CONCEPTS IN IP

Satyendra Talla

8790293949 (1)

II CONCEPT OF POWER

Qn: Discuss the determinants of power. What is the difference between determinants of power & elements of power.

Introduction:

o IP has been dominated by REALIST paradigm.

For Realists, IP can be described/defined as Struggle for Power.

Acc. to Morgenthau - "Whatever be the ultimate end,

Power is always the immediate end"

o Thus POWER is the more central concept in IP.

Power is traditionally defined as Ability of states to influence other states. Power is always a Relational concept, Relative concept and Compelling in nature.

⇒ The Elements of Power can be discussed as following:

① GEOGRAPHY

- Most static element

- We can change our friends but not our neighbours

- We can change history but not Geography

a) Size - always big is not must EX: JAPAN, Israel

b) Location - It is said that USA is what it is not because of who they are but because of WHERE they are.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

c) Topography

d) Resources *Ex: South China Sea*

e) Demography *Ex: Nepal*

② POLITICAL FACTORS

*If it's not politically stable
then it can't focus on foreign
politics*

If a country is politically stable, there is a domestic consensus on FP, it becomes the element of strength.

③ SOCIAL FACTORS / STRUCTURE

It is easier to make FP decisions if social composition is HOMOGENOUS.

If society is heterogenous, it becomes difficult:

Ex: India couldnot have a sound policy towards ISRAEL for long because of domestic compulsion, the sentiments of minorities.

④ LEADERSHIP FACTOR *Kenneth Waltz*

Though structural realists eliminate the Personality Factor, yet leadership does play a role.

KAUTILYA, one of the earliest scholars on GEO-POLITICS, gave the theory of ELEMENTS OF STATE called Saptanga Theory.

✓ He calls king as 'Nabi' or 'Centrality'. A strong king can convert even the weak elements of sovereignty into elements of strength. (Give ex of strong leaders & decisions)

⑤ INTELLIGENCE FACTORS

Strength of countries like

* USA ^{CIA} * RUSSIA ^{KGB} * ISRAEL ^{Mossad} * BRITAIN ^{M16}

Comes from highly professional Intelligence bodies.

Ex: CIA, KGB

⑥ TECHNOLOGY FACTOR

Technology itself has become determinant of power.

To some extent technology has reduced the importance of Geography.

⑦ ECONOMIC STATUS

⑧ MILITARY STATUS

⇒ Determinants of Power:

Elements of power become determinants of power only when countries can make skillful use of Elements.

⇒ Measurement of Power:

Since countries do not disclose their Real status in case of military capabilities, it is difficult to calculate the amount of power exactly.

However, it does make sense for countries to measure their own power & power of others. (Eco-GDP, ...)

On basis of Amount of Power, Countries are categorised as:

Super Power

It is extraordinary power. Ex: USA

Other countries, even in combination cannot defeat Superpower.

Great Power

Ex: RUSSIA ; CHINA ; BRITAIN ; FRANCE (UNSC)

The countries which are capable of defending their interests on their own.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Middle Powers

Ex: INDIA ; ISRAEL ; VIETNAM ; PAKISTAN ; IRAN ; ITALY ; NK

Countries which can defend themselves in coalition with others.

Small Powers

All countries are called as powers out of Respect.

Ex: BHUTAN ; MALDIVES ; SRI LANKA...

TYPES OF POWERS

Qn: which type of power has greater significance in 21st Century.

There are 2 forms of Power:

* HARD POWER ^{Eco} Carrots & ^{Mil} Sticks — Concrete

* SOFT POWER Cultural & Ideological — Frangible

Comparison btwn Hard & Soft Power

i) Materialistic; Resource Intense	i) Non-materialistic
ii) Concrete	ii) Frangible
iii) Compelling in nature	iii) Relies on consent
iv) At disposal of state (use it any time)	iv) It is dispersed among civil society institutions (x as & when req)
v) Can be acquired in short time	v) Takes long time to build.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Traditionally, REALISTS — more weightage to Hard power.

However LIBERALS like Joseph Nye held that importance of hard power has declined considerable in 21st century because of COMPLEX INTERDEPENDENCE.

One of the reasons for US's hegemony decline is greater reliance on hard power.

However, later on, NYE modified his views and accepted that Soft power alone may not work. (will work only with hard power)

He gave concept of Smart Power, popularised by H. CLINTON.

HILLARY CLINTON

We cannot work with 19th Century concepts now.

There is a need for skillful use of Eco, Military, Cultural and diplomatic powers.

OBAMA

His FP was based on 3Ds

3Ds — Defence ; Diplomacy ; Development.

(Demography, Democracy, Demand) and Modi

NYE defined Smart power as an approach which underscores the necessity of strong Military power but invest heavily in Institutions, Partnerships & ALLIANCES.
Hard power with Soft power.

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005, ☎ 011 45612719

J.NYE is concerned about use of SHARP POWER as an alternative to soft power.

Sharp power → represents power of:

- Authoritarian states Ex: Russia, China, Iran
- Propaganda

It aims to attack the credibility of western liberal democracies.
Ex: Putin's intervention in USA election.

JOHN CHIPMAN

* He has given concept of FAST POWER.

→ Acc. to him, SPEED has become the determinant of power.

→ What matters in 21st Century is not the HEFT but how much a country is AGILE, ADAPTIVE.

→ The rule of the present world is not 'Survival of the Fittest' rather 'Survival of Fastest'

Ex: INDIA NEA - "Fast Track Diplomacy"

Polarity of Power Thesis

It is given by STRUCTURAL REALISTS like:

- * Kenneth Waltz
- * Mearsheimer

What is the thesis?

Acc. to them, BIPOLAR WO { Most stable
least dangerous.

What does Polarity denote?

Distribution of power across the globe.

So far we have seen 3 Models:

⇒ Multipolar: — Most Unstable; Frequent wars; Worst

◦ In a situation of multipolarity, greater confusion prevails, more fingers are on the trigger button.

◦ Difficult to keep watch.

◦ Greater chances of even accidental war (Nuclear)

⇒ Unipolarity: — Most Unstable; and Worst (1991-2001)

◦ Single hegemon will overstretch

◦ Free riders (like China) will take the advantage

◦ There will be relatively decline of power of hegemon.

Why unipolarity will go?

When there is a single super power, the country may suffer from MEGALOMANIA (i.e) will think that there are no limitations on its power & will itself destroying the order, which it has built, by taking unilateral actions. Ex: USA undermined UNSC in case of 2nd war on Iraq in 2003.

⇒ Bipolarity: — Most Stable; Best

✓ Strategic balance between the 2 super powers.

✓ It is easy to keep watch on actions.

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

✓ The 2 super powers will contain Anarchy in their own zone of Influence.

Qn: Does India support Multipolar world Order? YES
why India supports it, if so?

- i) India believes that it can exercise Strategic Autonomy.
- ii) what does Multipolar world means?

Decline of USA;

Primarily rise of CHINA; then rise of RUSSIA, IRAN, INDIA.

It is questionable as to why India supports the rise of CHINA despite the fact that China is the biggest security threat & presently US & INDIA are strategic partners.

Book

India on High Table of Diplomacy.

Does India support Multipolar South Asia?

NO India favours Indian hegemony in South Asia.
It doesnot want China in South Asia.

Y India wants China out of SAARC?
Foolish. atleast w/ China it will work.

SHUBHRA RANJAN

CONCEPT OF BALANCE OF POWER

Qn: Discuss the relevance of concept of B.O.P in 21st century.

Oldest concept. (Westphalian order)

Treated as MAXIM (i.e) on par with fundamental law.

David Hume called it COMMON SENSE

Acc-to-him, BOP will remain relevant so long as common sense is relevant.

Feature of Westphalian W.O.

Militaristic concept.

The 1st formal recognition of BOP was on 1713 in Treaty of Utrecht. The famous historian A.P. Taylor mentions 1848-1914 as 'GOLDEN AGE OF BOP'
they are balancing. (between two European countries)

European countries formally adopted concept in 1815, Vienna Congress which has given rise to CONCERT OF EUROPE where countries of Europe gave guarantees to ensure BOP so that Peace is maintained. The concert of Europe gave ~100 years of Peace to Europe (Till 1914).

BRITISHERS were the masters in the art of BOP. It was the Hallmark of British FP.

Hegemony - USA

BOP - BRITAIN

MAIN ASSUMPTIONS OF BOP

- (i) It is based on the working of Westphalian World Order (WWO).
- (ii) SOVEREIGNTY is the sacred concept of WWO, defined in terms of TERRITORIAL INTEGRITY since land is a source of wealth, acquiring the land of neighbours is a conventional wisdom among nations.
- (iii) In WWO, the structure of IP is ANARCHICAL.
- (iv) Anarchy compels states to acquire POWER (the amount of power required is unlimited).
- (v) The means to acquire power is:
 Internal Power → ARMS RACE or External power → ALLIANCES
 happening again many times
- (vi) War is a Recurrent feature in BOP system, one of the reasons why WOODROW WILSON wanted to find alternatives to BOP.
 pursuing for BOP they used to wage war.
- (vii) WAR on itself is a technique of BOP.
- (viii) The rule of the game is whenever any state tries to gain Prepondinance (extra-ordinary) - like FRANCE under Napoleon - all states will have to come together to balance the state so that it does not establish hegemony. WAR is the ultimate way to maintain the balance.
- (ix) In BOP system, no actor is ousted from the system. The defeated state is brought back in the system.

(110)

BOP

- Exclusively MILITARISTIC
- Feature of WWO
- Nutty concept.

Qn1: Relevance - 2nd Com
 Qn2: Ambiguity.

BOP - MAXIM (Law)

WWO → SOVEREIGNTY
 - even WAR for it

No
 W. Govt ← State Authority

↓
ANARCHY → POWER race

MILITARY

◦ Arms Race ◦ Alliances
 BOP

✓ Conventional wars

X Nukes/cyber wars

[Now] ↑ Deterrence

Y not ideal conditions?

→ Nukes
 - WWO not now. Now it
 is complex interdependence
 → Proxy wars
 [Terrorism - Nu (00)]

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(x) BOP shows that there are NO PERMANENT FRIENDS/ENEMIES.

⇒ The techniques of BOP include: *ac to our National Interests
dynamic Ex → after war USA - India*

- ARMS RACE [cold war]
- DISARMAMENT [end of cold war]
- ^{START, SALT} PARTITIONING the Territory (Size matters, Big state - Big aspirations)
- Establishment of BUFFER STATES, so that the 2 major powers ^[Poland] don't come on direct confrontation against each other.
- Disarmament of defeated country & imposition of Reparations to weaken it further.

⇒ BOP despite being recognised as the Fundamental Law, is seen as Murky concept. There is a vagueness in the way Balance is explained. Sometimes $A=B$ is called Balance.

• Sometimes $A-B = \text{Remaining}$ is called Balance.

> Similarly there are different ways in which scholars describe BOP.

* MORGENTHAU

He summarised 4 meanings of BOP:

- ① A policy aimed at establishing a certain state of affairs.
- ② An actual state of Affairs.
- ③ An approximately equal distribution of power.
- ④ Any distribution of power.

* ERNST HAAS

He has given 8 MEANINGS of BOP

- ① Equilibrium resulting from equal distribution of power among states.
- ② Equilibrium resulting from unequal distribution of power among states.
- ③ Equilibrium resulting from the Domination of one state, which acts as Balancer. For ex: BRITAIN.
- ④ A system providing for Relative STABILITY & Peace.
- ⑤ A system characterised by INSTABILITY & War.
- ⑥ A way of describing POWER POLITICS.
- ⑦ A universal law of history.
- ⑧ A guide for FP makers.

RELEVANCE OF BOP IN 21st CENTURY

Why there is a question mark on the relevance when it is seen as the most fundamental law?

□ The relevance of BOP is called into question 1st by the LIBERALS / IDEALISTS like Woodrow Wilson. Acc. to him, BOP is prone to war. BOP can convert any local war between 2 countries into World War because countries are linked in alliances. Hence, it is said that 'BOP gives protection against Measles but create conditions for Plague' - a bigger epidemic.

Even Pt. NEHRU was a critic of BOP. He described BOP as 'Nervous State of Peace' (i.e.) there is always a fear of war as countries possess Nuclear weapon.

Hence W. Wilson wanted to end the reliance of countries on BOP and gave the concept of COLLECTIVE SECURITY.

Even Nehru had huge faith in collective security.

However collective security could never emerge as a viable alternative to BOP so that states leave their reliance on power politics.

[2] Theoretical Modifications:

BOP, as a concept has been either modified or challenged by the scholars of different schools of thought because of its Inadequacy.

i) Modification by REALISTS

* STEPHAN WALT gave concept of 'Balance of Threat'.

→ Acc to him countries actually balance not power but Threat. The extent to which country will go for building its power will rely on its Threat perception.

→ He suggested 4 conditions which may determine Threat perception.

- i) Aggregate power of enemy country
- ii) Geographical proximity
- iii) offensive capacity
- iv) offensive intentions

Thucydides trap

* KENNETH ORGANSKI has given 'Power Transition Theory'

Acc. to this, war happens more not when there is BOP rather when Power transitions take place. When a new country start acquiring power, it makes other countries insecure.

Normally war is started by countries which are more INSECURE & WEAKER.

i) Modification by Social Constructivists

Social Constructivists suggests that BOP theory ^{fail to notice} overlooks the role played by NORMS & VALUES. They overemphasize on Material structure. Here the material structure is Anarchy, but it is the result of norms & values that anarchy is interpreted on specific way giving rise to POWER POLITICS.

Power rare. BOP theory misinterpretation creates a misconception. Rather they have to give importance for norms & values.

As suggested by ALEXANDER WENDT - "Anarchy is what states make of it"

ii) Contemporary Modifications

In contemporary times, scholars have given the concept of ASYMMETRICAL BALANCING.

The traditional BOP theory only includes states as actors. In present times TERRORIST ORGANISATIONS have to be included as Security threats. Since there is an asymmetry b/w state & non-state actors, this concept has been added.

iv) Soft Balancing by Realists

Realist scholars have also added the concept of SOFT BALANCING to traditional concept of Hard Balancing.
Demotes Militaristic approach while Soft Balancing demotes Political approach.

When there is a single super power, other countries can't check super power militarily but from platforms like UNSC, they can form a coalition of like minded countries to check the actions of single super power.

v) Theoretically, Nuclear weapons also challenged the need of BOP.

* BERNARD BROODIE

Acc. to him, states should try to gain 'NUCLEAR DETERRANCE' rather than BOP.

[3] Cease of Ideal Conditions

BOP has been questioned because the Ideal conditions of operation of BOP has ceased to exist.
What are ideal conditions?

(i) Westphalian World Order rather than Anarchical Society or Complete Interdependence.

(ii) BOP as a concept makes sense in Regional situations,
Politics at present has become not only International but Global.

GEO CENTRIC
GLOBAL POLITICS

(115)

Blurs nations
across world

Ind. Non state
actors also

It would not be possible to imagine the working of BOP Globally.

- (iii) BOP operates on MULTIPOLAR situations, it neither operates on the state of unipolarity nor Bipolarity.
- (iv) BOP is based on CONVENTIONAL warfare. The NUCLEAR weapons and the technological warfare may cause the BOP go into involvement the emergence of nuclear weapon has been a serious challenge to BOP.
- (v) In some regions like WESTERN EUROPE, BOP has become Redundant because of emergence of Security Community. [EU]
- (vi) Since, on present times, the challenge to the security of states comes from NON-STATE ACTORS, the non-state actors can act from any state, failed states being the most fertile soil for them, if attack comes from non-state actors capturing a country which is friendly, it would not be easy to initiate war because that sovereign may not be responsible for it as it is the NSA & also it will affect the friendly relation with that nation.

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ✆ 011 43612719

However it does not mean that BOP, as a concept altogether is irrelevant.

DAVID HUME rightly held that BOP is a COMMON SENSE. He held that so long common sense remains relevant, BOP will remain relevant.

It is to be noted that non-state actors are actually the powers. It is true that Nuclear weapons have challenged the importance of conventional weapons but it is also true that Nuclear weapons are not to be used. Hence, the importance of conventional weapons will never go out of relevance. Even in 21st century, we can observe nations exercising the Game of BOP.

In which region do we see BOP game?

1) We can see the game of BOP going on in Asia-Pacific.

It is because of the game, the centre of gravity of IP has shifted towards Asia-Pacific. The rise of CHINA has forced USA to go for ASIA REBALANCE / ASIA-PIVOT POLICY.

→ As a part of this policy, there is a greater deployment of US navies on this region.

→ The neighbours of CHINA → India • Japan • Australia are going for the formation of Alliances & Quasi-alliances. EX: QUAD

→ Acc. to scholars, there is a high probability of CONVENTIONAL WAR between India & China as foot of USA's policy of:

Back passing (or) Bait & Bleed.

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005, ☎011 45612719

⇒ All major countries are acquiring conventional weapons, most also have NFO policy.

ii) Similarly EASTERN & SOUTHERN EUROPE, in neighbourhood of Russia may also emerge as a Theatre of war.

US-CHINA war is also predicted on basis of Power Transition & Thucydides Trap.

→ The countries are going for military exercises on a big way. However, in Europe 'DETERRENCE' as a concept will have greater relevance considering neither Russia nor NATO has NFO approach.

(Middle East - Cob web / complex Interdep - Non state actors -

US Hegemony - So no BOP issue - focused only on SW

ASIA PACIFIC, US even renamed FP as ASIA REBALANCE)

Thucydides } US - Status quo power
China - Revisionist power
China Revisionist power challenging Status quo countries hegemony

[2] CONCEPT OF COLLECTIVE SECURITY

Brought by
Woodrow Wilson
in 14 points speech.

⇒ collective security is an alternative to BOP.

It is a LIBERAL approach.

Though it is alternative to BOP, it is based on idea of BOP.

Both BOP & collective security are methods of MANAGEMENT OF POWER.

Both concepts are based on the view that ^{power} power is ANTIDOTE to power.

In both concepts, sovereignty of states is treated as saved and war is seen as a means to ensure sovereignty.

^{Institutional liberalisation} We can say collective security as INSTITUTIONALISED FORM OF BOP.

BOP acts in the state of Anarchy whereas collective security can come into existence only when some international organisation exist. It is operated through international organisation like ION or UN.

⇒ BOP is an Ad-hoc concept, whereas

collective security is Institutionalised concept.

There is uncertainty on BOP but there is Theoretical certainty in collective security. Ex: when Napoleon was destroying the WWO, BOP as a principle did not emerge automatically. It took long time for countries to check rise of Napoleon. Hence there is uncertainty as to whether BOP will emerge or not.

⇒ BOP may be more relevant for Great powers but collective security is highly useful for smaller & poorer countries.

They can escape from Axis race or necessity to form alliances.

^{Crises of international power} Collective security is conducive for peace because it reduces Arms Race.

Collective security as a concept continues to be seen as too idealistic. Neither under LON nor under UN, it could be operationalised successfully. ^{League of Nations}

It has not been successful in ending the arms race. Lack of faith in collective security let countries to go for NUCLEAR DETERRENCE.

Collective Security should not be confused with Collective Defence.

Ex: NATO → Collective Defence Institution → USSR
Warsaw Pact → Only Members; Defined enemy
(Defunct) CSTO → + SEATO, CENTO
LON → Collective Security Institutions
UN → Universal; Neutral - enemy not defined.
SCO →

UN-1945
USSR - Nov-1949
So UN's purpose
lost: US lost
interest

Collective Security

- o Universal
- o Neutral - Enemy is not defined.

Any country can approach UN.

Collective Defence

- o Regional. Meant only for members
- o Enemy is known in advance.

Views of India:

- India always opposed Collective Defence pacts (Hence, NAM)
- But India always supported Collective Security.
- For India, Collective Defence pacts undermine the faith in Collective security.

Views of USA

There is no contradiction because collective defence is the practical way to operationalise collective security.

It does not contradict on charter which allows countries the right to self defence.

WORKING OF COLLECTIVE SECURITY

Under LON:

It could not be operationalised because of following reasons,

- US was out
- Russia was out
- Britain & France had No faith
- Countries followed policy of appeasement of fascist powers as they considered communism as a bigger threat.
- collective security was a new concept & there were flaws in the way it was conceptualised.
- In LON, all countries had veto power. It was practically not possible to get consensus of all countries.
- collective security as such is based on false suggestions. It assumes as if International Peace is the aim of states. It forgets that National Interest is aim of states.
- Just because one state committed aggression on other state, it does not mean all countries will commit their forces or forget their long term interests.

Under UN:

> UN charter does make some improvement in the procedure of operationalisation. Under UN, consent of only 5 states [P5]_{UNSC} is needed. However, the practical experience show even that is not possible.

> collective security under UN remained paralysed because of 'EAST-WEST CONFLICT' (US vs Russia) countries continued to give primacy towards national interest over Justice, Peace, Order.

> There are only 2 occasions when collective security could be operationalised under UN:

a) 1950 - KOREAN CRISIS

*mediated as
intermediary
in Korean
crisis*

→ Even in here, it was not operationalised in ideal sense.

How? Korean crisis itself was the reflection of cold-war.

→ NK was aggressor

→ NK was supported by CHINA & RUSSIA

→ SK was under the influence of USA. USA was supposed to punish the aggression by NK.

→ USA was successful in getting the permission of collective security from UN only because Russian representative was absent Russia was boycotting UNSC on issue of Permanent seat for Communist China. (Taiwan was at seat). The moment Russian rep. came to know about resolution, it came back & Vetoed. It had stopped collective security. However, USA introduced a new concept - 'Picheson Plan' (or) 'Uniting for Peace Resolution' (UPR)

UPR → In case there is a deadlock in UNSC, GIA can authorise collective security by 2/3rd majority.

Russia never accepted the legality of UPR because it has not been the part of UN charter.

Later on, USA could never get support for most of the resolutions and hence even this route could not work.

It was the failure of collective security that the then SG of UN proposed 'Peace keeping' - Dag Hammarskjöld - to keep the role of UN relevant in its primary purpose. award - India too recipient
(Peace keeping is not a part of UN charter)

Note: Peace keeping is not a part of UN charter but an extra-constitutional growth.

Difference — Collective Security Vs Peace keeping (Blue helmets)

Part of UN charter

≈ Army → offensive

Authorised by UNSC

Militaristic attack

Extra-constitutional

≈ Policing → Defensive (keep watch)

Authorised by UNSC, but only

with consent of parties in conflict.

Maintain ceasefire till UNSC decides

PK force → Defensive.

[Rajiv Gandhi → Don PK in SL, ^{LITE} should've gone for multilateral approach]

Partially implemented (PK mission)

Not militaristic

SHUBHRA RANJAN

11-1-30

> Peace keepers are sent only with consent of parties in conflict, there is no such requirement in case of collective security operations.

> Peace keepers can use force only in SELF-DEFENCE

The main objective of UN is to PREVENT WARS. UNSC could not fulfill the obligation. Hence the only way UN's role remained relevant was through Peace keeping [PK]

INDIA It is to be noted that India has made unparalleled contributions to PK under UN.

India's contribution in PK efforts is one of the strongest basis to demand permanent seat in UNSC. It needs to be emphasized that if any country, whose actions kept UN relevant in UN's core objectives, it is INDIA. Hence, it is a paradox if India is not a permanent member of UNSC.

INDIA'S EFFORTS IN UN Peace keeping:

Note: MEA website → India & UN - update official positions.

India is a founding member of UN.

It has contributed towards PK since beginning.

In 1950 KOREAN CRISIS, India had sent a medical unit & later on provided custodian force for the neutral nations Repatriation Commission meant for exchange of Prisoners of War.

SHUBHRA RANJAN

Always Ahead

22 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Between 1945-1970, India contributed for:

INDO-CHINA (Vietnam) Supervisory Commission deployed in Cambodia, Laos & Vietnam.

India made further contribution in following operations:

UN Emergency Force in GAZA STRIP in 1956.

In CONGO Crisis 1962-64

In CYPRUS in 1964

After end of cold war, India continued to provide Armed contingents, Military observers, Medical missions, AF attack helicopters to UN missions.

It has unique achievement of sending ALL WOMEN CONTINGENT in LIBERIA.

Indian Peace keepers have been awarded with

Padm Bhushan & Padma Vibhushan Award for their supreme sacrifices.

India's role is primarily as TROOP CONTRIBUTING COUNTRY.

India also provides TRAINING To UN PKs.

The Image of Indian PKs is that they have acted in an extremely professional manner.

They are known for Competency & Ability to establish rapport with local populations.

However, in recent times, PK has become not only COMPLEX but also CONTROVERSIAL.

Complexity arise because peace keepers are supposed to work in highly dangerous environment. Post Cold war has witnessed the emergence of civil wars. Non-state actors don't observe norms. Casualties of peace keepers have increased. Hence, some countries are now reluctant to contribute troops.

Controversy arise because of following reasons:

Reluctance on part of developed countries to contribute troops.

Allegation by fund contributing countries against the troop contributing countries w.r.t. Misappropriation of funds.

Some developing countries look at PK as a means to earn Foreign, they have failed to act in a responsible manner. At present, BANGLADESH & PAK have become the leading countries.

PK operations are authorised by UNSC. However, permanent members of UN don't go for involving the troop contributing countries in the consultation powers.

What should be India's approach towards PK?

At present India does not show the earlier enthusiasm. The reason being, so far India's contribution did not get the due acknowledgement which it deserves. It is a paradox that India is not a Permanent member of UNSC despite making supreme sacrifices.

As peace keeping is becoming more dangerous, developed countries are reluctant to give funds. Hence India does not find strong motivation.

Very recently, CHINA has started playing prominent role in PK operations. It may result into sidelining of India in global affairs.

India is already reluctant to participate in COMBAT operations abroad. Hence India needs to rethink about its growing lukewarm attitude towards PK. It should not happen that over a period of time Indian contributions get diluted & we fail to capitalise on efforts & sacrifices we had already made.

PK also strengthens India's SOFT POWER. India should utilise its growing weight in International affairs to force countries to take adequate reforms as PK is needed more than ever.

Earlier, under OBAMA admin., US has shown interest in PK and proposed INDIA-US partnership in PK operations in AFRICA.

However, TRUMP Govt's approach towards MULTILATERALISM differs from OBAMA administration.

Note: Difference - PK vs RTP (Responsibility To Protect)
w/o consent of parties on basis of HR violations

RTP is a Military operation & comes close to CSO (Collective Security Operation) rather than PK operations.

(UN charter - does not permit action w/h states, only b/w states)

Changing Trends in PK:

PK itself is an evolving concept.

Initially, PK was limited to maintaining CEASEFIRE between parties in conflict.

Ex: UN Military Observer Group for INDIA + PAK.

Since CONGO crisis, PKs are also involved in civil wars.

Over a period of time, PK has also involved PEACE BUILDING efforts (i.e) Reconstruction, Rehabilitation.

PK missions are also becoming MULTI-DISCIPLINARY.

Now members of civil society are also involved bcoz they have major role in Reconstruction.

Developed countries have proposed ROBUST PK

Robust Peace keeping

Since attacks against PKs are increasing, developed countries have proposed that PKs should also be allowed to keep offensive arms & to use force in situations other than Self Defense.

There is an objection to the idea that it will end the distinction & developed countries will send their forces in disguise as PKs.

INDIA'S POSITIONS ON REFORMS IN PK

- (i) Consultation with troop contributing countries
- (ii) More funds & their timely release.
- (iii) Zero Tolerance towards any sort of irresponsible behaviour such as sexual violence, corruption, etc. by PKs.

On: which is the best example of CSO (Collective Sec. Operation) in the history of UN?

GULF WAR I, 1989

When IRAQ invaded KUWAIT. This was the time when UNSC could give effect to the Resolution w/o use of veto by USSR. More than 50 countries participated in the UN operation under the leadership of USA.

The CSO itself symbolised the end of cold war.

After this CSO, there has been no operation which can be called as a CSO.

Overall assessment of Collective Security

Collective Security continues to remain an utopian ideal. So long countries will continue to give priority to their narrow national interests, it would be difficult to expect the operationalization of CS. It means there will be no End to Arms Race.

[3] CONCEPT OF SECURITY

Qn: Discuss the changing concept of security & what should be approach of security in 21st century

Qn: Discuss diff. Theories of Security.

Importance of Security

Acc. to HOBBS, Security of life is the most fundamental value as all other values are dependent on it.

Security is also the core concept in theory of IP.

We can call IR theories as Security Theories.

Security community

Regional co-op concept
Not related here.

Overt Defence - IRAN
no basis.

BOSNIA

UN protection zones.

There are diff. schools of Security & basic debate among schools is on:

- (i) whose security is important - territorial or Human
- (ii) security from whom - own state or external/non-state actors
- (iii) Security of what - life, env, social, cultural...

Types of Security Theories:

1) INSTRUMENTALIST

o LIBERALS

o MARXIST

o REALIST

} All are instrumentalist theories.

REALISTS → security can be achieved by acquiring power

LIBERALS → support Economic Interdependence

MARXISTS → support End of capitalism

2) REFLECTIVIST

They focus on ideas norms values culture as a means of acquiring security

> FEMINIST

> CRITICAL SCHOOL

> SOCIAL CONSTRUCTIVIST

> COPENHAGEN SCHOOL

PROMINENT THEORIES OF SECURITY

REALIST THEORY

- ? whose → state centric
- ? whom → From other states (source of insecurity)
- ? Methods → BOP • Diplomacy • Deterrence

LIBERAL THEORY

- ? whose → Both-states & Persons
- ? whom → Reasons of insecurity
 - Anarchy
 - Protectionist policies
 - Limited Interaction
 - Militaristic state
 - Absence of Democracy
- ? Methods → Liberal Institutionalism
 - Functionalism (Solving problems phase by phase)
 - Security Community (collective security)
 - Trading state (Economic interdependence)
 - Democratic Peace (non democratic states will never go to war)

MARXIST THEORY

whose → Human
whom Capitalism
Method Revolution against Capitalism

FEMINIST THEORY

whose Human
whom Patriarchy
Method Empowerment of ♀
Bringing women perspective
Bringing Ethics into Politics.

CRITICAL SCHOOL / EMANCIPATORY SCHOOL

Andrew Linklater

whose Human
whom State & Capitalism
Methods End heterosexual boundaries
Promote Moral boundaries
Grass roots democracy.

SOCIAL CONSTRUCTIVISTS

whose Both-Human & State
whom From way we think
Methods Communications
changing norms

COPENHAGEN SCHOOL

Bary Buzam - Read his articles

→ Acc. to him, Security is a SPEECH ACT.
(It is how things are told)

Any issue is a matter of security or not depends on "How we talk about it"

Ex1: General Impression on India is that

TERRORISM is the biggest security threat.

However, even so held that every year more no. of ppl loose their lives on Road Accidents.

Thus terrorism is the biggest security threat is the SECURITISATION by policy makers in India.

Ex 2: TRUMP in his election speeches tried to

Securitize Muslims as a Security Threat.

Since end of CW, ethnic relations have been Securitized on most of the countries causing INTRA-STATE conflicts.

→ Thus, in most of the situations, govt, trying to divert the attention of people from real issues, Securitize some issues.

⇒ BOZAN suggests that while concluding about Security concerns, we should focus upon:

(i) who is speaking

(ii) what are they speaking about

(iii) whom are they speaking to.

Securitisation

Post-modernism

Security is a Speech Act

"How we talk about it"

Terrorism Vs Corruption

SC: more ppl died in road accidents than in Terrorism.

Any issue can be a non-issue unless it is talked about.

Govt. can securitize any topic - social construction.

→ To divert attention any issue can be made into security issue by Speech Act.

→ Thus, Copenhagen school comes near to the views of

SOCIAL CONSTRUCTIVISTS that Anarchy is what states make of it?

→ Buzan has also suggested approach of security policies in 21st Century:

⇒ security has become a MULTI-DIMENSIONAL concept. Now

we cannot compartmentalise "state security" from Human security

◦ Economic " from Ecological "

◦ National " from Regional/Global "

⇒ Any Security Policy should have 5 PILLARS.

- ① Military
- ② Political
- ③ Economic
- ④ Social
- ⑤ Ecological

4 CONCEPT OF DETERRANCE

Qn: Discuss the logic behind theory of deterrence, the types of deterrence doctrines & relevance of deterrence in 21st century.

* Deterrence

The term comes from Latin word 'De terre' which means 'To frighten' the potential adversary from attacking what requires for Deterrence?

Deterrence is a PSYCHOLOGICAL concept.

It assumes that actors are RATIONAL.

It will work only when the adversary believes in the credibility of Deterrence.

Adversary needs to be communicated that, if it prefers to attack or start war, the victory will come at the cost which is not worth paying (in case victory comes), thus preventing the adversary from taking action.

Deterrence is an old concept,

Traditionally used for conventional weapons.

Now, it is associated with Nu. weapons.

Hence, no. of times Deterrence is seen as an alternative to BOP.

PAK-IND	
Bad guy	Good Guy
↑ Bargaining power	Can't threatened with Nukes
child with loaded gun	Responsible action

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎011 45612719

The concept of deterrence is developed by GAME THEORISTS. Prominent scholars supporting deterrence include:

- * Bernard Brodie
- * Herman Kahn
- * Mearsheimer
- * Thomas Schelling

Theory of Deterrence has developed with changing postures of Superpowers esp. USA in context of its Security.

It was realised that USA's security cannot be simply dependent on conventional weapons. Conventional weapons can convert local wars into world wars. If Nu. Deterrence is developed, it can ensure that major war is avoided.

USA's Security Policy during CW was based on Deterrence. The only way to avoid war with USSR was to achieve 'MAD'

MAD can be called as

It is also called BALANCE OF TERROR.

Cold war

US vs USSR
Vietnam

MAD - 2nd strike

NUTS - 1st strike

↳ NND - offensive
- Very expensive
Primarily US-MAD

↳ Massive retaliation

NU TRIAD 

EISENHOWER-MAD

KENNEDY - FR

MAD - Strategic

FR - Tactical also

↳ short distance also

↳ long distance
+ civilians

Extended Deterrence

Partially - Conventional

Now - Nukes

NUTS - actually not possible - no country can entirely destroy other in 1st strike

✓ NFU?

US, even, is not capable of it

MAD was dependent on the capacity of a country to convince the other that starting a war is suicide.

The idea of MAD is based on developing 2nd strike capability. (i.e) Surviving the attack & RETALIATING and inflicting unacceptable damage (killing civilians).

MAD requires the development of TRIAD.

Some scholars in USA suggested to pursue the policy of NUTS - Nuclear Utilization Target Selection.

It also denotes developing 1st strike capacity. But, it requires huge investments & may push countries towards the dangerous arms race.

During CW, we've also seen that USA under KENNEDY shifted towards FR - Flexible Response (i.e) Ability to respond in both manners:

STRATEGICAL → Long Range weapons, on civilians

TACTICAL → Short Range Nu. war heads, in battle field.

At present PAK is developing tactical weapons HATF Missile

PAKISTAN - HATF Missile

INDIA - PRAHAR Missile.

Countries can have:

- > DIRECT Deterrence
- > EXTENDED Deterrence

↳ JAPAN & S. KOREA - under USA's extended Deterrence

Relevance of Deterrence in 21st Century

Why a qm. mark on relevance?

The emergence of COMPLEX INTERDEPENDENCE (weakens scope for hard power)

Main security threat comes from NON-STATE actors.

Realists however never accept that Nu-weapons have lost relevance.

145-5 K. WALTZ believes that Nu-weapon is the factor that made cold war remain cold.

He & HEARSHEIMER support SELECTIVE PROLIFERATION (i.e.) Proliferation among western countries will add to their security as they are Democracies - (i.e.) they will heed to public opinion - Ist GEN.

On other hand IInd GENERATION Nu-states cannot maintain Nu. safety and security & may not be accountable to public opinion.

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ✆ 011 45612719

LIBERALS however believe that Nu. weapon needs to be eliminated. The urgency has increased because of fear of proliferation into hands of Non-state actors.

Social Constructivist scholar Nina Tannenwald suggests that Nuclear Taboo has come into existence. Acc to her, main reason USA could not use Nu against VIETNAM was bco of development of taboo against the use of Nu. weapons. Hence, it is not possible for countries to use Nu. weapons. Hence, those countries which do not have Nukes should not feel insecure rather should support the construction of NORMS which STRENGTHEN Nu. TABOO further.

Henry Kissinger also does not support reliance on Nu deterrence because deterrence will apply only in case of rational actors. Acc to him, countries should find other means to reduce the Security threats.

Though it is widely believed that the relevance of Nu. weapons have declined in Post CW situation, yet major countries like USA, RUSSIA, FRANCE continue to rely on Nu-deterrence in their security policy.

USA coming out of

ABM (Anti-Ballistic Missile) Treaty

INF (Intermediate

Indicate New Arms Race.

The Nu. Posture Review ^{super} released by Trump admin. in Feb Jan, 2018 clearly show that US continue to rely on Nu weapons for its security as well as security of its allies

Refer to: article "Nuclear deterrence is over-rated" by Ramesh Thakur - "THE HINDU"

→ Article by Rakesh Sood - 16/11/18

[5] CONCEPT OF NATIONAL INTEREST (NI)

Qn: Discuss Morgenthau's theory of NI & to what extent it is appropriate to suggest that NI is pseudo theory.

FP is dominated by REALIST school of thought. US's core NI

Acc. to Morgenthau, father of realism:

NI is the prime motivation of FP.

NI is a highly dynamic concept.

POWER is a means to secure the NI.

NI itself can be described in terms of Power.

- Peace in Mid.Eas.
- Freedom of Nav. in Asia-Pacific

There is no permanent friends
(or) enemy in IR.

2 Types of NI - Horgenthau:

He has categorised NI into 2 Types:

① CORE NI

Fundamental;
Don't change
Continuity in FP

② VARIABLE NI

Continuity with change in FP.

Scholars like ROBINSON have given classification

PRIMARY

SECONDARY

PERMANENT

VARIABLE

GENERAL

SPECIFIC

He has also given the ways in which countries protect their NI:

BOP

Deterrence

Diplomacy

Int'l law & Organisations

Propaganda

Intelligence

Ideology

Incentives

Note: INDIAN Version of NI:

6 Fold Policy

4 Fold policy

⇒ Though NI is a core concept, yet it is called as PSEUDO THEORY.

> The prime reason is - it is highly SUBJECTIVE concept.

* NI, as a concept has been criticised by MARXIST scholars.

(i) The 1st theoretical analysis of NI from Marxist perspective was done by: CHARLES BEARD. In his words:

"If citizens have to support the govt. which prosecutes them, soldiers are to die for it, FP's have to conform to it, what better term it can be other than NI"

(ii) NI is a pseudo theory → 1st declared by Raymond Aron. He called NI pseudo because it is:

◦ Vague - uncertain.

◦ Subjective - meaning changes acc. to context

◦ Ambiguity in concept hinders the formulation of acceptable theory of NI.

(iii) Joseph Frankel: Any search for theory of NI is useless. It is used in variety of ways for variety of purposes, there is no single meaning & content.

(iv) BURCHILL SCOTT

Despite the wide use of concept, theory lacks any substance.

(v) MOHAMMED YUNUS

NI is a means to promote the interest of Elites. In his Book: On Theory of NI, he has shown how army of PAK describes its interests as NI.

CONCEPT OF SECURITY DILEMMA

One of the core concepts of REALISM which is based on WWO. This concept has been developed by following scholars:

JOHN HERZ

He used the HOBBSIAN theory of SON to develop security dilemma, a vicious cycle of INSECURITY which makes power politics a permanent feature.

ROBERT SERVIS

He has developed 'offence Defence theory' to explain the Severity of Security dilemma.

SOCIAL CONSTRUCTIVISTS

They believe Security Dilemma is because of Anarchy being interpreted on a specific way.

They suggest COMMUNICATION can address Security dilemma.

GEORGE SORENSON

He has given the concept of Insecurity Dilemma → It suggests that, in 21st century nations suffer from INTERNAL SECURITY THREATS - civil war, ethnic conflicts, (militarism) Non state actors, failure of states (failed states)

AMITAV ACHARYA

He also believe that security dilemma may not be a relevant concept for 3rd world states - (sub-altern Realism)

HEGEMONIC STABILITY THEORY

* ROBERT GILPIN

* Charles Kindleberger

Theme: Justification of Hegemony

Why hegemony is justified? To maintain Peace & Order in the International society. It is based on the assumptions that peace requires some global policeman. (i.e) some state which can establish:

(i) Rule of law → By establishing the norms. It basically means establishing LIBERAL INTERNATIONAL ORDER.

(ii) Actor should have willingness & capacity to ensure that other actors observe the norms. It should be in a position to punish those who destroy liberal world order.

(145)

US Vs CHINA

(iii) 2 Qualities of Hegemon

✓ CAPACITY · ✓ WILLINGNESS

Ex: Till WW-II, USA did not have willingness, though it had capacity.

Examples of Hegemons

a) Up till WW-II — G. Britain 'Pax Britannica'

b) After WW-II — USA 'Pax Americana'

The term 'PAX' denotes → DICTATED PEACE.

the country which control the ocean controls the world
— Both are Island nations (kind of) ~ with NAVAL POWER
Both are Liberal Capitalist nations

Span of Hegemony

Normally it continues for 100 years, after which it starts declining because:

Hegemon overstretches

Free rider takes advantage

Why countries will accept the Hegemon?

Hegemon provides Order & security.

Why hegemon would accept to become one?

Since hegemon dictates the rules, it is going to benefit by the system.

Thus, Hegemony denotes LEADERSHIP.

Hegemonic stability theory is a REALIST theory which accepts the Liberal Int'l order.

The REALIST THEORY of Hegemony is different from the GRAMSCIAN theory (GT)

GT looks Ideology & Culture as bases of Hegemony
RT include military & Economic power.

ROLE OF TRANS-NATIONAL ACTORS

TYPES OF ACTORS

- ① State Actors
- ② International Actors
- ③ Trans-national actors

NGOs, MNCs, Terrorist organisations

TRANS NATIONAL ACTORS are NSA (Non-state Actors) having operations beyond borders.

Do they have a role on IP? Matter of Debate.

REALISTS

Realism → state centric view.

For them, even Trans. orgs are proxies.

LIBERALS MARXISTS FEMINISTS

they recognise the role but there is diff of opinion.

LIBERALS → see the true role in bringing development

MARXISTS → look @ MNCs as exploiters

FEMINISTS → also consider MNCs as exploiters

why there is a role of NSA?

- Growth of Society Centric World

- Growth of Interdependence

which models recognise the role of NSA?

- ✓ Cob web Model

- ✓ Complex Interdependence

- ✓ 3-D chess model

ANALYSIS ON ROLE OF MNCs

Realists do not recognise their role.

Liberals appreciate their role but consider it as a relatively recent phenomenon.

Marxists & outsize realist approach. When realists do not recognise MNCs as actors, they are actually diverting our attentions from the activities of MNC.

Similarly, Liberals promote FALSE CONSCIOUSNESS.

MNCs have resulted into continuation of ~~DR~~

Drain of wealth

Development of underdevelopment

They did not adopt SUSTAINABLE dev't approach.

Sometimes, MNCs carry forward the interest of their states & sometimes states carry forward the interest of their MNCs.

MNCs have contributed towards the failure of Democracy by SABOTAGE. They've toppled the democratically elected govt. in LATIN AMERICA, MIDDLE EAST and installed puppet regimes.

Now, even developing countries like INDIA & CHINA are having their own MNCs which may not follow sustainable path in AFRICA & LATIN AMERICA resulting into huge Resentment.

MNCs are extremely powerful forces. The budget of some of MNCs is bigger than GDP of many small countries.

MARXISTS trace the role of MNCs till 17th Century.

EX: EIC can be seen as an example, which est. its own Empire.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

ANALYSIS ON ROLE OF NGOS

REALISTS

Don't give importance

LIBERALS

Recognise as +ve agents

UN CHARTER

Recognise as consultative bodies attached to

ECOSOC - Article 72 of UN charter

Like MNCs, even the annual budget of some of the trans-national NGOs is many times bigger than GDP of many small countries.

MARXISTS

their role is not new. Along with EIC, came CHRISTIAN MISSIONARIES. The role of missionaries was to build the SOFT POWER.

NGOs & MNCs work in close Nexus.

MNCs - channelise the CSR fund to these NGOs.

Along with MNCs, NGOs have been accused of attempting Regime change.

Ex: Recently RUSSIA has ousted USAID from its territory.

ANALYSIS ON ROLE OF TERRORIST ORGANISATIONS (TO)

There is a role of TO in WW-I which started with the Assassination of Prince of AUSTRIA by SERBIAN extremists.

Since the creation of ISRAEL & Failure of Arab nations in direct war, there has been the growth of TO attempting Proxy wars.

PLO (Palestinian Liberation Orgⁿ) was initially a terrorist organisation.

Initially MIDDLE EAST was affected by TO but now it has become a GLOBAL PHENOMENA.

Sponsoring TO has become a part of FP of many nations.

NOAM CHOMSKY

He calls USA as 1st terrorist state in the world.

JOHN LEWIS GADDIS

He predicted a bigger role of ASYMMETRICAL actors in the post CW-WO as if he suggested that USA has killed the python (USSR) but has given rise to numerous poisonous snakes. How does he describe security scenario for USA in a post CW-WO? MORE CHALLENGING - Because

Security threat has become DIFFUSED & thus more DIFFICULT to control.

— END OF IR Theory —

Satyendra Yallu

SHUBHRA RANJAN

— Mainly opinions

* Project SYNDICATE

FRANTZ FANON

Book: Black skin, white masks

'Terrorism is the weapon of impotent'

History:

In IP, Terrorism has been an issue of secondary importance till the end of Cold War.

Since the event of 9/11, 2001 — Terrorism is recognised as principal security threat.

thus from the periphery terrorism has become one of the core issues.

what made Terrorism a core global concern?

① Globalisation

How? Globalisation increases the role of NSA — MNCs, social movements, etc..

② US declaration on Global War on Terrorism

Note: It is USA that has made Terrorism a global concern.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

We can apply the Copenhagen School of thought:

Nations Securitize Issues. USA has Securitized Terrorism.

Whether there is a global terrorism or not? | Security is
Not to the extent it is being talked about! | a Speech Act

More than Al Qaeda, it is ISIS which is giving rise to Global terrorism.

How? ISIS $\Rightarrow$ IDEOLOGY; while
Al Qaeda $\Rightarrow$ only INSTITUTION.

It is said that 'Security is a Speech Act'.

Global terrorism is not as a big concern till date as it is being talked about.

What is Terrorism?

It can be considered as a political strategy to gain certain political ends.

History of terrorism:

Terrorism is as old as human race.

Origin of term "Terrorism":

The term is associated with history of France.
Period from 1793-94 Rule of Terror. There were MASS
EXECUTIONS by Jacobins led — by Robespierre.

Later on, the term terrorism came to be associated with the Communists. They had the aim of INSURRECTION (revolution). Towards WW-I terrorism has been used by those who wanted their own Nation. ^{October Revolution.}

It is believed that Terrorism is a Non-Western phenomena but the fact is there has been Terrorist movements in Northern Ireland - IRA
Basque - ETA
Quebec - FLQ

In ^{non-}western world, terrorism is primarily linked to the Middle East and Western Islamic world.

Ex: PLO - Palestine Liberation Organisation.

However scholars like Noam Chomsky attribute Terrorism in Middle East to geopolitical objectives of US FP. He prefers to call USA as 1st Terrorist state.

LACQUER

He categorised Terrorism into 2 types:

(i) Terrorism from above:

state led
state sponsored } Terrorism

(ii) Terrorism from Below:

NSA led
(Non-state Actors)

 **SHUBHRA RANJAN**
Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Type of war of Terrorism:

Terrorism is called as Asymmetrical war!

The reason is Terrorism is a weapon of weak. Those who cannot prevail over the opponent will go for:

- GUERRILLA WAR to compensate the greater strength of enemy. The strategy of terrorism include:
- 'WAR OF ATTRITION' (i.e) PROTRACTED STRUGGLE ^{Long war. (war of position)}
^{Process of Reducing strength by continuous pressure} to weaken the power of the enemy

Distinguishing features of Terrorism:

- > Propaganda
- > Highly publicized atrocities
Why publicize?
 - o To intimidate enemy
 - o To mobilise popular support

⇒ Terrorism is ideologically contested
x Emotionally charged
x Pejoratively used term (L-ve)

Not so important } There are 2 interpretations:

- First } → Conventional — Attack on Civilized humanitarian values
Interpretation } — INJUSTICE — Threat of humanity
- Radical — Terrorism as an attempt to advance Justice.
— JUSTICE — Attempt to counter bigger violence.
అపరాధాన్ని కంట్రోల్ చేయడానికి 10 అపరాధాలను చేయడం

Critical School:

They are against ESSENTIALISING terrorism.

(i.e) Warn against linking terrorism to a particular religion or culture.

Hence, Terrorism is a highly contested concept.

TYPES OF TERRORISM:

① Insurrectionary Terrorism:
↳ violent uprising against govt
To overthrow the state.
Ex: SEK; left wing extremism

② Nationalist Terrorism:
To overthrow foreign occupation
[like Indian freedom fighters]

③ Global Terrorism:

Aim:

✓ To weaken US Hegemony (Aim is to inflict damage or humiliation on global power)

✓ To change the global civilisational values.

(Clash of civilisations) Samuel P. Huntington.

④ New Terrorism:

Earlier, it was secular (i.e)

o For Nationalism o To end capitalism/exploitation

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(269)

New terrorism is RELIGIOUS Majority of terrorist organisations have religious character.

Why? The end of Ideology. Religion itself is an ideology

Form: Secularistic $\rightarrow$ Nationalistic $\rightarrow$ Religious.

Comparison b/w Old & New:

4> Old - Selective ^{dealing things sensibly & realistically} • Pragmatic - political strategy
New - A Sacred duty

4> Old - was satisfied with limited changes or partial accommodation of demands.

Wants Radical changes in society $\rightarrow$ New - has become Total war. Not just political change but society • Moral values • way of life.

4> Old - was Institutionalized there was ritualized style command & control.

New - Not an institution, rather an IDEA

Al-Qaeda / Isis $\rightarrow$ not organisation, but ideology.

Hence it is • Diffused • Leaderless • Amorphous

Big spread of ideas
Radical changes in society
Diffused in society
Connected to cells

JIHAD

ISIS & Al-Qaeda represent Leaderless JIHAD.

Since it is not an institution & ideology, it is not enough to end orgⁿ or leader.

Bottom-up $\rightarrow$ volunteers are more
loose setup
Decentralisation

It gives rise to Foot Soldiers. Hence it is difficult to manage. Thus the new terrorism is more destructive. Globalisation helped in making it global.

However, it is believed that the threat is overstated.

- Terrorism is still confined to certain countries
- Jihadis are not a cohesive entity.
- Jihadis are turning into Hotels ^{(spot) to scattered.} groupings.
- Concern is changing from ideological → economic ^{oriented.}
- The 'so-called' global character is hardly intrinsic.
It is more of how others are describing & using the term.
- Even the no. of casualties are smaller in comparison to regular warfare.
- clash of civilizations is a construct of USA. Aim is to keep Western world united & controlled by USA after the end of Communism.
[It is used by USA to maintain its hegemony by showing it as a global threat]
- Terrorist campaigns have hardly been successful.
- In most situations, it has provoked popular hostility.

Future Prospects:

It may become more dangerous.

→ There is a fear that terrorists can acquire WMD (Weapons of Mass Destruction) Ex: Attacks on Saudi's ARMANCO by deserters by Saudi Rebels

→ New tactics like Lone-Wolf attacks, inspired by religion & seen as Martyrdom may increase.

STRATEGIES TO DEAL WITH TERRORISM

① Realist Approach:

Since they are threat to National security, hence should be countered with all means. 2001 Power use in 9/11

No regard for Civil liberties or rights - HARD POWER.

② Liberal Approach:

They face the dilemma as how to counter Fundamentalist ideology w/o ^{violation} infringement of liberal values themselves.

If they accommodate fundamentalists - it will create protest movements.

If they don't accommodate - it will counter their own values.

③ Critical School:

They suggest to distinguish b/w:

◦ Wholesale & ◦ Retail Terrorism

Ex: Chomsky accuses - USA for wholesale terrorism & NSA as Retail terrorism
Playing a main role by showing them as global threats to obtain hegemony
Non state actors

④ Social Constructivists:

It is we have to reject the stereotype. When we keep on branding certain groups as terrorists, we are overlooking many other actors who are also terrorists.

Branding some as terrorists allows others to legitimise their terrorism.

USA is
legitimising
their acts
via this.

Among the counter-terrorism strategies, following ideas are proposed:

i) Strengthen the State Security

ii) Military Repression *suppressing them by force.*

However terrorism through this method can only be reduced to manageable level, it can't be ended.

iii) Heart & Mind strategy *(root cause of terrorism)*

Not just dealing with symptoms rather treating the CAUSE

Isolation should be eradicated completely & improve terrorism

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. © 011 45612719

(273)

iv) Political bargain

It may not work against fundamentalists
Because they want to create a new order rather than
political accommodation.

It is suggested that excessive force is
COUNTER-PRODUCTIVE.

Why? Terrorism achieves its end not by violent
attacks but by communicating the legitimacy.
When govt. becomes more repressive, sympathy turns
towards the terrorists. [same happened in Yemen]
use is legitimising by depicting them as terror groups

strategy of terrorists itself is to draw govt.
on the cycle of repression. Once govt. slip onto
authoritarianism, it becomes more convincing to
legitimise their own actions.

Hence, it is suggested that Terrorism
can't be tackled only by ROBUST STATE
SECURITY APPROACH.
Rather it should be Radical
Change from fundamental.

There is a need to fight war at
2 levels:

Indian govt. has to win
1st: war of position
Only from war of
manoeuvre can be
done.

Capitalism → Geopolitics
Realism
Terrorism

- i) war of Position (to use soft power
needs to gain moral high ground)
- ii) war of Manoeuvre / Movement.

War of position is to use SOFT POWER. In case of terrorism, state needs to gain MORAL HIGH ground. Hence state needs to appear more sensitive to HR; Protection of Freedom & Development.

* G8I has offered 5-Point Formula to UN

- ① Exchange of timely & actionable Intelligence
- ② Prevention of misuse of modern communication systems.
- ③ Building capacity to improve border controls.
- ④ Sharing info on movement of persons.
- ⑤ Designation of counter-terrorism focal points for Effective response.

* KOFI ANNAN, former Sec. Gen. of UN

Strategy of 5 D's

- ① Disuade the terrorist to groups from resorting to terrorism.
- ② Deny means to curb attacks.
- ③ Deter states from supporting such groups. FATF
- ④ Develop capacity of states to prevent terrorism.
- ⑤ Defend HR. Human Rights

Acc. to him Terrorism & HR are not conflicting rather mutually re-inforcing. Any strategy to fight terrorism has to be grounded on:

- i) Rule of law
- ii) Victim centric
- iii) Reduce the appeal of terrorists
- iv) Civil Society participation against propaganda war.
- v) Deal with root causes like poverty Seen in Bangladesh.
- vi) Co-operation among nations.
- vii) Condemn terrorism in all forms, wherever, whatsoever, whenever.
- viii) Implement international conventions.
- ix) Global solidarity will weaken the temptation to use terrorist tactics.

India has also proposed: (1996)

* CCIT (Comprehensive Convention on Int'l Terrorism)

- Accept the universal definition of terrorism to be adopted in domestic laws. (No differentiation in Good & Bad terrorism)
- To ban all terrorist groups & shut down all terrorist camps irrespective of the country.
- Prosecution of all terrorists under special Anti-Terror laws.
- Mandatory extradition of terrorists involved in cross border terrorism.

Status of CCIT:

It has been not accepted by following groups/countries:

1] USA:

It suggests to exclude the acts committed by its armed forces w/o the mandate of UN from the definition.

2] OIC states: [Org. of Islamic states]

Exclude National liberation movements.

3] Latin America

concerned about HR violations.

Silver lining for India

For the 1st time SCO approved CCIT.

Progress so far:

Though CCIT is not in force, yet some other conventions are in force:

(1) 1997, International Convention on Suppression of:

> Terrorist bombings

(2) 1997, > Terror Financing

(3) 2005, > Acts of Al-Terrorism

Terrorists

Capital punishment

Take Consequentialist approach.

- Not emotional but calculational logic -

FOUCAULT

Sympathy

ENVIRONMENT

Note: Either terrorism triumphs or civilization triumphs.

Analyse.

Start with Frantz Fanon.

Asymmetrical warfare

Ancient origin - prominent recently. Peril → Core threat

Due to Globalisation - NSA - Global

USA - GWOT

New & Old Terrorism

(Always write Basic theory).

Realist - state security view

Liberal - No clear approach

Radicalists - Chomsky : Diff b/w 'wholesale' & 'Retail'

Critical - against essentialism

Big qn mark on future of civilization.

why? Become catastrophic

Fear of even NSA acquiring WMD.

However some scholars believe that threat is overstated

Kofi Annan - SD strategy

Still civilization/ humanity can win over the most violent & animal instincts of human race subject to the

(273)

condition we are determined to save humanity & fight it - we need to reject it in any form, anywhere. No option for humanity than to prevail over terrorism. Time to have a look over CEIT of India.

CLIMATE CHANGE

THOMAS FRIEDMAN

→ We have shifted from towards 'energy climate era'
from

→ From the sidelines, environment has become a major issue in IP.

Beginning of politics of Environment:

Env. movements were started by civil society in advanced countries. Global env. movement started with publication of RACHEL CARSON's Book: 'Silent Spring'

over a period of time, there is emergence of 2 types of environmentalism:

→ Deep Ecology

→ Shallow Ecology

- Evolution of Fundamental principles on the Policy of Environment

✓ I. Stockholm Conference, 1972

Significance:

1st UN conference which led to the development of fundamental principles.

Fundamental principles:

(i) Environment is a collective responsibility.

However there will be a Differentiated responsibility

(i.e) North & South different responsibility.

(ii) Priority of South: Development. It can't contribute to protection of environment w/o Development.

I. Gandhi - 'Poverty is the biggest polluter'

(iii) It was agreed that North will support South so that they develop the capacity. (i.e) Transfer of funds & Tech.

(iv) India has been at forefront of formulation of Environmental laws. India has proposed the concept of 'Equity' (i.e) In any negotiation - Equality with fairness.

Hence, here it was agreed that North will support the development of the South.

2] Brundtland Commission, 1983 → Sustainable Development
UN Commission on Environment & Development.

Purpose: Once agreed that development of south is the solution bcoz poverty is polluter, the commission has to suggest the type of devt. to be pursued by south.

Outcome: Commission came up with idea -

SUSTAINABLE
DEVELOPMENT

The idea was published in report - 'Our Common Future'

3] Rio Summit, 1992
1st Earth Summit

How to go for sustainable development.

* 1st UN Summit on Environment & Development *

Purpose: Since it was agreed that countries will go for sustainable development, it has to determine strategies to move on sustainable development.

Outcomes:

(i) AGENDA-21 → It is a voluminous document containing strategies (in every sector). Main theme guiding strategies: Community Participation & involvement of all stakeholders.

(ii) Rio principles:

→ Precautionary Principle: Even when there is a lack of enough scientific evidence, countries will take actions to protect environment.

 **SHUBHRA RANJAN**

(281)

X USA has an objection X (In 1992, it was supporting
wanted solid data + acceptance just to show solidarity
by US scientists. after cold war.)

(iii) Polluters Pay principle → Historical responsibility

USA does not support this.

At that time none was aware of impact of
human actions on environment.

4 Conventions emerged in RIO

① UNFCCC

② CBD

Convention on
Biodiversity

③ UNCED

④ Forest
principles

The most politicised issue is CC.

Evolution Of CC Negotiations

It was realised that CC is happening beyond
the natural reasons. Hence, it can't be left on
NATURAL ADAPTATIONS. There is a need for ACTION.

Countries adopted UNFCCC.

Objective of UNFCCC:

To ensure GW remains well $< 2^{\circ}\text{C}$ & if possible
 $< 1.5^{\circ}\text{C}$ to pre-industrial
levels.

SHUBHRA RANJAN

Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(282)

Nature of treaty:

Not Binding. (Hence, USA accepted)

Principle of UNFCCC:

* CBDR * HR (Historical Responsibility)

How was it implemented?

It divides countries into 2 groupings:

⇒ ANNEX - Developed

⇒ NON-ANNEX - Developing

ANNEX-1

ANNEX-2

All Industrialised countries - must reduce emissions.

OECD countries (well-off) - must provide Funds & Tech.

They can increase emissions to achieve development.

Outcomes:

double responsibility

Overall Carbon emission declined.

But not because of treaty but by sudden halt of Industrial activities in E-European states.

Carbon emissions increased in USA.

4]. KYOTO PROTOCOL, 1997

Since UNFCCC was not binding, it was decided to create a binding agreement.

It imposes the target of emission reductions in devd. countries by 5.2% < 1990 levels.

To become effective by 2005-2012.

Since it was binding, USA did not join.

Purpose of CC negotiations since then....

- i] To find Successor agreement to Kyoto protocol.
- ii] To bring USA under commitments.

How will it become possible to bring USA?

2 ways:

- ① Effort to force BRICS to take binding commitment (USA had put the conditions)

Why?

There cannot be any effective action until and unless major polluters like CHINA & INDIA take binding commitments.

- ② No country take Binding commitment. Similar principles on developed & developing countries.

USA does not believe in HR (Historical Responsibility)

Uptill Kyoto protocol, South has been winning the cc negotiations. However after Kyoto Protocol, they've been losing & USA has been winning.

Approach of developed countries:

They maintained DUAL POSITIONS.

1] EU - 'Act as a Good Cop'

why?

→ Strong civil society movements in Europe.

→ EU makes highly ambitious commitments to attract developing countries & to create differences among developing countries. Devg. countries have been winning base of solidarity which had to be broken. EU started showing that INDIA & CHINA are spoilers. If any both will agree, USA will agree.

Thus INDIA & CHINA are giving primacy to their trading interests over Environment. [US soft power via EU]

2] USA - 'Act as a Bad Cop'

Took extreme positions.

Small island states are the most vulnerable & started creating huge pressure on BASIC countries.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(285)

BRICS had formed BASIC group to negotiate.

5]. COPENHAGEN SUMMIT, 2009

* It was a Turning point. *

Since then North was winning & South losing.
CC negotiations are moving on the track which is
favourable to countries of North. USA was dominating
the show.

At Copenhagen, neither dev. countries could
maintain the solidarity as they came under EU influence.
Even BASIC countries couldn't maintain solidarity.

As dev. countries started blaming INDIA & CHINA,
China tried to project itself as a responsible country. &
Thus, only INDIA appeared to be spoiler. — Prisoner's Dilemma —
India got isolated & came under
global pressure. Countries accepted USA's approach.

Since Copenhagen summit became very controversial,
agreement happened only at:

6] CANCUN SUMMIT, 2012

New framework:

Dilution of CBDR:

i) All countries will take MITIGATION actions.

ii) Bottom-up approach. (Decide own target)

INDC (i.e) each country to decide voluntary target.

iii) It was decided to create a CLIMATE FUND to transfer \$100 Bn by 2020 to devg. countries. However, it is not clear about source of fund.

Devd. countries only held that they will be mobilising the fund.

Since then

Various Conferences happened.

It appeared as if international community will not be able to arrive at any successor agreement.

A. PARIS CLIMATE AGREEMENT, 2015:

Fortunately, countries came to an agreement at Paris. Agreement will come into force from 2020.

Kyoto protocol expired in 2012.

Some devd. countries had taken voluntary commitment.

USA & even JAPAN preferred to remain out.

The Paris agreement aims to limit temp to 2°C ;
Give \$100 Bn to devg. countries.

It was decided that they will finalise a work program / rule book to be implemented to achieve targets of paris.

3] KATOWICE, Poland, 2018

To finalise a work program / rule book.

USA now had threatened to come out of deal.

However, as per agreement, it can't come out before 2020.

At Katowice, there has been huge disagreement b/w various groups, biggest being on Transparency on Funding & Reporting.

Dev. countries favoured VOLUNTARY mechanisms;

Dev. countries wanted BINDING commitments.

Dev. countries rejected the demand to provide information whenever demanded by dev. countries.

Final Text:

It has managed to incorporate some crucial issues related to Climate Finance. It suggests:

- > A higher goal from present \$100 Bn/year.
- > Dev. countries to give more resources as a grant rather than as a loan.

> The text plays with words. It suggests that interested party MAY provide appropriate information on efforts taken for averting or minimising the loss and damage.

Acc. to experts,

Instead of serious rules, new rule book is riddled with loopholes which allow devel. countries to avoid responsibility.

INDIA'S APPROACH IN CC NEGOTIATIONS:

India's approach has been OFFENSIVE.

It has always emphasized on principle of Equity.

Democracy

Human Rights

Gender Justice

HUMAN RIGHTS

Origin

International Bill of Rights.

- Civil, Social, Economic rights.

Regional conventions

Evolution of HR

1st - Civil

2nd - Soc. eco.

3rd - Solidarity

Why HR mechanism is weak?

Countries not interested genuinely.

Strategy to geo-pol. interests.

Approach not neutral.

UNHR Council

47 countries

Whom? what?...

ICC - I. Criminal Court

Why India didn't join?

ICC :

- Est. in 2002.
- Uptil now, only states could be held responsible for HR violations. Now even private persons could be held accountable.
- It deals with crimes of Genocide
 - Crimes against Humanity
 - War Crimes.
- Highly criticized institution.
- None of the major powers have joined.
- It lacks any enforcement mechanism.
- States refuse to cooperate.
- Accused of targeting African nations only.
- Criticised of racist agenda
 - Flawed investigative process

India's objections:

- ICC doesn't include use of ◦ Nu. weapons
 - Terrorism
- as crimes against humanity as proposed by INDIA.
- ICC has been made sub-ordinate to UNSC
 - (i) UNSC can refer a matter to ICC

ii) It can bind non-state parties to ICC.

iii) It can block ICC proceedings.

Hence India says PS could misuse it.

iv) It dilutes the sovereignty. Because prosecutor can initiate investigations on its own & neutrality is always questionable.

Real Reason

It will create problems because India will be accountable for its actions in Kashmir & NE.

DEMOCRACY AS A GLOBAL CONCERN

Democracy as a global ideal has a complicated status. While it is embraced by many as the most desirable governance system, many others reject it as an imposition by western nations. The second Iraq War and the associated neoconservative ideology of diffusion of democracy by force may have amplified the latter image.

UN and Democracy

As per Kofi Annan, democracy as an international issue goes far beyond its direct connection to international peace. Where domestic peace has broken down, the international community must be able to assist in its restoration. In this work, democratic governance, and the realization of human rights, are essential. The UN not only can offer essential help in repairing democratic breakdowns in domestic peace but also must explore democratic principles at the global level.

Democracy provides an environment for the protection and effective realization of human rights. These values are embodied in the Universal Declaration of Human Rights and further developed in the International Covenant on Civil and Political Rights, which enshrines a host of political rights and civil liberties underpinning meaningful.

United Nations activities in support of democracy and governance are carried out through the United Nations Development Programme (UNDP), the United Nations Democracy Fund (UNDEF), the Department of Peacekeeping Operations (DPKO), the Department of Political Affairs (DPA) and the office of High Commissioner for Human Rights (OHCHR), among others. Such activities are inseparable from the UN's work in promoting human rights, development and peace and security, and include:

- Assisting Parliaments to enhance the checks and balances that allow democracy to thrive;
- Helping to strengthen the impartiality and effectiveness of national human rights machinery and judicial systems;
- Helping to develop legislation and media capacities to ensure freedom and expression and access to information;
- Providing electoral assistance and long term support for electoral management bodies;
- Promoting women's participation in political and public life.

GLOBAL DEMOCRACY

Global democracy is a field of academic study and political activism concerned with making the global political system more democratic. This topic has become a central area of inquiry for established literatures including political philosophy, international relations (IR),

(407)

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

international law, and sociology. Along with global justice, global democracy has also been critical to the emergence of international political theory as a discrete literature in recent decades. Whereas global justice scholars tend to focus on how burdens and benefits should be distributed by international institutions, global democrats probe how political power can be legitimated beyond the nation-state. Global democracy is therefore concerned with how transnational decision-making can be justified and who should be entitled to participate in the formation of global rules, laws, and regulations.

Globalization impacts upon the nation-state and has implications for traditional conceptions of democracy. The notion of a global democratic deficit—in which individuals are removed from transnational decision-making in problematic ways provides reasons to pursue global democracy. There are also prominent normative proposals for global democracy. There has also been a recent turn toward pursuing 'values of democratization'. This new direction for the literature has both methodological and substantive implications.

Jan Aart Scholte proposes that global democracy is best envisioned through a new approach, which he labels "postmodern global democracies." His approach responds to what he identifies as the central inadequacies of two current strains of thought on global democracy — statism and cosmopolitanism. According to Scholte, statism is the view that "global democracy is best achieved through multilateral collaboration among democratic nation-states", whereas cosmopolitanism suggests that "global democracy is optimally realized by elevating pillars of Western liberal democracy...from the national to the global level". Among other things, Scholte contends that both of these perspectives fail to adequately account for the social structures and characteristics of global governance that dominate the current global environment. He argues that in the contemporary world, global connections are greater than ever before, collective identities are often non-territorially based, supra-state, sub-state and non-state actors as well as states are global regulators, and the Western-modern state is critically looked upon by some cultural views.

Scholte suggests that instead of the vision of global democracy put forward by statism or cosmopolitanism, global democracy should be built on five principles — transcalarity, plural solidarities, transculturality, egalitarian redistribution and eco-ship. Transcalarity recognizes that "democracy is not achieved at one or the other geographical 'level', but through fluid mobilizations across scales". Plural solidarities as a principle tells us that "an individual can embrace multiple solidarities and that the relative weight of these attachments can fluctuate," and thus there is no one *demos* but a plural *demoi* behind global democracy. The principle of transculturality requires that within all cultures or life-worlds global democracy "be practiced in ways that are *meaningfully* democratic within each of these multiple life-worlds". Egalitarian redistribution recognizes that truly democratic rulemaking requires not only legal and moral equality of persons, but also economic equality. Last, eco-ship "would embed democracy in a concern with ecological integrity"

DEMOCRACY AND GLOBALIZATION

Analysis by Mary Kaldor:

The spread of democracy, it can be argued, is both the consequences and a cause of globalisation. The opening of the authoritarian states resulted from market pressures, increased communication (travel, radio and television and more recently mobile phones and the internet), and the extension of international law. In the 1970s and 1980s, the failure of the statist model of development, the drying up of economic aid, and the growth of indebtedness, contributes to disaffection and to demands, often from outside donors, to introduce democratisation measures to legitimise painful economic reforms. In some countries, for example communist countries, frustrated bureaucrats saw an opportunity to translate political position in economic wealth. These impulses towards democratisation from above were paralleled by pressure from below as communication with the outside world helped to nurture nascent civil societies especially under the rubric of human rights laws, formally adopted by non democratic states. But while political, economic, technological and legal interconnectedness may have contributed to democratisation, the process of political and economic liberalisation, in turn, in further speed up global integration.

But what is rarely discussed in the literature on 'transition' or newly emerging democracies is the global context. Those who write about democratisation tend to analyse the process almost entirely within a national or comparative framework. Yet the spread of democratisation has coincided with the speeding up of the process known as globalisation – growing interconnectedness in political, economic, or cultural spheres. Theorists of globalisation point to the global democratic deficit which results from the speeding up of globalisation (Archibugi and Held 1997). In the context of globalisation, democracy, in a substantive sense, is undermined. This is because, however perfect the formal institutions, so many important decisions that affect people's lives are no longer taken at the level of the state. Democracy assumes congruence between the state, the people, the economy and territory. Yet this congruence no longer exists. Increased migration means that the 'people' cross boundaries and live in multicultural global cities. The economy is increasingly global shaped by the decisions of global companies, free floating speculators, and international financial institutions. States have to take into account a range of international agreements, which constrain national choices.

Analysis by David Held:

The developments putting pressure on democratic polities are often referred to as part of the process of "globalization." He defines globalization as the stretching and deepening of social relations and institutions across space and time such that day-to-day activities are increasingly influenced by events happening on the other side of the globe and the practices and decisions of local groups or communities can have significant global reverberations.

Globalization implies two phenomena:

(409)

- 1) Many chains of political, economic, and social activity are becoming world-wide in scope.
- 2) There has been an intensification of levels of interaction and interconnectedness within and between states and societies.

There is a striking paradox about the contemporary era: More and more nations and groups are championing democracy just at the moment when the very efficacy of democracy as a national form of political organization appears open to question. As substantial areas of human activity are progressively organized on a global level, the fate of democracy, and of the independent democratic nation-state in particular, is fraught with difficulty.

The meaning and place of democratic politics and of the contending models of democracy have to be rethought in relation to overlapping local, national, regional, and global structures and processes. A new agenda will have to be created for democratic theory and practice in order to rethink democracy in relation to the interconnectedness of states and societies in the global system. This new theory of democracy must offer an account of the changing meaning of democracy within the global order and of the impact of the global order on the development of democratic associations.

In the modern age, there are many determinants of the distribution of power, many power centres, and authority systems within and across states and thus the bases of politics and of democratic theory must be recast and the meaning and nature of power, authority, and accountability re-examined. Held attempts to do this and argue that the concept of legitimate power must be separated from its exclusive traditional association with states and fixed national borders and that the conditions of its successful entrenchment depend on an international framework of political life. He does not mean to abandon the modern state, but that democracy can only result from a nucleus of democratic states and societies and that national democracies require an international cosmopolitan democracy if they are to be sustained and developed in the contemporary era. Democracy must be extended and deepened within and between countries for it to retain its relevance in the future.

DEMOCRACY, CLIMATE CHANGE AND GLOBAL GOVERNANCE

The urgent challenge of climate change poses a critical test for modern democracy and rules based international politics. Democracies need to shift from loose policy commitments to real and binding action. Yet, there are enormous collective action problems in combating climate change. Can democratic systems evolve to confront the challenge? At global governance level there has so far been a failure to generate a sound and effective international framework for managing global climate change, whilst at state level solutions are weak and struggle to transcend the normal push and pull of partisan politics. By setting out a range of focused governance and policy recommendations, this paper proposes steps for re-forging a rules-based politics, from the nation state to the global level. To coherently combine democracy, markets and universal standards, global governance systems need to develop into inclusive and representative institutions with the legitimacy and capacity to translate policy commitments into real world outcomes. This will require the wealthy

(410)

industrialised states to shoulder a significant part of the cost of the transformation in developing countries. The nation state holds the key; it must broaden and deepen the deliberative process through democratic agency, involving citizens and civil society in the making and delivery of policy and ensuring that flexible regulation is in place to encourage entrepreneurialism and drive technological innovation.

At the most basic level, it can be argued that modern liberal democracies suffer from a number of structural characteristics that prevent them from tackling global collective action problems in general, and climate change in particular. These are:

- Short-termism
- Self-referring decision-making
- Interest group concentration
- Weak multilateralism

HUMANE DEMOCRACY AND A NEW GLOBAL ORDER

What is humane democracy, and how does it differ from the concept of liberal democracy?

In a nutshell, differing from liberal democracy whose political goal is rather negatively conceived in a sense of protecting individual rights, the concept of humane democracy is envisioned to promote humanity's higher and nobler ethical ideals such as building solidarity, upholding diversity, and enhancing the capabilities of all, beyond protecting individual rights. The ethical ideals of humane democracy are comprised of diverse and rich moral values of all humanity.

The concept of humane democracy also differs from the Western republican model in that the cosmopolitan civic virtue of humane democracy is not exhausted by the Western society's rather parochial *Sittlichkeit*; the much thicker cosmopolitan civic virtue of humane democracy comes from the varied resources of the humankind's shared wisdoms that incorporate not only its diverse philosophical traditions, but also its rich and profound religious insights. Unlike Western liberal democracy, which is often anxious and even fearful of any religious influences, humane democracy is much more hospitable to the humane values of the world's higher religions.

Humane democracy requires each independent democratic state to reconstruct its social, political, and economic systems in such a way as to implement the shared cosmopolitan ethical values through deliberative democratic process, which Habermas exemplifies in his *Inclusion of the Other*. To achieve this goal, cosmopolitan citizens of humane democracy are also to engage in what he calls a "learning process," not only through each state's formal education system, but also through ongoing public and real life educations.

Following are the key cosmopolitan ethical ideals of humane democracy:

1. First, solidarity is a different name for universal hospitality, which is much in need of in today's world, where an increasing number of people are migrating from one

(411)

place to another due to political instability, cultural oppression, or economic exigency. To illustrate this, Jacques Derrida's later work on "hyperbolic ethics" of radical hospitality and its based cosmopolitanism as well as Immanuel Levinas' phenomenological "ethics of the other" have substantively laid out the philosophical foundation of the ethics of solidarity.

2. Second, diversity is another key moral pillar of humane democracy in today's multicultural society. James Bohman, in his article "From *Demos* to *Demoi*: Democracy across Borders," argues that against the liberal model of the "sovereignty of the people in either its Lockean or Rousseauian versions," we should choose an alternative democratic tradition that recognizes the possibility of *demoi*. According to Bohman, "under the conditions of pluralism and complexity" which calls for Habermasian "postnational" legitimacy, the cosmopolitan democracy should be formed as a "decentering" democracy in order to fully valorize the ethical value of diversity.

In recent years, the concept of capability has become an important cosmopolitan moral-political criterion of justice, thanks to the works of Amartya Sen and Martha Nussbaum. Their key argument is that in order to provide justice more fully to all citizens, society should provide a "threshold level of capabilities" to all its citizens. Nussbaum enumerates a list of ten capabilities to illustrate what they might be. Without substantive provision of this list, the political entitlement of "opportunity" may only have a nominal value. Humane democracy thus supports the concept of capability, and is committed to promoting the universal realization of its ideal on a global scale. The Western liberal democratic ideal of security is also an important ethical value of humane democracy. Humane democracy should be able to defend itself not just from non-humane political groups such as ISIS, but also from ideological attack on humane values by those who promote non-humane values such as violence and destruction. The ethical value of security, however, should not trump other ethical values in humane democracy.

GENDER JUSTICE AS A GLOBAL CONCERN

Women-Global-Scenario-

- About two thirds of countries in the developing regions have achieved gender parity in primary education.
- In sub-Saharan Africa, Oceania and Western Asia, girls still face barriers to entering both primary and secondary school.
- Women in Northern Africa hold less than one in five paid jobs in the non-agricultural sector. The proportion of women in paid employment outside the agriculture sector has increased from 35 per cent in 1990 to 41 per cent in 2015
- In 46 countries, women now hold more than 30 per cent of seats in national parliament in at least one chamber.
- Gender inequality is a major cause and effect of hunger and poverty: it is estimated that 60 percent of chronically hungry people are women and girls.
- Women make up more than two-thirds of the world's 796 million illiterate people.
- According to global statistics, just 39 percent of rural girls attend secondary school. This is far fewer than rural boys (45 percent), urban girls (59 percent) and urban boys (60 percent)
- Every additional year of primary school increases girls' eventual wages by 10-20 percent. It also encourages them to marry later and have fewer children, and leaves them less vulnerable to violence.
- Rural women's deficits in education have long-term implications for family well-being and poverty reduction. Vast improvements have been seen in the mortality rates of children less than 5 years old since 1990, but rural rates are usually much higher than urban ones.
- A large gender gap also remains in women's access to decision-making and leadership.
- Natural disasters, climate change and conflict can undermine the health, education and livelihoods of rural women, differently to men. For example, although women usually manage the small plots of agricultural land in each family for income or sustenance in developing countries, land titles are most likely to be held by the men. This means that following a disaster, many women cannot independently claim state-offered

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

reconstruction funds. Women can also be more at risk of harm during flooding in countries where boys are taught to swim at an early age, but girls rarely are.

Gender in Global Economy

There are enormous differences in the socio-economic status of women, depending on their race, class, nationality, and geographical location. Nevertheless, women are disproportionately located at the bottom of the socio-economic scale in all societies.

On average, women earn two-thirds of men's earnings even though they work longer hours, many of which are spent in unremunerated reproductive and caring tasks. Even when women do rise to the top, they almost always earn less than men.

Thus, despite the absence of legal restrictions on employment and earnings, there is a gendered division of labour.

Gender constructs, such as breadwinner and housewife have been central to modern western definitions of masculinity, femininity, and Capitalism. Even though many women do work outside the home for wages, the association of women with domestic roles, such as housewife and caregiver has been institutionalized and even naturalized

Moreover, Political activity does not go with female respectively. Employers hire women on the assumption that they will provide a "docile" labour force, unlikely to organize for better conditions.

As companies have moved towards a more flexible labour force (less benefits and job security), it has led to increased economic vulnerability in times of economic crises.

Women's relative lack of economic opportunity is not caused by market forces alone, but by the process that result from gendered expectations about the kind of works for which women are believed to be the best suited. In addition, much of women's non-monetarised labour contributes to the global economy, but remains invisible.

Moreover, Christine Lagarde, the International Monetary Fund chief has declared that India's GDP would be 27 per cent higher if the country had as many of its women working as men. Even Turkey's per capita income would increase by 22% if it achieved gender parity in work force, and even Japan and US could increase their GDP by 5% and 9% respectively with workforce gender parity.

Social feminists say that the sexual division of labour, through which men dominate the public sphere while women are customarily confined to the private sphere, have served the economic interests of Capitalism in a number of ways. For some social feminists, women constitute a

SHUBHRA RANJAN
Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

reserve army of labour, which can be recruited in the work force when there is a need for increased production, but easily shed and returned for domestic life during a depression.

Many such gendered processes are largely ignored by conventional theories of political economy which concentrate only on commercial exchange and paid labour thus rendering much of women's contribution to productive activity invisible. This can be seen by the feminist critique of the notion of the 'economic man'.

The restructuring of the economy as a result of globalization has had a number of further implications for gender relations. In the first place, it has brought about the global feminization of work. In the developing world, this has been evident in the expansion of employment opportunities for women, both as the agricultural worker and through a process of global industrial restructuring. Examples of this include the growth of Asian electronics industry and of clothing assembly plants in Mexico.

The developed world has also witnessed the growth of the new 'feminized' or 'pink collar' jobs through the expansion of the service sectors of the economy. Women workers therefore suffer from the double burden of low paid work and continued pressure to undertake domestic labour, often, thanks to advance of neo-liberal globalization; in the context of the reduction of state support for health, education and basic food subsidies.

Economic globalization has also unleashed dynamics that have led to the feminization of migration. The pressure of globalization has therefore combined to redefine the sexual division of labour in both global and ethnic terms, creating a dependency of a particularly intimate kind, as affluent and middle class families in the developed world come to rely on migrant women to provide child care and home making services.

Feminization of Poverty

The feminization of poverty is a change in the levels of poverty biased against women or female headed households. More specifically, it is an increase in the difference in the levels of poverty among women and men or among female versus male and couple headed households. It can also mean an increase of the role that gender inequalities have as a determinant of poverty, which would characterize a *feminization of the causes of poverty*.

This trend is not only a consequence of lack of income, but also of lack of opportunities due to gender biases and fixed gender roles in some societies. Gender biases often deprive women of opportunities to independently pursue education or careers and are often linked to the expectation that women are responsible for childbearing and childrearing. Women's increasing share of poverty is related to the rising incidence of lone mother households.

Women in poverty also have reduced access to healthcare services and resources. Partly due to the toll of childbearing, women are disproportionately afflicted with poor health outcomes.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Poor health reduced women's ability to earn income, and, thus, is a key factor increasing and perpetuating household poverty. Increasing health services to women could, therefore, mitigate the feminization of poverty. The education of women and children, especially girls, can create greater opportunities for women to lift themselves out of poverty and increase their social position. Countries with strong gender discrimination and social hierarchies limit women's access to basic education. Even within the household, girls' education is often sacrificed to allow male siblings to attend school.

Employment opportunities are limited for women worldwide. Women are often barred from materially controlling their environment due to unequal access to profitable and fulfilling occupational opportunities. Employment can be divided into informal and formal occupations. Formal employment is government regulated, and workers are insured a wage and certain rights. Informal employment takes place in small, unregistered enterprises. A large proportion of women are employed in informal workplaces, reducing the regulation of their employment. This makes it more difficult for women to address workplace grievances and ensure safe and legal working conditions.

The overrepresentation of women among the income poor at a given moment seems to be a much more common phenomena than the process of the feminization of income poverty.

Causes

The feminization of poverty, among many other factors, may be caused by changes in:

- **Family composition**
dissolution of marital unions, constitution of families without these unions, higher male mortality
- **Family organization**
Gender division of labour and consumption within the household, gender roles regulating the control over household resources
- **Inequality in the access to public services or in their quality**
Barriers to education of girls, educational segregation by sex, lack of women specific health attention
- **Inequality in social protection**
Contributory pensions systems reproducing previous labour market inequalities, lower access to pensions and social assistance by women, inequality in benefit concession or in benefit values in targeted policies
- **Labour market inequalities**
Occupational segregation, intra-career mobility, differential levels of employment in paid work, wage discrimination, duration of work shifts.
- **Legal, paralegal and cultural constraints in public life**
Property rights, discrimination in the judiciary system, constraints in community and political life, etc.
- **Migration to rural areas being limited to men**

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Women are left behind with limited work in primary sector, while men migrate from rural areas to urban areas in search for better employment opportunities.

Impact of Globalization on Women

Globalisation is a process of increasing interdependence, interconnectedness and integration of economies and societies to such an extent that an event in one part of the globe affects people in other parts of world. We have often heard of global culture and integration of the world economy. However, as this process is not consistent throughout the world, it leads to conflict and fragmentation.

In 2000, the Beijing+5 Document, while reviewing progress made since the 1995 UN Conference on Women, notes that globalisation presents opportunities to some women but leads to marginalisation of many others and thus advocates mainstreaming in order to achieve gender equality. Globalisation affects different groups of women in different places in different ways. On the one hand, it may create new opportunities for women to be forerunners in economic and social progress. With the advent of global communication networks and cross-cultural exchange there seems to be a change in the status of women albeit not to a very large extent. However, globalisation has indeed promoted ideas and norms of equality for women that have brought about an awareness and acted as a catalyst in their struggle for equitable rights and opportunities. On the other hand, it may exacerbate gender inequality in a patriarchal society, especially in the developing world. In the economic realm, it may lead to further marginalisation of women in the informal labour sector or impoverishment through loss of traditional sources of income.

Impact on Women in India

Globalization has had greater impact over women in developing countries. Over the ages, women in India have faced the problems such as patriarchy and social pressure; caste based discrimination and social restrictions; inadequate access to productive resources; poverty; insufficient facilities for advancement; powerlessness and exclusion etc. However, the new circumstances created by globalization are diverse, encompass all women in the country and cover almost all aspects of their life. Some of these are as follows:

Positive Impacts

- Changing role in work

Globalization has undermined the traditional role of women in homemaking, farming, livestock, animal husbandry, handicrafts, handlooms etc and resulted in a relatively better environment

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

for women. Women have more jobs, become more active in avenues generally reserved for men, have played a more prominent role in society and not just restricted to the household. It has affected both the quantity and the quality of work available to the majority of women in India.

- Changing role in Family, Marriage, Caste

Globalisation has posed a major challenge to the institution of patriarchy in India. As women take up jobs and achieve social mobility, they have also begun to stand up for their rights. As nuclear families have become more common, it has become easier for women to assertively claim their rights and ask for equality in an environment not stuck in ancient mores. Marrying within the same caste has become less important, and women have in many cases reserved the right to marry whoever they choose irrespective of caste. As countries come closer, and boundaries disappear in the globalised world, women in India are inspired by women the world over to fight for their rights. Of course, there are some notable exceptions to the above generalisations. But, to a large extent, these changes have received a great push from the new era of globalisation.

- Other Positive Impacts

Prospects of higher and quality education have become feasible for those women who can afford them, economically and socially. Employment in technological and other advanced sectors, which have global bearing, has opened up for suitably qualified women. With changing attitude towards women, especially in the urban areas, women enjoy more egalitarian set of gender relationship. Augmentation of women's movements through exposures at the international level will help bring about major changes in the economic, social and political lives of women. Reduction in gender inequalities will have positive effect on women's empowerment in the socio-economic context. Attitudinal changes towards women's role in the family due to good education, benefits of family planning and health care, child care, good job opportunities etc. will surely help in the development of more confident and healthy women. Positive approach to economic and cultural migration will facilitate women to be exposed to better prospects at the international level.

Negative Impacts

Globalization has increased the number of low paid, part time and exploitative jobs for women. Increased prices due to open economy demand more cope up with changes from women. With increasing nuclear families, the older women's life has become pitiable, sometimes spending their later days in old age homes and isolation. The feminization of population has further aggravated this problem. Similarly, male migration from rural areas to urban centres has put the women under triple burden of home making, farming and job in rural sector. At the same time, migration of women for economic reasons has led to increased exploitation including sexual exploitation and trafficking.

SHUBHRA RANJAN

Critics of liberalisation argue that following the World Trade Organisation regulations the states have brought about a change in national policies so as to allow the free entry of foreign corporations, to give more incentives to big businesses rather than to small firms, and to lift import controls on agricultural products. This has resulted in further marginalisation of rural and indigenous women.

Moreover, as consumers, women are increasingly facing a consumer culture which reduces them to commodities and as producers, women are exposed to work exploitation and occupational hazards.

Of late many Transnational Corporations have located some of their manufacturing plants and industries in the developing countries due to the easy availability of cheap labour. As producers also, women have to suffer exploitation in terms of low wages, poor working environment, instability of employment, and denial of right to representation.

Gender equality is critical to the development process. The process of globalisation may have resulted in new avenues of growth, but due to unequal distribution of its benefits women have been adversely affected in many cases. It calls for creating opportunities for women to be part of this development process. Merely enacting legislation will not help. What is required is its proper implementation.

Gendering Security

Challenging the Myth of Protection:

Men are often seen as protectors, and women and children as people who need protection. It is said that men fight wars to protect women and children. However, women and children are the worst sufferers of war and constitute about half of the world's refugee population.

In wartime, women are particularly subjected to rape and prostitution. Rape is not just an accident of war, but often a systematic military strategy.

In Bosnia, rape was associated with a policy of ethnic cleansing. These instances about women in conflict situations severely challenge the protection myth.

Unequal gender relations, such as protector/protected leadership that legitimizes military activities and hides some of the negative effects of war on civilians.

PLACE OF GENDER JUSTICE IN GLOBAL AGENDA

The UN and Women

UN support for the rights of women began with the Organization's founding Charter. Among the purposes of the UN declared in Article 1 of its Charter is *"To achieve international co-operation ... in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion."*

Within the UN's first year, the Economic and Social Council established its Commission on the Status of Women, as the principal global policy-making body dedicated exclusively to gender equality and advancement of women. Among its earliest accomplishments was ensuring gender neutral language in the draft Universal Declaration of Human Rights.

In 1979, the General Assembly adopted the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW), which is often described as an International Bill of Rights for Women.

Conference on Women

As the international feminist movement began to gain momentum during the 1970s, the General Assembly declared 1975 as the International Women's Year and organized the first World Conference on Women, held in Mexico City. At the urging of the Conference, it subsequently declared the years 1976-1985 as the UN Decade for Women, and established a Voluntary Fund for Decade.

By the end of the Decade, women from the South began to organise around the impact of the economic crises of the 1970s caused by high prices for food and oil on the international market and a downturn in the global economy. Their work led to the establishment of a network of Southern women known as Development Alternatives with Women for a New Era (DAWN).

Beijing Platform for Action: The Fourth World Conference on Women, held in Beijing in 1995, went a step further than the Nairobi Conference. The Beijing Platform for Action asserted women's rights as human rights and committed to specific actions to ensure respect for those rights.

The fundamental transformation that took place in Beijing was the recognition of the need to shift the focus from women to the concept of gender, recognizing that the entire structure of society, and all relations between men and women within it, had to be re-evaluated. Only by such a fundamental restructuring of society and its institutions could women be fully empowered to take their rightful place as equal partners with men in all aspects of life. This

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

change represented a strong reaffirmation that women's rights were human rights and that gender equality was an issue of universal concern, benefiting all.

The legacy of the Beijing Conference was to be that it sparked a renewed global commitment to the empowerment of women everywhere and drew unprecedented international attention. The Conference unanimously adopted the Beijing Declaration and Platform for Action, that was in essence an agenda for women's empowerment and stands as a milestone for the advancement of women in the twenty-first century. The Platform for Action specified twelve critical areas of concern considered to represent the main obstacles to women's advancement and which required concrete action by Governments and civil society:

- Women and poverty;
- Education and training of women;
- Women and health;
- Violence against women;
- Women and armed conflict;
- Women and the economy;
- Women in power and decision-making;
- Institutional mechanisms for the advancement of women;
- Human rights of women;
- Women and the media;
- Women and the environment;
- The girl child.

Other Institutional Initiatives:

- Since the availability of data is important in getting issues in policy agendas. Adoption of the Gender Development Index (GDI) by the UN Human Development Programme in 1995.
- Another important move towards gender equality was the adoption of by the UN and other international intergovernmental organizations of a policy called gender mainstreaming. Gender mainstreaming requires organizations that adopt it to evaluate the gendered effects of all aspects of their institutional decision-making.
- In 1996, International Labour Organization adopted a convention that set international standards for the type of home-based work. Pressure for adoption of these standards began with the organizing and lobbying efforts of the Self-Employment Women's Association (SEWA), a trade union based in India composed of women engaged in small-scale trade and home-based work.

UN Women

All human development and human rights issues have gender dimensions. UN Women focuses on priority areas that are fundamental to women's equality, and that can unlock progress across the board.

It's focus areas include:

- Leadership and political participation
- Economic empowerment
- Ending violence against women
- Peace and security

Commission on the Status of Women

The Commission on the Status of Women (CSW) is the principal global intergovernmental body exclusively dedicated to the promotion of gender equality and the empowerment of women. The CSW is instrumental in promoting women's rights, documenting the reality of women's lives throughout the world, and shaping global standards on gender equality and the empowerment of women.

Women and Millennium Development Goals

MDG3 was intended to promote global equality and empower women.

Launched as one of the eight millennium development goals, MDG3 calls for the promotion of gender equality and the empowerment of women. It has one target: the elimination of gender disparity in primary, secondary and tertiary education by 2015 (an interim deadline of 2005 for primary and secondary schooling was missed). Progress on the goal is tracked by the ratio of girls to boys in class, the share of women in paid employment in sectors other than agriculture, and the proportion of female MPs in national parliaments.

Just about all the issues needed to achieve gender equality and women's empowerment were left out of MDG3. But then the goal did keep things loose by only calling on leaders to promote equality rather than actually realise it.

On the plus side, other MDGs – such as numbers two and five, on education and maternal health – did have targets that were geared towards gender equality. And a target in goal number one made reference to women's role in the job market.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

But many key issues were overlooked by MDG3, including: eliminating violence against women; recognising the unpaid burden of care work that falls disproportionately on women; women's limited access to assets and resources, such as land; protecting women's sexual and reproductive health and rights; ending harmful traditional practices, such as early and forced marriage and female genital mutilation; and the vital role women play in peace and conflict reconciliation.

Women and Sustainable Development Goals

In the SDGs, there is a dedicated 'gender goal', Goal 5: Achieve gender equality and empower all women and girls. It has the following targets:

- End all forms of discrimination against all women and girls everywhere.
- Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking and sexual and other types of exploitation.
- Eliminate all harmful practices, such as child, early and forced marriage and female genital mutilation.
- Recognize and value unpaid care and domestic work through the provision of public services, infrastructure and social protection policies and the promotion of shared responsibility within the household and the family as nationally appropriate.
- Ensure women's full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic and public life.
- Ensure universal access to sexual and reproductive health and reproductive rights as agreed in accordance with the Programme of Action of the International Conference on Population and Development and the Beijing Platform for Action and the outcome documents of their review conferences.
- Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws.
- Enhance the use of enabling technology, in particular information and communications technology, to promote the empowerment of women.
- Adopt and strengthen sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels.

Women have a critical role to play in all of the SDGs, with many targets specifically recognizing women's equality and empowerment as both the objective, and as part of the solution.

Goal 5 is known as the stand-alone gender goal, because it is dedicated to achieving these ends. Deep legal and legislative changes are needed to ensure women's rights around the world. While a record 143 countries guaranteed equality between men and women in their Constitutions by 2014, another 52 had not taken this step.

SHUBHRA RANJAN
Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Stark gender disparities remain in economic and political realms. While there has been some progress over the decades, on average women in the labour market still earn 24 per cent less than men globally. As of August 2015, only 22 per cent of all national parliamentarians were female, a slow rise from 11.3 per cent in 1995.

There is a certain cynicism in many quarters about the use of such global frameworks - and the recent memory of the Millennium Development Goals, conceived behind closed doors by bureaucrats, fuels this cynicism. They were dubbed the '*Minimum Development Goals*', and feminist critiques of them highlighted their poor fit with the realities of women and girls, particularly those living in poverty in the global South, and their lack of political energy.

The SDGs will form a significant element in the constellation of international agreements shaping the world for the next decade and a half. And they therefore need to work for women.

Compared to the MDGs, they reflect a more complex, and hence sophisticated vision of what development means, and what is needed to get there. They focus on inequality - or more accurately, on inequalities. They are drafted in a way which makes it more difficult for policy makers to relegate gender equality and women's rights to a silo: the goals allow for overlapping analyses and for the identification of inter-linkages between different goals. This architecture - together with an explicit focus on responding to hard-to-reach complex inequalities in the commitment to 'Leave No-one Behind' - marks a commitment to go beyond the simpler, easier wins which characterized the MDGs.

However, there is a danger that the SDGs and targets which contain most potential for transformation will be 'neglected in implementation through selectivity, simplification, and national adaptation'. The women's movements and wider social justice movements have much to do to ensure this does not occur.

Satyendra Talla

UNITED NATIONS (UN)

(3)

- ⊛ Envisaged Role & Actual Record.
- ⊛ Specialised agencies & Need for UN reforms
- ⊛ India & UN system (Role in PK by India-done)
- ⊛ India's demand for Permanent seat in UNSC.

Envisaged Role

"UN was not created to create heaven on this Earth
But to prevent it from becoming hell"

OBJECTIVE (as per UN Charter)

As mentioned in the preamble, the envisaged role of UN is to save succeeding generations from scourge of war.

It also aims to promote:

Respect of Human Rights

Recognition of equality of Nation, big or small

social progress

Better standard of life

In larger freedom [from poverty, hunger, bad climate...etc.]

3 Pillars of UN system

I. Protection of
WORLD PEACE

II. Protection of
HUMAN RIGHTS

III. Promotion of
DEVELOPMENT

(37)

Actual Record

It has to be measured w.r.t. UN's achievements in realising the core objectives.

I. In Maintaining Peace

Unfortunately ^{East West} because of E & W conflict, UN could not play any effective role in its prime objective.

Collective Security has remained paralysed.

At present, Commitment of countries for PEAR KEEING (PK) is weakening.

UN couldnot play any effective role towards the resolution of crises on:

- Korean peninsula
- B/w INDIA - PAK
- Palestinian Issue.

II. In Protecting Human Rights (HR)

- ▷ Rohingya Crisis
- ▷ Syrian Crisis
- ▷ Crisis in many African countries

show failure of Int'l community in protecting HR.

Even HR regime has become prey to Geo-political ambitions of great powers.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

III. In Promoting Development

To certain extent, there has been some achievement of UN, it is in this field.

The most successful UN agency is WHO

However, UN's role as a major platform for development partnership has been taken by other institutions. Even WTO, IMF have sidelined UN w.r.t. Development Agenda

UN is facing multiple crises & in need of urgent reform. In the age of America First, USA has even threatened to come out of UN.

UN has been a platform to establish the US hegemony. However, once USA realized that other countries prefer to utilise the platform to counter-US hegemony, USA started undermining the platform.

USA has been the biggest defaulter on paying the membership dues. One of the major weakness of US is finances. As per 2015 data:

UN Budget - \$ 45 Bn

Per capita exp - \$ 6 / person / yr

It is highly inadequate considering global challenges.

We are living in an age when Multilateralism as such is coming to an end.

Like NAM, UN is also facing crisis of Credibility & Relevance.

GARETH EVANS, former foreign Minister of AUSTRALIA

He was right in his assessment of UN when he held that "No other body invokes as many dreams, yet so many frustrations like UN"

Reference: Read PROJECT SYNDICATE for more & add.

Do we Need UN?

* BAN KI MOON, former UN Sec General

"we need more UN than less UN" why?

The size of global threats have gone beyond the capacity of a single nation including the super power to deal on its own.

Has UN Failed?

It is not UN's failure, it is OUR FAILURE

* TRUMAN, former US Prez.

On the eve of inauguration of UN he held that "UN is malleable to the wishes of those who are running the institutions. It cannot be more successful than what we desire. We should not

forget the sacrifices of those bees of whom we are here & creating this body. If we do not fulfill the objectives of UN we are betraying such men & women who sacrificed their life in hope of peace & justice”

UN REFORMS

why the need for reforms?

Some form of institution of GLOBAL GOVERNANCE is needed, even if we end UN, we will have to recreate UN. Hence, it is better to reform UN.

Reform is natural in evolution of any institution so that it remains relevant.

what Reforms are required?

INSTITUTIONAL REFORMS

(1) ⇒ Reform of UN charter

a) A-2(7) → prohibits UN from intervention in domestic affairs

b) it still mentions ^{certain} states as ENEMY STATES

(Axis powers), they all are now UN members aspiring for permanent seat. ^{e.g. Germany}

Note: a) will mean R2P will become part of UN charter

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

UNGIA REFORMS

No reform is needed but better co-ordination is required between UNGIA & UNSC

ECOSOC REFORMS

No. of agencies have grown too much on no. with huge overlapping hence streamlining is needed.

TRUSTEESHIP COUNCIL

This body completed its work long ago & now it has no work.
Then abolish it or give new mandate to the body.
Ex: Governing the GLOBAL COMMONS (Arctic, Antarctic)

UN SECRETARIAT

Address Red Tapism

Right sizing of Bureaucracy

Greater representation from developing countries

Training & capacity Building

PEACE KEEPING - (refer before done)

It requires more budget.

However, TRUMP has cut \$600 mn.

FINANCIAL REFORMS

All countries must pay dues on time.

Increase the Budget.

Independent source of Income → Visit

TOBIN TAX - Tax on Int'l financial transactions
Handling corruption.

How to Reform?

Institutional Reforms except Secretariat reforms
requires amendment of UN charter

Procedure:

A-108 is extremely rigid. That is why UN charter
has been reformed only twice since birth.

- 1- to increase strength of Non-permanent members of UNSC & ECOSOC
- 2- to increase strength of ECOSOC.

Steps:

- I. Proposal to be initiated by 2/3rd members of GA
- II. Passed by 2/3rd members of GA
- III. This 2/3rd requires consent of P5 also (VETO not allowed)
- IV. Then it has to be ratified by Domestic Ratification
procedure in 2/3rd of countries.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

REFORM OF UNSC

Importance of UNSC:

Considered as Nucleus of UN system
why?

▷ It is the only body of UN which has 'Teeth to bite'

▷ The permanent members of UNSC (P-5) possess VETO power.
It provides them ultimate weapon to stop functioning of UN
against their National Interest.

▷ UNSC has a veto say on all critical appointments in UN
and UN functions. Veto - Security Council

Need of reform of UNSC:

(i) There is a huge disappointment with functioning of UN
primarily because P-5 did not allow UN to function by using
VETO powers.

(ii) None of the UNSC decisions go w/o criticisms and
allegations because of their PARTIAL nature.

Like during CW, UNSC remains DIVIDED b/w

P-2 (CHINA & RUSSIA) and P-3

In present time, there is an urgent need for Credible
Institution of Global Governance which is IMPARTIAL

Do
ECOSOC
UNESCO
etc...
for G13
from Net

(iii) There is a lack of TRANSPARENCY & ACCOUNTABILITY in the functioning of UNSC.

(iv) Poor coordination b/w UNSC & UNGA.

(v) UNSC, in its present configuration cannot be called as REPRESENTATIVE. There is a need to reform the manner in which VETO power is exercised.

Most Urgent Reforms

1) VETO reforms

⇒ MEMBERSHIP Reforms

VETO REFORMS

→ Inclusion of VETO was controversial even at the time of inception of UNO. It was included on the insistence of former USSR which was skeptical towards western countries.

→ Experience of LDP has proved that it would not be wise if USSR is kept out.

→ The VETO issue creates problem because it has not been used on PRINCIPLED manner. P-5 countries enjoy veto power which can actually be called as DOUBLE VETO.

How decision is made in UNSC?

P5+10

Total strength of UNSC = 15 (P5+10)

To pass any resolution, affirmative vote of 9 is req., subject to condition none of P5 uses veto.

 **SHUBHRA RANJAN**

(45)

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

The subjects in UNSC are categorised into 2 types:

- a) Procedural Matters: on these, affirmative vote of any 9 members is sufficient.
- b) Substantive Matters: on these, affirmative vote of 9 members is needed, subject to the condition no P5 uses veto.

How to decide which is procedural & which is substantive?

This is also decided by P5.

Thus P5 has VETO in 2 stages & hence called DOUBLE VETO.

SUGGESTIONS:

- ✓ Eliminate VETO. But none of the P5 will agree.
- ✓ No new Permanent members should be getting VETO. As it is already problematic.
- ✓ UNGA should be given power to override veto in case there is a deadlock.

MEMBERSHIP REFORMS

In 1945, strength of UNGA was 51. There were 5 permanent members & 6 non-permanent members (UNSC)

In 1963, strength of UNGA became 113. So the strength of UNSC was made 15 (4 Non-permanent members added)

Present, 2018, strength of UNGA is 193 but no change in Permanent or non-permanent members.

 **SHUBHRA RANJAN**

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

If we see the present composition:

Africa: Most actions of UN here, but No representation

Latin America has no representation.

Asia is under represented.

Europe is over represented.

If UNSC represent the GREAT POWER status, the present configuration does not meet the reality.

France & Britain - powers of bygone era.

India - It is anachronistic if the country possessing 3rd largest army, de facto Nu weapon state, Emerging economy & country with 2nd largest population is not represented despite immense contribution & commitment to UN.

Japan & Germany - largest contributors to UN budget, w/o having final say on use of budget. Even though they are large contributors their work not recognised

If more no. of countries are added, it will enhance the CREDIBILITY OF UNSC. The presence of NEUTRAL countries like INDIA, BRAZIL will dilute polarisation.

to keep UN relevant, it has to reform itself.

How to reform?

Membership reform will require amendment of its charter.

Possibility of reform:

It seems there is no light at the end of the tunnel.

Reforms are next to impossible.

The history of membership reform is quite old. India itself proposed its candidature in 1970s. However India did not have good relation with western block & hence no hope for India's inclusion.

In 1991, USA itself initiated the reform process.

After GERMANY & JAPAN's contribution to GULF WAR, 1989, USA proposed their inclusion as permanent members. USA was looking at BURDEN SHARING & bounding its allies.

USA was in good relation with CHINA. Russia was also not in a position to oppose. It was the best time to induct GERMANY & JAPAN.

Who is the spoiler in USA's plan?

INDIA's objection to include GERMANY & JAPAN w/o including itself first.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

India's stand:

The seat at UNSC is not at sale to be given to the highest bidder. International community cannot ignore the contribution of India:

- a) In strengthening UN
 - b) Towards World Peace.
- India proposed itself to be the most eligible candidate. Why?

Besides the credentials mentioned earlier, India is best suited because:

- (i) No other civilization has a COSMOPOLITAN OUTLOOK like India.
- (ii) India is CONSTITUTIONALLY COMMITTED to strengthen International law and peace - A451 of DPSP

Response of International Community

LUKEWARM response - Because:

At that time, India neither had significant relation with west & India's rel. w/ RUSSIA had also changed considerably.
(Russia had pro-west policy)

Hence, India changed its strategy of going alone & decided to form a coalition known as G4 countries.

Response of International Community

Formation of COFFEE CLUB.

○ PAKISTAN ○ ITALY ○ ARGENTINA ○ ~~CHINA~~^{CHINA}? formed a club with other countries opposing the candidature of G4.

Coffee club maintained the position that G4 countries are not the Regional leaders but hegemonic powers. If they will be given permanent seat, it will not consolidate the peace in the region rather it will DESTABILISE the regional stability.

Response of G4:

To assure Coffee Club, G4 proposed that they will not ask for VETO for 15 years.

Response of AFRICAN UNION (AU)

EZULWINI CONSENSUS

2 members from AU

No expansion w/o VETO

Still, no consensus among African countries as to which 2 will be selected.

Demand of MUSLIM COUNTRIES

OIC & ARAB LEAGUE

proposed rep. of Muslim countries bcoz the most conflict prone region is M. EAST & lot of UN interventions.

P-5

- ✓ Veto
- ✓ Free from Elections
- ✓ Status symbol
- ✓ Rep. in all other UN bodies

India going to UN on J & K issue was a foolish mistake.
They played India

Other Problems in Reforms

i) If Germany is present, Europe will become more over-represented.

Since EU had formed COMMON FOREIGN & DEFENCE POLICY, it has been proposed that all European seats must be merged into an EU SEAT to be occupied by those countries taking turns. Neither BRITAIN nor FRANCE agreed.

(ii) No consensus from candidates of I. America & Africa.

(iii) Coffee club has brought UNITING FOR CONSENSUS RESOLUTION which suggests that any amendment for expansion for membership will be done only by consensus on UNGA.

However, as per G4, there is NO NEED OF CONSENSUS as UN charter provides for decision by majority.

(iv) So far, there is NO FORMULA agreed by countries on membership. Once former Sec. Gen. KOFI ANNAN proposed 2 FORMULAE.

At present, smaller Island nations of Pacific & Caribbean have also proposed their representation.

PROGRESS SO FAR:

In 2015, UNGA adopted Resolution for 'TEXT-BASED NEGOTIATIONS' by consensus. Now each country will give written suggestions & discussion will be on formal text.

Note: Refer to NEA & update.

INDIA'S STRATEGIES TO GET P in UNSC

It has been a long-time ambition of India to be on the seat of HIGH TABLE OF DIPLOMACY.

PT. NEHRU has clearly communicated that India should try to get its Rightful place on the Comity of nations which it deserves because of its great civilization.

If India gets permanent seat, it will be an acknowledgment of its GREAT POWER STATUS. It will be a recognition that India is a MAJOR STAKE HOLDER in Int'l Peace.

Multiple strategies of India

- (i) Establishing itself as a champion of Peace, Disarmament.
- (ii) Presenting itself as a leader of 3rd world with NAM.
- (iii) GOING ALONE and GOING IN COALITION. At present India is working with 2 coalitions.

* G-4

* Large G9 Group

The strategy of going in Coalition has not been much helpful as it became Swimming & Sinking together. CHINA may agree to India's candidature but never for JAPAN. There are very limited chances that GERMANY can be inducted.

(iv) To prove its worth, India has acted as a NP member for 7 TIMES. It also shows that International Community wants India's representation. Till now, only once India was defeated in 1996 by JAPAN by 100 votes (out of 195)

India changed the strategy & maintained the position that it deserves to be a P member & will not stand as NP member.

India again changed its strategy & stood for the 7th time in 2010 & became a NP member of 2011-12. India got overwhelming support. ^{was my} ^{friend}

Why India changed the strategy?

USA promised that it will help India to acquire Great Power status but India has to show that it can take right decisions. USA will judge India's decisions on a grad of apprenticeship.

It was unfortunate for India that in 2011, crises in LIBYA & SYRIA emerged, it was diff. for India to take decisions b/w P2 Vs P5. [Lack of firm stand 'Fence sitter' position]

How important is it for India to fight for UNSC?

As per all Govts. in New Delhi, it is one of the PRIORITY of India's FP.

Acc. to. Experts:

R.C. GUHA No need to be on pace of superstardom, but focus on internal development.

SHYAM SARAN No point swimming after ILLUSIONARY GOALS. focus on building real strength - Military, Economic.

Prof. RANESH THAKUR If India thinks it important, go for NCM with UN so that they will realise the importance of India themselves.

C. RASAMOHAN It is not important that much as it lets India to be bargained by western powers.

KISHORE MAHBUBANI India's situation is like SISYPHUS, the historic greek character carrying huge boulder on the head to the top of the hill just to see it rolling down.

Note: ICT (P) Pune. Brundage Encyclopedia
Compulsory Jurisdiction of ICT.

Determinants of Foreign Policy

→ Foreign policy is never uniquely determined by any one factor or set of factors, but is a result of interplay of large number of factors.

Some of these factors are relatively stable & have to be taken as given by makers of Foreign policy and thus can be regarded as more basic or unchangeable determinants of policy than others.

But the more volatile institutional factors and even the personal role of decision makers is no less important.

Basic Determinants:- Relatively Stable

- ① Geography
- ② Economic development
- ③ Domestic political and social structure.
- ④ International environment
- ⑤ Military Strength.
- ⑥ History and culture.

① Geography

- Napoleon "any country's foreign policy is determined by its geography."

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005, ☎ 011 45612719

- The Mahan - mackinder debate has often been used to emphasise the impact of geography on foreign policy.

Alfred Thayer Mahan :- argued about the key role that naval power plays in the emergence and growth of world powers and the growth of British empire in particular.

- Identified several narrow passages or strategic Choke points the control of which contributed to great Britain's command of sea.

for eg:- Indian Ocean and Indian Foreign Policy

Indian Ocean is a key connecting link between Atlantic and Pacific with all major shipping routes.

- 80% of China's oil imports and 85% of India's trade passes through it.
- Historically ~~when it was~~ British or Portuguese, their strategy of establishing control over Indian Ocean consisted of guarding entrances to Indian Ocean.
for eg:- Persian gulf from Strait of Hormuza
from, Suez, UAE
 - Red Sea
 - East-African Coast. (northern Africa) Djibouti.
 - Strait of Malacca. (Indonesia, Singapore, Malaysia).
- British maintained naval presence
 - on Suez Canal till 1956
 - Singapore till 1970's

Always Ahead

Mauritius

- US maintain naval presence in Indian Ocean in Diego Garcia region since 1974 on the Southern tip of India.
- French, USA and now China all have established naval bases in Djibouti at the horn of Africa close to Gulf of Aden.
- India has secured access to Duqm port in Oman in 2018 for military and logistical use with Guadar port of Pakistan China in sight.
- On the eastern side of Indian Ocean, India has secured access Sebang naval base in Indonesia (2018). Moreover India maintains a functional Far Eastern Command (FEC) with all three wings of armed forces in Andaman and Nicobar Islands.

Mackinder :- emphasized the importance of being a land based power for any country intending to be a world power. he argued that

"Whoever rules Eastern Europe will rule Heartland."

"Whoever rules Heartland will rule World Island."

"Whoever rules World Island will rule World." (Europe)

- Mackinder's emphasized that such a effective control of Heartland had been unattainable in the past because :-

3

- Heartland was protected from sea power by ice to north & mountain & deserts to south.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005, ☎ 011 45612719

- Previous land invasions from east to west and vice versa were unsuccessful due to lack of efficient transportation made it impossible to assume a continual stream of men and supplies.

In India's case:- trans-himalayan frontier in the north acts as a natural defence to prevent any immediate from north (China).

- The control of vital passes on India-China border is critical to prevent a Chinese transgression.

a) for eg:- Western Himalayas with Askani Climb and its ten important passes b/w Tibet and Ladakh border all under Chinese control constitutes a key concern to India.

b) In Central Himalayas:- Nepal-Tibet border is a vital link in India's defence perimeter as stated by Nehru during the 1950s.

c) In Eastern Himalayas:- the Butan-Tibet border with its proximity to the chumbi valley-Siliguri Corridor (Chicken's neck) which witnessed the recent Doklam standoff of 2017 is another key geographical flash-point in India's border with China.

d) Far-eastern Himalayas:- Assamachal Himalayas - particularly Kameng district close to Tibet-Butan border with the Thag La & Bum La Passes bevents

represents the area from which the Chinese made intrusions during 1962 war.

② Economic development.

- An industrial country is expected to have a higher GNP and can devote greater funds for external purposes on foreign policy.
- Moreover the ability to use aid or purse higher military expenditures is partly limited by the financial ability of a state.

- India's limited economic development made Non-Alignment a key feature of Indian Foreign Policy as:-

- ① as limited economic capability of India at time of independence limits its ability to adopt a militaristic approach.

Complex - interdependence

Keshava and Nye argued that the decline of military force as a policy tool and the increase in economic and other forms of interdependence should increase the possibility of cooperation amongst states.

- Industrially advanced countries are more deeply involved in relations with other countries with stronger economic linkages.
- for example:- India's heavy dependence on oil imports from Gulf countries is a key determinant of its look west policy.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

③ Domestic political and Social Structure.

→ Democratic peace theory: proposes that democratic states never wage wars on each other. The theory states that "Although inter-state war is a rare event in general, war between democracies have been even rarer."

The potential explanations for the existence of this democratic peace are

- ① due to shared culture: disputes must be settled by peaceful means.
- ② Structural/institutional factors: separation of powers along with checks and balances constrain the ability of elected leaders to move countries rarely towards war.

→ within South Asia a number of India-Pakistan conflicts have been triggered for eg - 1965 war, 1971 war & 1999 war when the military establishment in Pakistan has been squarely in charge of its foreign policy.

current affairs the absence of a stable democratic structure in Pakistan has been a key obstacle to betterment of India-Pak relations.

Federalism & Indian Foreign Policy.

→ The prominent rise of regional parties since 1970's and the federalisation of Indian polity has influenced Indian foreign policy as well with an increasing say for states in drafting of Indian foreign policy.

SHUBHRA RANJAN 7

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

① Partner like DMK/AIADMK TN have strongly influenced India - SL relations where India voted in favour of the ONHRC resolution against human rights abuses by Sri Lankan army in its offensive against LTTE in 2013.

② Bengal's reluctance to agree to the Tista water / river sharing agreement has delayed the signing of the treaty with considerable significance for India - Bangladesh relations since 2011.

Impact of Domestic Politics

Moreover Nehru said "foreign policy is an extension of domestic policy".

- Diplomacy & Domestic politics Two level game

- International negotiations can be conceived of as a two level game.

Domestic level - Level II :- Separate discussions within each group of constituents about whether to ratify the agreement.

Level I - International level :- Bargaining b/w negotiators leading to a tentative agreement.

→ An agreement reached at level I needs to be ratified at level II.

Moreover the Parliamentary confrontation affecting foreign policy outcomes occur principally under coalition/minority Govt.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- also many observers have pointed out that Zhou Enlai in 1960 had proposed to Jawaharlal Nehru to explore the feasibility of border settlement agreement under which New Delhi would recognise Beijing's claims in Aksai Chin region for a reciprocal recognition of India's claim in NEFA region by Beijing.

However, the domestic political parties in India, specially opposition parties were stiffly opposed to any such "swap" & resulted in Nehru adopting a hardline approach against any such agreement that was soon followed by 1962 war.

Impact of Social Structure on IFR

- while shared ethnicity can help in fostering P-2-P relations and boost relations b/w countries, in South-Asia shared ethnicity has been a source of distrust rather than harmony. People of Indian ancestry residing in Terai of Nepal.

for eg:- the Madhesi factor and accusations against New Delhi's interference in the domestic constitution drafting process in Nepal in 2016-17 has casted a long shadow on India-Nepal relationship.

- for eg:- Shared ethnicity and the Gauril factor has often forced New Delhi in adopting a hardline

SHUBHRA RANJAN

9.

approach to persistently maintain pressure to ensure a speedy implementation of the LLRC (Lessons Learnt and Reconciliation Committee) & 13th Amendment 1978.

④ International environment.

Historically International environment has had a major influence on foreign policy of India since Independence.

a) for eg:- the cold war and the Bipolar world era had a major influence on Indian foreign policy and saw India adopt a policy of Non-Alignment driven by concern to maintain (Sovereignty) of its foreign policy, to maintain friendly relations with both blocs and also derive from them with ease.

b) for eg:- The Sino-Soviet conflict during late 1950s and early 1960s following the rivalry b/w Russia and China to take over the leadership of the Communist bloc (Mao-Khrushchev rivalry) had a major impact on Indian foreign policy.

In 1962, China attacked India. India fought a war and lost. This led to the emergence of (1965) Sino-Soviet conflict and bipolarity of International relations to an extent USA - China - Pakistan (1960s) led to the emergence of axis and posed a major threat to India's interest. Prolonged Soviet presence in Afghanistan post 1979 further strengthened USA - China - Pak axis and further compelled India to move towards Soviet Union with respect to Security dimension of its policy.

1971

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

③ The post-cold war era Post 1990 - Saw the shift towards a unipolar world era and emergence of USA as a sole superpower. This along with a rise of China and Chinese assertiveness has resulted in a tilt in Indian foreign policy towards USA. Therefore, a structural transformation of India's international environment would necessarily involve a radical change in shape and direction of Indian foreign policy.

④ Military Strength

Developing country like India tends to invest its scarce resources primarily in Economic development. However, external environment may sometimes pose such a threat to external security of a state that it is compelled to augment its military strength as a "necessary evil."

There is a theory that China wanted to attack so we will all be in a war.

- for eg:- Nehru's foreign policy based on diplomacy rather than on military power was forced to undergo a reeval post the 1962 Indo-China war. Also four wars since Independence with Pakistan compelled India to augment its defence capabilities adopting a more realist approach.

for eg:- China's N-weapon's capability and its aid to Pak have compelled India to adopt a strategy of Common Minimum Deterrence (CMD).

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

11

→ At the same time, pursuing a militaristic approach with rapidly increasing military expenditures may alarm and antagonize other states that it may trigger an arms race b/w states.

It will divert economic wealth to military expenditure & there will be arms race & less development.

for eg:- rapidly increasing military expenditures may by Germany during early 1900s particularly in the naval sphere triggered an arms race with Britain and France pursuing similar efforts that pushed Europe towards WWI.

The two world wars were beg of the arms race & it is also linked to colony.

Role of History

- Bitter historical experiences of Imperialism, colonialism and racial mistreatment lead a significant impact on the formulation of Indian foreign policy that led it towards a non-aligned approach in the foreign policy arena post independence.
- According to A. Appadurai, the British rule made in India had a two fold impact on India's foreign policy.

Firstly it gave a stimulus to the national movement for freedom which in turn led to India lending support to decolonization movements in Asia and Africa. Secondly, racial inequality that existed during the British rule made India commit itself to root out the evils of racial discrimination. India took a strong stance against apartheid in South Africa.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- Also the desire to guard its newly acquired Sovereignty post independence saw India moving towards a non-aligned approach during the cold war era.
- Even the realist legacy left behind by ancient scholars of statecraft like Kautilya have an important bearing on country's approach towards safeguarding its vital interests by coercion if necessary. J. Nehru and Indira Gandhi candidly acknowledged the limitations of idealism to guide state policy at critical junctures. The action that India took in Goa (1961) & Bangladesh (1971) situations symbolized pragmatism.
- Moreover, the experiences of past continue to shape the views of foreign policy formulators in the present.
- for eg:- the historical experiences of 1962 war with China & 1965 & 1971 war with Pakistan continue to shape the views of these countries towards each other.
- However, historical experiences & the differences created due to them can be surpassed in the face of pressing or compelling national interest.
- for eg:- France & West Germany⁽¹²⁾ led efforts to establish a European Union overcoming the historical rivalry of WWI & WWII.

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Geo-politics Of India - Pakistan Relationship

- Pakistan lacks internal "strategic depth" - somewhere to fall back to in the event of being overrun from the east from India.

- While the ^{India} swamplands in the south of Pakistan, the ^{very difficult to fight} Thar desert & the mountains in the north may be relatively difficult territory for an army to cross, the distance from Indian border to Islamabad, Pakistan's capital is less than 250 miles, most of it is flat ground.

In the event of a massive, overwhelming conventional attack the Indian army could be in the capital within few days & from Pakistan army's point of view they need to have Plan A & Plan B to counter such a risk.

Plan A is to halt an Indian advance in Punjab region & possibly counter-attack across the border & cut highway 1A which is a vital supply route for the Indian military.

Plan B is to fall back across the Afghan border if required & that requires a sympathetic government in Kabul.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Hence geography has ~~ded~~ dictated that Pakistan will involve itself in Afghanistan, as well as India.

Strategic importance of Balochistan :

With almost 44% of Pakistan's landmass & 5% of its population. Balochistan is perhaps Pakistan's most strategically important province.

- In the north, the region shares border with Afghanistan. Its western districts make up the border with Iran. In addition, its 1000 km coastline is almost 2/3 rd of Pakistan's coastline. Three of Pakistan's naval bases are located on the baloch coast - Ormara, Pasni & Gwadar.
- In addition to providing ^{to} Pakistan with a deep water port & the potential for millions of dollars in revenue given its location adjacent to the Strait of Hormuz, a key oceanic trade route / choke point.
- When fully developed, Gwadar is likely to provide the Pakistani navy with strategic depth. This is something that the main naval base at Karachi does not. In fact Karachi had been blockaded & attacked by India in past.

Chagai in Balochistan is home to Pakistan's nuclear testing sites. Additionally, Balochistan's immense area allows Pakistan the flexibility to scatter its nuclear arsenal & thus protect it from potential attacks.

SHUBHRA RANJAN

Culture as a Determinant of Foreign Policy

- * Joseph Nye conceptualized a theory on "soft-power" in the post-cold war era.
- * Soft power was conceptualized as the power of attraction or the ability of a state to attain its objectives through attraction or co-option rather than coercion.
- * Soft power needs to be differentiated from hard power. The latter involves the use of coercion i.e. military or economic to pursue state objectives. *↳ hard power*
- * Nye claimed that "soft power" is not a substitute for "hard power" & cultivation of soft power requires allocation of significant "hard or economic resources" as well.
- * Soft power of a state aims to capitalize on the inherent attractiveness of a country's cultural, political ideals & domestic & foreign policies.
- * Nye argued that exercise of soft power by USA would make the exercise of its power more legitimate in the eyes of other powers/state actors. For Nye, the basis of USA's soft power has been liberal democratic policies, free market economics & fundamental values such as human rights in essence, liberalism.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- The post cold war era between 1990 - 2010 saw there "American values" being imbibed by the non-western world, everyone wanted to vote, everyone wanted free speech, everyone wanted jeans & hollywood. The number of liberal democracies rapidly grew & USA did drive to establish & enlarge new international institutions that would support the new world order as prescribed by it such as WTO, World Bank & IMF.
- Hard power is considered tangible & is relatively easy to measure. Moreover, it can be easily wielded or more effectively put to use by state actors.

In contrast, soft power assets are considered relatively "intangible" to the extent that one cannot "hold" a nation's culture in one's hand as one might hold a gun or monetary instrument.

Economic Surplus
2020 CAP TSA

- * Also key instruments of projection of soft power for example: tourism, commercial cinema, yoga etc. may not be directly under state control.
- Finally, an effective assertion of soft power requires the use of public diplomacy. Public diplomacy is the process by which direct relations with people of another country are pursued to advance the interests of one's own state/country.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Public diplomacy aims to create/build long term relationships that create an enabling environment for government policies.

India's soft power : status, issues & challenges

- Jhauroo argues that India's soft power is multi- & includes sports, music, art, films, yoga, food, tourism etc. others have argued that India's anti-colonial history democratic institutions, free press, the large presence of Indian diaspora in Europe, USA, Africa etc. all are also part of its soft power.
- Rohan Mukherjee argues that while India has plentiful soft power resources at its disposal, it has yet not fully utilized its soft power toolkit, an assessment frequently heard about China as well.
- Also official & semi-official modes of Indian cultural dissemination & soft power projection are relatively few. For example : organizations like British Council, Alliance Francaise, Japan Foundation have been promulgating the respective cultures of the corresponding great powers. They have more recently been joined by China's Confucious institutes which stood at 517 in 2017.

Impact Of Political Institutions On Foreign Policy

While geography, economic development, political tradition, domestic & international milieu, military strength etc. constitute the boundary conditions within which decision making in foreign policy must take place, the rationality or otherwise of a foreign policy depends largely on the processes adopted at various levels, particularly the institutions concerned with drafting of foreign policy.

For example :

a) Cabinet

b) Parliament

c) Pressure Groups

d) Inter-Ministerial Institutions :

- PMO : Prime Minister's Office

- National Security Council

e) Ministry of Foreign Affairs

a) Cabinet

Political Party ultimately responsible for foreign policy formulation is Cabinet. But even cabinet is too large a body to take all decisions. The Cabinet Committee on Security (CCS), a subcommittee composed of PM, Minister of Home Affairs, Minister of Foreign/External affairs, Minister of Finance & Minister of Defence decides most of

2

the issues affecting vital foreign policy & national security issues.

⇒ During the Nehru era, PM was seen merely as informing the cabinet rather than involving them in decision making.

⇒ Under coalition govts. views of cabinet members, specially coalition partners becomes important

for example :

The India - USA civil nuclear deal of 2008 was bitterly opposed by left partner parties part of the UPA coalition.

Also, the nuclear liability act of 2010 was passed with major amendments to accomodate concern of left parties.

b) Parliament

The primary role of the parliament is to hold the executive accountable for its policies / actions including in the foreign policy arena.

⇒ Under the USA presidential system, the senate has a key role in exercising a check on the foreign policy of the President.

For Example :

Treaties signed by President require ratification from senate to come into effect & so do major decisions like declaration of war.

⇒ However, under the Indian parliamentary system, the check of parliament on the executive's foreign policy is relatively weak.

3.

- ⇒ Under the Indian Parliamentary system, war could be declared by govt. without the need to obtain any formal authorization from parliament.
- ⇒ Members of Parliament may propose motions/resolutions to deliberate on range of issues & in doing so push the govt. to justify its decisions.
for Example :
During the Doklam stand off with China in 2017, questions raised in rajya sabha resulted in the executive represented by the minister of external affairs to offer an explanation on government moves & future strategy to deal with the issue.
- ⇒ Extreme measures such as ceding Indian territory to any other country requires a constitutional amendment & thus a parliamentary approval as pointed out in Berubari Case of 1960.
- ⇒ Due to restrictions/checks the much delayed Land boundary agreement with Bangladesh was finalized only in 2015; as previously during the UPA II tenure, the BJP led opposition had not supported the constitutional amendment.
- ⇒ Beyond these limited restrictions, no legal mechanism exists in India by which govt. is required to seek parliament.
- ⇒ any endorsement in pursuit of foreign policy except for extreme measures such as vote of no-confidence.

Role of Pressure Groups

⇒ Pressure groups / interest groups exist in most democracies. They aggregate, articulate & ventilate particular interests groups of different sections of the population.

Role of Business Groups :

Manmohan Singh said in 2004 "It is on foundation of people-to-people & business-to-business people that we in government try to build state-to-state relations."

- "Many have argued that perhaps its no longer trade that follows the flag but flag that follows the trade."
- In his paper - Sanjaya Baru "Growing influence of Business media on foreign policy" (2009) argues that the Nehruvian era had a relatively small size of Indian business class which followed a inward looking approach. Predominantly geo-political considerations of cold war era & the priorities of nation building saw a state led socialist model of economic planning being adopted with little role for business groups in crafting, Indian foreign policy.
- The Rajiv Gandhi era (1985-1989) saw a movement towards liberalization, which opened a new era in govt.-to-business relations.

{5.}

- 1990 - saw the end of cold war , the Uruguay round of negotiations moving forward towards establishment of WTO & the success of Indian IT industries saw a rise in their profiles.
- 1995 - FICCI & CII moved towards a greater involvement in drafting of foreign policy . CII became active in Track II diplomacy & strongly supported the adoption of look East policy & invited Singapore PM as chief guest of its 100th anniversary celebrations in Calcutta in 1995.
- FICCI & CII organized partnership summits & became a major diplomatic event where prominent foreign leaders were invited routinely.
- The increasing interests of business in foreign policy was a result of India's shift away from protectionist measures , the rise of China as a business rival & the growing outward orientations of Indian business .
for eg: Indians are the 4th biggest investor in U.K. currently. Moreover Indian business have increased their footprint in USA as well as Africa ; for eg: Ethiopia , South Africa , Kenya etc.
- Indian business leaders have been investing in Track II diplomacy such as Mukesh Ambani group funded the formation of Observer Research Foundation (ORF) & Ratan Tata was founded & participated regularly

{6}

in CII - Aspen strategy group on India - USA relation since 2001.

- Business leaders today influence agenda set, facilitate meetings between officials & politicians & fund political parties. For eg: the Hinduja's diplomatically active in USA & UK through political lobbying generated support for India - USA civil nuclear deal of 2008.
- As the outward investments of Indian business have increased dramatically in IT sector, BPO sector in Western markets, The sharp decline in India - Russia economic relations in 1990's & comparably a similar dramatic increase in India - USA trade relationship (130 billion \$ in 2017) & India - China (80 Billion \$ in 2017) trade have had significant influence over drafting of Indian foreign policy.

Inter - Ministerial Institutions

- a) PMO : Prime Minister's Office has historically played a key role in the drafting of Indian foreign policy.
- Under the Nehru era from (1950-64) all major foreign policy moves were initiated by PMO which became the fulcrum of Indian foreign policy. For eg: Nehru's initiative was a key factor behind New Delhi launching the Non-Aligned policy & movement during the 1950's.

{7}

- The Indira Gandhi era 1967 onwards saw a decisive tilt towards Soviet Union taking the form of India-Soviet Union Friendship treaty of 1971.
- Moreover, 1997-98 period under I.K. Gujral saw the articulation of Gujral doctrine under which it was argued that New Delhi must not insist on quid-pro-quo from its smaller South Asian neighbours & must be willing to grant unilateral concessions to fulfill the strategic objectives of Indian foreign policy.
- Under PM Modi's period ; the foreign policy has seen a distinctive focus on engaging the Indian abroad in USA, Europe & beyond. (Diaspora)
- K. Subrahmanyam has argued that PMO enjoys a pre-eminent role in drafting of Indian foreign policy. He stated "Indian foreign policy is always a leadership function & more often than not, does not command consensus."

b) National Security Council :

Since independence, decisions regarding security, both internal have been centralized with little deliberation & no institutionalization. The flaws in this type of ad-hoc setup were shown in 1962 war.

8

- To correct these deficiencies in planning & decisions making the National Security Council (NSC) was established in 1998.

- The National Security Council is composed of :

(1) NSAB :

National Security Advisory Board : with members chosen from subject experts, retired officials & bureaucrats. It serves an advisory role.

(2) NSA :

National Security Advisor : The NSA receives intelligence reports & coordinates them to present before the PM.

(3) JIC :

Joint Intelligence Committee : It serves as a nodal agency that analyzes intelligence data from IB, RAW & Directorates of Military, Naval & Air intelligence.

(4) SPG :

Strategic Policy Group : It is the nucleus of the decision making apparatus of NSC. It is the principal organ for inter-ministerial bureaucratic consultation & is composed of Cabinet, Foreign Defence & Home Secretary, Chief of Army, Naval & Air Staff etc. The SPG is headed by NSA.

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

* Role Of NSA & Scope for Reform :

Since the appointment of the first NSA, Brajesh Mishra in 1998 the position of NSA has been shared alternatively between MEA (Ministry of External Affairs) & Intelligence Bureau heads (IB).

- Moreover, the role of NSA in the formulation of Indian foreign Policy has grown by leaps & bounds. For example in the immediate post 1999 era, Brajesh Mishra, the first NSA strongly advocated relations with USA.
- or more recently, with the appointment of Mr. Ajit Doval as NSA since 2014, there has been an enumeration of what has been termed as "Doval Doctrine." It is argued that under this approach, on security related matters, India has taken a more hardline approach by authorizing "Surgical Strikes" against insurgent & terror groups across borders in Myanmar in 2015 & in Pakistan in 2016.
- The "Doval Doctrine" apparently would involve a greater use of intelligence services & covert operations & diplomacy is likely to take a backseat while dealing with security challenges emanating from neighbours.

(10)

* Scope for Reform :

- Arvind Gupta in his book "How India Manages its National Security_" argues that currently the NSC & NSA have no legal / constitutional imprimatur. The NSA derives his power from closeness to PM. He argues that NSA should have a rank of Cabinet Minister.
- Shiv Shankar Menon has previously argued for the need for position of NSA being given a legislature backing given the rising salience of this position in the foreign policy & security architecture of the state.

MEA : Ministry Of External Affairs

MEA is the principal government instrument for formulation & implementation of foreign policy.

* Structure & Composition of MEA :

- The foreign secretary is the senior-most bureaucrat in the ministry responsible for overall supervision & coordination.
- IFS officials, selected through UPSC primarily man the MEA.
- Within MEA, placed below the Foreign Secretary (FS) are four secretaries & the work of MEA is broadly divided into 24 divisions. There are 12 territorial divisions such as Canada & America, Gulf, East Asia etc. There are 11 functional divisions like protocol, External Publicity, UN etc.
- The IFS officers are sent abroad to head Indian offices & are expected to perform a variety of functions from providing consular access to Indian nationals abroad, for maintaining links with diaspora etc. However the most vital function performed by Embassies is that they serve as "eyes & ears" of government abroad & gather information that may not be openly available through other sources.

MEA : Issues & Challenges

- In a recent paper "India's Foreign Policy Capacity" by Kanti Bajpai & Byron Chong (2019) an important question has been raised : whether India's foreign policy establishment has the prerequisite capacity to play an effective role in realising its greater ambitions, both in neighbourhood & beyond.
 - The following set of issues have been identified which demand more attention for reforms.
- (1) Critical Mass of Capable Officers & Information Infrastructure
- (Markey 2009) notes that IFS is extremely small compared to other major foreign services. Even the MEA accepts that the current strength of service is too small to meet the needs of India's external commitment & stood at 708 in 2007.
- Though the number of sanctioned positions have steadily increased from 708 in 2007 to 941 in 2017, almost by 33% over the last decade, actual numbers of appointed officers remained low at 770 (China's Strength 4500).

SHUBHRA RANJAN

13

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- India has the smallest number of diplomats amongst G-20 & BRICS countries.
- The Sashi Tharoor Committee (2016) points out that there is a serious disconnect between the foreign policy priorities of India & the language skills of its diplomatic corps. for example : only 559 of 770 officers have proficiency in any non-Indian language.
- While the government has prioritized its neighbourhood first policy, there are no diplomats with proficiency in either Bhutanese or Nepalese & a mere two with a knowledge of Pashtu & only 3 diplomats with the ability in Sinhalese.
- China is the only priority country that is adequately served by language proficient diplomats, 75 diplomats have proficiency in Chinese.
- The lack of number of officers & inadequate language skills is most evident in Africa where over two dozen embassies remain headless & most serving diplomats have no knowledge of local language.

19

(2) Internal Organizational Structure

- Kishan S. Rana (2014) argues that the organizational structure related challenge for MEA is its highly funneled & pyramidal structure.
- Rana notes that at the top within the ministry, there is one Foreign Secretary (FS) & 4 other secretaries. The FS is the head of IFS, direct supervisor of relations with 12 or more key partner states & a vital advisor of PM & external affairs minister when they travel abroad.
- Rana notes that while the FS is terribly overworked with both administrative supervision related issues within ministry & larger policy issues, the 4 secretaries in the second tier in the ministry's hierarchy carry a much lighter load than the foreign secretary. There needs to be a better rationalization of work responsibilities at the top of organization.
- Rana points out that despite calls for reforms, the structure at top has remained the same leading to delays in decision making & coordination with other ministries & foreign partners.

SHUBHRA RANJAN

TS

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(3) Relationship with other political institutions

- the External Affairs Minister is a key member of Cabinet Committee on Security (CCS), while MEA officers are posted in PMO, NSC etc.
- The position of NSA since 1998 has on regular intervals been offered to IFS officers. In addition MEA increasing deals with domestic state units under its federal architecture & has established a separate unit, i.e., States division within MEA for para-diplomacy.

By & large the relationship of MEA to political institutions is a correct one, it is non-partition & firmly under political control.

(4) Communication with other agencies & public :

- Bajpai (2019) argues that MEA's communication with public has historically been quite restricted. It is only in the past 2 decades that the position of ministry's spokesperson has been given more importance.
- With the explosion of television & social media, the office of spokesperson has grown in importance.
- However it was only in 2006 that the MEA established its public diplomacy division.

16

- The most public form of outreach is either ~~passive~~ passive i.e. via MEA's website or more active via Facebook / Twitter. However most MEA communication is in English & thus a large audience in India cannot understand what is being said.
- As a part of more active outreach to public, the ministry has recruited retired ambassadors to give public lectures in Indian universities since 2010.
- Indian Embassies public outreach abroad is also rather limited & embassies rarely organize large public events to showcase India.

Overall as Kishan S. Rana argues that wrt to IFS/MEA the "glass half full" view of the service needs to be replaced by "glass getting fuller" view indicating that foreign policy capacity had increased but still had significant weaknesses.

Influence Of Media On Foreign Policy

The media has an obvious role in shaping public opinion on foreign policy issues in a democracy. However, the influence of media on foreign policy is shaped by two important factors.

Firstly, the extent of domestic political disagreement or consensus on foreign policy issues.

Secondly, the relationship between the government of the day & media.

- Indian foreign policy was marked by a high degree of domestic political consensus in the initial years after Independence. Moreover, the domination of Nehru & Congress ensured media at best, had a marginal role to play.
- The Indian state's approach towards media historically has been to "win" over the media towards its point of view rather than being influenced by any independent thinking within the media.
- The media is viewed as an instrument for promoting the government's view point, not as the "fourth estate".

®

whose "independent" voice must be heard. During the cold war period, the government of the day were successful in securing broad media support for their foreign policy.

Ironically, a substantial part of the work of the external policy division of the ministry of external affairs has in fact been in dealing with domestic media rather than international media.

This division is more often engaged in seeking internal publicity for external policy rather than external publicity for internal policy.

Equally, it is difficult to offer any example where the government of the day has altered its policy in foreign affairs due to pressure from the media. The Indian diplomats take pride in claiming "they can get media they want."

Increasing Role Of Media In 21st Century

Since the 2000's, there has been a breakdown of the domestic political consensus on foreign policy issues & with the pervasive influence of 24x7 television news channels.

- The increasing role of media in shaping Indian foreign policy has been driven by :
 - (i) the gradual erosion of domestic political consensus on foreign policy.
 - (ii) Media revolution & expansion with the rise of television & business journalism & the growing importance of private corporate advertisement revenues as apposed to government support for media.
 - (iii) Increasing relevance of business & middle class preferences for media policy will count for more in shaping media thinking on foreign policy.

A recent example of media playing an important role in shaping public opinion & generating public support for foreign policy move of the government was visible when India - USA civil nuclear deal of 2008 was widely supported in the Television media strengthening the UPA government position against criticism from left parties.

- 20
- Sanjaya Baru argues that Indian media does not yet view itself as an active player in foreign policy. One important reason is that Indian media is yet to find a business model/plan to justify greater coverage of foreign policy issues & posting of foreign correspondents in major foreign capitals & neighbouring countries.

There has infact been a scaling down of foreign correspondents with most Indian media houses drawing on news put out by foreign news agencies & partners.

For example :

While China has emerged as India's one of the biggest trading partners & its significant neighbour, only 3-4 media organizations have correspondents stationed in China.

Geopolitics of Arctic and Climate change

Global climate change has catapulted the Arctic into the centre of geopolitics, as melting Arctic ice transforms the region from one of primarily scientific interest into a maelstrom of competing commercial, national security and environmental concerns, with profound implications for the international legal and political system.

For the last few years, the Northern Sea Route along Russia's north coast has seen significant changes, providing Russia with greater access to its vast Siberian resources and leading to bold assertions of its sovereignty over vast swathes of the polar sea. Indeed, the region has already opened to global commerce with the announcement on 21 August 2009 that, for the first time, two German commercial ships unaccompanied by icebreakers were traversing the Northern Sea Route on a voyage from Vladivostok to the Netherlands.

The prospect of longer ice-free periods in the Arctic has momentous implications for the region's commercial development, which risks further melting of the Arctic ice.

In addition, new technological developments in marine surface and undersea logistics, as well as deep-water drilling technology, have increased the salience of issues relating to the extension of coastal states' respective continental shelves under the United Nations Convention on the Law of the Sea (UNCLOS) and the Commission on the Limits of the Continental Shelf (CLCS).

Arctic melt does and will continue to pose economic, military and environmental challenges to governance of the region, and that technological factors will most likely be a barrier to access in the short term and an enabler in the longer term. Decreased sea ice gives countries more opportunities to plant infrastructure to enable the exploitation of hydrocarbons and minerals, and to gain greater access for commercial shipping and fishing.

Resources and shipping routes

The ice there has locked up vast caches of natural resources, including an estimated 13 percent of the world's undiscovered oil and 30 percent of undiscovered natural gas.

While the Arctic may have tremendous potential in the long run its contribution to energy resources in the short term should not be overestimated, as other areas are cheaper, less contentious and less technologically challenging to exploit.

The technology required to recover Arctic resources year-round is not readily available, and will not become so in the short term. Transport difficulties add to the problems to be overcome. Natural gas requires pipelines or expensive and complex liquefaction infrastructure. The former is the less likely option, because pipelines would have to cover very large distances. With technological breakthroughs in the development of shale oil resources in the lower 48 states over the last several years, meanwhile, US natural gas reserves have nearly quadrupled.

Technology is a key barrier to Arctic access in other ways. Icebreakers, many nuclear

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

powered, are necessary for presence and power projection in the region year-round. The various Arctic nations have widely divergent capabilities. For example, Russia has 20 icebreakers; Canada has 12, and is working on budgeting for 8 more; the US has, to all intents and purposes, just one functional icebreaker.

In addition to hydrocarbon resources, new shipping routes opened up as the Arctic ice vanishes will reduce substantially the maritime distances between Europe and Asia, while also providing strategic alternatives to other countries such as Japan, which would have an interest in Arctic access owing to its current dependence on shipping through the Strait of Malacca for most of its energy supplies.

Use of the North-West Passage over North America could shorten shipping routes between Asia and the US east coast by 5,000 miles. However, even though Canada is a strong ally of the US, there are disputes between the two countries over the waters of the Canadian archipelago, which Canada claims are internal waters not subject to the conventions of 'innocent passage',¹⁶ while the US regards them as a strait for international navigation, through which ships should be allowed to pass without interference by Canadian authorities.

If the waterway does indeed become ever more ice-free in the future, Canada will be forced formally to resolve its dispute with the United States over the status of the North West Passage.

The Northern Sea Route over Eurasia is also important since it shortens shipping routes between northern Europe and north-east Asia by 40 per cent compared with the existing routes through the Suez or Panama canals,¹⁸ and takes thousands of miles off maritime routes round Africa or Latin America.

Moreover the potential benefits of an ice-free Arctic throughway include the ability to avoid dangerous chokepoints beset by piracy and lower transportation costs

Finally, the potential for dangerous weather patterns to emerge in warming waters, combined with difficult-to-navigate broken ice and the lack of adequate maritime traffic management, make Arctic transit a treacherous undertaking even under the best of conditions.

Hydrocarbon prices and concerns about energy security are key drivers in accelerating interest in the Arctic, since high energy prices will generate new technological developments that are difficult to justify with prices even at current levels.

Governance

The Arctic is geologically complex, largely uncharted, and rife with overlapping sovereignty claims that will affect all commercial activities involving hydrocarbons and fisheries and will have a momentous impact on the region's indigenous population.

States with territorial borders in the Arctic, as generally defined, are the US, Canada, Russia, Denmark (via Greenland) and Norway (via Svalbard)—together known as the

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

'Arctic Five'. While possessing no direct borders on the Arctic Ocean, Sweden, Finland and Iceland are also usually considered Arctic states,

Strengthened legal and regulatory frameworks in the Arctic will be necessary to attract international investment and development. The debate on the future of Arctic governance centres on whether to create new or use existing multi-national frameworks. Although the US enforces UNCLOS without having ratified it, it lags behind the rest of the Arctic states on its Arctic policy and in asserting its presence.

Geopolitical rivalry between USA, Russia & China

The melting Arctic is opening up the once isolated region to more shipping, tourism, mining, and oil exploration. Climate change is warming the Arctic, which helps regulate the rest of the earth's climate, at a faster rate than the rest of the world. Where scientists warn of crisis from the cascading effects of a thawing Arctic, others see opportunity. It's also becoming a battleground once again in the standoff between Russia and the West.

Russia is dramatically expanding its military footprint in the Arctic as tensions roil further south, though still not at levels seen during the Cold War. Moscow has modernized and expanded its Soviet-era Arctic bases, including on the Kola Peninsula near Scandinavia, where its massive Northern Fleet is based. The expansions include facilities to house nuclear missiles and long-range cruise missiles pointed at North America and Europe.

Moscow also has high hopes of turning the opening Arctic into a Russian-dominated waterway as ice melts, opening new avenues for maritime trade. At an International Arctic Forum in St. Petersburg in April, Russian President Vladimir Putin outlined plans to expand commercial shipping across the Arctic Ocean. Without summer ice, traversing the Arctic could drastically shorten maritime shipping routes between Europe and Asia, and it could grow to rival other strategic trade corridors including the Suez Canal and Strait of Malacca. "We need to make the northern sea route safe and commercially feasible," Putin said.

China, meanwhile, has planted its own diplomatic flag in the Arctic, declaring itself a "near-Arctic state" and outlining ambitions to create a "Polar Silk Road" with other countries to boost trade and commerce through the region. China has shoveled money into infrastructure projects and building sprees wherever it can find willing partners, including in Iceland and Greenland. Beijing maintains that they are purely commercial projects, but Washington and other Western capitals see the moves as a geopolitical ruse to get its foot in the door on Arctic claims.

Greenland, the self-governed territory in Denmark's kingdom, has emerged as a microcosm of the intensifying commercial tussles and a potential crown jewel in Beijing's Polar Silk Road. Last year, China developed plans to finance and build three airports in Greenland, whose cash-strapped government welcomed the prospect of foreign investment. The plans sparked fears in Washington, particularly at the Pentagon, that Beijing could take control of the airports and create a beachhead in the Arctic if Greenland lapsed on loan payments. A last-minute dash by the U.S. and

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Danish governments to squeeze China out of the projects averted those plans. But it's unclear if Washington can fend off Beijing's Arctic ambitions at every turn.

Even NATO, which in the past has avoided discussions about the Arctic due to political sensitivities, is getting into the game. Last year, NATO conducted a massive military exercise with tens of thousands of troops in Norway aimed at strengthening its ability to operate in Northern Europe. It included the U.S. aircraft carrier *USS Harry S. Truman* sailing into the Arctic Circle to train—the first such move in decades.

"Russia is increasing its military presence in the Arctic ... investing in reopening Soviet-era military bases," said Dylan White, NATO's acting deputy spokesperson. "NATO is monitoring Russia's Arctic buildup carefully."

As Russia, China, and some NATO countries charge ahead, the United States is struggling to catch up. The U.S. Coast Guard has only two aging icebreakers in its fleet capable of punching through thick Arctic ice, one of which is normally deployed to Antarctica, compared to Russia's 40. Moscow plans to expand its fleet of heavy icebreakers to 13 by 2035, including nine nuclear-powered icebreakers, compared to the four it has now.

While U.S. President Barack Obama's administration appointed high-level envoys to oversee a new Arctic policy and released a national strategy on the Arctic in 2013, it devoted few resources to back up its ambitions. Now, under President Donald Trump, the U.S. government has done little more, some analysts say.

A Pentagon report on China released in May also outlines growing concerns over the prospect of China's submarine fleet operating in the Arctic more frequently.

The U.S. Coast Guard, in a new strategy on the Arctic, has called for boosting the U.S. presence in the region to counterbalance Russia and China. "Over the past 15 years, the Nation's strategic competitors have invested heavily in Arctic-capable assets, infrastructure, and relationships, some of which are targeted at eroding the influence of America and the rule of law," the document reads. "U.S. investments over that same period of time have been comparatively modest."

India - Bhutan Relations

Chapter Outline

- 1) Background
- 2) Friendship Treaty of 1949 & its significance.
for framing foreign policy India helps.
- 3) Revision of Treaty :- India Bhutan friendship treaty of 2007.
under this foreign policy suggestion was cancelled.
- 4) India Bhutan relations issues
 - a) Doklam issue & China factor.
 - b) India - Bhutan :- Military Cooperation - (Security issues)
14% of GDP
 - c) Trade & Hydropower cooperation.
 - d) Recent- 2018 elections ^{in Nepal} & its impact on India-Bhutan relations.

Background

- Among India's South Asian neighbours, India's relations with Bhutan remain a model worthy of emulation.
- The type of trust deficit shown by India's South Asian neighbours is not visible in Bhutan's attitude towards India.
- Both partners have historically shared a very close relationship with each other.

Evolution of India - Bhutan Relations

1910 - Treaty of Punakha :- signed during the colonial era was a modification of 1865 treaty between British India & Bhutan.

The treaty :-

- 1) guaranteed Bhutan's independence.
- 2) granted Bhutanese royal government an increased stipend.
- 3) took control of Bhutanese foreign relations and foreign policy. British India took control of Bhutanese foreign Relation.

1949 - India Bhutan treaty of Friendship & Cooperation

- The treaty's origin can be traced back to the Treaty of Punakha.
- Signed by the newly independent governments of Bhutan & India in 1949 the treaty stated that "Bhutan & India are natural partners with an inseparable future."

The features of the Treaty are:-

- i) Article 1 :- India Bhutan friendship treaty is for all times to come. (Big Brother & Small Brother)
- ii) Article 2 :- Suggests that Government of India should shall not interfere in the internal

③

affairs of Bhutan. In return, Bhutan gave an undertaking that it would be guided by India in context of its international relations.

iii) The treaty provided for special provisions like Visa-free travel national treatment of goods etc.

Significance of 1949 Treaty

- The treaty historically guided India-Bhutan relationship.

This has been visible in the past when:-

a) Bhutan stood by India in wake of 1962 war.

b) Bhutan rejected the "package deal" offered by China since 1990, more so in 1996. The package

BCR accord to
Groundship treaty
may not allow
border crossing
Bases in Bhutan
which can affect
sovereignty of
China.

deal offered by China and Bhutan to concede its claim in Chumbi valley (Doklam region)

(400 sq. km), while China would give up competing claims in Northern Bhutan region (900 sq. km).

c) India has provided developmental assistance to Bhutan's five year plans. Since the Nehru era, since Bhutan's first five year plan of 1961.

(for eg - 11th five year plan pledged 4500 cr in assistance to Bhutan (2012-17))

 **SHUBHRA RANJAN**

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

1926-1952

- King Jigme Wangchuck was the second king of Bhutan from (1926-1952). Under his reign, Bhutan maintained a policy of isolationism and continued to take advice on foreign affairs from British India.

1948-1958: PLA aggression in Tibet.

1959 → Dalai Lama came to India.

- Under King Jigme Dorji Wangchuck (1953-1972) a sharp foreign policy shift was noticed in 1959, when Bhutan allowed India to build its first motorable road from near the Indian border to the country's capital Thimphu covering a distance of 175 km.

Dantak.

It would not be an exaggeration to state that this decision reflecting Bhutan's willingness to move south towards India was a response to Chinese occupation of Tibet in 1951.

→ This move closely followed J. Nehru's first official state visit to Bhutan in 1958.

1972 onwards

Bhutan adopted the concept of Gross National Happiness. At the domestic level, hydropower development received priority with Indian collaboration.

By using hydropower they made Bhutan dependent on India.

 **SHUBHRA RANJAN**

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

for eg:- Chukha Hydro Power Project was initiated in 1978 & built under a 99 year agreement between India and Bhutan whereby India provided a financial assistance that was 40 percent loan & 60 percent grant. along with a power buy-back agreement with India. ⑤
but now network have changed so loan 40% grant leading to higher debt for Bhutan

- Moreover rapid construction of road network in Bhutan Indian assistance under BRO (Border Roads Organisation) since 1961 took off in a major way. Over the years, Project Dastak constructed 1500 km of roads, airfield at Paro etc. even helped at THIMPU.

India - Bhutan friendship Treaty of 2007 → New democratic govt came.

- From a guiding role in Bhutan's modernization, India & Bhutan now standing as "close-friends" & "equal-partners" in the global arena. → not attracted from the friendship treaty 1949

- Article 2 of 2007 treaty replaced Article 2 of 1949 treaty:-

The 2007 treaty, Article 2 stated - India and Bhutan "shall cooperate closely with each other on issues relating to their national interest. Neither government shall allow the use of its territory for activities harmful to the national security & interest of other." So they didn't accept the package of China.

 **SHUBHRA RANJAN**

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Significance of Revision of Treaty

- The treaty 2007 addressed any fears among Blutinese elite, against the possibility of India unfairly holding Bhutan hostage for its own geopolitical interests.
- India anyways, had never invoked Article 2 of 1949 treaty in the past. If anything, the clause had been a burden for it allowed Indian adversaries to accuse it of having 'hegemonic & expansionist ambitions'.

Bhutan moved towards a pro-active, independent foreign policy 2007 onwards, Thimpu's diplomatic ties rose from 25 in 2011 to 53 in 2013

Bhutan's
Nepal's shift towards democratic political structure

2005 - first constitution was released and monarch was declared as a constitutional head.

2007 - Bhutan conducted its first ever parliamentary elections.

2012 - Bhutan's P.M Jigme Y Thinley (from DPT party) met the Chinese P.M Wen Jiabo on the sidelines of Rio Summit in Rio-de-Janeiro.

climate Summit.

 **SHUBHRA RANJAN**

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(7)

- Under DPT's leadership Thimpu had broadened its diplomatic ties from 25 in 2011 to 53 in 2013.
- the 2012 unscheduled meet between Bhutanese & Chinese PM on sidelines of Rio + 20 summit caused much discomfort and apprehensions in India. Though no final/substantive deal was reached between Bhutan and China, there were indications that China was willing to settle the border question with Bhutan as it claimed a large part of the Doklam area in the Chumbi Valley trifunction region.
- following the meet, New Delhi accused Thimpu of a lack of transparency and of acquiring a habit of keeping India in the dark even on matters impinging upon its common security. → Article 2 of friendship treaty - 1904

2013 → New Delhi in an apparent signal to Bhutan abruptly cut subsidies on gas & kerosene & fuel leading upto the Bhutanese elections in July 2013.

- The abrupt cutting of oil subsidies was seen by many on Bhutanese side as a direct response to the earlier meeting in 2012 between Bhutan and China.
- Many accused India of adopting a carrot and stick policy with Bhutan, DPT was eventually defeated in 2013 elections.

- DPT's defeat nonetheless reinforced the fear of Bhutan's arm-twisting. Harsh V. Pant argued that the whole abrupt withdrawal of subsidies in 2013 was a manifestation of "how poorly conceived and executed Indian policies had become, completely disconnected from any strategic thinking." → may shouldn't have done this bco some other day it may lead to some other disaster.

India - Bhutan Relations :- The security Angle mounts by political parties.

a) Chumbi Valley and Doklam Crisis

Significance of Chumbi Valley :- located at India, China and Bhutan tri-function. The Chumbi valley is a danger pointed at the so called chicken's neck sector or the Siliguri Corridor, which at its narrowest is merely 30km in its width and is a vital connecting to India's north-east.

2017 Doklam dispute :- the 73-day standoff that began on June 16, 2017 was triggered in the Doklam plateau which is in the Doklam area (Chumbi valley).

- The trifunction is disputed, India claims it passes through Batang La, where as China claims it is around 6.5 km South at Gyemochen.

India said their territory only extends up to Batang La but they continue to build road & other infra.

constructing road with Breat... the... Batang La

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Blutan's Position on Doklam question *Peace & tranquility agreement. (9)*

The 2017 road building exercise by China in Doklam area is in violation 1988 and 1998 agreement between China and Blutan where both sides agreed not to unilaterally alter status quo, pending the final settlement of the border question.

India's Position on Doklam

- As per the agreement between special representatives of India & China in 2012, the two sides have to maintain status quo ^{Existing State of affairs} until their competing claims are resolved in consultation with the third party i.e. Blutan.
- India's June 16th intervention was due to -
 - a) to provide assistance to Blutan, given Blutan's objections to China unilaterally altering status quo. India given its treaty obligations of 2007 provided military assistance to Blutan. *near Dokhla.*
 - b) Road construction activities in the region would represent a significant change in status quo with serious security implications for India.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Current Status - following talks between both sides a "Disengagement" ended the 73 day face off.

- While New Delhi had stated that "Status quo" prior to June 16th would be restored. Several media reports have indicated that troops from both sides have moved only a couple of 100 meters from the face off site.

Implications of Doklam standoff for India-Bhutan Relations

- The 73-day standoff saw India & Bhutan demonstrate close cooperation on a key security and sensitive issue.
- While the standoff demonstrated the strength of India-Bhutan Partnership, some observers P. Stobdan have argued that such situations may engulf Bhutan in a battle between "the two giants." Bhutan will get caught in crossfire
- Stobdan argues that the prevailing sentiment in Bhutan is in favour of resolving the issue with China without further delay so that the country could have a peaceful boundary with its northern neighbour as it has with India.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

(11)

Moreover, the Bhutanese have expressed the fear that a delayed resolution could lead to China toughening its position and reviving maximal territorial claims.

India - Bhutan :- Security Cooperation

- Beyond the Doklam issue, India and Bhutan have demonstrated close cooperation in checking insurgency in India's North East for example, Bhutan extended full support during Operation All clear against ULFA insurgents in 2003.
- Moreover, India trains the Bhutanese army, through the Indian military Training Team (IMTRAT) since 1962 1000 Indian troops are permanently based in West Bengal Bhutan to train the Royal Bhutan Army.

India - Bhutan Economic Relations

Trade relationship and the Rupee or liquidity crunch

- A 2012 study by Medha Bisht for IDS reflected the close economic dependence of Bhutan upon India Bhutan's merchandise exports (95%) & imports (75%) to and from India reflect this dependency.

- the study found that over 60% of Bhutan's government expenditures goes into import of goods from India. Bisht argues that India's limitless budgetary support loans grants and lines of credit in billions of crore including the setting up of hydropower plants has been useful for Bhutan, but also have helped. India maintain close economic engagement with Bhutan.

All the Deals B/w Bhutan & India are done in Rupee which helped Bhutan in foreign exchange purpose.

- However the increasing dependency of Bhutan over India has resulted in a liquidity crunch in 2012 as grant inflow did not match up the rupee outflow.

Balance of Payments crisis.

Imports are more than exports which lead to BOP crisis. Bhutan has to pay back loan which need more loan.

- India increased the limit for Stand by Credit facility to Bhutan to 600 crore in 2011 & in the wake of 2012 rupee crunch crisis, India offered Bhutan a Rs. 10 billion credit line with an low interest rate of 5%.

leading to complete dependence on India.

→ their GDP is 5 billion

Hydropower Cooperation :- Issues and challenges

Background.

India's technical assistance, economic and soft loans have enabled Bhutan to exploit its hydropower potential for eg:- in 2006, the 1020 MW Tala Project.

(13)

was completed with Indian assistance.

- Moreover, its hydropower exports to India are a key revenue generator (forex reserve) for Bhutan as 90% of this hydropower is exported to India.

- India Bhutan decided in 2009 on a target of 10000 MW of hydroelectricity generation by 2020 in Bhutan. This would boost Bhutan's exports to India and reduce its trade deficit with India.

Current Issues in Hydropower cooperation

Suhasini Haider has pointed out that Bhutan has raised with India several issues at the highest level related to hydropower projects.

but during 2006-2018 India had become self sufficient in energy. led to doubt to Bhutan for compulsory market

They are:-

① New projects finalised a joint venture with India have stringent financing terms i.e. high interest rates for eg:- a 70:30 loan: grant ratio for these projects in contrast to funding patterns for previous projects.

led to problems for Bhutan as it had increased its Debt to GDP Ratio to 108%.

2006-2018

② India has become a power surplus country and questions have been raised in Bhutan about the availability of India's market for Bhutan's power exports.

for providing market → want to make electric connections for

SAARC, BIMSTEC

13

Rakshak Energy Group

Repat Group

① Moreover, Delay in projects execution, issues related to settling tariff rates and impact of GST, all such concerns have to be addressed at the earliest.

Also, the 1200 MW Punatsangchu I, the 1020 MW Punatsangchu II and 720 MW Mangdechhu project need to be completed at the earliest.

Way forward for economic cooperation

- The incoming DNT govt. of Dr. Tshering Lotay is well aware of Blutinese exports of Hydro-electricity to India contributing upto 14% of its GDP and 27% of government's revenue. The DNT wants to diversify the economy and reduce its reliance on hydroelectricity given the debt situation with India.
- Also the idea of a SAARC electricity Grid as repeatedly highlighted by India, Bangladesh with Nepal and Blutan needs to be pursued earnestly.
- SAARC electricity grid an inter-connected electricity grids would allow Blutan to export surplus electricity beyond India to Bangladesh which has a huge electricity deficit.

(15)

- As Bhutan looks to diversify its economic linkages beyond hydropower, closer links in areas like Tourism needs to be build between India & Bhutan to promote Eco-tourism to Bhutan.

tourist visa free & low volume high profit. due to increase in tourist led to vast amount of waste

2018 - elections in Bhutan and its Impact on India-Bhutan relations

- The 2018 elections saw the runner up party DPT that was previously in power from 2008 to 2013. argue that "Sovereignty, Security and self-sufficiency" were DPT's top priorities DPT advocated a Bhutanese foreign policy that was less dependent on India.
- Harsh V. Pant argues that much like other smaller states in India's neighbourhood, Bhutan would also like greater autonomy in its foreign and security policies in keeping with the 2007 friendship treaty with democracy taking roots in the country. India needs to avoid any impression of being seen as a nosy external party interfering in Bhutan's internal affairs.

Prof. S.D Muni argues that India has historically shared close friendly relations with Blutinese monarchy and that would ensure certain continuity in India-Blutan relations given that monarchy is a powerful institution in Blutan and continues to shape its foreign policy.

Prof. S.D Muni argues the India would have to eventually prepare for dealing with a Blutinese foreign policy that may look to engage China sooner than later with even a full establishment of diplomatic relations.

- He argues that there is no reason to believe India would not accept Blutan's establishment of diplomatic relations with China in future if its core interests of preserving security, peace and positive business climate are not disturbed.

- Sahasini Haider also has pointed that out that India needs to be mindful of Sovereignty & Sensitivity related concerns of Blutan

Conclusion

(17)

- PM Modi's first visit after 2014 elections was to Bhutan signifying the importance of this historical friend in India's neighbourhood.
- Both countries are currently celebrating 50th anniversary of diplomatic relations & India-Bhutan relations have been a model worthy of emulation as has been pointed out by India.
- Bhutan has been largely mindful of Indian sensitivities even Doklam, is yet to establish full diplomatic relations with China. Moreover, Bhutan has been the only other South Asian country that boycotted OBOR conference in Beijing in 2017.
- Going into the future the idea of "Bhutan - Bharat made for each other" paradigm highlighted by PM Modi in 2014 to enhance development cooperation and economic ties between the two must be the guide.

India-Bhutan relations: recent advances since the Doklam Standoff of 2017

India's role in Bhutan's economy is enormous too. India is Bhutan's largest trade partner, accounting for 79 percent of Bhutan's total imports and 90 percent of its exports. Bhutan's hydropower sector, which contributes 14 percent of its GDP and 27 percent of government revenue, is financed largely by India. Besides, India provides a market for three-fourths of Bhutan's hydropower production, with the rest being consumed locally. India is Bhutan's largest aid donor too and has financed much of its Five-Year economic plans.

Sudha ramachandran points out that a small but growing number of Bhutanese are critical of India's grip over their economy and foreign policy. They describe its role in Bhutan's hydropower sector as exploitative. "Not only are the terms on which India is financing the hydropower projects unfavorable to Bhutan but also, it is getting electricity from Bhutan at cheap rates," the Bhutanese official pointed out. Importantly, Bhutanese are arguing that as a sovereign country, Bhutan should be able to determine its own foreign policy. Not establishing a normal relationship with China "at the behest of India" is seen as imperiling Bhutanese sovereignty.

Importantly, Bhutan is increasingly keen to settle its territorial dispute with China.

China lays claim to 764 square kilometers of territory, including 493 sq km in the Jakurlung and Pasamlung Valleys in north-central Bhutan and another 269 sq km in western Bhutan, comprising the Doklam Plateau.

Although Bhutan and China do not have official diplomatic relations, they have engaged in direct bilateral talks since 1984 to settle the border dispute. Twenty-five rounds of talks have taken place so far. China has reportedly offered Bhutan a "package deal" under which it will recognize Bhutanese control over the Jakurlung and Pasamlung Valleys in return for Thimphu ceding control over Doklam to China. Additionally, Beijing is reportedly insisting on Bhutan establishing trade and diplomatic relations as a quid pro quo for a border settlement.

China has intimidated Bhutan repeatedly on the Doklam question. Although the two countries signed an agreement in 1998, promising to maintain peace and tranquility along the Sino-Bhutanese border areas, Beijing has carried out several incursions there. In November 2007, for instance, its soldiers dismantled several unmanned posts near the Chumbi Valley.

China's building of roads in Doklam triggered a serious crisis last year at this tri-junction, resulting in a 73-day standoff.

In August 2017, India and China agreed on an "expeditious disengagement" from the area. However, satellite images reveal that Chinese troops have not pulled out. Indeed, Chinese road building and helipad construction continues. Therefore, the possibility of another India-China face-off here cannot be ruled out.

While Doklam is strategically important to India and China, its value to Bhutan is more economic than strategic; Doklam's rich pastoral land supports the livelihoods of people living in Bhutan's western border districts.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Ceding it to China would impose economic costs on Bhutan but it would give the latter settled borders. However, it would draw New Delhi's ire.

During the Doklam crisis, "Thimphu walked on eggshells, balancing between India's stifling embrace and the potential consequences from China," Indian defense analyst Ajai Shukla observed. The crisis underscored to the Bhutanese that their unresolved border dispute with China was leaving them vulnerable to entanglement in big power rivalries. Understandably, it has injected a sense of urgency in Thimphu to settle the border dispute with China. Bhutan's new government is under some pressure from the Bhutanese people to act on this issue.

In addition, there are economic compulsions that would prompt the government to reach out to China. Diversifying Bhutan's hydropower-centric economy was one of the main election promises of the DNT and the government can be expected to set this in motion. Bhutan's hydroelectric sector accounts for almost 80 per cent of the country's external debt - to focus on developing industries and other employment generating sectors such as Tourism.

Such steps to diversify the economy, "will affect relations with India," S. D. Muni, a former diplomat and Professor Emeritus at the Jawaharlal Nehru University in New Delhi has said.

Even without official relations, China has a significant presence in the Bhutanese economy. A third of Bhutan's consumer imports consist of Chinese goods, which are making their way into Bhutan through third countries, Muni points out.

This Chinese presence will grow manifold once diplomatic and economic ties are established. It could enhance Chinese influence over Bhutan, as it has in India's other neighbors, such as Sri Lanka. There is concern in India that Bhutan could quickly slip into a debt trap, forcing Thimphu to hand over strategic assets to the Chinese in exchange for debt relief, as was Sri Lanka's experience.

There is concern in New Delhi that such a scenario would compel Bhutan to cede Doklam to China. India has often been criticized for treating Bhutan as a protectorate. However, India has sought to meet Bhutanese aspirations in the past. It was India that sponsored Bhutan's membership in the United Nations in 1971. Importantly, it replaced the 1949 Treaty with the Treaty of Friendship in 2007, which brought into the India-Bhutan relationship "an element of equality."

Bilateral relations between the two countries completed 50 years last year and a host of programmes were held to mark the historical moment.

The DNT government in Bhutan came to power on the slogan "Narrowing the Gap" and has looked at addressing income disparity and growing unemployment. The government is also looking to diversify Thimphu's trade, the latter largely dominated its hydropower exports to India.

Also, Bhutan is all set to graduate from UN's Least Developed Country status by 2023 and a robust economy with vibrant private sector is a requisite for that. Thimphu cannot for long resist foreign direct investment and opening

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

up its market. It is also eyeing at the membership of the World Trade Organization.

China's advances

Bhutan declined an invitation to attend the Belt and Road Initiative (BRI) conference held in Beijing in April this year that saw the participation of more than 40 heads of states. However, if Bhutan's media is to go by, its civil society is warming up to China's advances. The rationale for Bhutan's civil society to open up to China is premised on the need for diversifying its foreign trade that it argues to be heavily leaning in India's favour.

Though, Chinese offers to further intensify trade have so far been snubbed by Thimphu, the pro prowess of the Chinese economy is having a marked influence upon Bhutan's urban population with internet available on fingertips. Chinese exports to Bhutan in terms of value are third, closely reeling behind India and South Korea, which are first and second largest exporters.

The pressure on the government was palpable when Prime Minister Dr. Lotay Tshering in January this year had reportedly said that his country is willing to strengthen pragmatic cooperation with China including tourism and resolve the border issue at an early date through friendly consultations.

In the backdrop of such developments, it is important for the Indian EAM to focus on strengthening political relations between the two countries.

BCR
of Bhutan

Recent advances following the foreign minister S. Jaishankar and PM Modi's visit of 2019

The two countries also signed 10 MoUs to infuse new energy in their ties. Both inaugurated the 720MW Mangdechhu hydroelectric power plant. Mr. Modi also launched the RuPay Card in Bhutan aimed at boosting tourism from India. Also an additional \$100 million will be available to Bhutan under a standby swap arrangement to meet the foreign exchange requirement. Also both sides inaugurated the Ground Earth Station and SATCOM network, developed with assistance from ISRO for utilization of South Asia Satellite in Bhutan.

India is providing ₹5,000 crore for Bhutan's 12th five-year plan that began in 2018, the same as the allocation for the previous plan. Hydro-power, however, will continue to be an important sector of cooperation between the two neighbours with the two sides looking to start discussions on the 2,500 MW Sankosh project.

India-Nepal relations: recent advances, issues & challenges.

Nepal is the world's 45th-biggest country in the world, with a population of 29 million people. The country's total area is almost equal to that of Bangladesh and is double Sri Lanka's. Thus, if only for its size, Nepal is too big a nation-state to be a vassal. The country takes pride in its history of never having been colonised and has an important geostrategic position, with India and China on either side.

Following Independence, India emulated Britain's approach in having a treaty-based relationship with Nepal, which led to Nepal's grudging acceptance of India's dominion.

To be sure, China's engagement in Nepal is not new. More importantly—and contrary to how it is portrayed in Nepal—it is not entirely positive. However, the engagement is crucial, since China's newfound economic power is as yet unmatched. This challenges India's privileged position in Nepal. Indian Prime Minister Narendra Modi has taken various initiatives and has indicated that he intends to address Nepal's concerns regarding India.

Nepal's eagerness to engage with China has been of interest to observers and largely misinterpreted as Prime Minister Khadga Prasad Sharma Oli's strategy to acquire more from India. However, the current approach fits perfectly in Nepal's long tradition of pursuing a diversified foreign policy and partners, taking advantage of its key geostrategic position. Oli's government aims to keep Nepal's relationship with China independent of the one it shares with India. The question to ask is whether Nepal will be able to achieve this, given India's discomfort with the increasing Chinese proximity.

In light of this stance, it is important to understand Nepal's policy motivation. New Delhi was for long perceived in Kathmandu as "hawkish" and "selfish" in dealing with sensitive matters, which in turn projected an unlikeable image of India. The most notable instances of this include different river treaties, reluctance to respond to regular border-encroachment complaints, high-structure build-up along the border, inundation complaints, the armed border forces' harsh behaviour, trade and transit crises, and embargoes. These experiences led Nepal to look for other options. Thus, the communist parties of Nepal have consistently protested against India, and the Nepali Congress too has shown reservations, indicating a broad political consensus on this approach to India.

There are historical reasons that explain the dynamics of the Nepal-India bilateral relationship. To maintain a sphere of influence, India needs sufficient soft power, as well as hard power, along with the confidence to act. As scholar Aparna Pande argues, "Managing a sphere of influence is not only a function of telling others what to do but being able to expend resources that deny space to competitors

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Indeed, the nature of India-Nepal relations has always been a mixed bag. Due to its provisions and protocols, the 1950 treaty quickly became controversial and set the conflictive tone of the bilateral relationship. The provisions of the 1950 Indo-Nepal Peace and Friendship Treaty related to secret letters associated with arms procurement limited Nepal from purchasing arms from third countries without "informing" India. Nepali politicians argued that the treaty constrained Nepal as an ally and a state under India's security umbrella. In 1988, King Birendra's decision to purchase anti-aircraft guns from China prompted then Indian Foreign Secretary K.P.S. Menon to warn Nepal of its existential uncertainty. Over the years, the incompatibility between the two countries only worsened in various domains.

Areas of contention: Border, water, commerce

Another area of grievance is trade and commerce. Because of its geographical constraints, Nepal has found itself heavily reliant on India, never acquiring the comparative advantage to increase exports. Local enterprises fail to grow, being simply unable to compete against lower-priced Indian products that flood the market. India's imposition of non-tariff barriers and lack of standard infrastructure have added to Nepal's discontent with India. The transaction costs for exports and imports are unsustainably high. It takes 42 days to reach export destination via Indian ports and 35 days to reach Nepal from the suppliers' point, which account for US\$2,700 shipping cost per container. As a result, as of 2018, the country's trade deficit ratio is at a staggering 1:14.9. Nepal's largest trading partner is India (the total trade accounting for 65 percent), with whom Nepal runs the largest trade deficit.

Another longstanding dispute between India and Nepal relates to the provisions of existing river treaties and their implementation. Nepali stakeholders claim that India has taken undue advantage of its generosity in sharing water, by using ambiguous provisions and providing far less benefits than the upper riparian state duly deserves. They claim that India's handling of the issues involving the Koshi and Gandaki rivers has been far from satisfactory. The Mahakali agreement has remained in limbo for over two decades. In 2008, the collapse of Koshi's embankment unleashed massive flooding, highlighting India's failure to take precautionary measures and its refusal to take responsibility.

Nepal's bureaucrats and water experts are reluctant to talk about any new framework agreements due to past experiences. The country appears to be in denial, as suggested by former Indian diplomat S.D. Muni in terms of India-Nepal water cooperation.

China-Nepal relations: recent advances:

Amidst such historically complicated relationship between the two neighbours, China has emerged as an ally for Nepal. The following sections discuss the new prospects that China's proximity has brought to Nepal.

Hydropower and infrastructure cooperation:

China has undertaken 15 projects in Nepal, including four hydropower plants, and the country's second international airport at Pokhara, with 14 others in the pipeline.

China has completed the construction of the 30MW upper trishuli hydropower project in 2019, a US 350 million\$ nepali police training academy as well in 2018. However, Chinese infrastructure projects have also witnessed major challenges related to cost escalation, project related displacement concerns etc. Already there are complaints that the Pokhara airport the Chinese are building is vastly overpriced. It was estimated to cost about US\$140 million but was contracted to a Chinese company at US\$216 million with loans from the China EXIM Bank.

The Chinese trade presence in Nepal has increased significantly over the years and stood at roughly 2 billion\$/year in 2017. China today has emerged the largest foreign investor in Nepal ahead of India and the influx of Chinese tourists has steadily increased over the years.

The Trans-Himalayan railway

China and Nepal have agreed to "intensify implementation of the MoU on Cooperation under the BRI to enhance connectivity," which includes ports, roads, railways, aviation and communications in the framework of the Trans-Himalayan Multi-Dimensional Connectivity Network. India poses a legitimate question: Is the trans-Himalayan railway up to Kathmandu economically viable, since several costly tunnels are needed before the railway reaches the lower mountains and plains? India might be overplaying the risk.

First, excluding Kathmandu, the Chinese Qinghai-Tibet railway—already fully operational up to Shigatse (Xigaze)—is expected to soon reach the Nepal border in Kerung (Gyirong). From Kerung it will be a 100-km-long railway to Kathmandu.

A combined transportation system of rail and truck via that route reduces the journey substantially.

Second, the economic viability of the Kerung-Raxaul (India) route is uncertain, with India emphasising its own centrality in the project and China planning to reach out to the Gangetic plains via Nepal. For its part, Nepal views the Chinese railway as an opportunity to bring Chinese pilgrims and tourists to Lumbini, the birthplace of the

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Buddha, and to the popular valley of Pokhara. Incidentally, in the first quarter of 2018, for the first time, Nepal welcomed more Chinese than Indian tourists

The dynamics of Nepal's relations with India differ from that with China. Nepal views its engagement with China from a different perspective. Due to the much-debated "debt trap," Nepal is cautious and has asked China to fund the railway as a grant and not as a loan. China, for its part, has also learned from its international failures, be it debt problems with host countries or political instability in some countries in Latin America and Africa where its plans did not materialise. Thus, it is understandable that China wants a stable Nepali government, and many have speculated that China is behind the merger of communist parties in Nepal.

Even without the rail connectivity and BRI, the China-Nepal engagement has strengthened in sectors such as hydropower, aviation, tourism, telecommunications, people-to-people relations, cultural exchanges, political exchanges, industry and technology

The way forward

The recent joint communiqués between India and Nepal seem to have all the right words and tone for a constructive move forward in their bilateral relations. Immediately after

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

the successive visits of Modi and Oli to Nepal, there has been unprecedented progress in several areas. For instance, a joint inspection team visited the bordering areas prone to flooding, something that has not happened in the past. Similarly, contrary to expectations, the joint Eminent Persons Group (EPG) has finalised their recommendations on the revision of the 1950 treaty, and submitted them to the two prime ministers for possible implementation. Another joint meeting has agreed to finalise modalities to implement the grand project of water connectivity, and India is willing to provide financial and technical support. The Oli government wants ships to enter Nepali waters by 2020. The MoU on the Raxaul-Kathmandu railway has also been well-received.

However, despite generous announcements, India continues to send mixed signals. First, in terms of the land and air connectivity, the response has been sluggish: the gap between providing access to Vizag Port and new air routes to Nepal is two years. Nepal's request to access India's west ports is at a nascent stage and will take some more years.

Regarding China's inroads into Nepal, an option for India would be to defend the status quo by attempting to block Nepal's options to diversify its cooperation with neighbours, through projects such as the infrastructure development by Chinese investment. However, such a policy is bound to fail because Nepal is determined to take advantage of cooperation opportunities with foreign partners, including China.

China is winning hearts and minds in Nepal through generous strategic charity. After the 19th Party Congress, it will continue to "use economic diplomacy as the foundation of its foreign policy." Therefore, the way forward for India would be to depart from its exclusively traditional security angle and be proactive with innovative strategies and policies.

As things are, Nepal cannot dispense with its reliance on India. India is and will remain vital for the country in many ways. However, Nepal is now a member of China's massive BRI, which puts India in a difficult position. As ORF analysts, Harsh V. Pant and Abhijnan Rej rightly put it, "New Delhi has found itself utterly unprepared to deal with an assertive Chinese foreign policy under Xi Jinping."

As long as the principles of non-interference and peaceful co-existence are respected and a high level of political engagement is pursued, there will be bonhomie and cooperation between the leaders of India and Nepal. At the same time, it will assuage China's unease about its security in Nepal. Disregarding India's traditional muscular diplomacy, PM Modi seems to have been following this line of cooperative diplomacy. The results are evident: the rapport between Modi and Oli, and Nepal's increasing cooperation in Modi's initiatives, which would have been impossible just a year ago.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Nepal is equally eager about the prospects of being road-connected with Myanmar and Thailand through BIMSTEC as it is with the BRI on the northern front. Therefore, India may want to institutionalise the current approach, which seems to be in the best interest of both

India-Nepal Treaty of Peace & Friendship – 1950: the need for revision

Introduction- the Treaty of Peace and Friendship between Nepal and India, concluded on July 31, 1950, has become an emotional issue in Nepal and the demand for its abrogation has regularly featured in election manifestos.

Many Nepalese commentators have argued that the treaty was signed by the then Maharaja, prime minister and Supreme Commander-in-Chief of Nepal Jang Bahadur Rana, who was not an elected representative. **Most importantly, the Rana regime fell within six months of the signing of the treaty.**

Subsequent governments in Nepal have been expressing their reservations over the treaty ever since. With the introduction of multiparty democracy in Nepal in 1990, the treaty became an important electoral issue for some political parties in Nepal. In 1994, for example, the Communist Party of Nepal-United Marxist Leninist (CPN-UML) campaigned on that issue vigorously.

Both the countries agreed in September 2008 to form a high-level committee headed by the foreign secretaries of the two countries to examine the treaty and suggest possible revisions. There is a view in India that the review process could be delayed due to the civil conflict and political instability in Nepal.

Former Indian foreign secretary Shyam Saran also dismissed the contention of Pusppa Kamal Dahal (Prachanda) that the treaty was an 'unequal pact', and pointed out that under the pact 'Nepali citizens enjoy special privileges in India.'

Review of the 1950 treaty

Aim of the treaty- The treaty was signed with an objective to strengthen the relationship between the two countries by recognising historical values and perpetuating peace in the region. It provided the foundation for India and Nepal relations. The treaty contains 10 articles.

Article 1: the two countries acknowledge each other's territorial integrity and sovereignty.

Article 2: says that they have to inform each other in case of friction with neighbouring countries.

Articles 5: secret letters associated with Article 5 deal with arms imports of Nepal

Article 6: national treatment of each other's citizens in economic matters

Article 7: reciprocal treatment to nationals in matters concerning residence, protection and trade.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Necessity of the treaty- It needs to be mentioned here that land-locked Nepal conducts trade with the outside world through India. As K.V. Rajan observed, the treaty 'basically offered economic opportunities in India for Nepalese nationals against Nepalese assurances that India's security concerns would be respected'

The international and regional situation during the 1950s, when the treaty was signed, was wholly different from what it is today. The world was then reeling under the Cold War. The international community was divided into three blocks of capitalist, communist and non-aligned nations. India as a newly independent country with a weak military and troubled by internal disturbances was suspicious of the Chinese adventurism in Tibet. It was also apprehensive of the communist influence in Nepal. As an Indian scholar has noted, 'India was also perturbed by the Chinese claim that Tibet is China's palm and Nepal, Bhutan, Sikkim, Ladakh and NEFA are five fingers. With the palm already under Chinese grip the security of other Himalayan countries was endangered.'

The Chinese annexation of Tibet changed the strategic significance of Nepal. India decided to strengthen its northern frontier by taking Nepal into confidence. Expressing India's concern, Prime Minister Jawaharlal Nehru said 'We cannot allow anything to go wrong in Nepal or permit that barrier to be crossed or weakened because that would also be a risk to our security'.

Nepal, which was striving for recognition in the community of nations and was facing domestic upheaval due to protests against Rana rulers, was surprised by the Chinese claim on Tibet. S.D. Muni has observed that the then 'external environment, particularly the developments in China and Tibet and the Chinese attitude of acquiescence towards the Indo-Nepalese ties also contributed a great deal in the evolution and perpetuation of "special relations" between the two countries'.

The Ranas also were looking for an opportunity to enter into some kind of understanding with India to pacify the democratic movement. During 1947-1950, Ranas' policy towards India was 'guided by winning over India's sympathy or to prevent [it] from supporting the democratic movements in Nepal which had its base in India'.

Both Nepal and India identified China as a potential threat. The commonality of interests and requirements resulted in the signing of the treaty. The treaty was not a military alliance but a kind of partnership between the two countries to prevent the Chinese threat.

The treaty also included socio-economic and cultural aspects of the relationship for mutual benefit. Nevertheless, the treaty is regarded as an unequal one by the nationalists in Nepal and it is often used by both internal and external forces to create anti-India sentiments in Nepal.

The Maoists have argued that the treaty is responsible for underdevelopment in Nepal and that it has been hindering Nepal from adopting a free foreign policy.

Irritants in the treaty- Nepali Perceptions.

- 1) Some Nepalese scholars argue that the treaty was signed with a Rana prime minister who was not elected by the people and therefore does not represent the Nepali political consensus. They also refer to the unequal status of the signatories (it was co signed by

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

the then Indian ambassador and King of Nepal) as an example of the built in inequality in the treaty.

- 2) Under the provisions of the treaty, neither country can unilaterally impose restrictions on the free movement of their people across the border. However, the Nepalese analysts allege that India had unilaterally imposed restrictions on Nepal in the past.
- 3) India has deliberately kept Nepal dependent on itself and created insurmountable difficulties in implementing a development policy based on market liberalism, because it was not ideologically palatable to India during 1950-1990.
- 4) Nepal feels uncomfortable with the 1965 arms agreement. In case of purchases from a third country, Nepal has to inform India. There were accusations that India did not supply arms to Nepal when it required them the most. The allegation was made by the then King Mahendra who was facing strong resistance from democratic forces in the early 1960s. India did not supply arms because it apprehended that the arms would be used against civilians. India also did not supply surplus arms in early 1960s due to the Sino-India conflict in 1962. India took similar steps in 2005 when King Gyanendra assumed power directly after dismissing the elected government. Nepal then decided to buy arms from China and Pakistan much to India's discomfort. Nepal also vigorously supported China's entry into South Asian Association for Regional Cooperation (SAARC).
- 5) Another criticism which frequently appears in Nepalese writings is that India has demanded reciprocal 'national treatment' for its citizens in Nepalese territory and access to all of Nepal's natural resources, while Nepalese citizens are being discriminated against while acquiring property in India. Interestingly, the reciprocity arrangement was first breached by Nepal in 1958 when King Mahendra imposed restrictions on Indians and foreigners to purchase immovable property. Later, the King justified this on the grounds of checking influx from India and brought in a new law which restricted commercial and business activities by Indians in 1970.

Indian Concerns- Indian perspectives

- 1) Of late, some groups in Siliguri, West Bengal, have demanded abrogation of the treaty in order to restrict border movement from Nepal into Darjeeling and Siliguri. They demand introduction of a passport-visa system and granting of citizenship rights only to those Nepalese who had come into India prior to the signing of the treaty in 1950. It is believed that if the border is not regularised, the new Nepali migrants might outnumber the original inhabitants, posing a serious law and order threat in the near future for the hills and plains in the Darjeeling district. A major concern for India is the demand for Greater Nepal in the Indian states bordering Nepal.
- 2) At the same time, Nepal is of great strategic relevance for India. There are 28 passes on the boundary between Nepal and China. Professor Hari Bansh Jha observed that the open border had benefitted around '3.5 million to 6 million Nepalese men and women in gainful employment in India.'

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- 3) In recent years, Nepal is believed to have become a safe haven for terrorists, smugglers and anti-India elements sponsored by Pakistan's Inter-Service Intelligence (ISI).

Benefits of the treaty

The 1950 treaty addressed the security concerns of both states to a large extent. While signing the treaty, both countries were, in a way, seeking to address the issue of Chinese adventurism in this region.

For all practical purposes the treaty provided a security guarantee to Nepal against China. However, China has all along tried its best to neutralise Indian influence in Nepal and bring Nepal into its own sphere of influence.

Nepal has also benefited from the conflict between China and India. It has played the Chinese card effectively as a bargaining tool against India. Nepal purchased anti-aircraft guns, medium range surface-to-surface missiles (SSM), and assault rifles from China in 1962 and 1988. King Mahendra allowed China to build the Arniko highway to link Lhasa with Kathmandu, which was started in 1963 and completed in 1965.

It has to be noted that the Kings of Nepal were worried about alleged Indian support to democratic elements in Nepal and pursued a close relationship with China to offset Indian pressures.

King Birendra violated the spirit of the 1950 treaty and entered into a secret deal with China for purchasing Chinese arms.

Recent Indian initiatives in India-Nepal relationship

Institutional mechanism: India and Nepal have several bilateral institutional dialogue mechanisms, including the India Nepal Joint Commission co-chaired by External Affairs Minister of India and Foreign Minister of Nepal. The Fourth Joint Commission Meeting was held in New Delhi in 2016, while the 5th meeting was held in Kathmandu in 2019.

2015 earthquake relief assistance: The total Indian relief assistance to Nepal amounted to over US\$ 67 million. The Government of India announced a post-earthquake reconstruction package of US\$ 1 bn (which comprises US\$ 250 mn grant and US\$ 750 mn concessional Line of Credit).

Connectivity linkages: In recent years, India has been assisting Nepal in development of border infrastructure through upgradation of roads in the Terai areas; development of cross border rail links at Jogbani-Biratnagar,

During the visit of Prime Minister of Nepal in April 2018, the two Prime Ministers jointly inaugurated the Integrated Check Post in Birgunj (Nepal) built with GoI assistance. In 2019, both sides inaugurated the 69-km Motihari-Amlekhgunj pipeline, having a capacity of 2 million metric ton per annum which would ensure uninterrupted, cheaper supply of oil to Nepal. The project has been almost completely financed by India.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Defence cooperation: India and Nepal have wide-ranging cooperation in the defence sector. India has been assisting the Nepal Army (NA) alternately in India and in Nepal. Since 1950, India and Nepal have been awarding each other's Army Chief with the honorary rank of General in recognition of the mutual harmonious relationship between the two armies.

Gorkha Soldiers in the Indian Army : The Gorkha regiments of the Indian Army are raised partly by recruitment from hill districts of Nepal. Currently, about 32,000 Gorkha Soldiers from Nepal are serving in the Indian Army.

Power: India and Nepal have a Power Exchange Agreement since 1971 for meeting the power requirements in the border areas of the two countries, taking advantage of each other's transmission infrastructure. Indians currently supplying a total of about 450 MW of power to Nepal.

→ 2018

SARAN
Shyam Sharan: How India sees the world from Kautilya to Modi

S.D. Muni:

Rakesh Sood:

Kanak Muni Dixit

Historical Evolution

1950 - Monarchy - King Tribhuvan (essentially powerless under
locus of power - with Rana's ~ (PM) Captivity of Ranas)
Not very popular

1949 → Communist party China → Tibet issue

1950 → India - Nepal friendship treaty

1. Open border (Shyam Sharan says before 1950, also it was always open)

2. National treatment → employment
→ property
→ settle down

3. Nepali Individuals in British Indian army also free movement of goods & citizens
- Visa free

- Treaty was signed b/w Rana (PM) ~ Foreign ambassador to Nepal
(326) so K.P. Oli says it is itself injustice and India treats Nepal

Khajendra Prasad

2018

unequally.

1951: ^VTribhuvan brought to India from house arrest.

Nepali Congress } B.P Koirala
 } G.D Koirala } good relations with DNC, also supported in National Struggle

Constitutional Monarchy
+
Parliamentary democracy } India told Tribunal & NC to draft a constitution

1955 - Tribhuvan became head of state, Nepali Congress govt was established

1962 - King Mahendra

- deposed NC
- abolished Constitution
- reasserts control

1958 - They had settled border with China

→ India-China war → gave Mahendra a way to reassert his power.

restricts India's intervention abilities in Nepal

- Mahendra starts playing China Card against ^{Japan} ~~China~~ ^{India}

↳ talked about maintaining "equidistant" with India & China

→ Said Nepal is not land-locked, it is India-locked

↳ Whipped the nationalist sentiments 4 India as - big brother, enemy

1972: King Bhrendra continue to play china card

1987 : India refused to supply arms to Nepal

Secret letter in friendship treaty "Nepal will buy arms from Bhutan India and in case India is not able to meet it's demand it can go for 3rd country" after informing India?

Why? - protests against Birendra → he orders to oppress it & militarily so India refused to supply arms.

- Brendra Imported it from China
- violation of the treaty

1990 - Jan andolan-I - led by Nepal Congress - want
Constitutional Monarchy with parliamentary democracy

- Nepal economically backward → Ranas did a little to address it
but political leaders blame it on India's unnecessary interference
leading to unemployment → unable to pursue independent foreign
policy which keeps us back in pursuing our economic & political
goals.

On the contrary, India employs 6-8 mn people and in army
also

- Bhandari agrees to NC demands - after 4 years again dissolved
the parliament → reasserts monarchy.

1996: Panchsagar power project - 80,000 MW electricity capacity
Ganga river system

still not built why?

- Dams will be constructed
in upstreams i.e. Nepal
leading to displacement
of most of Nepali people

India ~~to~~ said
equitable cost
& benefit sharing

irrigation electricity

India's area under irrigation will be
more than Nepal's but human cost is
more for Nepal

- Indian companies will construct it
- Nepal companies will sell electricity to India
it will ↑ their force.

India's stand: It is mutually beneficial and Nepali political parties
need to remove the mindset of opposing India's policies ~~stated~~
proposed by India.

- Nepal won't be able to build such a big dam without India's
assistance and if they build it on their own it will also lead
(328) to displacement of people. India is gaining more but at the same

line project is benefitting Nepal also in a big way. (electricity, irrigation)

Why so late? - political instability in Nepal

- delay by Indian companies
- land acquisition problem

This led to untutilized potential of India - Nepal economic relationship and it is a missed opportunity.

Gujarat Doctrine: Non-reciprocity - put 90:30 ratio in building dams instead of 50:50

2000 - NC rule had been revoked, Birendra was ruler

2001 → Palace Massacre → Deependra assassinates whole Royal family.

Gyanendra came to power

2002 Jan. Andolan - II - led by Marxists - armed uprising → want to capture state with force → do not want Constitutional Monarchy as agreed by Gyanendra.

- India got concerned

2005 - India mediated the settlement - Nepali pol parties (Congress) along with Marxist and Monarchy to settle Nepal with CM+PD

- ~~But~~ Still Marxists not convinced, public protests in Kathmandu

India again committed a mistake to support the resolution that supported PD+CM (constitutional Monarchy Parliamentary Democracy)

- Public raised anti-Monarchal & anti-India slogans.
- India gave up its approach of supporting the twin demands of supporting PD+CM

- Monarchy gets abolished

- Constituent Assembly elected

2013 - drafted another Constituent assembly } No constituent came

2015 - Earthquake - India supported actively in reconstruction

Public opinion criticised the pol. parties for not drafting a Constⁿ.

Within 1 week new constitution drafted. Since 1990 in 28 years Nepal had 27 PMs.

Issues with New Constitution ^{Everyone congratulated for formulation of constitution except India. They were not given citizen ship.}

- ① Underrepresentation of Madhesis ^(until 2007 they were not given citizen ship)
- ② Issues w.r.t. the federal structure ^(they were divided states in such a way that Madhesis were minorities)
- ③ " " " Nationalised Citizens ^(Madhesis were treated as nationalised citizens & not allowed to hold upper posts)

Constitution $\left\{ \begin{array}{l} \text{Unitary?} \\ \text{or} \\ \text{federal?} \end{array} \right\}$ federal because Nepal has a lot of diversity (Big or small Country does not matter, what matters is diversity)

They support longitudinal division of states into 7 and only 1 state in east will be created for Madhesis spread in 3 states. Though Madhesis are more than 50% of the population but will be reduced to minority in every state after such divisions.

(330)

two major states must be created in Terai region to get funds for its economic development which has been largely confined to hilly areas

- support east-west division of state

So, Madhesi claim of underrepresentation & Marginalisation in such structure.

- Hill elites - equal status to status in upper house

Madhesi favour - proportional representation in lower house

100 seats - hill elites
65 seats - Terai

Barbara
Oklaey

Course eval

upper house (like USA)
Per state 2 members

2015 - Violence erupted in Madhesi region

Can spill out to India also due to proximity.

India Foreign Secretary → Nepal → "we have 'voted' the adoption of new constitution but Madhesi concerns must be addressed."

2015 - Madhesi Blockade

oil imports from India declined

- India said we are not doing this Indian companies are ^{not} willing to go there due to instability.

- Criticism of India again

- Nepal inclined towards China for Transit agreement.

- China alighted oil & gas supplies to Nepal

for China, Himalayans are not a barrier, they can establish gas / oil pipelines easily to Nepal

2016 - K.P. Oli came to power - in coalition of Prachanda (CPN) (UML)

↳ CPN withdrew support

Oli blamed India for this also.

Oli signs to - point agreement with China

road links - Lhasa → Shigatse

rail links - Tibet rail →
N/w (331)

Nepal (Kathmandu)

2018 → Oli wins (UML) - with a majority in many
Constituencies
Oli, Prachanda again Unified. (Maoist party)
Oli is expected to complete the term.

PM visit 2018 - Oli said India & Nepal should speedily
implement the outstanding commitments

Trade : HPP - pancheshwar dam completion
oil pipeline project needs to be completed (170km)
Cheaper & reliable

- Integrated check posts (ICP) → Open Borders → illegal trades

ISI plan terrorist camps in Nepal

- fake currency
- trafficking → Narcotics
→ Human

Need not to close
border due to these
problems just implement
ICP. It is helpful
in maintaining people
to people contact

BSSB → Currently only 1

Revise India - Nepal friendship treaty

Why revision needed? - 1. unequal representation

Ramas (PM) India ambassadors

They were also not Nepal's democratic
representative

as Ramas are
the rulers &
they do it

2. Nepal has settlement, employment
3. Secret letter - Arms acquisition → Nepal says it hurts Sovereignty and Nepal violated the treaty in 1987
4. India's problems - Fake Currency, Narcotics, Security Challenge
Terror backed by ISI, human trafficking
Still India has not closed the borders and open border is in favour of Nepal in terms of employment, settlement.
- India tells Nepal to come with a formal proposal to renegotiate the treaty.

China factor in Nepal

- Nepal has often raised the issue of including China in SAARC
- 2015 - Madhesi blockade led
Nepal signed 10 point agreement with ^{China} ~~Nepal~~
- to explore transit rights through China

2018 - China provided transit rights through 4 ports in Tibet
China has extended support to upgradation of infrastructure including railway construction, (Lhasa to Kathmandu)
road network

Hydropower projects

Nepal also signed BRI with China.

Experts like S.D. Muni and Shyamsharam say that India need not to be concerned as the Chinese ports are 2600 km away from Nepal. As Nepal do not have much exports and imports will also be costlier from there to transport but India also need not to be complicit.

Shyamsharam - There is certain kind of paradox though P-to-P Cultural links (Buddhism & Hinduism) Economic relations are good but what has lapsed is G-Z-G relations

(333)

 **SHUBHRA RANJAN**

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Way forward: (Shyamsharan)

We should follow the original doctrine of peaceful co-existence

1. Negotiate all the treaties whatever Nepal wants as India don't
2. India has huge access in Nepal which India has not operationalised. have much to lose and it will also give a break to Nepal's view of India as big brotherly attitude
 - (i) Military - India needs to utilize goodwill from retired Gorkha army men who get good pensions from India. There is a huge public support for this in Nepal.
 - (ii) Terai region lacks infrastructure so India can collect goodwill by taking developmental projects in the region.

S.D. Munir:

- India talks while China delivers - So India needs to implement its outstanding commitments Speedily. Life Railway line, dams, oil pipeline agreements.
- Geography & P to P also favour India - Nepal relations

C. Rajamohan:

BIMSTEC 1st ever military exercise in Pune - Nepal rejected but held military exercise with China.

Oli argued "Rather Nepal becoming a concern in India China relations. It should act as bridge" 2+1 framework

- India need to adopt a Nepal-first approach which means there should be urgent focus on neighbourhood specially Nepal.
- India's Nepal policy has backfired in past years so India needs to avoid mistakes of the past and should provide reassurance to Nepal through continuous political engagement.

Background

India's relation with Bangladesh have been a roller-coaster ride, with periods of mutual bonhomie and deep distrust since the emergence of Bangladesh as an independent nation-state in 1971, while the relationship is marked by acute structural-assymetry, shared geography and history combine to make it a crucially important relation for both states.

Historical Background

Mujib Era (1971 - 1975) : India's decisive military

intervention in Bangladesh, played a critical role in the birth of Bangladesh. This laid the ground for evolution of a closer India - Bangladesh relations which resulted in the signing of India - Bangladesh

Friendship Treaty of 1972.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

However issues like Ganga water sharing, maritime boundary disputes remained as irritants in relationship. The Indira - Mujib Era this was marked by certain proximity within India - Bangladesh relations.

Mujibur Rehman was assassinated - 15 Aug 1975

Era (1975 - 1982) : The relations between New Delhi and Dhaka ^{straightly drop} plummented following Mujib-ur-Rehman's assassination as India criticized the military coup association that followed and resulted in rise of Zia-ur-Rehman as president.
General of Bangladesh Army

Zia sought to consciously distance himself from India and returned to the Islamic roots of Bangladesh's identity cultivating ties with Pakistan, China and the West.

Issues such as migration from Bangladesh and its reluctance to address illegal border trade further alienated her. Bangladesh became vocal and started internationalizing the contentious water sharing issues.
Ganga, Teesta

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

^{during Rajawgarcher}
Era (1982 - 1990) : General Ershad came to power ^{after assassination of Ziaur Rahman}
in 1982 after a coup and assumed position of
president in 1983 after suspending the constitution.

He broadly continued the direction of President ^{Towards China & Pakistan}
Zia's foreign policy. Ershad proposed the idea of
South - Asia regional cooperation as an entity.

The principal motive why Dhaka pursued the
idea of SAARC was with an apparently negative
mindset of containing the "hegemony" of India in
South Asia. ^{due to structural asymmetry.}

^{(where by using SAARC they thought of challenging India, where all other countries could unite & contain hegemony of India) But India kept rule that bilateral issues should not be discussed & only common goals should be discussed & other nations said that they should not accept FTA agreement as India was turning towards open economy.}
Era (1992 - 1996) : Khaleda Zia's BNP (Bangladesh

National Party) formed the government in 1992
after Ershad's removal in 1990.

BNP's election campaign talked about standing up
to India's hegemony and following an autonomous
foreign policy.

BNP recurrently argued that election of Awami League
(AL) would lead to erosion of sovereignty and
emergence of Bangladesh as a client state of India

The Enclaves were lacking basic resources as they were no state citizen after 2014 deal they were given a time window to join which ever country they like.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

due to Awami Leagues "Subservient - Foreign Policy."

1992 - during PM Khaleda Zia visit to India in 1992 an agreement on Teen Bigha Corridor was finalized. India formally granted perpetual lease over the 1.5 hectare / Teen Bigha Corridor that had left a larger Bangladeshi enclave in India unconnected from their homeland.

such an parliament have not agreed for passing the land to Bangladesh completely by constitutional amendment in 2015.

Despite the leasing of the Teen Bigha Corridor, given BNP's fundamental mistrust of India, the overall relations remained frozen.

1996 - 2001 : The ^{Awami League} AL era under Sheikh Hasina saw an improvement in India - Bangladeshi relations as both sides agreed to an equitable water sharing agreement on Ganga river for a three decade period 1996 onwards i.e. (1996 - 2026) thus removing a major irritant in the bilateral relationship.

By this Awami League was able to show in domestic politics that it is the party which brings the things done from India.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Key Issues in India - Bangladesh Relationship

Land Boundary Issues :

- India shares its largest land boundary with Bangladesh 4096 km long.
- The Radcliffe Line drawn during Partition period in 1947 left behind landholdings called enclaves. (territory nationally belonging to one side, but totally surrounded by territory of other), with India having 111 enclaves (17,000 acres) in Bangladesh and Bangladesh having 55 in India. (7000 acres)
- By 2009, the problem of enclaves had become complicated as the population increased, turning over 50,000 people on both sides virtually 'stateless'.
- Moreover, the problem of enclaves further fuelled the issue of illegal migration & frequent violations of international boundary were noted.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- After much delay, a framework agreement between Dhaka - Delhi on land boundary was signed in 2011 while Dhaka gained constitutional ratification for deal in 2011, the final ratification by Delhi was delayed by four years till 2015 due to domestic opposition by West Bengal.
 WB govt was saying that it was their land that was being transferred & they can't give it
- Though delayed, the final settlement of border question removed an unnecessary friction in the relationship and also strengthened the domestic position of Sheikh Hasina in Bangladesh.

Illegal Migration & Issue of Demographic Change

- Illegal migration refers to the phenomenon of the unauthorized, unregulated migration. In the context of India - Bangladesh relations, the push factor for fuelling the illegal migration has been the lack of adequate employment opportunities in the border districts of Bangladesh while the construction sector in India's north eastern states is the pull

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

factor that generates demands for such workers willing to work at relatively low wages.

However the issue of illegal migration into India from Bangladesh got deeply ^{entangled} enmeshed with the two wave of refugees that came to India, firstly in 1947 during the Bangladesh liberation war of 1971. Estimates said that almost 10 million refugees came to Indian North Eastern States and Bengal during 1971 war.

- Some 6.8 million refugees returned to Bangladesh soon after the war & the rest by 1972.

However illegal migration into India from Bangladesh, particularly in Assam which triggered the non-violent, highly visible, Assam agitation (1979-1985) spearheaded by All Assam Students Union (AASU).

That agitation resulted in Assam Accord of 1985 which did set the cut-off date for March 24, 1971 & stated that anybody settled after it would not be a citizen but an illegal migrant.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- This provision of the Assam Accord has not been strongly implemented & hence has failed to change the nature of Bangladeshi immigration into Assam.

The Sinha report of 1998 pointed out "the silent & invidious demographic inversion of Assam."
(means slowly the migrants have dominated more than the locals)

- Moreover, similar demographic inversion has been noted in Tripura as well.
- Assam has been repeated incidents of ethnic violence due to the illegal migration including the Kokrajhar riots of 2012.

Also, the rapid rise of Islamist ideology across South Asia including in Bangladesh has fuelled considerable religious extremism.

- While estimates vary, currently estimates say that upto 15 million illegal migrants have entered into India from Bangladesh.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

According to S. Behera, Bangladeshi migration has been securitized by the "developing nexus between Muslim immigrants and thriving separatist insurgent groups like ULFA & Islamic fundamentalist terrorist groups like HUJI [Harkat - ul - Jihad - al - Islami] & others."

- Moreover, the problem of illegal migration has been further worsened by the vote bank politics in the region as these illegal migrants have managed to obtain voter - i cards, rational cards etc. (as there have been demographic transition)
- While some observers have argued that illegal migration from Bangladesh into bordering Indian states represents its "mexico problem". However, such a comparison may not be completely accurate given the strong security dimension of the issue in India's core.
- Pushpita Das of IDSA points out that the multitude of steps taken by GOI including increasing deployment of BSF troops, increasing the number of Border Surveillance outposts and fencing of some 3000 km of India Bangladesh border have been taken. Namrata Goswami from IDSA & Veena Sikri, India's former

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

ambassadors to Bangladesh have argued for issuing "Work Permits" to migrant workers for ensuring an orderly tracking entry and exit of workers from Bangladesh to India. [such problems can be rectified large amount of work permits should be issued.]

Fencing of border has historically generated a strongly negative response from Dhaka. Moreover the possibility of deportation of "illegal migrants" to Bangladesh if & when identified by India is unlikely as Dhaka has consistently refused to recognize the scale of the issue and given the possible negative implication in domestic politics of Bangladesh such a settlement is unlikely.

Water Sharing Issue

India and Bangladesh share 54 trans boundary rivers including major areas such as Ganga, Teesta, Barak & Brahmaputra.

- Bangladesh is a lower riparian w.r.t India over all these major river systems coupled with the

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

structural asymmetry of power between the two actors. These two factors along with the domestic politics in both countries have heavily influenced any resolution of water-sharing issues.

- With an equitable water sharing of Ganga water between the two sides agreed upon, even during the lean season the Ganga water sharing Treaty of 1996 valid for a period of three decades removed a major irritant in the bilateral relationship.
Adding monsoon means doing
- Even though the Ganga Water Sharing issue has been largely resolved to the mutual satisfactions of both parties, the proposed construction of Tipaimukh Dam on Barak river since 2011 has produced much controversy including strong reservations by Bangladesh fearing the flooding of Sylhet district in particular.
India have given assurance that they will not stop (or) make any decision of 1996.

Since then, New Delhi has repeatedly reiterated that India would not take steps on Tipaimukh project that would adversely impact Bangladesh. India's official position emphasized that the Tipaimukh Dam would be a hydroelectric dam.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

with provisions for flood controls” and would “not involve diversion of water on account of irrigation”.

Moreover, local climate changes in India are expected to have higher adverse consequences in Bangladesh & this would trigger environmental refugees into India. However, no institutional & legal agreement at the bilateral level / adequate policies exist to reduce vulnerability of people, posing the significant risk for stake-holders in the process.

The Teesta river is a major source of irrigation and water supply for both West Bengal & Bangladesh. The sharing of water becomes Problematic specially during the lean season. Negotiations on Teesta water sharing have been ongoing since 1983. A 2011 interim deal, that was supposed to last 15 years gave India 42.5% of Teesta water & Bangladesh 37.5%.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

West Bengal opposed this deal at the last minute & thus the deal remains unsigned.

- While Bangladesh want 50% of the Teesta's water between Dec - May every year (Pre-Monsoon years), India claims 55% of the river's water.

- With the advent of coalition era in India since 1991, the claims of bordering provinces/state have assumed much greater significance for India.

Simple Delhi - Dhaka negotiations do not always work, under federal grievances are accommodated, there is little scope for a genuine breakthrough on the issue Indian Foreign Policy is yet to develop the means to incorporate federal concerns in its dealings with neighbouring states.

Moreover, such set backs strengthen anti-India sentiments & weaken the legitimacy of secular political forces in Bangladesh.

Tariq Karim, the former high commissioner of Bangladesh to India argued in 2017 that for Dhaka the Teesta river issues "remains a Litmus test for India - Bangladesh relations."

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Moreover, in future, the India - Bangladesh Joint River Commission (JRC) functional since 1972 which held its 37th meeting (last) in 2010 needs to be revived from slumber. Also, the idea of integrated river basin management, joint development of hydro-power projects joint dredging of rivers needs to be explored & taken forward.

India gave deal for Bangladesh for making riparian as a joint project.

Trade and Transit Issues

- The structural asymmetry between India & Bangladesh is also reflected in their economic relations.

The Bilateral trade relationship was estimated at 8.8 Billion & in 2017 with the balance of trade largely in favour of India. This stood at 7.2 Billion & for 2017 (Indian exports : 8 billion, Bangladesh export 0.8 billion).

- Though this has previously been an important bone of contention between Delhi and Dhaka, most commentators recognize the structural inevitability of this imbalance, Dhaka has a huge trade deficit being as well.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- Addressing Dhaka's trade concerns unilaterally, India removed 47 items during Sheikh Hasina's visit to India in 2010 & 46 textile items during Manmohan Singh's visit to Dhaka in 2011 with this practically all items in which Bangladesh has an export interest to Indian market have been removed from negative list.
- On the issue of Transit, Bangladesh has the potential to serve as a vital connecting link between West Bengal and India's North Eastern States decreasing the overwhelming dependence on the Siliguri corridor for transit of goods and people.
- Moreover, granting such transit rights would be mutually beneficial for Delhi-Dhaka as the transit time and cost for Indian goods would drop by 1/3rd to 1/2 (i.e. by 30 - 50% as the 500 km route through Bangladesh would be much faster than the 1700 km route through the Siliguri Corridor).
- It would yield economic gains for Dhaka in form of transit fees and grant credit times for upgradation of infrastructure from Delhi. Also, it would help to build positive inter-dependence between the two neighbours.
↳ Economic interdependence will have spill over effect for other states.

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. **Always Ahead**
☎ 011 45612719

- A positive movement to build transit links between the two was made during the Sheikh Hasina visit during 2010, an MoU between both sides on Akhaura - Agartala rail link was signed in 2013 (15 km rail link Akhaura in Bangladesh to Agartala).
- Protocol on Inland water Transit was linked between Delhi - Dhaka in 2015 in pursuance of which North East India would be connected through National Waterway 1 running through Bangladesh to mainland India.
- A key element of this National Waterway 1 would involve the Ashugang - Kolkata Port Link.
- While positive momentum on building connectivity links has been built up since 2010, much more needs to be done. Also the Bandhan and Maitree express between Kolkata - Dhaka have also added

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

to improving the connectivity links between the two.

- However any radical boost to connectivity between the two is more likely to be withered if the existing concerns of Dhaka on trade and connectivity are addressed at the earliest.

Dhaka have been using wrong kind of argument to achieve water rights

Role Of China Factor & India - Bangladesh Relations

In contrast to the absence of domestic political consensus in Bangladesh over the course of foreign policy with India, there is a striking consensus for pursuing closer relations with China.

Though historically, China had opposed the creation of Bangladesh in 1971 & tilted towards Pakistan, this has not come in the way of normalization of ties between the two.

- In 2002 - China & Bangladesh signed a defence cooperation agreement during Khaleda Zia's visit in BNP era which provided for military training to troops, defence acquisitions etc.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

So P.K. Singh argues that

"The fact that Bangladesh opted for a defence pact with China rather than USA means a conscious desire on Dhaka's part to invest in anti-India coalitions in South Asia, since America's relationship with India has metamorphosed fundamentally in the new millennium."

- China's increased engagement in South Asia including in Bangladesh has been increasingly visible since 2016 visit of Xi Jinping upgraded the Beijing - Bangladesh relationship to a strategic partnership level.

This was the first visit by a Chinese premier to Bangladesh in 30 years (3 decades) China during Xi's visit promised to give a major push to the infrastructural projects as it offered 24.5 Billion \$ in investments on 34 projects. This would largely be in consonance with China's BRI (Belt and Road Initiative).

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- Recently in 2017, China has surpassed India as Bangladesh's largest trading partner with Bilateral trade reaching 10 Billion \$ annually, however the trade relationship is largely tilted in favour of China (Chinese exports $\approx$ 9 Billions \$ Bangladesh's exports $\approx$ 1 Billion).
- Most Bangladeshi defence platforms have been historically processed from China including two-wing class submarines procured in 2017, which raised in much concerns in India.

[also see C. Raja Mohan's views on China - Bangladesh relation & its implications for India.]

India's Recent Engagement in Bangladesh

- The Modi era since 2014 has seen a renewed push by Delhi in increasing its engagement with Dhaka. This included bring a settlement to a much delayed land boundary agreement issue in 2015, the extension of a 4.5 Billion \$ line of credit to Bangladesh during Sheikh Hasina's visit to New Delhi in 2017.
 line of credit is low cost interest.

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. **Always Ahead**
☎ 011 45612719

- Also a framework for closer defence cooperation was signed between New Delhi & Dhaka under which Dhaka could procure defence platform from India under a separate line of credit amounting to 500 million \$. *(India gave option for Bangladesh that if it want to procure defence products from India it can use 200 \$ (one million))*
- In economic and trade arena India continue to be a major trade partner for Bangladesh with Bilateral trade at (> 8 Billion \$) in 2017.
- P.M. Modi's 2015 visit saw additional transmission lines being opened from Tripura to supply 500 MW of electricity to Bangladesh in addition to 660 MW already being exported through West Bengal. *(as Bangladesh was Energy hungry country)*
- Moreover India has signed a trilateral agreement with Russia & Bangladesh for a 2400 MW Rooppur Nuclear Power Project while Russia would supply the reactors, India would assist in installation of power plants framing of Bangladeshi officials in operationalizing the project.

SHUBHRA RANJAN

C. Raja Mohan Views

- He argues that in context of India - Bangladesh relations, three sets of issues are at the root of political opposition in both countries that need to be addressed.

First, question relates to the issue of size and significance. It is time for Dhaka - Delhi "to get out of big brother, small brother syndrome."

While Delhi needs to engage Dhaka in a more sustained & purposeful manner, Dhaka must demonstrate greater self assurance in engaging India for enlightened self interest time is now for Dhaka - Delhi "to get out of big brother - small brother syndrome."

Second, with a border of merely 4060 km, ^{India had already benefited from its engaging} India's largest with any country, Delhi has no reason to see itself in competition with Beijing in Bangladesh.

China has become a major partner for Bangladesh is partly due to Beijing's emergence as the World's ^{13 billion dollar} 2nd largest economy. But it is mostly about growth

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Delhi's past neglect of its neighbours. *celebrating 75th anniversary*

- The partition of subcontinent & the inward looking economic orientation of India & Bangladesh meant that the two sides were working against the logic of geography, rather than with it.

Third, set of issues relate to Bangladesh's leadership role of in the subcontinent & beyond Dhaka has an important role in shaping the future of sub-regional cooperation between Burma, Bhutan, India & Nepal. *Director*
It has the potential to serve as a land bridge for East Asia.

Muchkund Dubey

Points out that the subcontinent suffers from the big brother small brother syndrome. Moreover, the big brother has the habit of ignoring the small neighbours which feel ignored.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- Dubey argued about the lack of scale in India-Bangladesh engagement and also the considerable delays in engagement. For example :
 - the 1 Billion \$ line of credit announced during the Manmohan era in 2010 was completely utilized only in 2016.
 - though India has committed 5 Billion \$ in line of credit in 2017 it needs to think bigger.
 - Dubey argues that if China can commit 46 Billion \$ to Kashar Corridor, India can commit 10 Billion \$ to Bangladesh in 4-5 years that can dramatically change relations.

Shibhasis Chatterjee : wrote on India - Bangladesh relations in the book "Engaging the World :- Indian Foreign Policy since 1947", the domestic politics is a key driver of India - Bangladesh relations.

- He argues that in Bangladesh, the deep political divide between secular Awami League & BNP with its focus on political Islam & religious identity

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

explains much of the inconsistency in India - Bangladesh relations.

Increasingly domestic politics within India has also come to influence India's relations with Bangladesh as India has moved away from a one-party dominant system to coalition based politics.

- Moreover the rise of regional forces / parties in many cases has resulted in local concerns / issues driving national choices.

India Myanmar Relations- Rohingya crisis

What is the Rohingya issue in Myanmar?

Considered by the United Nations as the "most persecuted minority group in the world", the Rohingyas are a stateless group of people concentrated in western Myanmar and facing brutal assaults from the Burmese state and military. The Rohingyas see themselves as (Muslim) natives of Arakan (Rakhine), a state in Myanmar, whereas Myanmar's government and the majority Buddhist community sees them as Bengali Muslims from Bangladesh who migrated there during the colonial period and continue to do so.

The Rohingyas were stripped of their Burmese nationality by the 1974 Emergency Immigration Act and then the 1982 Citizenship Act. There are numerous restrictions on them, including on their movement, access to the economy, education, health and other rights. This results in their legalised persecution by the government.

they don't have proper political representation

Myanmar has been under severe attack from the international community in recent times for what is being considered as 'genocide' against the Rohingya Muslims.

In the aftermath of the recent incidents of terrorism in the state by the Rohingya militant group, ARSA, a fresh wave of refugees have made their way to Bangladesh and other countries in the region

— adding to the Rohingya-refugee population in these countries. Some 40,000 Rohingyas have also found their way to India.

What has been the response of the new government in Myanmar?

There has been no change in the government's policy towards the Rohingya community, as positioning itself against the Buddhist majority whose leaders are vociferously anti-Rohingya, is considered a risky political move.

Even Aung San Suu Kyi, the Nobel Laureate who fought for decades for democracy and reform in Myanmar, has been conspicuously quiet on the issue.

Myanmar can have stronger control of the country as they have control of their Economy

Despite the return of democracy in 2015, the military continues to have a strong hold over the civilian government in Myanmar, especially on key issues such as defence, border affairs and home affairs.

Ex: In Pakistan 4-6% of the population are controlled by military MINBUS

An Independent and Representative Advisory Commission led by former UN Secretary General Kofi Annan was allowed by the government to seek "lasting solution" to the Rohingya crisis. This was the first time any concrete initiative was undertaken by the Myanmar authorities after the 2012 Rakhine State riots between the Rakhine Buddhist majority and the Rohingya Muslim minority.

How has the international community responded to the crisis?

While Human Rights Watch has called the military crackdown on Myanmar a case of 'ethnic cleansing', the UN's office of Human Rights has declared that the crisis in the South East Asian country 'could tantamount to crimes against humanity'.

Kofi Annan-led Advisory Commission on Rakhine State submitted its report to the State Counsellor and de facto Foreign Minister Aung San Suu Kyi. The Commission, appointed last September, strongly recommended a review of the 1982 citizenship laws and specifically

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

pointed to the slow and sporadic process of citizenship verification, which has covered only 10,000 Rohingyas since 2014. Suu Kyi has termed the Annan report as constructive.

The assault on the Rohingyas has also been fast gaining attention from Jihadists around the world, making the ground ripe for extremism. The West has been particularly wary about the possibility of a breeding ground for religious terrorism as a response to Myanmar's brutality and has been urging neighbouring Muslim majority countries to strongly resist the repression of the Rohingyas.

In addition, there have been protests rallied out in countries like Malaysia, Indonesia and Bangladesh to denounce the military assault in Myanmar and the inaction of Su Kyi.

India's Stand on the issue

India primarily considers it as an internal affair of Myanmar.

This was the approach as suggested by Harish V Pant as C. Raja Mohan.

Even as Delhi has maintained a cautious stance, it has been receiving Rohingya refugees and allowing them to settle in different parts of the country over the years particularly after the communal violence in Rakhine state in 2012. There are approximately 40,000 Rohingyas estimated to be living across India as illegal immigrants. Even if they possess UNHCR certificates, the government doesn't recognise them as it is not a signatory to the Refugee Convention. The government has a plan to deport them back to neighbouring Myanmar. The government's plan has, however been challenged in the Supreme Court.

India is not a signatory but still follows all the norms.

In the joint statement issued by India and Myanmar on Modi's visit, the previous formulations towards were repeated whereby India condemned the recent incidents as terrorist attacks. It also noted that the problem in Rakhine is also one of lack of economic development and India has promised assistance.

India haven't joined due to Kashmir & other issues.

Reasons behind India's Rohingya-Myanmar policy:

- Under the neighbourhood first and look East policies, Myanmar assumes a key role to connect with southeast Asia and cut off China from the Bay of Bengal.
- India's criticism of the military junta for its suppression of the democracy movement in the 80s and 90s had an adverse impact on the bilateral relationship for years.
- Moreover, India has real security interests too, like those concerning the Naga rebels, which depend on the goodwill of the Myanmar regime.

When in a bilateral the refugees possess both Education & Economic power so they were able to find sign.

With the political and military establishment in Myanmar more or less on the same page on the Rohingya question, PM Modi's reiteration of the Rohingyas as primarily a security issue rather than a human rights issue of a stateless and persecuted minority, was a welcome respite to both sides of the Myanmarese leadership, beleaguered as they are by the blunt international criticism on this front.

Meanwhile, in keeping with its Myanmar policy, at the World Parliamentary Forum on Sustainable Development in Bali, India abstained from the Bali Declaration because of a reference to "violence in Rakhine state".

not voting either for or against something.

However, India's security and diplomatic establishments have been concerned at events in Myanmar since 2012 and the "disproportionate response" by the security forces since last year, for their potential to radicalise the Rohingyas.

India believes "quiet diplomacy" is its only option but is worried it will be increasingly drawn into the situation.

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Impact of Rohingya crisis on India

The issue has raised four important issues for India's consideration.

1. First, the initial firings of radical group activity is more than apparent in violence hit areas of Myanmar. For India, the problem is that ARSA (a Rohingya militant group responsible for the recent attacks) has a definite Pakistani link with some reports noting that the group may have been trained there, or even in Afghanistan. *E also Samrat & Islam origin in Bangladesh*
2. The second issue for India, arises from the first. The movement of Rohingyas across the subcontinent underlines that the community is well-networked throughout the region. This raises serious fears about ingress of terrorists in the cause of refugees. This trend is already apparent in Europe where Islamic State terrorists hid among entering the continent and launch attacks in Paris that killed more than a hundred and thirty. *In France the terrorist had come as refugees & started wide scale attacks*
3. The third issue for India is the stability of Bangladesh. Coping with nearly a quarter of a million refugees is a difficult task for even the most advanced economies. For Bangladesh, the human catastrophe is a nightmare.
4. The fourth issue is overall relations with Myanmar at a time when it is being wooded by China and Russia. India has not backed the call for a Commission of Enquiry, reasonably noting that the present Myanmar government has hardly had a year in office and needs time to work through a problem that is more than four decades old. China, on the other hand, has condemned the terrorist attacks, and has not hesitated to offer mediation between Myanmar and Bangladesh. China and Russia had earlier blocked a UN Security Council statement expressing concern at the humanitarian crisis. Recent statements by Myanmar's officials indicate that they would be again seeking support from these countries, as well as Turkey. With India still grappling with north east insurgent camps based in Myanmar, the room for manoeuvre seems limited. *Seeking the support*

On the other side, there are also factors that provide for India's intervention in the issue:

A hefty dose of humanitarian assistance will provide the underbelly for strengthening the much talked about "soft power" of the Indian state. Just being soft will however hardly draw results. In the longer term, it is useful to remember that the Rakhine State was once a hub of commercial trade with natural links to the subcontinent. At a time of a search for connectivity across the continent, this should be a thrust for both stabilisation efforts and commercial outreach by Indian institutions and Ministries alike. *To moment reaching care @ Sri Sri*

India-Myanmar-Bangladesh Complexities

The Rohingya issue has always cast a shadow on relations between Myanmar and Bangladesh, who share a 271-km-long border over the provinces of Chin and Rakhine. Bangladesh has seen the influx of Rohingya refugees before, but the current numbers were perhaps last seen only in the early 1990s and has faced the political and security fallout of the largest influx of refugees ever since its independence. *down to Tripura*

In 1978, more than 200,000 Rohingyas fled into Bangladesh following a security crackdown prior to a national census. Most of them returned home after a bilateral pact was signed under pressure from China, the US and the UN.

The Indian prime minister's remarks during the recent visit were in line with the previous

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Indian foreign policy position on the Rohingya issue – which has become so aligned with Myanmar that India does not even use the term ‘Rohingya’.

However, Indian statements made in Myanmar – while Bangladesh had to face the fallout of thousands of refugees across the border – led to complications.

When the Indian Prime Minister’s visit took place, the security situation was the main focus. Since then, the number of refugees have increased at an alarmingly fast pace.

There was rising public anger in Bangladesh about India’s position which led to Dhaka’s diplomatic overdrive because of which New Delhi had to modify its position on the Rohingya issue, to also acknowledge that there is now a refugee crisis. Pushed by Bangladesh, India had to ask Myanmar for “restraint” in its military operations against the Rohingya in its Rakhine state. This was the first time that India acknowledged that there is an ongoing refugee crisis, rather than just talk about violence perpetrated by Rohingya militants.

For the Bangladesh state, the perennial Rohingya issue is viewed through a lens of multiple threats, as concerns over terrorism, disquiet over vulnerability to entrenchment of foreign terror groups and domestic political equations being influenced by the Rohingya issue. There is also a risk of merging with local populations, which poses a high degree of hidden threats to communities.

There is also a particular belief in Bangladesh that India was “privileging” its strategic goals in Myanmar. This is because India has been keen not to give more diplomatic capital to China than it already has with Myanmar over the Rohingya issue. Earlier this year, China had offered to mediate between Myanmar and Bangladesh.

India was in a “catch-22 situation” on the Rohingya issue. Both Myanmar and Bangladesh are crucial for fighting insurgency in the northeast, as well as for India’s ‘Look East’ policy and connectivity projects. Faced with India’s support for Myanmar, Bangladesh could grow closer to the Islamic bloc of countries.

Bangladesh’s reliance is now rather shifting towards UN, the West and Muslim members of ASEAN.

Indonesia, Malaysia, etc.

REFUGEES IN INDIA

Refugee crises may be caused by any number of reasons but the most common, in Indian context, are war (Bangladesh), domestic conflicts (Tibet, Sri Lanka), natural disasters (famine), environmental displacement, human trafficking and—this one will turn up at all our doorsteps soon—climate change.

Composition of Refugees in India

According to the UNHCR, there were 204,600 refugees, asylum seekers and “others of concern” in India in 2011.

India is the largest refugee receiving country in South Asia. Refugee groups that have sought asylum in India include Tibetans, the Tamil from Sri Lanka, Partition refugees from erstwhile East and West Pakistan, the Chakmas from Bangladesh, Bhutanese refugees from Nepal, Afghans, Rohingya and other refugees from Myanmar and refugees from Somalia, the Democratic Republic of Congo (DRC) and Sudan.

As per 2015 data:

Tibetan	Sri Lankan Tamils	Myanmar	Afghanistan	Other Countries
100,000	73,000	16,300	13,200	2100

India's policy on refugees

India is not party to the 1951 Refugee Convention or its 1967 Protocol and does not have a national refugee protection framework. However, it continues to grant asylum to a large number of refugees from neighbouring States and respects UNHCR's mandate for other nationals, mainly from Afghanistan and Myanmar. While the Government of India deals differently with various refugee groups, in general it respects the principle of non-refoulement for holders of UNHCR documentation.

Since India does not have any specific laws to deal with refugees, the policy has been traditionally based on a combination of judicial pronouncements and ad hoc executive policies. In India, the law that deals with entry and exit of foreign nationals is the Foreigners Act, 1946. It does not recognise refugees as a special category needing humanitarian protection. The process of deciding who is a refugee is also unclear.

While the Indian government deals with asylum-seekers from Tibet and Sri Lanka, the office of UNHCR in New Delhi deals with asylum-seekers from other countries.

The three principles underlying India's treatment of refugees was spelt out in Parliament by Jawaharlal Nehru in 1959 with reference to Tibetan refugees. They include:

- ☐ refugees will be accorded a humane welcome;
- ☐ the refugee issue is a bilateral issue; and
- ☐ the refugees should return to their homeland once normalcy returns there.

India-Myanmar Relations

Background

India and Myanmar share a 1,643 km long land border as well as a maritime boundary in the Bay of Bengal, and have a shared history as well as cultural and religious connections. Burma was a province of British India until 1937, from which point it became a separate British colony. The British famously exiled India's last Mughal emperor, Bahadur Shah Zafar, until his death in Rangoon.

While populations had moved between the two countries for centuries, the Indian presence in Burma increased under the Raj as the British brought Indians into administration, police and defence, and the Indian Burmese community became a commercial elite.

India and Burma became independent in 1947 and 1948 respectively. India's approach to Burma/Myanmar may be divided into three distinct phases since independence, reflecting changes in the bilateral relationship but also changes in India's Myanmar policy. The period 1948-62 was marked by friendship and international solidarity while the years 1962-91 saw an unprecedented level of hostility as India embarked on its open condemnation of the Tamadau. From 1991 onwards, as India's Myanmar policy metamorphosed into a gradual engagement with the junta, the stage was set for a new phase in the relationship.

1948-62: friendship and international solidarity

The period 1948-62 witnessed largely cordial Indo-Burmese relations, and three themes stand out as particularly relevant: close relations at the highest political levels, a similar ideological affinity and co-operation in international affairs, and the situation of the Indian diaspora in Burma. Indeed the close friendship between Jawaharlal Nehru and U Nu resulted in almost annual official and private visits in the years 1948-62.

Carefully balancing between its larger neighbours India and China, U Nu's Burma nevertheless favoured India. New Delhi supplied arms to Rangoon's counter-insurgency efforts in 1949, and four years later U Nu and Nehru worked to counter increasing Naga demands for independence on the volatile Indo-Burmese border. In July 1951, India and Burma signed a "Treaty of Friendship and Peace" in Rangoon, agreeing on "everlasting peace and unalterable friendship." Efforts were made to revive Indo-Burmese trade, and in 1954 Nehru cancelled significant parts of Burma's debt to India.

Close ideological and political affinity between the political elites led to a close alignment in international affairs. In the early post-Independence period India and Burma sought active places in international politics, the countries' foreign policies marked by adherence to notions of pan-Asian ideals, neutralism and non-alignment as well as socialist-inspired notions of equity and justice. The countries frequently co-operated in forums that were central to the new Third World movement such as the UN, taking on

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

roles as leaders of the decolonised and decolonising countries. Indeed Burma wished to emulate the Nehruvian approach in world politics, remaining non-aligned while at the same time taking a leadership role.

In April 1954, India and China signed the Panchsheel Treaty, agreeing to principles of peaceful co-existence, mutual non-aggression and non-interference. At Nehru's instigation, Burma and China agreed adherence to the same principles two months later. India and Burma were among the initiators of the 1955 Bandung conference, which laid the foundations for the 1961 establishment of the Non-Aligned Movement (NAM).

Foundations for NAM

Closeness in Sino-Burmese relationship: In parallel with India and Burma's emerging leadership role in international affairs, however, a closer Sino-Burmese relationship created apprehension in New Delhi. Chinese economic assistance, joint Sino-Burmese military operations in Shan state and the 1960 signing of a Sino-Burmese border agreement and treaty of friendship all created growing concern in India, at a time when Sino-Indian relations were strained over the border issue.

Anti-Immigrant sentiment in Myanmar:

Early post-independence Indo-Burmese relations were also affected by problematic issues at home, such as the fate of Burmese people of Indian origin. The number of Indians residing in Burma at the time of independence is estimated to be between 700,000 and 800,000, and these were hard hit by the early measures to nationalise land and industry.

The colonial legacy created lasting Burmese apprehensions about India and the Indian Burmese (or 'kalias') due to their role in the colonial apparatus of domination & their relative economic success. Indeed Sino-Burmese relations were also strained by similar Burmese fears of domination, and the Chinese population in Burma also experienced antipathy. Wishing to limit foreign economic interests, U Nu's government introduced the 1948 Land Alienation Act, which forbade sale of land to non-Burmese nationals, and the 1949 Burma Land Nationalisation Bill, which reclaimed Indian-owned land. In 1953, over 10,000 Indians were dismissed from various Burmese government services. Indian official reactions were muted. While the government facilitated repatriation, Nehru in 1950 encouraged Indians in Burma to change nationality and settle permanently.

Even though India has closer ties with the Indian Burmese were seen as coloniser against Sino-Burmese and sent back to India

1962-91: from friendship to antagonism

When General Ne Win in 1962 set aside U Nu in a coup, India condemned the move. Burma became a military one-party regime under the Burma Socialist Programme Party (BSPP), also dominating the country's external relations. While the setting aside of the democracy in Burma provoked strong negative reactions in Delhi, India's attention was soon diverted by the October 1962 war with China. The Burmese military regime's neutral stand on the Sino-Indian war was in Delhi interpreted as support for China, straining Indo-Burmese relations further.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

The same year, however, China began endorsing the Communist Party of Burma (CPB) in its insurrection against the central government, making it the best armed of Burma's many insurgencies. China's support for CPB created a lasting strain on Sino-Burmese relations.

Violent uprising against govt

However, by the late 1970s this was reduced, and by the mid-1980s the CPB support was no longer a matter for bilateral diplomatic relations. Eventually Beijing worked to restrain the CPB insurgency, and in 1989 the CPB was dissolved.

Armed forces foreign

General Ne Win's "Burmese Way to Socialism" entailed a comprehensive xenophobic nationalism, limiting foreign economic and cultural participation and favouring the dominant Burman (Bamar) identity. The autarkical economic policies brought a drastic reduction in cross-border trade and prevention of external investments and foreign participation in the economy. The Indian diaspora was again hard hit. Large proportions lost their means of livelihood, while their bank accounts were simply closed down. In addition, anti-Indian sentiments prevalent in the Burmese population flared up.

Self sufficiency

While Indo-Burmese relations were severely strained over the issue of the Indian diaspora, In the mid-1960s Ne Win visited Delhi and Lal Bahadur Shastri visited Rangoon. Spurred on by insurgencies in north-east India, the Indo-Burmese border was settled through a boundary agreement signed on 10 March 1967, and the period also saw some co-operation on counter-insurgency operations in the border areas. From the mid-1970s, however, relations again cooled. U Nu, exiled from Burma by Ne Win's regime, was granted political asylum by India, which in turn became a sticking point between the countries.

Sino-Burmese relations & the end of the "paukphaw" era post 1967 riots: In comparison, Chinese diplomatic reactions to the extensive anti-Chinese riots in Burma in 1967 were strong, effectively ending the era of friendly Sino-Burmese 'paukphaw' (sibling or cousin) relations.

Indo-Burmese co-operation in international matters soon decreased. India officially disapproved of the undemocratic nature of the Burmese regime, while Burma became the subject of relative international isolation. In addition, Ne Win and the BSPP chose to lead an isolationist policy combining economic self-reliance with nationalist seclusion, gradually withdrawing from most of the diplomatic connections U Nu had built up. As a result, in 1979 Burma withdrew from the Non-Aligned Movement.

1987: after a hiatus of nearly 20 years, Rajiv Gandhi's visit to Rangoon was the first Indian visit on prime-ministerial level since his mother's 1969 visit. Aiming to improve bilateral relations, any headway created by Gandhi's visit was, however, thoroughly undermined by the events of 1988.

1988: suppression of pro-democracy protests in Myanmar. Indo-Burmese relations reached an all-time low following the August 1988 pro-democracy demonstrations in Burma and the military regime's brutal repression of protests. India was the first and only

SHUBHRA RANJAN

Asian country to criticise the new Tatmadaw junta of September 1988, the State Law and Order Restoration Council (SLORC).

Furthermore the Indian embassy in Rangoon actively helped pro-democracy activists during the protests, famously turning the embassy library into a makeshift hospital and providing financial support for democracy activists. The Indian government established refugee camps in Mizoram and Manipur states, and the government run All India Radio (AIR) began broadcasting Burmese language reports on the SLORC repression, read out by U Nu's daughter. New Delhi wished to limit involvement with Yangon as the capital was renamed, even more so after the regime placed Aung San Suu Kyi under house arrest from June 1989. Furthermore, when Suu Kyi was awarded the 1991 Nobel Peace Prize, India's Prime Minister Narasimha Rao lauded the recognition.

The strong Indian stance against the new regime in Myanmar – the country's new name from 1989 – caused considerable offence within the SLORC, creating an impetus to seek allies elsewhere.

Thus while both Myanmar and China countries faced internal crises as well as strong international condemnation following their crackdown on the 1988 uprising and the 1989 Tiananmen Square protests respectively, Yangon and Beijing soon built a close relationship. As the extent of this relationship became clear, Indian security analysts and foreign policy circles began reviewing India's policy towards Myanmar, fearing expanded Chinese influence in India's neighbourhood.

1991 to today: India's policy of engagement:

In the early 1990s, Indian security and foreign policy circles pressed for a change in the policy towards Myanmar, opting for engagement with the Tatmadaw. In March 1993, India's Foreign Secretary J.N. Dixit visited Myanmar and discussed Indian concerns with Myanmar's military co-operation with China. The first high-level contact since the repression of the 1988 pro-democracy demonstrations, Dixit's visit was understood as a breakthrough, confirming New Delhi's policy change.

→ In 1993 first time they started making deal with Sanja properly before General Khasu Gordin

The policy change was desirable for a number of reasons, China's economic growth and increased influence in Myanmar became an overriding concern, making India's Myanmar policy take on new and important geostrategic dimensions.

India's geostrategic interests in Myanmar: Writing in 2000, J.N. Dixit argued that the main reason for the review of Indo-Myanmar relations was "Myanmar's geostrategic importance for India" pointing out the shared border with the Indian north-east, China and Bangladesh, as well as its relevance for Indian security interests in the Bay of Bengal and the Andaman and Nicobar Islands. However it was "equally important to ensure that Myanmar does not become part of an exclusive area of influence of other powers in the region with whom India has uneasy relations. China, for instance".

While most countries had severed their ties to Myanmar after 1988, China quickly

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

became the country's closest ally and economic partner, and its largest provider of development aid. Spurred on by a new willingness by the SLORC regime to set aside the Angistie approach of the Ne Win era, Sino-Burmese co-operation grew to encompass economic, military and infrastructure development. The alignment facilitated a massive military expansion and rearmament in Myanmar with China as the largest supplier.

Sino-Burmese trade boomed and China invested heavily in Myanmar's infrastructure, also benefiting Chinese aims of using Myanmar as "a corridor for the southward flow of Chinese goods" and opening up the western provinces. In Delhi, this development was viewed with deep suspicion – an infrastructure corridor from Yunnan to the Bay of Bengal could potentially transport soldiers just as easily as goods. Suspicion turned to fear when in 1992 China was reported to have set up bases or even intelligence-gathering facilities on the Burmese Greater Coco and Hainggyi islands.

Under Prime Minister Narasimha Rao, India embarked upon a new and more pro-active direction in foreign policy, which combined a gradual approach towards the remaining superpower, the USA, with a turn towards East Asia and especially the ASEAN states through the "Look East Policy" (LEP).

While often assumed to be a mainly economically motivated policy, LEP also aims for a strategic engagement of Southeast Asia ^{→ USSR} as a result of "India's search for new friends and partners after the loss of its superpower patron in 1991". Thus the LEP has economic, diplomatic and strategic aspects, and the total sum of these affect India's relations to Myanmar. Myanmar has come to attain a central place within the LEP due to its geographical location, geostrategic relevance and natural resources.

India's main objectives: security, connectivity, economic and maritime dimensions

In addition to the 'China factor' and India's own orientation eastwards, four geostrategic considerations have guided India's Myanmar policy over the last two decades. First, a growing Indian wish to stabilise and develop India's northeast has made the need for co-operation with Myanmar on cross-border security issues evident. Second, Myanmar's position as a connecting point between South and East Asia is central, as Myanmar is understood as key to improving connectivity to the greater Southeast Asian region. Third, Myanmar's natural resources and particularly its gas and oil reserves make it an interesting trading partner. Finally, Myanmar's position in the Bay of Bengal littoral region, in which India aims for regional leadership, is of key importance.

A main driver behind India's co-operation with Myanmar remains the need to stabilise and develop India's north-east, which poses a significant security challenge for the central authorities. As mentioned above, Myanmar and India share a 1,643 km border along the Indian states of Manipur, Nagaland, Mizoram and Arunachal Pradesh and Myanmar's Sagaing region and Chin and Kachin states. The border cuts across the homelands of a number of ethnic communities, many of which have led insurgencies against the central authorities in both Myanmar and India. The border is also porous, and militant groups operate out of both India's and Myanmar's territory, often protected by

project &
Ailabur
project*

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

the local neighbourhoods or local authorities. Furthermore the Free Movement Regime which allows tribal communities to cross the border without visa restrictions, aids trafficking in illegal goods.

Following India's growing engagement with Myanmar, closer military co-operation in the border areas took place from the first half of the 1990s onwards operation golden bird, resulting in a number of counter-insurgency operations, joint military operations against insurgents along the border were thus resumed and strengthened in autumn 2000, spring 2001 and autumn 2001 and became annual joint winter campaigns. Co-operation mainly works to counter the major militant groups that oppose the Indian central government, such as the National Socialist Council of Nagaland and its two factions, Isak-Muviah (NSCN-IM) and Khaplang (NSCN-K), the United Liberation Front of Assam (ULFA).

Gradually, an understanding of the need to develop India's north-east and improve infrastructure has gained ground in Indian foreign and security policy. Enhanced connectivity is a central objective of India in Myanmar, both in order to connect India proper to its own north eastern states, and in order to connect to Myanmar, using its neighbour as a gateway to the ASEAN countries.

A number of infrastructure initiatives have been established or are currently underway, such as roads, railways and pipelines such as:

India-Myanmar-Thailand trilateral highway project: The project aims to connect the three countries through the construction of a highway from Moreh in Manipur state via Mandalay and Yangon in Myanmar to Mae Sot in Thailand. The Indian side has wished for a weekly bus service between Imphal and Mandalay for several years, with relatively low fares and a visa-on-arrival scheme for travellers, making movement between the countries easier.

The Kaladan multi-modal transport project has long been one of India's flagship projects in Myanmar. Initiated in 2003, an agreement was reached between India and Myanmar in 2008. The project will link the ports of Kolkata (India) and Sittwe (Myanmar) by shipping route, and link Sittwe further up the Kaladan river by boat to Mizoram in India.

But not able to implement due to the insurgency

The main rationale from the Indian side has been to improve connectivity between India proper and the north-eastern states through creating an alternative to the Siliguri corridor.

Geostrategic relevance of Myanmar: Myanmar's importance as a connecting point between South and East Asia has been much emphasised, and the country is often seen as the crossroads of Asia, or as India's 'land bridge' towards South-east and East Asia. In 1996, ASEAN leaders agreed that Myanmar would be admitted as a member state, and the following year Myanmar became a member. ASEAN's engagement of Myanmar and Myanmar's 1997 ASEAN membership coincided with India's growing engagement with both Myanmar and ASEAN through the LEP. A strategic consensus thus emerged

SHUBHRA RANJAN
Always Ahead
32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

between India and ASEAN on the need to wean Myanmar away from China.

The first of these was the Bangladesh-India-Sri Lanka-Thailand Economic Co-operation (BIST-EC), established in June 1997. Having attended the inaugural meeting as an observer, Myanmar became a full member in December the same year, and the organisation was renamed BIMSTEC.

Not a Road just cooperation

Another similar initiative is the Mekong-Ganga Cooperation, which from 2000 has worked to improve connectivity and economic and cultural exchanges between its member countries India, Laos, Myanmar, Thailand, Cambodia and Vietnam. A closer regional co-operation has also been sought by China, such as through the 1999 "Kunming Initiative" or the BCIM co-operation between Bangladesh, China, India and Myanmar. From 2013 onwards, however, renewed interest has emerged in the BCIM economic or trade corridor,

Geo-Economic importance of Myanmar: Over time, India's own economic rise has made access to resources and markets, as well as energy security, increasingly important, and in light of this access to Myanmar's natural resources, gas and oil reserves are interesting for India

While the Indian oil and gas industry is heavily involved in Myanmar's energy sector, it is, relative to the Chinese industry, less profitable. Moreover, it is also hampered by the lack of oil and gas infrastructure between the two countries. While an MOU on the sale of natural gas from the Shwe field to India was signed in 2006, India nevertheless eventually lost out to China, as Indian attempts at establishing a pipeline between India and Myanmar, via Bangladesh or India's north-east, did not succeed. China, in contrast, constructed a double pipeline between Kyakpyu and Kunming in five years, and has a 30-year contract on the gas from the Shwe field.

In April 1995, the first India-Myanmar Border Trade Agreement was implemented. Since then three border trading posts connecting Manipur, Mizoram and Nagaland have been put into place. The bilateral trade increased from USD 87 million in 1990-91 to USD 1.9 billion in 2012-13 to USD 2.16 billion in 2016. India is one of the main importers of Myanmar's agricultural items, and the main exporter of pharmaceuticals to Myanmar & India is the fifth largest trading partner of Myanmar.

Chinese economic presence in Myanmar: According to ADB (2016) data, continuously since 2001 China has been the leading source of Myanmar's imports. It reached 3.04 billion USD in 2015 and constituted 28 percent of all Myanmar's imports. Once the gas and oil pipelines became operational, China became the main export destination in 2014 and the value of export reached 7.72 billion USD (43 percent of all Myanmar's export)

Myanmar is Economically dependent on China

Defence cooperation between India-Myanmar: The maritime domain is an area where Indo-Burmese co-operation has been relatively successful, achieving extensive collaboration. Important objectives on the Indian side have been to acquire intelligence on the claimed Chinese presence in Myanmar, and more particularly the alleged Chinese

SHUBHRA RANJAN

Always Ahead

bases on Burmese islands.

Joint yearly naval exercises have been held since 2003, and the Myanmar navy, or Tatmadaw Yay, takes part in the annual MILAN exercises led by the Indian navy. The close co-operation has intensified during Them Sein's government, and Myanmar naval vessels in 2013 made their first port calls to mainland India. Following the port call, the two navies conducted joint exercises and patrolled their joint maritime boundary. India decided to supply several offshore patrol vessels to Myanmar, and give training to officers of the Myanmar navy.

The increased Indian willingness to support the Myanmar navy was later interpreted as central to a conscious change in Indian defence policy, originating within the military, intelligence and foreign policy circles in South Block, and taking place in the latter half of 2013. Using India's military branches, the main aim is seen as furthering India's interests in the immediate and strategically important neighborhood, also countering China's influence.

Barriers to India's achievement of its objectives in Myanmar:

While India's engagement with Myanmar in the maritime domain has been relatively successful, India's achievement of its objectives in the areas of security and economic development, trade and connectivity has been hindered by a number of constraints. Despite the radical turn-around in India's Myanmar policy in 1991, in practice it took several years before India managed to implement a powerful policy. It was not until the early 2000s that tangible results were seen in the form of several bilateral agreements, and defence and security co-operation was carried out on a more regular basis.

Particular importance has been accorded to Jaswant Singh's period as India's Foreign Affairs minister in 1998–2002, and his 'Eastern Strategy'. In part, it took a long time to establish a basic trust following the strong Indian condemnation of Myanmar in 1988. Also, the BJP government placed greater emphasis on trade as a foreign-policy tool, lending greater support to Indian investment in Myanmar than the previous governments. In addition, the BJP added a cultural dimension to the engagement with Myanmar, emphasizing the Indian roots of Buddhism.

In 2004 the State Peace and Development Council (SPDC) junta's leader Senior General Than Shwe visited India – the first head of state visit for 20 years. After BJP lost the 2004 Indian elections, Manmohan Singh's United Progressive Alliance government (2004–2014) continued and intensified the policy of engaging with Myanmar.

A main obstacle for the Indian projects in Myanmar has simply been problems of implementation. As shown by several projects such as the Kaladan project, the "India-Myanmar-Friendship Road" and the Trilateral highway, several years have gone by between establishment and finalisation of projects. It is implied that these projects have not received the necessary support from government circles in Delhi, whose approach towards the infrastructure projects in particular has been termed 'lackadaisical' by Indian

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

observers. Lack of security in border areas and on the main Indian roads to the border areas is also a main reason why cross-border trade remains low.

To Save themselves from Sanctions

The democratisation process and the 'Sino-Indian Great Game' in Myanmar: From late 2010 onwards Myanmar's political landscape underwent significant changes: national and local elections were held, a new parliament was convened, and Thein Sein was elected President. Eventually the SPDC was dissolved. Aung San Suu Kyi was released from house arrest; The National League for Democracy (NLD) re-emerged as a legal political party and won 43 seats in parliament in 2012. The changes prompted enthusiastic responses from supporters of a greater Indian engagement with Myanmar, as well as internationally.

A dominant line of argument was that India needed to strengthen its approach and engagement, in light of China's comparative strategic advantage. Again, the notion of a 'Sino-Indian Great Game' in Myanmar came centre stage – on the Indian side.

Prime Minister Manmohan Singh travelled to Myanmar in 2012, significantly supporting both the new semi-civilian government and its opposition through meetings with Thein Sein and Aung San Suu Kyi.

While Myanmar's opening up has seemingly created new opportunities for bilateral contact and co-operation, it could, however, also constitute a new turning point for India's Myanmar policy. Myanmar's democratisation process is likely to make it easier for Indian politicians to agree on a coherent Myanmar policy, not marked by conflicting loyalties towards the different political actors in Myanmar. The November 2015 elections in Myanmar, and Aung San Suu Kyi's National League for Democracy's overwhelming victory, have been warmly welcomed in India. At the same time, however, the democratisation may make it all the more urgent for India to utilise its established relation to Myanmar, as the number of Myanmar's potential co-operation partners has increased rapidly since 2011, and will increase even further with NLD in power. In comparison to the years of international sanctions, Myanmar is now in a position to pick and choose, which leaves India as just one of many potential suitors.

Myanmar is now attracting considerable funding, an example being the Japanese assistance to and co-operation with Myanmar. In 2013 Prime Minister Shinzo Abe visited Myanmar, and Japan soon after cancelled Myanmar's USD 3.7 billion debt. Increased Japanese engagement is understood as motivated by a wish to counter Chinese influence.

Debt should be waived
rather the concentration in one party which will help to protect sovereignty & not let them dictate terms

Furthermore President Thein Sein's 2011–2012 suspensions of the Chinese funded Myitsone Dam project and the Letpadaung copper mine have widely been interpreted as a sign that Myanmar will work to limit the Chinese dominance, particularly by the Indian press.

Security ties & the related challenges for India-Myanmar relations:

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- India's border with Myanmar is densely forested the cover of which is used by insurgents to pursue anti-India agendas, sometime without the knowledge of Myanmar authorities.
- Myanmar presents what Samir Das calls a "frontier dilemma" for India's Look East policy.
- However, in recent times, Myanmar government has taken several steps against Indian insurgent groups. U. Thein Sein reassured India that Myanmar will not let its territory be used by insurgent groups from the Northeast against India.
- Mechanism of regular Joint Consultative Committee meetings between the two countries affirms the shared commitment to fight terrorism and insurgent activity. In a recent meeting the need for enhanced cooperation between security forces and border guarding agencies was emphasized
- At least half a dozen Indian insurgent groups including the United Liberation Front of Asom (Ulfa) and the Nationalist Socialist Council of Nagaland-Khaplang faction, are alleged to have training camps in northern Myanmar
- It is critical to note that the most significant long term connection that northeast insurgents have enjoyed, that with the United Wa State Army (UWSA) which is closely aligned with China.
- UWSA is the largest source of weapons for Northeast insurgents including the NSCN (K). For China, its linkage with the UWSA is a strategic priority, even more so than its relationship with the Myanmar government which is gradually democratizing
- Breaking these covert Chinese connections with insurgent groups like the UWSA with the help of Myanmar is a priority for long term stability in the Northeast.

Civil war and ethnic conflicts within Myanmar:

- Struggles for ethnic and sub-national autonomy has pitted the dominant Burmese community disproportionately represented in the Government against the other ethnic minority groups
- Panglong Agreement: Agreement signed in 1947 by General Aung San and different tribes which promised full autonomy for internal administration in frontier regions where Kachin, Chin, Shan and other tribes lived. However, with establishment of military rule, the agreement was abandoned which resulted in emergence of autonomous armed groups directly challenging the government
- Since 2011, the government has opened negotiations with warring factions and entered into ceasefire negotiations & there is a demand for developing new Panglong

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Agreement that calls for true federalism and respect for human rights. The success of peace-building in Myanmar is hinged on its ability to resolve the ethnic crisis

- In a bid to stabilize the situation, President Thein Sein sought for all round cease fire with autonomous militant groups to ensure peaceful environment for elections in 2015
- The United Wa State Army believed to be the largest and best equipped of the country's armed ethnic groups, has remained largely on the sidelines of the peace process and did not sign the latest nation-wide cease fire agreement. Also missing is the Kachin Independence Organization, which controls vast areas of Kachin State, in Myanmar's northeast.
- It has been reported that these two groups, which operate on the Myanmar-China border, had come under pressure from China not to sign. China has denied these allegations

The 'Second Coast' and its implications for Northeast India

- Myanmar's 2,276 km long coastline in the Bay of Bengal has the potential to provide the 'second coast' to China to reach the Indian Ocean and achieve strategic presence in the Bay of Bengal and the Andaman Sea. Especially transportation logistics to the 'second coast' from landlocked south west Chinese provinces like Yunnan have both economic and strategic benefits.

There have been reports of Chinese built SIGINT listening stations in the Andaman Sea at least at Manaung, Hainggyi, Zadetkyi and the Coco Islands in Myanmar. Additional reports indicate that the Chinese maybe pushing Myanmar for a listening facility on Ramree Island, Rakhine state, which also holds the deep sea Kyaukpyu port developed for oil and gas transportation. China is building an integrated transport system linking the Kyaukpyu port to Yunnan Province in South West China with the sole aim of reducing energy shipping through the Malacca Strait and South China Sea. The plans include a railroad project from Kunming, the capital of Yunnan, to Kyaukpyu to complete the logistics loop to the 'second coast'

Further north from Kyaukpyu port is the capital Sittwe of Rakhine state where China has assisted the Myanmar Navy built a naval base. Interestingly, India's northeast serving Kaladan River Multi modal transport system feeds off the Sittwe port being developed by India, being the closest to the Kolkata port.

As per Indian Navy's assessment, China's control of Myanmar's ports from Sittwe in the north to Cheduba, Bassein and a string of other military assets on the 'second coast' can enable it to enforce anti-access/area denial to deny the Indian Navy the ability to operate in its littoral waters in the Bay of Bengal. Such escalating scenarios have grave implications for Northeast India from clandestine arms shipments that

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

pass through these waters for the insurgent groups in the region. Contraband arms shipments seized in the past from Chittagong port and Cox's Bazaar in Bangladesh originated through arms traffickers in Cambodia and Thailand ports.

The coastal border points between Bangladesh and Myanmar have become a haven for contraband arms transit due to inadequate patrolling of their huge coastline in the past by these two countries. These shipments can land on the coasts of South Bangladesh and Northwest Myanmar and then smuggled inland in smaller consignments into Northeast India. The neighboring transit state in Myanmar namely Rakhine has rampant ethnic strife and Chin state has ethnic insurgencies and is not fully controlled by the Myanmar government.

India needs to put in place a well-coordinated approach to secure the maritime and land neighborhood of the Bay of Bengal and Northeast India. This would include strengthening naval and coastal patrol assets in the littoral waters off the Andaman and Nicobar islands as well as enhanced strategic assets at the Northeastern borders opposite the 'second coast'.

India has to work with Bangladesh, which faces a huge national security threat as the landing zone of trafficked arms through the Bay of Bengal by conspiring foreign terrorist organizations operating from its soil with support of local elements. The Myanmar government is challenged by insurgent militias still running loose, who are aided and abetted externally for short sighted strategic gains inside the country. India needs to support Myanmar in establishing the firm rule of the laws of its government throughout its length and breadth. India would need earnest diplomatic efforts to push relations with both Bangladesh and Myanmar in a mutually supportive security partnership against common foes of all the legitimate stakeholders in this strategic theatre.

Thus it may be too early to predict Naypyidaw's preferred policy towards China vis-à-vis other potential cooperation partners. In addition, Burmese nationalism and xenophobia have been and remain powerful drivers in the country's politics and international relations, particularly in relation to China and India, and may remain so in the future.

Recent literature has aimed to 'deconstruct' this notion of a 'Sino-Indian rivalry' in Myanmar, as China's leverage far outweighs India's, and as the Tatmadaw's position nevertheless prevents either country's manipulation of Myanmar. It has also been argued that the triangular relationship between India, China and Myanmar might be better understood "in terms of respective spheres of influence rather than direct confrontation

Views of prominent scholars:

Rajiv Bhatia

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

While India views Myanmar as its gateway to ASEAN, Myanmar saw ASEAN as its bridge to South Asia.

On major political issues, India was forthright in its support to Myanmar, especially to its fledgling democratic institutions, the initiative for national reconciliation and peace, and the ongoing economic and political reform process under difficult circumstances. New Delhi has offered to share India's own experiences in evolving parliamentary rules, procedures and practices as well as managing Union-State/Region relations, allocation of powers and resources between the Union and States etc

A way to deepen the bilateral is by activating a proposal to establish an India-Myanmar Foundation, tasked with expanding people-to-people exchanges. A China-Myanmar Foundation is already underway; India should not be far behind.

President Htin Kyaw has set the stage for a new level of bilateral engagement. To concretise this, Indian leaders may have to await in-depth interactions with Suu Kyi who is now routinely portrayed by media as the de facto prime minister of Myanmar.

Harsh V. Pant

Indian diplomacy has a tough job at hand as all major powers are now wooing Myanmar. China and Myanmar pledged to forge closer ties as 'blood brothers' and enhance trade. Even the Obama administration views Myanmar's transition to democracy as one of its key foreign policy achievements

Myanmar's transition to a civilian government has given India more strategic space to manoeuvre. But as in the past, the future of bilateral ties will not be determined by just democracy

C. Raja Mohan

Modi has his task cut out in bridging the growing gap between the potential and reality of India's partnership with Myanmar. The problem in Delhi is not in the lack of a vision for the future of the relationship, but India's problems in translating that into practical outcomes over the last two decades.

The new dynamic of international position of Myanmar offers both challenges and opportunities for the Modi government. For one, India no longer has a privileged access to the markets in Myanmar. It has to compete with global businesses in the country. At the same time, as Thein Sein told the PM, Myanmar wants to take full advantage of India's prospects for rapid economic growth under Modi. As it diversifies its international relations, India remains an important political partner for Myanmar.

India - Sri Lanka Relations

Historical Background

- During the colonial period, beginning from the 1830's. Indian indentured labour from Tamil Nadu was employed by British to constitute the labour force for the tea/rubber plantation sector. This population came to be termed the Indian origin Tamils numbering 8.42 lakh or 4.2% of population in 2012. They are a distinct community from the native Sri Lankan - Tamils who have been settled for more than 1000 years.

These native Sri Lankan Tamils constitute 11.2% of the population in 2011 who constitute a majority of the population in Northern & Eastern provinces of the island (2011 census).

- The deteriorating relationship between the majority Sinhalese who constitute about 75% of the population & the minority Tamils since independence & specially

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

Since 1980's has been a major factor in Indo-Sri Lanka relations. Post independence, Sri Lanka in 1948 adopted a constitution which established a unitary state under the effective control of the Sinhalese - Buddhist majority.

- Sri Lanka introduced the official language policy of 1956 which made Sinhalese the sole official language threatening the prospects of Tamils in public employment. Also, during the 1970's state sponsored settlement schemes to promote Sinhalese settlement in eastern provinces was adopted significantly altering its demography by 2011.

- From the late 1940's to the 1970's, Indo-Sri Lanka relations remained normal if not cordial with both being non-aligned, third worldist & state regulated economies. Sri Lanka's non-aligned posture was not seen as a threat by India. The major tension in this period was over citizenship status & repatriation of Indian origin Tamils.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- While Sri Lanka aimed to deny them citizenship & repatriate them to India, Nehru resisted because he did not want to set a precedent for other overseas population. After prolonged negotiations the 1974 Sirimavo-Indira accord was signed that fixed the exact numbers to be repatriated, the rest being granted citizenship in Sri Lanka.

During the Indira Era, 1974 onwards India completed the repatriation of Indian origin Tamils & also recognised Sri Lanka's sovereignty over Kachchativu island against objections by DMK government in T.N. without adequate safeguards for traditional fishing rights for T.N. fishermen.

The Deterioration of relations between India-Sri Lanka
Relations from 1980's :

- The relations between the two sides deteriorated due to two factors :

Firstly Sri Lanka's discriminatory & majorita treatment of its tamil minority had led to the beginnings of Tamil separatism from the late 1970's.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

The 1977 anti-tamil riots & finally the massive 1983 anti-tamil riots in which somewhere between 400 - 3000 tamils were killed which led to an eruption of public sympathy in T.N & in India generally which the government could not ignore.

Covert- assistance , including arms & training to Lankan Tamil rebel groups including LTTE was stepped up by India during 1980's to push Colombo for a negotiated settlements with the insurgents.

Secondly, Sri Lanka moved towards an executive presidential system with a weak parliamentary system in 1978. Jayawardene was appointed as the president & led a distinct shift to right in Sri Lanka's economic policy as well as a pro-american tilt in foreign policy. In 1980's despite India expressing its concerns diplomatically Sri Lanka was negotiating with US over naval facilities in Trincomalee. At that time following the strain in India - USA relations after the US tilt towards

SHUBHRA RANJAN

Pakistan during the 1971 war, the Indian nuclear test of 1974, India was very sensitive to a possible USA presence in Sri Lanka.

- post 1983, Sri Lanka riots India also offered to mediate between the Tamil rebel groups & the Sri Lankan govt. . Between 1983 - 85, repeated failed attempts for a negotiated settlement were led by India between the two sides.

In the meantime Colombo hardened its stance & pushed for a military solution between 1986 - 87 by pushing in the army to crush rebel troops. Also, the government rejected Tamil demands for their recognition as a nation, recognition of a Tamil homeland & self determination for Tamils.

Under public pressure to intervene New Delhi made a decision to intervene & on June 4, 1987 the Indian airforce, violating the Sri Lankan airspace dropped food packets in Jaffna peninsula.

SHUBHRA RANJAN

- In June - July 1987, India pressured Sri Lanka to permit a mediatory military intervention under the India - Sri Lanka Accord (ISLA) of 1987.

Specifically ISLA had the following components :
while supporting the territorial integrity & unity of Sri Lanka, it recognized Sri Lanka as a multi-religious multi-lingual society in which each groups identity had to be carefully nurtured.

- * It recognised the Northern & Eastern provinces as the historical habitation of Tamil speaking people.
- * It provided for the devolution of power, including the subjects of land, police & finances to the provinces & the recognition of Tamil as an official language.
- * In exchange for there settlements, India undertook to deploy a peacekeeping force to disarm the rebel groups while the SL army was to be confined to barracks in the merged Northern & Eastern province.
- * In addition, with a supplementary exchange of letters to Colombo agreed to not allow its territory including

SHUBHRA RANJAN

the Tricomalee port to be used by third powers to the detriment of India's security & India agreed to not allow its territory to be used by the militancy in Sri Lanka.

LTTE with reluctance agreed to be part of ISLA, Indian troops under IPKF (Indian Peacekeeping Force) was deployed soon after, however the LTTE soon withdrew from the accord which led to the breakout of a Guerilla war between TTE & IPKF.

- In the meantime in Nov 1987, Sri Lankan Parliament passed the 13th amendment to the 1978 constitution initiating a devolutionary arrangement in which 9 provincial councils were to be set up including a merged North - Eastern province.

(Tamil Speaking majority)

- Significance of 13th Amendment : the provision was meant to give effect to the ISLA accord, although India always maintained that the 13th amendment only partially & in a diluted form reflected the agreement & has pressed for a 'full implementation' of the agreement though taking 13th amendment as a useful starting point.

SHUBHRA RANJAN

- Elections were held in 1988 in provinces however without the still to be devolved land, police & fiscal powers. The LTTE had boycotted the elections while an inconclusive guerilla war in which more than 1100 Indians troops died until IPKF's withdrawal by March 1990.

Understanding the Indian intervention between (1987-1990) Shiv Shankar Menon argues in his book "choices: Inside the making of Indian foreign policy choices," that Indian intervention was driven by its strategic & domestic policy related concerns.

- As the ethnic conflict worsened, the Sri Lankan govt. moved to seek weapons from & rely upon, China, Pakistan, Israel, USA. The increasing presence of outside powers in Sri Lanka was viewed with concern by New Delhi. The intervention was therefore an attempt to pre-empt outside influences in Sri Lanka given its own strategic interests in the region.

Domestic concerns were related to constant flow of Tamil refugees into India, the rising public sympathy & opinion in Tamil Nadu in favour of the plight of Tamil refugees.

Menon argues that the Indian intervention in Sri Lanka in 1980's as anything but an inexorable tragedy as

* The breakdown of ceasefire between Sri Lankan army & LTTE resulted in IPKF being forced to fight LTTE this created resentment amongst Tamils.

* The Sri Lankan govt. under Jayewardene showed little inclination to implement the 13th amendment with effective devolution of power to northern provinces.

* The Sinhalese majority saw the IPKF intervention as a violation of Sri Lankan sovereignty. Also, the opposition political parties in Colombo opposed IPKF deployment.

In december, 1988, when Premadasa was elected as President,
he demanded that India withdraw IPKF.

By march 1990 following much criticism India withdrew IPKF from Sri Lanka delinking withdrawal from devolution of power to northern provinces.

* Indo - Sri Lanka Relations (1991 - 2009) :

Post IPKF, Post Cold War, Post Rajiv Gandhi Assassination

Assassination of PM Rajiv Gandhi in May 1991 by LTTE in Chennai followed subsequently by banning of LTTE in India 1992 onwards marked a strategic mistake on part of LTTE following which Indian foreign policy

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

underwent a decisive strategic shift.

- 1995 → The civil war in Northern provinces continued where the Sri Lankan army retook Jaffna after 10 years.
- Bandaranaike elected as President in 1994's attempt to reach a negotiated settlement with LTTE failed as the latter now insisted on formation of an independent Tamil Eelam in the north.
 - following Rajiv Gandhi's assassination in 1991, along with the large number of massacres committed by LTTE whatever public sympathy that existed in India for LTTE evaporated, also any appetite for further military intervention in Sri Lanka was out of question following the bitter • IPKF experience.
 - The raging civil war in Sri Lanka tore apart the social fabric of the country & displaced at least one million people internally.
 - India & Sri Lanka signed a FTA between 1997-98. Also given the war fatigue both Sri Lankan govt. & LTTE had asked Norway to mediate.
 - 2000 - 2003 : despite best efforts of Norway & other partners, an effective agreement could not be reached.

SHUBHRA RANJAN

Always Ahead

between LTTE & Sri Lankan govt. as the former stuck towards its demand for a Tamil elam.

2005 - 2009 : LTTE endgame : While India largely adopted a hands off approach, the SL military assumed a more hard line military assertive policy against LTTE under the presidency of Rajapaksa. The LTTE also tried to hold on to its territories in north & east, as the civil war waged LTTE, resorted to the widespread use of human shields to deter the Sri Lankan army.

- By March 2009, Prabhakaran was killed & the Sri Lankan army took effective military control of Northern & Eastern provinces.

India Sri Lanka Relations post LTTE (2009 - 2015)

- Rajapaksa's first term (2005 - 2009) brought curtains on the 3 decade long military in northern provinces & this victory strengthened his position amongst the Sinhalese majority & yielded a bigger electoral victory in the upcoming elections for his party.
- However the Elam War IV (2006 - 2009) period, had seen an increasing influence of China in Sri Lanka. During the war, China extended large scale military assistance by supplying arms.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- While in India, including in Tamil Nadu, support for LTTE had evaporated post Rajiv Gandhi's assassination in 1991, India exercised restraint & did not intervene in the military conflict due to:
 - * the prior negative experience of fighting LTTE.
 - * the uncertainty about Sri Lankan govt. ultimate goals & intentions regarding devolution of power to tamils following suppression of LTTE.
 - * the Tamil sensitivities regarding the fate of displaced Sri Lankan Tamils in the post war era.

Post 2009 : While India insisted on the full devolution of power including land, police & fiscal powers to north & eastern provinces starting with 13-th amendment the Sri Lankan govt. dragged its feet on the implementation. Further, Sri Lanka army failed to effectively withdraw from northern provinces.

- While western criticism of Sri Lankan army's actions during Eelam war IV & widespread allegations of human rights violations surfaced, domestic pressure in Tamil Nadu started to build up again.

☎ 011 45612719

- 2012 & 2013 : Under rising domestic criticism within Tamil Nadu against Sri Lanka's non implementation of 13th Amendment India voted against Sri Lanka in the UNHRC, twice in succession in 2012 & 2013, despite potential negative consequences for India.
- Post 2009, China offered increasing economic & military assistance to Sri Lanka which was facing increasing isolation from international community over civil war issues. In 2009, China was the largest provider of developmental assistance offering 1.2 billion \$ & also its largest foreign investor. By 2013 China's total infrastructure loans totalled around 2.2 Billion \$.
- However despite political constraints India - Sri Lanka economic integration continued. India became Sri Lanka's largest trading partner with bilateral trade reaching 5 billion \$ with a huge trade surplus in India's favour. India also provided the largest single source of tourists (1.76 lakh - 16% of total tourists).
Also post 2009, India worked towards aiding in reconstruction & rehabilitation in war torn northern provinces of the

SHUBHRA RANJAN

Always Ahead

Internally Displaced Persons (IDP). India offered to build 50,000 houses for IDP's, in helping with de-mining, rebuilding roads & railways in north & east provinces.

2015 : From Rajapaksa to Sirisena : the 2015 election saw Rajapaksa government being voted out over allegations related to nepotism corruption & authoritarianism.

- However, the Rajapaksa years had seen a considerable increase in amount of Chinese investments. The Rajapaksa govt. welcomed Chinese investments as the latter aimed to increase its strategic presence in Indian ocean region as a part of its Belt & Road initiative. Also the Chinese finances were willing to overlook the human rights concerns regarding the war & treatment of its Tamil minority, an issue that had become contentious with India.

A spate of Chinese investments in Sri Lanka grew such as :

* Hambantota Port Project located on its southern tip, there were hopes that a new port could exploit the country's location on the busy East-West shipping lanes.

32 B, Pusa Road, Karol Bagh, Delhi 110005. ✆ 011 45612719

Always Ahead

Rajapaksa govt. had initially offered the project to India, however as the latter declined given concerns related to financial viability. However as India declined, Sri Lanka turned towards China funded by EXIM bank of China at an initial cost of 1.5 billion \$ at a commercial interest rate of 6.3%. Eventually another loan of 600 million \$ was extended by China to expand & build new container terminals.

By 2014, Sri Lanka found itself facing increasing debt obligations to China, by 2016 as the losses mounted for Colombo, it struck a deal with Beijing for a "debt-equity swap" while handing over the latter a majority stake & the operational control of China merchant group in exchange for a debt-write off worth 1.1 Billion \$.

* Mattala (Hambantota) International Airport :

The airport was built in Hambantota district financed with 209 million \$ Chinese loan & built by Chinese companies. In 2013, the interest rate on the airport project was increased from 1.3% to 6.3% over renegotiations.

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

to give local parties bigger equity stakes. However, the airport was a commercial failure & increased Sri Lanka's debt exposure to China.

* Colombo Port & Port City Project :

Of all the Chinese investments in Sri Lanka, the port upgrade is the most successful. Chinese merchants group in 2011 took a 55% stake in Colombo South container Terminal - an investment of 500 million \$ & operational rights for 35 years. The terminal started operations in 2013.

In addition, China funded another 1.3 billion \$ port city project to build an artificial island of Colombo on reclaimed land. This was announced during President Xi Jinping's visit in 2014.

- During the same period in 2014, Colombo allowed a Chinese submarine & navy to dock on its Colombo port despite India's concerns about the Chinese naval presence in its backyard.

Post 2015 Elections (Sirisena Years) :

- Sirisena registered a surprise victory against Rajapaksa. A major plank of Sirisena's election was focussed on

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. **Always Ahead**
☎ 011 45612719

criticism of Rajapaksa family & allegations that it was using its personal clout over the entire government to Sri Lanka's

Implicit in this criticism of Beijing's rising influence in Sri Lanka allegations related to Chinese funding for Rajapaksa campaign allegations of large scale corruption in mega infrastructure projects & the vulnerability created by Sri Lanka's debt obligations to China. Srisena's campaign promised to halt the projects pending corruption investigations.

2015 → PM Modi's visit in 2015 was the first visit by an Indian PM in 28 years. The visit saw India offering a fresh line of credit of US \$ 380 millions to Sri Lanka's railway sector. India also proposed for joint development of Oil storage facility in Trincomalee port in Northern province & establish Trincomalee as a major petroleum hub.

- Also New Delhi expressed its desire to see the implementation of 13th Amendment in Sri Lanka.
- In trade sphere in 2016, India was Sri Lanka's largest trading partner & accounted for 15.2% of Sri Lanka's

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

total trade while China came in second at 14.9%, followed by USA with 11%. Moreover China comprises only 2% of Sri Lanka's total export market compared to 7.1% for India & 26% for the United States.

* Views of Prominent Scholars :

- Harsh V. Pant
- Shiv Shankar Menon
- Rohan Mukherjee

Harsh V. Pant :

In dealing with Sri Lanka while India has to balance its domestic sensitivities & strategic interests, China faces no such constraints in developing even stronger ties with Sri Lanka. There domestic constraints were amply visible when New Delhi under pressure from Tamil political partner like DMK pushed for a strongly worded UNHRC resolution in 2013 against Colombo overturning its age-old policy of opposing country - specific resolutions on human rights.

Sri Lanka matters because the Indian ocean matters where the "great game" of the century will be played. Though India's geographical location gives it operational

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. **Always Ahead**
☎ 011 45612719

advantages in Indian ocean, it is by no means certain that New Delhi is in a position to hold on to these advantages. India's quest of retaining its position as "first amongst equals" in Sri Lanka is a work in progress for Indian foreign policy.

Shiv Shankar Menon : argues that with the elimination of LTTE by the use of military means the civil war that had lasted over for more than 3 decades was brought to an end in 2009. While rehabilitation of displaced Sri Lankan Tamils has progressed in the Northern provinces, a genuine reconciliation has been completely missing & as time passes it seems less likely that there will be a political solution that would satisfy all concerned parties. But the tamil sense of unaddressed grievances makes the return of separatism & radicalism in another form a matter of time but for the present there is little real support in Tamil Nadu for the causes or methods adopted by LTTE.

On the issue of Chinese presence in Sri Lanka, New Delhi has constantly expressed its concerns & has been

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

assured by Colombo that there would be no permanent military presence in Sri Lanka & that Sri Lanka would look towards India for most of its military training & intelligence needs, at no stage was exclusivity sought or promised & realistically speaking it would be unreasonable to expect exclusivity from Colombo towards India.

For Sri Lanka, as for India's other smaller neighbours, using China to get India to pay attention & invest in the relationship & using India to get Chinese investment & support is a productive strategy empirically proven in the past. For India to not recognise & deal with this fact of international life would be foolish.

Rohan Mukherjee : evaluating the impact of Chinese economic statecraft on Sri Lanka, Rohan Mukherjee argues that Sri Lanka is not very vulnerable in the arena of trade. For example, in the trade arena in 2016, India was Sri Lanka's largest trading partner accounting for 15.2% of its total trade while China came in second at 14.9%, followed by USA with 11.1%. While Beijing is no small player, it is not in structurally dominant position either.

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. **Always Ahead**
☎ 011 45612719

Moreover, China ~~only~~ comprises only 2% of Sri Lanka's total export market, compared to 7.1% for India & 26% for USA.

However, the influence of Chinese capital in Sri Lanka post 2009 has been China's primary instrument with which it aims to increase its strategic influence in Colombo.

Chinese capital for large scale infrastructure projects are not typically linked to any broader policy reform goals or economic commitments by the recipient state i.e. Sri Lanka in this case except to hire Chinese firms & their labour for these projects. In this way, China's principle of non-interference in the affairs of recipient countries sets its lending programs apart from those of other international organizations, particularly from west where public investments & Overseas Development Assistance (ODA) are often tied to broader economic & political reforms. Beijing's no-question asked approach has been immensely useful to Colombo during 2006-2009 period & since then in the face of international criticism regarding human rights violation.

SHUBHRA RANJAN

Always Ahead

32 B, Pusa Road, Karol Bagh, Delhi 110005. ☎ 011 45612719

- China's capital flows in form of loans (debt) at high interest rates coupled with Sri Lanka's weak economy & balance-of-payment crisis provide Beijing leverage over Colombo.

Also the financial details regarding many such Chinese projects is scant, this lack of information in public domain & the opaqueness of financial liabilities often leads to situations where there is lack of public scrutiny & checks & balances against any suspicious investments which may be financially unviable & push Sri Lanka into a "debt trap".

- Also the experience of the Sirisena years (i.e. 2015 onwards) has shown that Chinese influence here to stay & unlikely to disappear overnight as revealed by Sirisena's govt. being left with little option but to offer China a debt-equity swap & operational control of Hambantota port despite public posturing of revisiting all projects awarded to external players during the Rajapaksa years (2010-14).

However New Delhi has significant economic engagement in Sri Lanka & in addition holds a number of potential military sticks as well. Economically apart for its pre-eminent trading position with respect to

SHUBHRA RANJAN

32 B, Pusa Road, Karol Bagh, Delhi 110005. **Always Ahead**
☎ 011 45612719

Sri Lanka, transshipments from India make upto 75% of volume of traffic through Sri Lanka's main port i.e. Colombo.

Also militarily, it would be relatively easy task for Indian navy to blockade Sri Lankan ports or for the Indian air force to enforce a no-fly zone over Sri Lanka.

- Finally New Delhi must work with like minded partners like Japan to provide Sri Lanka effective alternatives to finance infrastructure projects, forums such as the Asia Africa Growth Corridor (AAGC) & multilateral institutions such as Asian Development Bank (ADB) must be explored to offer effective alternatives to Sri Lanka.
