North Korean Challenge to USA Hegemony

China - USA - North Korea Triangle.

What is the importance of North Korea?

Since the establishment of PRC (People's Republic of China), there is a proxy war b/w USA & China to bring Korean peninsula under its strategic influence.

Importance for USA

Korea (North Korea) is situated at the border of two major Rivals of USA. (1) Russia

(2) China.

very significant location in USA's policy of containment
Importance for China.

(i) Security perspective - The long term aim of China is to avoid the presence of USA military at its doorstep.

(ii) Economic Importance of Yellow Sea - China's only known offshore oil Reserve (uncontested) Bohai Sea → EEZ → Reserve of China

(iii) North Korea is the ideal buffer b/w China & USA [South Korea as USA's ally]. China can use North Korea to challenge USA hegemony.

What is the long term objective of China in North Korea?

As China does not want regime change in North Korea.

China does not want collapse of present Regime.

Why?

It will create Refugee Influx, China will be compelled to take Harsh Actions against Refugees. It will Spoil China's Image.

These Ethnic tensions will Spoil Relations b/w China & North Korea.

What is China's attitude towards North Korea Nuclear Programme?

(Confusing)
Ambivalent attitude. How?

(i) China has helped North Korea, Pakistan, Iran to develop capabilities, However China supports

a) UN Sanctions against North Korea.

b)? 6-party talks (UN-talks) for de Nuclearisation of Korean peninsula.

What is the approach of USA?

(i) De Nuclearisation. — To maintain its hegemony.

(ii) Regime change & Regime collapse as a method to achieve De Nuclearisation.

How North Korea looks at China & USA?

North Korea does not trust China completely, However China is the strongest support to the present regime.

(i) Biggest Donor (Economic aid)

(ii) Largest trading partner

(iii) permanent member of UN Security Council

— China has supported the sanctions but always maintained a stand that sanctions should not be too harsh. China has diluted the sanctions.

How North Korea looks at USA?

Biggest threat

USA's plan is regime change.

It was the fear of USA's attempts for Regime Change that North Korea acquired Nuclear weapons as a Deterrence.

Which is a bigger priority for North Korea?

prevention of Regime collapse (or) possessing Nuclear weapons.

What USA should do?

Look at the Big picture. USA's aim should be for not the containment of North Korea but containment of China. Hence USA should not prioritise de nuclearisation.

It is not achievable in present times. Rather USA

should try to bring North Korea to its side.

Why?

As suggested by Abraham Lincoln. There is another way to end the enemy.

What is that way?

Make them friends.

What is the current policy of USA towards North Korea?

To: The ouster of John Bolton ^{Bolton} as a National Security adviser shows, Trump defers from Bolton, Bolton favoured Maximum pressure approach.

Trump favours Engagement.

Trump's foreign policy is called as Shockingly ~~unorthodox~~ ^{unorthodox} policy. Hence at present USA is going for Engagement of North Korea to counter China.

How?

(i) personal initiatives.

(ii) Through South Korea.

What is the response of China?

Chinese president visited North Korea after a very big gap to recover the lost ground.

What North Korea wants?

Since North Korea cannot trust either of the parties North Korea uses one against the other. North Korea wants best of the both North Korea can extract maximum benefits from both the parties to its advantage.

China wants to play safe; China wants complete control over North Korea's Nuclear programme.

Why China supports North Korea's Nuclear weapons at present?

↳ This is the best way to challenge USA Hegemony in ASIA-PACIFIC.

How?

If North Korea will have its nuclear weapons, some day or other South Korea, Japan will try to develop their own nuclear weapons. Once they develop their own deterrence, they may not require USA.

What is the deterrence faced by the countries in the region?

In terms of Economic security they are integrated to China. In terms of their Strategic security they are integrated with USA.

What is the implication?

All countries of ASIA-PACIFIC are integrated with USA. China's dream of Sino-centric Asia will be only partially fulfilled. Once USA is out even Asia Pacific will be China centric in terms of security. Then also China can use nuclear weapons of North Korea to build its hegemony.

How?

Others will look at China to counter balance North Korea's hegemonic ambitions.

What is the fear of China?

(1) Unification of Korean peninsula.

Paper: Section: B

INDIA &

Chapter - 5

THE GLOBAL CENTRES OF POWER

INDIA - CHINA RELATIONS

Official Status:

India & China are Strategic partners since 2003.

During Vajpayee's visit to China.

Q1. How to define Strategic partnership, what is the nature & scope of India's Strategic partnership with China?

The term Strategic is taken from the military science. Conventionally used for the relations woven around the idea of security. The conventional view of security was territorial.

The term Strategic partnerships have come to be used in a big way since the end of Cold war. Cold war was a bipolar world, at that time countries used to form the military alliances.

Present world

The age of complex interdependence. in present context alliances appear "outdated" and "anachronistic".

Strategic partnership gives flexibility than collective security

Hence the usage of the word of strategic partnership

It is preferred. Strategic partnership is more flexible. The status of ally means a country has to get entangled in the war even if the other country has not directly attacked.

Strategic partnerships allow the countries to secure their strategic priorities along with maintaining the freedom & not to get entangled.

Nature & Scope of Strategic partnership with China.

In fact China is not a source of security. China is a biggest strategic threat to India.

However in present times the concept of security has become multi dimensional. It is not just territorial security it includes social, economic, ecological, political & so on. Hence the basis of India China strategic partnership is cooperation at multilateral platforms.

One of the areas of the cooperation have been the reform of global financial architecture. IMF, world Bank besides cooperation in Doha talks & at climate change.

At present :

It seems there is a limited scope of cooperation in multi lateral forums. Today the approach & concerns of India & China even on climate change as well as on WTO differ to a considerable extent.

Prospects of India - China cooperation.

At present there is a upward trajectory in India - China relations especially since Wuhan informal Summit. However India can never be assured of the continuation of the present ways.

Views of Ashley Teller (Scholar of Indian origin) → Instrumental polarisation of George Bush towards India.
His books "CRUX OF ASIA".

He is not optimistic about the cooperation bcoz there is a considerable difference b/w the two on

a) ASIAN Security.

b) South Asian Stability.

c) Nuclear Non Proliferation. (NSG - Pakistan against)

Maritime Security, Cyber Security, Energy, Env,

Climate Change (on Everything Else).

Views of John G. Ikenberry (Long drawn conflict)

The Protracted Conflict - The Conflict

W/o India & China will continue. It can end only when India accept China's Hegemony in South Asia.

(or) China accept India's Hegemony atleast in South Asia. Since these aims (or) goals are not possible they are bound to remain in conflict.

What is China's policy towards India?

China wants to contain India within South Asia.

Hence China uses Pakistan. China is trying its best to challenge India's soft power in entire South Asia. (C & China is successful)

How China looks at India?

Acced to another most prominent scholar of India-China.

Jeff Smith has theory Cold peace.

China looks at India with ~~disdain~~ (disrespect) &

disinterest. China doesnot accept India as Strategic

rival. China doesnot want its comparison with

India. Chinese officials go for even disrespectful

statements for Indian leaders. ~~for ex~~ Mao called

Nehru - Running Dog of Imperialism. Now they called

India as America's prostitute.

By accord to Chinese there cannot be two tigers in

one mountain. However accord to Indian analysts

China is fearful of India. The biggest fear of China

is India's Democracy. China is also concerned about

growing Indo-US partnership.

The Doklam Standoff has communicated to China

that India has overcome its weakness to defend

its core interest. Hence China is not in favour

of intense rivalry & prefers Engagement to

contain USA.

India - China Relations are too complex.

They are not zero-sum game like India-Pakistan

Relations There is lot of scope for mutually beneficial cooperative partnership as well as ~~very~~ ^{no} very high propensity of conventional war.

What world expects from India & China? @ How India & China deal with each other?

As mentioned by Minister of Foreign Affairs.

S. Jaishankar. India-China relations have consequences which go beyond the bilateral framework. He mentions that ^{Kazakhstan} Astana Consensus - 2017 (SCO Summit) should be the guiding approach. Astana consensus is based on two pillars:

(i) In the ^{age} ~~face~~ of global uncertainty. India-China Relations are a factor of stability.

(ii) India & China, in their Relationship, must not allow differences to become disputes.

How strategic community in India looks at India-China Relations?

There are 3 schools of thought.

① Idealist: Inspired by the leaders like Tagore & Pandit Nehru, these scholars believe in the concept of ASIAN century. ^{It means} India & China working together not only for mutual benefits but for the public good.

② Realists: Inspired by Sardar Patel. Patel always looked at China as a threat, a country with imperialist ambition, & importance to adopt the balancing strategy to counter Chinese threat.

It is to be noted that China is known to be a ^(land grabbing) ~~imperialist~~ country.

Note: Russia is called Revanchist Country trying to recapture the lost lands.

③ Pragmatists? Scholar: Shyam Saran & C. Raja Mohan

They suggest to take balanced approach

China is both threat & as well as opportunity.

Hence they suggest Conengagement [Engagement + Containment]

It means Engagement where ever possible. Containment

Wherever necessary.

Views of Shri Shankar Menon.

Title of his book "CHOICES"

The approach of pragmatists is desirable but not possible.

China shares a very long border with India it has direct impact on India's security. The

Asymmetrical accumulation of power. Contained India's ability to exercise Strategic Autonomy.

↳ a fundamental principle of India's foreign policy.

(NAM) with China putting pressure on India.

India cannot remain non-aligned. India has to go for partnership with USA.

It is to be noted that India's non-alignment policy was based on China-factor. However India cannot exercise

Non-alignment bcoz of China.

Why India adopted Non-alignment?

After Independence of India had to join the block it could have joined only the western block.

Why?

India has chosen for democratic political system & hence India could not be in the Communist block. However

India could not have even joined Western Block.

Why?

India's Geographical proximity with China & Russia. Hence India preferred remaining Non-Aligned as the safest bet. It was a wise move. However India had ignored the

Importance of possessing capabilities to counter Chinese aggressions.

Views of Rajeev Sikhari

Though China has out maneuvered India almost everywhere yet India should not lose the psychological war against China.

C. Raja Mohan.

The Unintended Consequence of China is that it compels India to think strategically & do something. China provides momentum to India to come out of slumber. India needs to be imaginative, open minded, neither complacent nor rhetorical in dealing with China.

8th Oct 2019

Nehruvian Era (upto 11-1962 war)

The most complicated aspect of the relations is border dispute. till border dispute is not resolved we cannot expect Normalisation of Relations. The two countries have gone even for the Border war.

Where is the disputed border?

There is a dispute in 3-Sectors

(i) Eastern Sector - China accused India of occupying 91,000 sq miles of Chinese territory (Arunachal Pradesh)

(ii) Middle Sector - Least disputed. There are some pockets in Himachal, Uttarakhand & major disputed region here has been Sikkim. Sikkim & Bhutan have been parts of Tibet. In 2003 for the first time China recognised ^{Sikkim} ~~Tibet~~ as Indian territory. It resulted into opening of border trade & Nathu la pass.

(iii) Western Sector - India accused China of occupying 38,000 sq miles of Indian territory

Aksaichon Since 1962 war

Origing Boundary dispute & Circumstances which led to 1962 war :-

The origing Boundary dispute goes back to British times Hence It can be treated as colonial legacy.

India & China have been "Civilisational states", the disputed regions have been "Transition zones". There are centuries of peaceful Exchange across these regions the Exchange of goods, Ideas, travellers, Religion & Culture.

The two countries civilisations have been living in peace for centuries. However In 1947 India & In 1949 China became Nation States. within few years They entered into the war. Thus 1962 war can be treated as

a) Colonial Legacy.

b) Great Power Rivalry

The present territorial boundaries of India are created by Britishers. In order to secure the British empire in India from the expansionist Russian Empire as well as Chinese Empire, Britishers tried to settle India's boundaries with a view to create buffer. for ex:- In North west, the Durand line became (Afghanistan-pakistan) bufferzone against Russian Empire.

Mac Mohan Line :- (Eastern Sector).

In 1914 a conference was called in Shimla the representatives of Tibet as well as Chinese emperor were invited.

Relations b/w Tibet & China :- Historically Tibet was the part of Chinese Empire. However whenever Central Authority is weak Tibet used to become

Independent.

In the conference the representatives of China didn't accept the proposal, left the conference in the middle. Hence Mac Mohan Line came into Existence as a Result of agreement b/w British India & Representative of Tibet.

Chinese view on the agreement:

- (i) Tibet had no Independent Authority to Enter into the agreement.
- (ii) It is a colonial boundary which China does not accept.

Britishers & Tibetans entered into agreement over Tibet

(i) Britishers Recognised Tibet as Chinese Territory

(ii) Britishers divided Tibet into Inner & Outer Tibet. As far as Outer Tibet was concerned China's Sovereignty was nominal. Outer Tibet was the Ideal Buffer zone. Britishers had Special Rights

↓
(i) Special trading Rights (Right of passage)

(ii) Stationing of Indian mission to keep watch on both Chinese & Russian Empire.

Thus Outer Tibet was in a Security perimeter of British India.

(iii) Even over Inner Tibet China's control was limited. China has external sovereignty but Tibet was to have Internal Autonomy

The type of a govt for a way of life have to be chosen by Tibetans.

Developments after establishment of PRC
Mao Declared 5-Himalayan Kingdoms as the

five digits & Tibet as the palm. Chinese hand is incomplete without palm & digits.

- (i) Bhutan (ii) Nepal (iii) Arunachal Pradesh.
(iv) Ladakh. (v) Sikkim.

In 1950 China occupied Tibet

How China looks at Tibet?

(i) Buffer zone. (b/w India & China where China have advantage)

(ii) A source of water, timber, oil & gas.

not in top of world

called world
due to its natural amount
& fresh water & glaciers
from there only many
rivers originate

The real China is HAN-CHINA, Chinese are Ethno centric. They recognise others as Barbarians. Tibetans are not seen as Chinese only these lands are occupied by Chinese for their protection & Benefits. There is a similar situation for Uighur Muslims & people living in Inner Mongolia.

Relations b/w Tibet & India.

Complicated.

(i) Tibet has been more culturally, Economically aligned to India. Buddhism has been the link. However, it is paradoxical that India didn't Embrace Buddhism. India rejected Buddhism for Brahmanism. Even Communist China has no links with Buddhism though at present Chinese State claims that it is the sole authority to decide the successor of Dalai Lama. Bcoz of connections with British India & cultural connections, Tibetans looked towards India against Chinese Occupation.

Tibetan Issue created tensions b/w India & China, China started looking at India's involvement

in unrest in Tibet. China believed that India is working with USA used to govt of China India had Estbd the training camps for Buddhist Insurgents in Darjeeling working with CIA.

What is USA's policy in Tibet?

USA is concerned about the Human Rights of Tibetans their Religious & cultural freedom. USA has also a special Representative for Tibet. Not only Tibet USA also keep on raising the issue of the cultural & Religious freedom of Uighur Muslims.

Panchsheel Agreement - 1954

- purpose: As the tensions started rising b/w India & China over Tibet, Pandit Nehru tried to pacify China to avoid the risk of war. The 5-principles of Panchsheel are a part of India-China agreement over the Status of Tibet.

- (i) India accepted Tibet as Chinese Territory
- (ii) India Ended its special rights in Tibet
- (iii) India closed its special mission

↳ Earlier govt of India had Independent contacts with Govt of Tibet. Now there was no direct communication. Now India needed permission of China.

In context of the above emerged the 5-principles in Respecting the Sovereignty.

- (i) Respecting the territorial Integrity.
- (ii) Non-Aggression
- (iii) Mutual Respect.
- (iv) Peaceful Settlement of disputes.

Assessment of Nehru's Action &

Entire agreement shows the lack of strategic culture on part of India. It was completely one sided India got nothing in return except empty promises (2) Idea.

What Nehru should have done

(1) Atleast he should have put a condition

→ In return of India accepting Tibet as Chinese territory China should accept Sikkim & Aksaichin as Indian Territory.

→ Atleast India should have made China to accept POK as Indian territory.

What is China's attitude towards Kashmir?

(2) Aksaichin is Chinese territory, POK is Pakistan territory. only J&K is disputed. i.e. why China gives stated visa for J&K.

There was no effective guarantee for India's security completely ignored the need of Balancing.

Nehru's Forward Policy

When Pandit Nehru came back to India he was criticised in Indian parliament & press. Hence Pandit Nehru tried to recover the lost ground. India has increased its support for Tibetan cause. In 1957 GOI came to know that China has built a road across Aksaichin.

Hence he ordered to build Indian military posts in the region. China calls this as Nehru's forward policy. In 1959 India granted asylum to Dalai Lama. He could not have escaped without India's support. Hence after Sino-Indian border skirmishes, full scale border started.

How China describes the war?

Offensive defence - A preemptive action against Imperialist India.

Who was responsible for war?

Aked to China ~~and~~ India violated Panchsheel

Aked to Indian scholars Nehru was responsible

Why?

He overlooked India's defence. His policy was confused policy. When he decided not to provoke China & preferred appeasement over containment. He should have continued with his approach.

→ Nehru came under the influence of USA.

Who won the war?

USA was successful in creating the permanent rivalry b/w the two Asian giants. It was successful in ending the vision of Asian Century.

Impact of 1962 war

→ Humiliating defeat for India even the present generations of Indians has not been able to overcome the psyche (fear) of China.

→ Loss of prestige for India

→ It has emboldened Pakistan to initiate war against India.

→ The development of closeness b/w China & Pakistan.

→ India lost opportunities to take advantages of Chinese growth.

→ India could not continue with its policy of Non-alignment. The End of Genuine Non-alignment India sought the help of USA & later on USSR.

India - China Relations Since 1962 till 1988.

Cold Peace:

In 1979, Vajpayee as a foreign minister tried to break the Ice.

However, He got nothing the day he reached China, Same day committed aggression on Vietnam.

India was friend to Vietnam & It was Embarrassing for Vajpayee to stay back.

In 1981 Chinese foreign minister Huang Hua was sent to India.

Why?

As part of Deng's focus on peaceful rise of China.

→ In dramatic process!

1987 - Chinese Invasion in Sino-Indian border valley. Tensions were raising. Hence to pacify Indian Prime Minister Rajeev Gandhi payed visit to China in 1988.

Significance of the visit.

He was successful in Breaking Ice. His visit resulted into two prominent agreements.

1) Establishment of joint working group.

They will start working for the Resolution of ^{Border} ~~border~~ dispute.

The basic template for the resolution of Border conflict came into existence.

What is basic template?

The two countries will reach fair, Reasonable & mutually acceptable Solution on Boundary question.

→ The two countries will maintain the Status quo on borders & will start CBM (Confidence Building Missions).

→ Establishment of joint Economic growth.

3rd phase

India - China Relations since the End of Cold war

The Entire context of Relations has changed during Cold war. There was USA - Pakistan - China Axis. With the disintegration of USSR, USA started containment of China. In the calculations of USA, India emerged as the ideal swing state to balance the rise of China.

Thus Asia Rebalance or Pivot to Asia policy started immediately after the end of cold war. India-USA engagement started ~~which was~~ India's attitude.

What was India's attitude towards USA after the End of cold war?

For long the approach of South block has been "Anti American". It was difficult for India to keep faith on USA. India's foreign policy needed time to adjust. As India lost the umbrella of USSR. India also needed to improve its relations with Neighbours. India also needed time to adjust with the changed Economic policies.

Though India had huge attraction for USA's commercial & strategic interest, yet the two democracies lacked enough understanding of each other.

When democrats came to power in USA, they kept on pressurising India to sign NPT & CTBT.

Hence India formed Triad with China & Russia to prevent Unilateralism of USA, to check Unipolarity & started talking about multipolar world.
[RIC - Triangle].

1993 :- Narasimha Rao's visit to China.

Resulted into the peace & tranquility agreement along LAC (Line of Actual Control).

It is the result of agreement that the border with LAC is peaceful whereas border with Pakistan is highly violent. Gradually there was a growth of economic interdependence b/w India & China.

There was a qualitative improvement in the relations.

1998 :- Operation Shakti.

India blamed China. However China has ignored India didn't apply any sanctions.

2003 :- Vajpayee's visit.

Outcome: Strategic partnership with China.

Why strategic partnership with China?

India was angry with USA. Why?

USA made Pakistan the major Non-NATO ally & the front line state in the war against terrorism when India had offered unconditional support to USA in its war against terrorism.

Outcome of the visit:

The two sides agreed to create the formulae for the resolution of Border dispute. The joint working group was alleviated, a new mechanism came into existence known as Special representatives mechanism. [Annual dialogue b/w National Security Advisors]. The first Responsibility that was given was to determine Political parameters & guiding principles for settlement of India-China boundary question. It was decided that the bordered dispute will be resolved in 3-stages -

1st Stage - Formulation of principles

this stage is completed.

Social construction

What are the guiding principles? [2005]

(i) The Differences on boundary questions will not be allowed to effect the overall development of bilateral Relations.

Sound Construction

(ii) Both sides will work for fair, Reasonable, mutually acceptable solution in accordance to 5-principles of Panchsheel.

(iii) Both sides will go for Mutual Respect, Mutual Understanding, Mutual adjustments.

(iv) Both sides will give due considerations to Strategic & Reasonable Interest.

(v) Historical Evidences, National sentiment, practical difficulties will be taken into consideration.

Boundary shall be along the easily identifiable Natural Geographical features. Till the final solution they will maintain peace & tranquility.

2nd Stage Based on formulae There will be work on field. - Its also completed.

3rd Stage Exchange of maps.

What is the Status of Resolution of dispute?

It is a cake ready to eat

Who is eager To Eat?

India is eager to Eat the cake. India wants earliest resolution as expressed by PM Modi. we have responsibility towards future generation. Till the dispute is not resolved we cannot realise the full potential of the relations.

What is the attitude of China?

China is not in Hurry. China does not want to resolve the dispute. China only wants to maintain peace &

Tranquillity was?

If China resolves the dispute. Then it will lose leverage over India.

(1) India will have free hand in promoting insurgency in Tibet. There is a huge trust deficit & it is believed that until that issue is not resolved Border issue will not be resolved.

China would prefer resolving dispute only when it has the distinct superiority over India.

China will dictate the terms. Again in context of USA, China's rivalry Boundary dispute is a leverage over India.

As China's power is increasing Chinese ambitions are growing.

What was earlier approach of China?

As reported in Indian media, China offered a package deal.

If India accepts Chinese sovereignty over Aksai Chin, China will accept India's sovereignty over Arunachal.

Now China is not interested in the package. It can take both.

Indian Express have good article about China.

13th Oct 2019

Tawang track → Before but claiming complete Arunachal was.

For China Aksai Chin is more important than Arunachal, Arunachal is important for containment of India, Aksai Chin is important to counter USA containment of China.

For India Aksai Chin is important for strategic security vis-a-vis China as well as Pakistan. Arunachal Pradesh is important for the success of India's Act East policy.

China may compromise on Eastern sector where India has advantage bcoz population is in India's favour in the past Chinese claims in the Eastern Sector have been shifting. Sometimes it claims entire Arunachal or sometimes just Tawang tract (or) Tawang Region. Importance of Tawang Region.

- (i) Religious Importance in the perspective of Buddhism
- (ii) Granary of Tibet which is other wise barren land. (plateau) Strategically this is more imp region.]

Way forward.

It doesn't seem that China will agree for Resolution of the Border dispute.

→ As the gap b/w the powers of China & India are increasing fast it may not be possible for India to pressure China.

What China want?

At the maximum peace & tranquillity, However if reqd China will use the strategy of incursions to pressure India.

What India want?

Earliest conclusion

What India should want?

is what ever China wants i.e. peace & tranquillity at the borders.

- (i) China should not be doing incursions on India's territory.

Hence the success of Indian diplomacy can be measured if we can ensure that there is peace & tranquillity at borders & there are no future incursions [No repeat of Doklam]

candid dialogue.

What are India's options?

- (i) appeasement of China - for ex. Indian Street.
- (ii) Balancing China - Strengthening Indo-USA Strategic partnership.
- (iii) Strengthening Quad.

India can use Tibetan card but may be in future India will not be able to use the Tibetan card.

Whether Regular communications at high level will help?
No. It will not help.

Why?

There are structural (or) fundamental conflicts.
Was there any need of Mamallapuram?

Check C. Raja Mohan
Article in Evernote
Important Article.

No, there is no need of Mamallapuram. The Relations have not improved in any way. China has already shown its approach on Kashmir question. Anyway the two leaders meet many times in a year on different platforms. G20, SCO, BRICS, UN.

Aud to Xi Jinping (BRICS Summit 2014)

- (i) Maintain strategic communications.
- (ii) More people to people contact.
- (iii) Handle differences with maturity.
- (iv) Harness each other's comparative strengths.
- (v) Collaborate on multiple lateral forums.

On what ground we can say that China want peace & tranquility?

(i) China has introduced military CBM (confidence building measures)

(ii) Initiated peace & tranquility agreement 1993.

, 2003 agreement (Guiding principles), 2013

LOB agreement → During the visit of manmohan singh
Border defence cooperation Agreement.

Background of the agreement.

Increasing the tensions b/w the countries bco of incursions.

What was the theme of agreement?

→ In case of overstep by the other party, The Other party will neither "Tall" (follow) nor use force (or)

Coercion.

→ Maintain communications b/w military officials at all the levels.

Way forward.

Astana Consensus -

What are the other issues of dispute in the relations.

Trade Issue - Once the trade trade been game changer in improving the relations. However, at present trade can be the reason for spoiling the relations why?

Unsustainable Trade Imbalance. presently, the total trade is \$97 Billion & trade imbalance ^{would be} \$60 billion.

\$56 Billion

Why Trade Imbalance?

- (i) India is exporter of Raw materials
- (ii) China is productionist, & limits the market access for
 - a) Indian agricultural goods
 - b) pharmaceuticals
 - c) IT

What India can do?

- Take dispute WTO; but WTO is now defunct body.
- Increase Tariff, china will retaliate
- promote Chinese Investment - India has Strategic concerns.

Water Issue

What is water Issue?

China is building large scale dams on Brahmaputra known as Farlung Tlangpo in Tibet. China has been denying that it is constructing dams only after satellite images are out China has accepted.

China has been insisting that they are "Runoff River Schemes" (means they are not storage dams).

The three major dams on Brahmaputra are.

① Tangmu. ② Jircha ③ JIEXU.

Tangmu dam has already started producing electricity (What are Indian concerns?)

- (i) It will reduce the flow of water in Brahmaputra downstream.
- (ii) Water in Brahmaputra has a major importance in India's River linking project.

Note: (i) Accord to the experts there will be no impact on availability of water on Indian side. Why?

(i) The water on Indian side is primarily because of rainfall.

(ii) There is no data available to scientifically estimate the impact.

What are other concerns?

Diversion of water is not a main concern but storage of water.

(i) Dams are located in the seismic zone. It can cause flood in the North East.

(ii) The stored water can be used as strategic asset during war to flood North East.

What India wants?

A water sharing treaty with China like

Indus water Treaty

What is China's attitude?

China tries to desecuritize the water issue.

→ In order to show that China is interested in cooperation

China provides hydrological data.

Note: India also provides data to Nepal, Bangladesh.

However India does not charge anything whereas China does not give data for free. China does not provide regular data. There is no oversight body to compell China to provide data in time.

What India should do?

India does not have leverage on its own. Hence, India should work with Nepal, Bangladesh to pressurise China for an agreement over Brahmaputra.

Other concerns

China's role in South Asia

India considers South Asia as a natural sphere of its hegemony.

What is China's approach?

(1) China does not want India's dominance in Asia. Hence it wants to contain India in South Asia.

(2) At present China aims not only to contain India's influence in South Asia but displays India's centrality in South Asia.

How far China is successful?

With the exception of Bhutan, China is successful in displacing the centrality of India everywhere.

Pakistan Factor

It is said that in international politics there is no permanent friend & no permanent enemy. However, China-Pakistan Relationship is an exception.

China - Pakistan Relationship ^{only} is best example of
"All Weather Friendship". They describe their relations
as deeper than oceans, Higher than mountains, Stronger
than steel, Sweeter than Honey.

China has been in consistent support to Pakistan.
Even in case of terrorism. When entire International
community has criticised Pakistan, China has held
that Pakistan is ~~the~~ not the sponsor rather the worst
victim of terrorism.

China has been providing consistent support to
Pakistan's Nuclear Missile programme, Pakistan
Stand on Kashmir, Stabilisation of Pakistan's Economy.
What are Chinese interests in Pakistan?

(i) Containment of India -

Pakistan is needed to conduct proxy war against
India considering the countries are nuclear weapon
State.

→ China has huge interest in Kashmir. China suffers from
Islamic Insurgency in ~~Xinjiang~~ Xinjiang province.
Pakistan is the epicentre of terrorism. Pakistan can
control insurgency.

→ China has commercial & Strategic interest in Afghanistan,
Pakistan has a strategic depth in Afghanistan.

→ Pakistan is a pivot State of Eurasia.

→ CPEC corridor is the most important link in OBOR.
It is to counter US containment & to overcome
Malacca dilemma.

What are the prospects of China - Pakistan Cooperation?
& whether they are declining & getting strengthened
According to some analysts the prospects may decline
bcoz Pakistan may become China's liability.
Why liability?

→ Pakistan image as state sponsoring terrorism.

→ Pakistan Economic condition & Pakistan's demand.

However it would not be correct to say that Pakistan's importance will decline. India should not think that China will be concerned about its trade benefits with India.

The logic of the relations b/w China & Pakistan is based on "Geopolitics" → As USA-China rivalry will become sharp China's dependency on Pakistan will increase.

Earlier Pakistan's importance was to contain India.

Now Pakistan's importance is also to counter containment by USA. China has strengthened its presence in Nepal.

Now Nepali politicians also talk about closer relationship higher than Mount Everest. Nepal itself has proposed

35 BRI projects out of which China has approved only

9. To recover the lost ground India has offered Economic aid of \$1.4 billion for Nepal's hydropower projects.

Bangladesh.

Bangladesh has a huge importance for China's Maritime Silk route. China's access to Bay of Bengal.

China has proposed BCIM corridor (Bangladesh, China, India, Myanmar). China has deep seaport at

Chittagong. China has proposed \$20 billion in Bangladesh.

China has military & defense cooperation with

Bangladesh.

Sri Lanka. Over the past few years China has displaced India's

hegemony in Indian Ocean region. For ex in Sri Lanka

China has acquired Hambantota port. As Sri Lanka

failed to pay debt. Sri Lanka has given port to China

on 99-year lease.

Maldives

estd

Similarly China has itself ~~planned~~ ^{planned} in Maldives.

Indians have offered \$ 1.4 billion USD aid to Maldives to recover the lost ground.

INDIA - CHINA RIVALRY IN INDIAN OCEAN.

→ China has two ocean strategy

① South China Sea ② Indian Ocean.

→ As China's trade with outside world has increased, China's stakes in Indian ocean has increased. Scholars like.

C. Raja Mohan predict the future war will be India & China not on land but on Oceans.

China is developing deep sea ports around Indian ocean. China has now its first military base outside China at Djibouti. It is said that China has the policy to contain India known as "String of Pearls".

Note: String of pearls. This is given by US dept of Defence. It's USA which tried to securitise Chinese activities in Indian Ocean.

What are Chinese objectives?

(i) Initially the objective where to protect its Sea lines of communications (SLOC) from conventional & non-conventional security threats.

What are present ambitions?

China wants to establish its Hegemony (or) control in Indian Ocean.

Note: Accord to Alfred T Mahan - The country which control the oceans will control the world.

Indian Ocean is a key to 7 Seas.

Infact China is challenging USA Hegemony.

What USA does?

USA has securitised China's presence in Indian Ocean.

USA had convinced India that China is the threat.

Today USA is a declining Hegemon. USA lacks capacity to counterbalance China on its own.

What USA wants?

Burden sharing ~~It~~

What USA did?

(i) Strategic partnership with India.

↳ The most important dimension of strategic partnership is cooperation in Maritime Domain. [Malabar Exercises]

(ii) 2015 - Joint Vision for Asia-Pacific & Indian Ocean Region.

a) for the first time Asia Pacific is mentioned Explicitly.

b) It mentions about cooperation from ^{ASIA} Africa to East Asia.

c) It Explicitly mentions South China Sea.

(iii) 2017 - USA has released 100 years strategy for India - with focus on Indo-Pacific. → The then Secretary of State Rex Tillerson called India & USA as 2 Bookends of Stability.

(iv) 2018 - USA administration has upgraded the strategic dialogue to the level of 2+2.

(v) 2019 - USA has released Indo-Pacific strategy report. It mentions China as a Revisionist power. Russia as a Revitalised malign actor. Korea as a rogue state. mentions India as an important partner.

USA dept of defence prefers to call India as "Net Security provider" in Indian Ocean Region.

What is India doing against China?

(i) Strategic partnership with USA.

(ii) India has left the hesitations of history & has become

a member of Quad. Upgraded the status of Quad.

India has released a more assertive Maritime doctrine

2015 - Ensuring Safe Seas

- India has asserted itself as "Net security provider" in the Region. India is reviving IORA (Indian Ocean Rim Association).

→ India is Revitalising BIMSTEC.

→ India has started ACT EAST POLICY.

→ India has signed Logistical agreements with USA & France.

→ India is Strengthening its Navy acquiring Nuclear Submarines.

- India has acquired Second Air craft carriers

India has its own pearls in Indian Ocean.

• Mozambique, Madagascar, Seychelles

→ India has launched SAGAR (Security & Growth for all in the Region).

→ maritime security in Indian Ocean.

12 Oct 2019

INDIA - USA RELATIONS

Comment on India's growing relation with USA
the Background of Strained Relations b/w India & China

Will now USA has not given India its Rightful role in International Stage?

Critically Examine India's position on South China dispute?

Q) What introduces friction into the ties b/w India & USA. is that Washington is still unable to find for India opposition in its global strategy which would satisfy India's National self esteem & ambitions.

tactical partnership — short term partnership

Q) Current State of India-USA relations

How officials explain ^{the state of} India-US Relations. How analysts look at India-USA relations

Timeline & prominent developments
Areas of Divergence & convergence.

Official Status

~~Strategic~~ Strategic partners.

As per MEA (Ministry of External Affairs) India-USA bilateral relations have developed into "Global Strategic partnership" based on democratic values & increasing convergence of interests on bilateral regional & global issues. The joint statement issued in 2016 calls

India-USA Relationship as Enduring Global partners in 21st century. The Strategic partnership at present is institutionalised. In 2010, India & USA has started Annual Strategic Dialogue, & In 2015 it became the annual

Strategic & commercial dialogue under Trump administration
It has been elevated to the level of 2+2 dialogue [2x2 MEA
& Minister of Defence]

Official pronouncements
from the perspective of USA, Condoliza Rice
(former USA Secretary of ^{state} 2002). India has a potential
to become a great power & USA foreign policy will be well
taking into the account.

2006 :- During Bush visit to India.

Relations are closer than ever & has a potential to
transform the world.

2010 :- OBAMA described India - USA partnership as
most defining partnership of 21st century

Hillary Clinton. ~~Secretary~~ former USA Secretary of
State. (i) India is the indispensable partner of
USA.

(ii) India is a part of Obama's great plan.

USA is making strategic bet on India

2017 ~~Modi~~ TRUMP

"I am true true friend of India."

during Hawaii Modi II event. Trump called Modi as
father of India.

How Indian Leaders describe? (on how Indian
affairs explain?)

Vajpayee 2001: USA is India's natural ally.

Mannohan Singh 2005: India & USA are natural partners.

Modi 2016: In US-Congress

India - USA relations have come out of the
hesitations of the past.

Rex Tillerson (former Secretary of state 2017)

He called India & USA the two book ends of

Stability in Indo-Pacific

Timeline of India-USA Relations

David Nelson in his book Can Elephant dance mentions India-USA relations (during cold-war) as a tale of ^{missed} opportunities. Their situation is like Two blind men trying to understand the Elephant. India-USA relations can be understood in two phases -

(i) During Cold war

(ii) After Cold war

They were not able to understand the main potentials of their engagement.

During cold war

1st phase up till 1965: India & USA have been engaged

democracies

alienated & separate

from 1965 - till 1991: they can be described as Estranged

democracies. (phrase by Dennis Austin)

Why India & USA were estranged democracies?

The biggest cause of estrangement was India's desire to remain non-aligned

→ India's Non-alignment / Assertion of strategic

Autonomy has always been a cause of concern.

Americans, never trusted India's Non-Alignment.

They described Non-Alignment as India's "Immoralism" &

"Opportunism". It also reflected India's "Exceptionalism".

Non-Alignment reflect lack of strategic thinking on part of India. *

At the same time, USA always believed that India

has not been Non-Aligned in genuine sense. India's

Non-Alignment has been tilted in favour of USSR.

During cold war, Indian attitude towards has been described as "Reflexive Anti Americanism".

Prominent Events.

(i) 1949: PM Nehru's visit to USA. Before visit
Pandit Nehru has proclaimed its policy of Non-Alignment,
staying away from alliances. Nehru's proclamation
had set the tone for Indo-USA relations for coming years.
It created tensions b/w India & USA as well as opportunity
of friendship b/w India & Russia.

(ii) 1959: USA president Eisenhower visited India
the first USA president. He had an active policy of
containment of communism. USA offered Economic &
military aid to India to bring India under its
influence.

It is to be noted that despite its Non-aligned
status India favoured China in Korean crisis & did not
support USA led Resolution in UN-General Assembly.

(iii) 1962: (i) The war started b/w India & China.

(ii) Pandit Nehru requested Help from USA
(John F. Kennedy). USA supported India in the
war whereas ~~most~~ countries in NAM supported China.
USA recognised Mac-Mahon line as the border b/w
India & China. USA agreed to provide Arms & Air
assistance to India. USA also dispatched USS-Enterprise
to threaten China.

→ USA kept on providing Economic & military aid
IIT-Kanpur is an example of USA's support for Excellence
in Academics & Research.

→ USA also had civil Nuclear cooperation with India.

(iv) 1965: 1965 war with Pakistan.

despite Pakistan being USA ally. USA maintained
the neutral stand. USA has stopped economic & military
aid to both the countries. However India continued
to give preference to Russia. Russia became the mediator.

in Tashkent Agreement. It is to be noted that till that time Russia's stand was more favourable to Pakistan. Pakistan had greater strategic importance for Russia bcoz of its location. Touching Afghanistan & Central Asia.

On the other hand India's location was of greater significance for USA vis-a-vis China.

After 1945 war, USA changed its approach. USA started closer engagement with Pakistan realising that India was strategic threatening of Pakistan in a better partner. Later on USA-Pakistan-China formed AXIS against India-Russia-Vietnam.

In the context of increasing closeness b/w USA-Pakistan India was compelled to leave its ~~former~~ Non-Alignment & to enter into treaty of peace & friendship with USSR which made India a Quasi Ally of USSR. [Article-9 of the treaty provided security guarantee].

1971 Treaty made them estranged democracies.

Not taking decision
is also decision.

What was the focus of USA's policy towards India?

PV Narasimha Rao

During cold war USA didn't have any independent India policy. It was South Asia policy. USA looked at India through the prism of Pakistan. Since India's Economy was closed, there was no economic attraction. Hence the USA policy on India revolved around the issue of "Nuclear Non-proliferation". Pakistan wanted that India should not develop its Nuclear weapons.

1974 - Pokhran Experiment further deteriorated the relations causing Estrangement. ^{Zhang Guiling} ^{Buddha}

1978 - USA president Jimmy Carter visited India.

However there was no relief in 1978 USA enacted its own Nuclear Non-proliferation Act by which it ended all Nuclear assistance to New Delhi.

1982: Indira Gandhi visited,

The focus of the visit was to address USA concerns over India's Nuclear programme. However there was no achievement.

1984: Bhopal gas tragedy - Lack of cooperation by USA

spoiled the scope of improvement.

Towards the end of cold war, there was a realisation that India needs to improve its relations with USA.

Hence for the first time India allowed the Refueling of USA warplanes used against Iraq.

↳ The member of Non-Alignment & India had close relations with Iraq.

India-USA relations since the End of Cold war.

New imperatives developed for the closer relations b/w India & USA.

(1) USSR disintegrated & USA remained the single superpower. It would have been futile for India to go for balancing against single superpower.

However India was too slow to change. In the Takasta Summit of NAM after the end of cold war many countries proposed to end NAM. However Indian prime minister asserted that even when there is a single superpower it does not mean we have to get aligned with single superpower. India trusted on continuation of NAM.

India - USA relations haven't improved in any significant sense. as USA kept on insisting India to join NPT & later on CTBT.

After the end of cold war, India started talking about Multipolar world, India joined Ruhraya chakra

to form RIC Triangle.

Thus, India renewed apprehensions of USA
India had to go for structural adjustment in Economy
& thus required access to western markets.

The rise of China has created imperative for USA for
the closer cooperation with India as a balancer. Hence
American leaders & analysts often talk about making
the strategic bet on India.

1998: Operation Shakti - USA has imposed sanctions
against India & compelled other countries also.
USA has also increased pressure on India to sign
CTBT.

1999-2000: The 14 Rounds of talks b/w Jaswant Singh
& US deputy Secretary of State Strobe Talbott.
purpose of the talks.

to compel India to join CTBT. Why?

There was a fear that arms race in South Asia will
lead to arms race in West Asia.

What was the outcome?

It led to the beginning of Strategic partnership that
was unique?

Within a span of one year they met 14 times. The regular
communications led to the growth of understanding of
each others perspective. [Most successful example of
Social Constructivism].

What was the indication about the qualitative change
in Relations?

USA's approach during Kargil - crisis

(i) for the first time USA's stand was Kashmir
was against Pakistan.

(ii) USA warned Pakistan & asked to exercise Restraint,
Respect LOC. Resume the dialogue.

USA summoned Pakistan PM Nawaz Sharif for Emergency meeting after which Pakistan has withdrawn its forces beyond LOC.

2000 : Clinton's visit to India.

First president to visit since 1978.

Outcome : Release of vision document.

Significance : The beginning of Strategic partnership.

Note : Still there was uncertainty.

Why uncertainty?

(i) Vajpayee was Prime Minister & favoured Strategic partnership with USA.

(ii) K.R. Narayanan (Congress) was president.

During the State dinner in the Honour of Bill Clinton K.R. Narayanan gave the speech, Insisted to recite his own speech, where he talked about the importance of NAM.

2001 : USA has lifted sanctions against India.

Vajpayee visited USA called USA as natural Ally. During visit India & USA declared NSSP (Next steps in Strategic partnership).

(i) Laid the foundation for Civil Nuclear Cooperation (focus on India's Energy Security).

(ii) Cooperation in Space & High technology.

2005 : Man Mohan Singh visit it led to finalisation of 123 Agreement (Civil Nuclear Agreement).

Same year India & USA entered into

Defence framework Agreement.

It is renewed after every 10 years.

One of the most successful & mutually beneficial areas.

Strategic coop b/w India & USA defences.

defence coop agreement set the principles for defence cooperation b/w the countries in the future.

As per 2005 Agreement They will be cooperating

→ in Maritime Security

→ Humanitarian Assistance in Disaster Relief.

→ Counter Terrorism.

→ The two countries started conducting Largest Naval Exercises followed by Air & Land Exercises.

Write Short Note on India-US defence Cooperation?

It is most successful pillar of India's strategic partnership.

(i) It is very broad in scope covering military to military engagements.

Note: One of the weakest aspects of India-Russia defence relation is very limited Military to Military Cooperation.

(ii) DTTI (Defence Trade Technology Initiative) - 2015 during Obama's visit.

Objective: Like Russia, India USA relationship in defence needs to go beyond buyer & seller relationship.

DTTI initiative will Result into Technology transfer joint research & production.

(iii) In 2016 OBAMA administration has granted India the status of Major defence partner. This is a Exceptional status enjoyed by India.

purpose: facilitation of transfer of technology. India will get access to high-end technology at par with USA's closest ally. Like Britain & Australia.

(iv) 2018 India's status has been elevated to STA - I (Strategic Trade Authorisation)

purpose: facilitate technology transfer (Base of

technology transfer. ^{It reduces} ~~It will reduce~~ Bureaucratic hurdles & deals can be done at faster phase.

Defence pact: for long India had hesitations in entering into the defence pacts in USA. as per USA domestic laws it is not possible to transfer sensitive defence equipment & technology to a country. No signing these agreements. Hence ending the hesitations of the past. India has entered into all defence agreements (on all defence pacts) Except one ^{BECA} (BECA - Basic Exchange ^{Communication} Agreement).
Eventhoughs consensus in Indian Establishment to enter into BECA.

(i) EOMA (End user Monitoring Agreement)

(ii) - Right to inspect the end use.

(iii) LEMA (Logistical Exchange Memorandum of Agreement)
It gives Logistical support.

(iv) COM(CSA (communications Compatibility & Security Agreement).

It will allow India to acquire sensitive weapons like Sea Guardian (Drones) which will increase India's surveillance capacity. Both the countries will have access to each other's Encrypted Information in real time situations (like wars).

(v) BECA (Basic Exchange Communication Agreement).
This will provide India Geo-spatial Information

TRUMP Administration - has elevated strategic partnership to the level of 2+2.

India is consistently mentioned as a important partner in all defence related documents released by USA administration.

Indian USA defence trade had reached to \$ 18 billion USD at present USA is the third largest exporter after Russia & Israel.

13 Oct 2019

2005: Finalisation of civil/Nuclear deal.

Significance: The significance of civil Nuclear deal goes beyond bilateral dimension so far as India is concerned.

→ Huge Significance for India

↳ It ends Nuclear Apartheid against India.

but it is a recognition about India's status as responsible Nuclear weapon state. India's record in context of Nuclear non proliferation is qualitatively better than China, even when India is under NPT. in practice China has violated NPT norms by providing clandestine (hidden) support to the nuclear weapon programme of Pakistan & proliferation of missile technologies to North Korea, Pakistan, Iran. It opened space for India's entry in elite clubs like MTCR, Australia group, Wassenaar group.

Export Regime

miss

Rockets/air vehicles/ISS
Weapons group
Conventional weapons & dual tech.

Australian group for
Chemical & biological
weapons

→ Civil Nuclear agreement have been a turning point in India-USA strategic partnership till day there is no other such big ticket initiative which can be compared with agreement. USA had walked extra mile as far as the deal is concerned. However, Indo-USA civil Nuclear agreement has also become a cause of major dissatisfaction from the perspective of USA.

Reason: USA has not been satisfied with India's

"Civil Liabilities in Nuclear Damages Act 2010" It is

booz of USA's apprehensions. No practical cooperation was possible other countries like Russia, France took the advantage but USA's Nuclear Suppliers failed to take the advantage.

What were USA's concerns?

USA was concerned about the two specific sections of the Act SEC 17B & SEC 46

SEC 17B: Right to Recourse [means any in case of any nuclear tragedy then Nuclear operator (NPCIL) will pay the damages or liabilities to victims & if it can Recourse to Supplier.]

after the Experience of Bhopal gas tragedy India came up with strict law which ensures that supplier will have to pay in case of Nuclear catastrophe. The Act provides for the compensation of Rupees 1500 cr.

As per the Act operator (presently NPCIL) will pay compensation to the victims but later on it can ask the compensation from the Supplier. Though there are certain conditions for Ex: In case of some patent or latent defect.

What was USA's concern?

Indian liability laws are not in accordance to global Norms

Why USA was so much concerned whereas Russia & France have gone ahead?

(i) In USA The Nuclear Industry is in private hands whereas in Russia it is owned by the government.

(ii) USA Reactors are not tested where as Russian reactors are safer & tested.

What is the current status?

Modi has offered the deal to Obama during his visit in 2015.

What is the deal?

Modi has proposed insurance mechanism. (Means shifting of liability to insurance) ^{As} the Norm in International nuclear trade. However in India the insurance

agency will be GIC_{Re} (PSU). To start the trade immediately govt of India will be providing the initial fund of Rs 750 cr. for the remaining 250 cr both suppliers & operators will ^{pay} take the premiums.

Sec 46 :- It was bigger concern for USA.

→ Sec 46 talks about other liabilities means liabilities other than civil liabilities. civil liability is limited to Rs. 1500 cr. the other liabilities can be under Criminal law any other law like Environmental law.

Since These liabilities are not defined USA has been more concerned. Modi has tried to convince OBAMA what he said & how he concerned?

He said Sec 46 will be applicable only for operators. What Modi offered?

He explained that Sec 46 ^{will not} does not apply to suppliers. What is the basis of this explanation?

Modi referred to the parliamentary debate when MP had asked clarification, it was clarified by the govt that it does not apply to supplier.

What experts say?

There is no legal validity of parliamentary debates even constituent assembly debate.

What is the scope of Sec 46 will be ultimately interpreted by Supreme court.

2008: USA Congress passed HYDE Act. (Civil Nuclear deal have to be ratified)

In 2008 USA got India specific waiver from NSG, guideline.

→ Collaboration of Chandrayaan-I.

→ Mumbai terror attack. USA closely cooperated with India, has sent FBI investigators & forensic experts.

2009: Man Mohan Singh's visit - No Outcomes.

2010: OBAMA visited India.

(i) called Indo-USA friendship as most defining friendship of 21st century.

(ii) promised USA support for permanent seat in UNSC

led to the institutionalisation of strategic dialogue ~~at~~ at the level foreign ministers.

→ 2010 India brought Civil Liability on Nuclear damages Act & USA expressed the concerns.

2012: US Secretary of defense Leon Panetta visited ~~to~~ to strengthen the military ties in the wake of OBAMA's administration announcement of Pivot to ASIA.

2013: Man Mohan Singh. VBP, No outcome.

2014: president OBAMA congratulated & Emailed VISA ban, & in 2014 only Modi visited USA.

Modi's event included outreach to Indian diaspora

Madison Square & meetings with business executives.

→ USA promised \$ 1 billion USD to help India to develop low carbon Energy ~~and~~ alternatives.

2015: → OBAMA's second visit to India - ^{So far only} The first USA

USA president to visit twice & the first USA president invited as a guest to Republic Day celebrations. OBAMA held that America is India's best Bet.

→ Modi resolved USA concerns on civil Nuclear issues

→ India-USA Defense framework Agreement - 2005 (2015) was renewed for next 10 years.

→ DT TI (Defense trade Technology Initiative) was launched.

2016: (i) India-USA signed LEMOA

(ii) India was given the status of Major Defense partner.

2017: Modi's visit to meet Trump. However, Trump

has raised sharp disagreement against trade, climate change agreement, H1B visas at the same time he described himself as "True ~~True~~ True friend of India". The joint statement released the title "prosperity through partnership".

→ Cooperation in Indo-Pacific

→ Strategic convergence against rising China

→ USA will consider the sale of Unmanned Aerial Vehicles (UAV's) Sea guardians to enhance India's Surveillance capacity.

2017: Trump administration released SOUTH ASIA Strategy. Strategy acknowledges India's constructive role in Afghanistan & criticised the role of Pakistan.

2018: USA released National Defense Strategy - which mentions India as a partner, China & Russia as Enemies.

In 2017 Trump administration released National Security Strategy (America First) It also mentions China, Russia, Iran, North Korea as a threat & India as a partner. → In 2017 ^{REX} Tillerson released 100 years

Strategy for India. The only country for which Trump administration has released 100 years strategy. Tillerson calls India-USA as two book ends of stability in Indo-Pacific.

2018: Indo-US Strategic dialogue has been upgraded to 2+2 dialogue. India signed COMCASA.

USA starts trade war imposes tariff on Aluminium & Steel.

→ In 2018 India was given STA-I (Strategic Trade Authorization) Status. India has been allowed to participate in CENTCOM (Central Command) Significance: It will strengthen India's Surveillance capacity in Indian Ocean, Arabian Sea, Horn of Africa,

positionally. It will also give India an unprecedented access to US Intelligence w.r.t Pakistan.

2019: USA released Indo-Pacific strategy calls India as a partner. USA has withdrawn GSP status. Trump called India as tariff kings. Aced to him India doesnot provide equitable & Reasonable access to its markets. In response India imposed Tariffs on 28 USA products which India was postponing since 2018 when USA has imposed tariffs on steel & Aluminium.

Should India be concerned about withdrawal from GSP?

Ideally India should not be concerned.

GSP was started in 1976 at present 120 countries are a part of programme. India has been the biggest beneficiary India was getting tariff concession of worth 240 million USD for 1400 products exported to USA. [approximately 12% of Indian Export worth 6.3 Billion USD]

What are the areas of divergences b/w India-USA?

(i) Trade: Aced to USA India doesnot give the fair & reasonable access. India is protectionist, India's IPR Regime, & India's investment model especially dispute resolution is not in accordance with USA's interest. There is a dispute b/w India-USA over Doha talks w.r.t Agricultural subsidies. However, during Jaishankar's visit USA has assured that it is ready to iron out the differences in a friendly spirit. As suggested by USA Secretary of state.

"Great friends are bound to have differences". USA has been India's top export destination the total Indian Export has been \$52.56 billion in 2018-19. India imported the goods worth \$35.56 billion.

E-commerce policy, data localisation norms India's policy towards Medical devices, Dairy products

Note: India want earliest resumption of GSP. However in 2002 India has challenged GSP given by European Union in WTO.

USA want India not to ^{allow} Huawei ^{technologies} not to be part given tender in India's Expanding 5G Network.
India - USA divergence.

Due to India - Russia Relations: India has strategic partnership with Russia. Russia is a source of high tech weapons. Recently USA has warned India against purchasing S-400 Triumph ~~Scud~~ missile defence system. India may have to suffer sanction under Section 235 of CAATSA Act. It provides for sanctions against any country having significant transactions with the countries declared as adversaries in following fields:

- (i) Defence
- (ii) Energy
- (iii) Oil-pipelines.
- (iv) Cyber-Security.

There can be 5-types of sanctions.

- (i) Export Sanctions
- (ii) Cancellation of loans
- (iii) Ban on Investment
- (iv) Restrictions on foreign Exchange & Banking.
- (v) Visa & travel Ban on Officials.

India - Iran If India had huge convergence with USA in the east there is a strategic divergence in the west. Iran is critical for India's Security. Not just Economic security but for the security threats emerging from Afghanistan. However India has yielded to USA pressure & stopped importing Oil for the time being India has waiver on CHABHAR.

Though Iran is important yet India's Oil is towards

Washington: We are more dependent on USA. There is a lot of hype of India-Iran relations.

(i) Iran has been consistent support to Pakistan on Issue of Kashmir.

→ Iran is more dependent on Pakistan for its security.

→ Iran has invited Chinese investment in CHABHAR.

→ Iran proposes to make CHABHAR & GUADAR as sister ports.

Iran is an important component in OBOR.

S. Jaishankar's Statement on S-400 deal

India will go by its national interest while dealing with other countries. We have many relationships.

They have a history - we will do what is in our national interest & part of that strategic partnership is the ability of each country to comprehend & appreciate the national interest of the others.

India - USA convergence on China

There is a convergence b/w USA's ^(Indo-Pacific) Asia pivot & India's

Act East policy. However there is lack of perfect convergence.

When we talk in general sense there is convergence. However the movement when we come to specifics divergences become

evident. Both India & USA talks about cooperation in

Indo-Pacific. However the ^{on} very specific idea of Indo-Pacific

There is very big difference. For USA the idea is containment of China. USA want India to assume the central role

on the other hand as evident in Shangri-La dialogue

India wants the inclusive architecture Indo-Pacific

as a construct for peace & prosperity & ASEAN as the

centre. Similarly India is the weakest pillar in QUAD.

It's because of India neither QUAD's purpose nor QUAD's

structure nor QUAD's future is clear.

1/10/2019

Views of Experts:

USA is a natural ally

Do you think USA & India are Natural allies?

(i) Vajpayee called USA as natural ally.

Man Mohan Singh called USA as natural partner.

However it is not appropriate to take USA as India's natural ally why?

(i) the concept of alliance is meant for cold war, in the age of complex interdependence alliance may not be the ideal approach.

(ii) In international politics there are no permanent enemies & no permanent friends. Hence foreign secretary is right when he suggests that India will be aligned only with its national interest.

(iii) India is too big & too proud & too argumentative to be an ally.

India cannot be a junior partner of any country.

India is placed under such a geo-strategic environment

that it is better if India exercises strategic autonomy.

It is not in India's interest to be a camp follower. It

is more important for India to develop the capabilities to balance the conflicting interest. Hence, India's foreign policy reflects balancing acts.

Ex: strategic partnership with China & USA

In place of alliance strategic partnership is a better word coz it gives flexibility.

What flexibility?

Cooperate against common adversary without getting entangled in any body's conflict.

Views of Shiv Shankar Menon :- his book choices

there was a conviction among Indian foreign policy makers that Indian strategic partnership with USA serves India's interest better but there is a consciousness of creative Tensions in the relations.
(Russia, Iran, Pakistan).

Views of Teresta Schaffer & Howard Schaffer

their book "India at the global high table of diplomacy"
The current strategic realities create a strong imperative for closer relations with USA. but the way India conducts its foreign policy is too preachy & prickly (irritating)

Views of ALYSSA AYRESS

her book "Our time has come"
India starting its is charting its course to power. India is a rising power of Asia. It is better if USA appreciates India's approach. USA should make efforts to strengthen the partnership.

Rakesh Sod

India-USA relations are complicated. USA never had to deal with any country like India before. India is neither ally nor adversary & USA is habitual of looking at countries only through these two frameworks

Ashley Tello & Robert Blackwell

their essay debate "India dividend"

(i) New Delhi remains Washington best hope in Asia

(ii) It's unfortunate that in Washington the logic of India-USA relations is misunderstood.

What is logic?

It's not important what India does for USA, it's more important to ~~help~~ know what India does for itself. Hence, USA should support India's rise & continue with strategic Altruism.

Harsh V. Pant

India's foreign policy & overview.

- (i) Global balance of power is in the state of flux.
- (ii) USA & India are trying to adjust with emerging realities. As pre eminent power is adjusting itself to new distribution of power India emerges as natural partner. However USA is not used to the partnership of equals. India remains too proud, too big & too argumentative to be a junior partner.

Views of S. Jaishankar. (Occasion during his meeting with Mike Pompeo)

We will do what is in our National Interest, strategic partnership ability of each country to comprehend & address the National Interest of the other.

What introduces the frictions into the ties b/w India & USA is that ^{washington is still unable} to find for India opposition in its global strategy which would satisfy ^{US-11 Question.} India's national ^{on US-11} ^{self} ^{esteem} ^{& ambitions} ^{ambitions}.

→ India - USA have been estranged democracies but the reconfiguration of powers on the globe after the end of cold war not only made them engaged democracies but

"Indispensable partners" & the partnership having global consequences. The structural determinants of Indo-USA partnership are strong enough as recognised by the officials as well as the analysts in both the countries.

However, there is a realisation that strategic partnership is unable to overcome the creative tensions & is reaching to plateau. In Washington there is a view that there is a limit to USA's strategic altruism towards India. However there is a consciousness in the strategic community that India is the best bet strategic bet in Asia.

It is being realised that the fundamental problem b/w the two countries is not structural. It is more to do with social

constructivism. It is about the difference in the norms & attitudes of the strategic cultures. USA has never dealt with any country like India which is neither adversary nor ally. Still at the same time India is too big, too proud & too argumentative. Hence USA needs to explore the strategy which does not hurt India's self-esteem. It is more important to USA if India helps itself. Hence USA should continue to strengthen India's power base. It act as "Force Multiplier for USA".

INDIA - RUSSIA

Acced to Prime Minister Modi Every child in India knows who is India's best friend.

Official Status:

Special & privileged strategic partner since 2010.

Since 2000 they are having strategic partnership with Annual Summits.

India-Russia partnership is also institutionalised. It is also

Having 2+2 Dialogue. (foreign minister & Defence Minister)

It is institutionalised through.

(i) India-Russia Intergovernmental ^{technical, Economic} ~~cooperation~~

& cultural cooperation headed by foreign minister.

(ii) India-Russia Intergovernmental military, technical cooperation headed by defence ministers.

Importance of Russia for India

	USA	Russia	China	Japan
Geo Economy	①	⑥	-	②
Geo political	②	②	-	③
Geo strategic	②	②	-	③

Any time we have to Explain in the terms of
Geo political - Reform / multi polar world
Geo Economy - Economic
Geo strategic - Security Issues

(Importance of importance to Russia - we can give more for Geo political)

Geopolitical Importance - Russia is a permanent member of UNSC. India has to ensure that Russia's stand in context of Kashmir Remains favourable to India.

What is the scope of cooperation?

Very limited, why?

There is a china-pakistan Axis & Russia is not present too much dependent on china. Hence Russia may not be in a position to take Independent position.

Russia is important for India's candidature as a permanent member in UN Security Council.

India & Russia have Geopolitical convergence on

world order. Both share the view of multipolar world.

India-Russia cooperate at the platform BRICS, SCO, East Asia Summit.

Geo Strategic:

during cold war India was heavily dependent on Russia for its security. However the situation has changed. Neither we are under any sort of treaty agreement with Russia. Nor we are too much

dependent on Russia. India has developed its own deterrence. However, Russia continues to remain the leading supplier of defense equipments to India.

However in recent years Russia has taken certain actions which directly ^(attack) impinge on India's security for ex: Russia has ended its self imposed Restrain^{to} on the supply of offensive weapons to Pakistan & China.

Recently Russia has provided 4 MiG 35 Helicopters to Pakistan.

The current approach of Russia in Afghanistan directly effect India's security. Russia is a major factor behind Resurgence of Taliban.

Geo Economic

Russia India bilateral trade continues to stagnate to a meagre amount of 14 billion USD.

Whereas India USA trade is around 122 Billion USD that is favourable to India. By Russia China bilateral trade is around \$ 7 billion favourable to Russia.

There is a huge potential to increase the trade yet there are barriers.

(1) Geographical: - Expected to improve once International

North South transport corridor becomes operational

→ There are sanctions against Russian Economy by Western countries.

→ Law & order Situation is not conducive, poor financial Infrastructure. Russia is a partner of China in OBOR. Russia had started its investment in infrastructural building in Pakistan. Russia is building gas pipeline b/w Karachi & Lahore.

Evolution of Relations

1st phase up till 1971:

How Stalin looked at India's decision to remain Non-Aligned. He was more critical than USA & felt that those who are not with us, are against us. However, India-Russia established diplomatic relations in 1947.

In 1955: PM Jawahar Nehru visited Russia & the same year Russian president Khrushchev visited India.

These visits led to the beginning of technical Economic cooperation for Ex: Heavy Industries, India's Space programme, Cooperation in Higher Education (IIT-Bombay).

However, In 1962 war Russia's position was favourable to China.

(i) Russia provided intelligence to China.

(ii) Russia has stopped the supply of MiG's Aircraft.

By In 1965 war Russia position was favourable to Pakistan. Russia compelled India to take its forces back & Return occupied territories.

For Russia the Strategic importance of Pakistan was greater than India. Pakistan's location. However, in

1969: There was a border conflict b/w Russia & China resulting into Sino-Soviet Conflict Schism. At the same time USA-Pakistan relations started becoming close.

Hence in such circumstances Russia looked towards India. India also need a External balancer. It resulted into the treaty of peace & friendship which had mutual Security Clause. Article-9.

Phase I 1971 - 1991:

Russia became India's closest partner / Quasi Ally. It was the strength of 1971-treaty that India could dare to intervene militarily in East Pakistan & created Bangladesh.

Russia became the pillar of strength from technical to Geopolitical (on Geostrategic goals of India). Russia was the consistent support for India in UN Security Council on Issue of Kashmir.

Phase II from 1991 - 1993:

Not only USSR was disintegrated India-Russia relations drifted apart. Yelstin's approach was pro west especially KOZYREV (external foreign minister).

Under USA pressure Russia pressurised India to settle the trade balance in dollars.

Russia denied the transfer of Cryogenic engines.

However very soon Russia realised its mistake.

Yelstin visited India renewed the Treaty of peace & friendship (Article 9 was repealed as Russia was not in a position to provide Security guarantee).

Role of Primakov

first as a foreign minister in 1996 & later on as a prime minister in 1999, Primakov proposed the concept of multipolar world a Three Dimensional pivot comprising of Russia - India - China, against the Unipolarity imposed by USA. The idea was to give freedom of choice. To those countries who were not willing to be allied to USA. He was responsible behind the idea of RIC Triangle.

Rolof Putin :

In 1999 Putin became prime minister & then president. The movement became to power, Russia's confrontation with the west became acute.

He changed the foreign policy from look west to "Multivector approach" (means ^{multipolar} multiple alignment).

Putin visited India in 2000 which led to the beginning of Annual Summits & Strategic partnerships.

India-Russia cooperated in Afghanistan against Taliban. Russia allowed India's first Overseas Air base at Fakhroon in Tajikistan. India also demanded another airbase at Ayul in Tajikistan, reportedly denied by Russia. However, during this phase

USA-India Strategic partnership started getting strengthened on the other hand there was no dilution in the approach of USA towards Russia.

Defence cooperation has been major area of cooperation but Russia started losing its monopoly - it started getting replaced by Israel & USA. Hence Russia started looking for alternatives.

Though there were concerns wrt to defence yet the two countries tried to manage the situation. Russia was unable to fulfill the demands of India. Russian industries were disrupted. India's demands became diversified. Russia was unable to give delivery on time. Delay also caused escalation in the cost.

Russia was not even able to provide the spare parts & servicing. India had to rely on Israel, which has expertise in Russian defence equipments. However the two countries tried to address by entering into joint Research & production of defence equipment. Russia lacked capital but had technology. India lacked

technology but had capital. Thus the relations got transformed from Buyer & Seller. However, Russian concerns remained in defence.

(i) Russia has provided India high end technology i.e. Brahmos which is very rare.

As to Russia defence deals in India are not transparent whenever deals are transparent Russia wins the contract when India rejects Russian Equipment. It adversely impact Russia-Brand.

However As to India, Russia is not being ignored purposefully. Russia continues to be leading supplier.

Hence to pacify Russia. India has promised Result oriented Strategic partnership [St. Petersburg declaration 2017].

It has resulted into Russia getting contract of \$ 4.3 billion USD for supplying S-400 missile defence system.

India will also be taking Akula ^{Class} Nuclear Submarines.

~~Under~~ on lease [\$ 3 billion]. India has given the contract of \$ 2 billion to supply T-90 tanks - India has given the contract of \$ 10 billion worth to Russia in 2017.

Areas of Cooperation at present

① Energy Sector: In 2014 - India-Russia entered into the strategic vision for cooperation in the field of peaceful use of Nuclear Energy. Besides supplying the Nuclear Reactors they will be cooperating in Uranium mining technology transfer mgmt of Nuclear waste.

Localisation under Make-In-India & exporting to the 3rd countries starting with Bangladesh (Roppon Nuclear Plant). There is also a huge scope for cooperation in Hydrocarbons. ONGC Videsh Ltd has 20% stake in Sakhalin-1 gas field.

Area of divergence

- 1) Russia - Pakistan relations.
- 2) Russia - China Relations
- 3) India - USA Relations.

16 Oct 2019

Russia - Pakistan Relations

Since the end of cold war & Putin's multi vector approach there is a significant improvement in Russia - Pakistan Relations.

Importance of Pakistan for Russia.

→ Security in context of Afghanistan & Islamic fundamentalism.

→ Russia is looking for New markets for defence. R.

→ Russia has huge stakes in central Asia & Pakistan is called pivot state (or) zipper state.

→ Some of the recent developments includes Regular high level visits a comprehensive defence cooperation entered in 2014.

↳ It includes military to military cooperation (which lacked till India).

→ Russia had ended embargo on supply of offensive weapons.

→ Russia is conducting military Exercises both bilateral & multilateral. Despite India's Reservation Russia had gone ahead with bilateral Exercises in 2016 even after Uri attack. Initially Exercise was planned in Gilgit Baltistan. ^{showing} The change in Russia's approach towards Kashmir.

→ TSENTR (2019) In 2017 Russia entered into a military technical cooperation which deals with arms supply & weapons development.

→ 2018 - Naval cooperation Agreement & Gazprom.

(Gas company of Russia) has shown interest in supplying LNG to Pakistan.

→ Bilateral trade is increasing at faster rate. It was 600 million USD in 2016 which has become 800 million USD.

→ Russia & Pakistan has formed joint working group on Counter Terrorism.

Russia & China

Context: Though Russia is not comfortable with China get western sanctions have pushed Russia into the arms of China. Russia & China has geopolitical convergence on multipolar world. They are cooperating at platforms like BRICS, SCO, OBOR. They are having massive programme to build gas pipeline. Ex:

Power of Siberia pipeline.

→ Cooperation in fossil fuels

→ Cooperation in Afghanistan

→ Russia has ended embargo on sale of offensive weapons

→ Bilateral trade has reached to \$107 Billion USD

→ Chinese president Xi Jinping calls Putin as his best friend

During Xi Jinping visit to Russia in 2019 he promised to walk hand in hand. The joint statement talks about the development of Strategic Cooperation & Comprehensive Partnership. It also talks about their partnership contributing to global stability.

How India should look at?

India should understand that in the age of complex Interdependence, multiple alignments becomes a compulsion. However, India should remind Russia that it should not be doing anything that threatens India's Strategic Interest. India should have a candid

dialogue & draw the red lines.

Though India has extended its partnership with the west but India has not done anything which harms the core interest of Russia. Hence India did right thing in reminding Russia that one old friend is better than two new friends. As suggested by Sr. Jaswant Singh.

(i) If we ask the question can India live without Russia the answer is yes, today Russia is more isolated & India is in a better position.

(ii) Whether India wants to live without Russia?

No, there is a lot ^{that} two middle powers can do together. As a good friend India should remind that Pakistan was a major factor behind disintegration of USSR. Which put it in a position which it considers as a major Geopolitical disaster.

Double Russia's flirtations with Pakistan are not new yet Pakistan ditched Russia for the sake of USA. Even now Pakistan will use Russia to gain leverage over USA.

Similarly Russia should be conscious about China's Charismatic offensives.

present direction of India-Russia Relations
Both Russia as well as India seems to mend their (improve) Relations.

(i) What are putin's concerns?

putin pivot to ~~USA~~ ^{East} policy. Russia's far East is full of Natural Resources but lacks Infrastructure for Commercial Exploitation. Putin has been compelled to look East bcoz of the Sanctions by western countries bcoz of CRIMEAN-CRISIS. Putin has been trying to attract investment in Russia's far East. However He has not been successful.

(ii) Put Sector is not finding it profitable.

(ii) There is a fear of Sanctions

(i) Even China has not shown much of Interest. Why?

a) Russia is not like Laos (or) Angola where China can use its coercive tactics.

Russia is reluctant to permit foreign investment in strategic assets like ports.

China is using its investments to gain geo strategic advantages. China understands that it may not gain much leverage against Russia. Russia has strong National Image. Hence Putin is looking for other countries.

In 2013 - Modi was invited to St. Petersburg forum to meet on Eurasian Economic forum.

In 2019 - Modi is made as guest of honour at Eurasian Economic forum at Vladivostok.

India's Approach

(i) Considering the uncertainties due to the Trump's policies, India does not want to lose its strategic autonomy.

(ii) As the gap b/w China & India is increasing, India wants to ensure its own peaceful rise.

(iii) Southblock has always preferred soft balancing & strategic autonomy as Hedging (playing safe) option.

(iv) Russia has been old trusted friend.

(v) Russia is a permanent member of UNSC.

(vi) Russia is also major power.

Hence, India is interested in addressing certain concerns which had emerged in the past. Since 2017 the two countries are taking steps to improve relations.

St Petersburg Declaration :- 2019 - Its title
VISION for 21st Century.

Advancing the comprehensive development is absolute priority. We will continue to widen our scope of cooperation by launching large scale initiatives in

different spheres & enhance & enrich our bilateral Agenda
to make it more result oriented.

First Informal Summit - ^{May} Sochi Summit - 2018.

India's initiative to uplift the relations it has
resulted into concrete achievement.

Oct-2018 - Bilateral Summit?

Finalisation for S-400 deal.

Note: India has clarified its position to USA that it will
go ahead with the deal on S-400 & will not yield to black mailing
by USA.

S. Jaishankar in his meeting with Mike Pompeo held that
- we will do what is in our national interest. Strategic partnership
means ability of each country to comprehend & address the
National Interest of the other.

Note: CAATSA Sec: 235 of CAATSA act provides for
5 types of Sanction.

Russia & India will take steps for finalisation of FTA b/w
India & ^{Eastern Economic Forum} (Eurasian Economic Union).

Dialogue b/w Niti Aayog & Ministry of Economic Development.

Greater participation of Russia in Make in India. address
Russia's concerns about its declining share in arms
Exports.

2019: India's announcement at Vladivostok.

what is the background?

Exploration of Natural Resources commercial interest

India's interest in Arctic Region - Strategy to counterbalance
China. by its presence in the regions where China is sensitive.
India's interest in the region is not new.

India is the first country to establish its consulate at
Vladivostok.

On 1990 India has got 20% stakes in Sakhalin-I (oil &
gas project).

PM Modi has offered the line of credit of \$ 1 Billion USD.
as an attempt to counterbalance China.

→ TATA Group will be Investing in coal Exploration in
Kamchatka peninsula

Russian company Novatek has entered into MOU to
provide long term LNG Supplies to India.

India & Japan will also be working together Scope for
Indians to work abroad.

India is not just seeking commercial opportunities.

India has pronounced geopolitical goal i.e. counterbalancing
China.

Can India counter balance China in far East?

Its Doubtful. Why?

China has bigger pockets. There are geographical disadvantages,
to India.

India's credit lines are too complex, too slow with lot of
Red tapeism. It is said that India promises, China
delivers.

Views of C. Raj Mohan:

(1) Russia's Embrace of China & its flirtations with
Pakistan are creating unease but India should take
Russia with clear eyed Realism.

As a middle power there is lot India & Russia can do
with each other. It is said that Russia's approach is
(relating to the conducting of business)
transactional in south block Transactionalism may not be
a nice word yet it is better than Sentimentalism.

Shree Nath Raghavan:

his title of article "The Myth of Idealic Indo-Russian
Ties".

(1) It is just a myth that India Russia Relations have
been too Idealistic.

(M) Russia has always looked at India through a prism of Realism. In 1962 - Russia helped China by sharing intelligence. In 1965 - war its Stand was pro-Pakistan.

During Cold war, Russia has seen India through the prism of Geopolitical Rivalry with USA. Russia looks at India through the prism of Realism.

Russia's approach towards India is transactional.

INDIA - JAPAN

Strategic partners:

During prime minister Modi's visit it has become special strategic global partnership 2016.

If we go by Kautilya's Arthashastra Japan is India's natural ally. India-Japan don't have any historical baggage of conflict & disputes whenever Indians have visited Japan they had felt warmth in the way Japanese treated Indians.

Whether it was Tagore (or) Rajeev Gandhi (or) Manmohan Singh felt this warmth.

PM Modi & Shinzo Abe Represents unique personal chemistry & romance.

Overview of the Relations:

Two phases 1) During cold war & 2) After cold war.

During Cold War

Though Indian leaders always talk about the warmth in the relations, yet accord to David Henderson the relations have been Tepid (lukewarm).

Major Events during cold war:

(i) Pandit Nehru has ~~said~~ sent Baby Elephant in 1949 & Japanese appreciated gesture. He sent the Elephant for children of Japan to console after Hiroshima & Nagasaki.

(ii) Justice Radha Binodh pal has given the only dissenting ^{dropped down} opinion in the war crime tribunal constituted against Japan bcoz of its actions against 2nd World war.

Till date Japanese appreciate India's initial gestures.

However, India-Japan relations was tepid bcoz they were in opposite camps. Japan was USA ally & India was Quasi-Ally of USSR.

Indian Economy lacked attraction for the trading

But Japan bcoz its closed Economy yet India became the largest Recipient of Japan's official development assistance (ODA). Japan has helped India's Infrastructure development & capacity development.

→ Japan imposed Sanctions against India's Nuclear test in 1974 & pressurised India to sign NPT.

After the End of Cold war:-

India & Japan Relations started turning Strategic.

- (i) The biggest factor was the changing Geopolitical Environment i.e. Rise of China.
- (ii) As India-USA Relations improved India-Japan also improved as Corollary (Byproduct).
- (iii) Opening up of India's Economy, made India attractive from commercial point of view.

However till the year 2000 there is no significant development.

In the year 2000 Japanese PM Toshizo Mori visited India. It resulted into the Declaration of "Global partnership b/w Japan & India". It is to be noted that India-Japan partnership is a "Global public good". Thus it is for the wider benefit of humanity & not just for bilateral gains.

Present: at present India-Japan Cooperation in Indo-Pacific is a factor to bring stability & prosperity in the Region. → Since 2006 they are having Annual Summits.
→ In 2006 partnership was elevated to the level of "Global & Strategic partnership".

→ In 2008 They have gone for joint declaration of Security Cooperation with focus on maritime security.
→ Since 2010 They are having 2+2 dialogue at Secretary level covering maritime, cyber security & cooperation in

Outer space. In the year 2019: It has been elevated to ministerial level dialogue.

In 2011: India & Japan entered into CEPA [Comprehensive Economic partnership agreement]. It also covers service sectors.

Note: It is to be noted that India-Japan Strategic partnership is not balanced. India-Japan Strategic partnership has become strong as far as Security Cooperation is concerned. However, the Economic pillar remains weak despite CEPA bilateral trade is below potential. It is in the range of \$16 billion USD whereas Japan-China trade is \$300 billion USD. Japan has a huge concern with India's Economic policies as China-Japan tensions are rising. Japan wants to shift its investments yet Indian Investment model is not very encouraging. There is a lack of infrastructure, skilled labour & too much of Red Tapeism. Hence, PM Modi has included two Japanese advisors in his Economic team & has promised that now whenever Japanese businessmen will come to India they will not find Red Tapeism. They will only find Red carpet.

In 2015: India-Japan released Vision 2025 → working together for peace & prosperity of Indo-Pacific Region, Resulting into the New Era in Indo-Japan Relations.

How is the current state?

Scholars described present relation as Cherry Blossom type.

3) Japanese Emperor & Empress visited India, A rare Gesture.

Despite Reservations Japan has entered in Civil-Nuclear Agreement with India. Without India signing NPZ.

Japan has ended self imposed moratorium (restrictions) from the sale of armaments. India-Japan are negotiating the sale of US-2 Amphibious Aircraft " (Increase Surveillance Capacity) Ishinomiyagi J. India & Japan are negotiating ACSA [Acquisition & Cross Servicing Agreement].

There is a convergence b/w Shinzo Abe's free open vision of Indo-Pacific & Modi's Act East.

In 2007: Shinzo Abe proposed the idea of QUAD. In

In 2017: India accepted the idea of QUAD.

Japan is the only country permitted by India for infrastructure development in India's sensitive North East & Andaman Nicobar.

→ Japan is contemplating its bigger role in BIMSTEC.

→ Japan supports India's role as Net-Security provider.

Japan, India are cooperating in ASIA-AFRICA growth corridor. Thus there is remarkable improvement in relation. Though there are concerns for India's engagement with China.

Traditionally India has avoided becoming camp follower & keeping its options open. However with the increasing assertiveness of China, India's options are getting limited.

India's recent strategic cooperation with Japan is strengthened India's Strategic Manoeuvrability.

Do you think Japan is India's Natural Ally?

If we go by the logic of Kautilya i.e. India's Ancient wisdom Japan is India's natural ally & there is a strong case for alliance in the present times of uncertainty.

At present even Japan can rely less on USA. Japan & India have complementarities in all spheres & no baggage. However, there is a reluctance in South block towards the idea of Alliance.

Views of C. Raja Mohan:

Article - "Case for alliance"

Or There is a strong case for India-Japan Alliance as they need to ensure against wide oscillations in USA's policies.

(1) As Chinese neighbours they have stakes in cooperative relations with China as well as to temper Chinese unilateralism.

Views of Japanese Experts:

The Relationship has gone beyond transformational stage & is all poised for alliance.

Views of Shinzo Abe.

Strong Japan is in India's Interest & Strong India is in Japan's Interest.

Rajesh Basra.

Article - "Why not an alliance & yes to strategic partnership"

→ Alliance is a cold war era concept

→ Does not fit in the age of complex interdependence

→ Strategic partnership gives flexibility.

16/10/2019 INDIA'S CONTRIBUTION TO NAM.

[Paper-2 see-B Chapter-2]

⇒ Relevance of Non alignment world in contemporary world?

⇒ Non Alignment aims & achievements

⇒ Indian contributions to NAM different phases & current Role.

India - USA

⇒ Do you agree of view that USA is willing to treat India as a partner rather than merely a camp follower? Give Reasons for your answer? [India's trying to balance but currently India's dependence on USA is increasing]

NAM:- is movement of 3rd world country

Non-Alignment is foreign policy of a country.

Non-Alignment as a foreign policy Choice

→ Discuss the relevance of Non-Alignment as foreign policy choice?

→ What is Non-Alignment 2.0?

→ QUAD (or) NAM which is a better option for India?

What is Non-Alignment?

It is a signature Idea of Indian foreign policy. It is an Identity of India's foreign policy. It is India's contribution to the theory of International politics. It is a brainchild of Pandit Nehru however accord to Pandit Nehru he is not the creator of the Idea.

Idea is the product of India's culture & tradition. Initially it was difficult for others to understand what is Non-Alignment. Scholars in the west compared Non-Alignment with

a) Isolationism (US foreign policy till the end of 1st war)

b) Neutrality.

- Even Pandit Nehru never gave the comprehensive Idea however he kept on defining Non-Alignment time to time.

(i) Non Alignment is not Isolationism (Stay away). It's not

staying away from world affairs. However it will be an active involvement in world affairs.

↳ India will take principled stand on world affairs.

What is principled stand.

It means Issue based & not based on prior commitments.

By Non-Alignment is not Neutrality.

Neutrality is a status during war where a Neutral country is obliged to give Equal treatment to both sides.

How world looked at Non-Alignment?

(i) Soviets were very critical - Stalin categorically held those who are not with us, are against us.

(ii) Americans considered India's Immorality, Opportunism & not Utopianism, Indian Exceptionalism.

For Ex: John Foster Dulles considered it as immoral.

India was trying to get best of the both worlds forgetting there is no free lunch.

How pandit Nehru described it?

The policy is in accordance to India's culture & tradition.

India will not join any of the military alliances. India will contribute for peace & harmony.

Whether, it was possible for India to go for Exceptionalism?

It was not possible for India to be Exceptional. If we go by Structural realism. Structure constrains the choices.

foreign policy makers do not have choice.

Whether India was genuinely Non-aligned?

Even when India believed that India is genuinely Non-aligned others did not take it in the way India wanted for Ex: Russians felt

Non-Alignment is against Russia. Even Americans believed that there was no genuineness. They believed Non-Alignment of India is tilted towards the communists block.

Ex: (i) India's stand at Korean crisis.

(ii) India's advocacy for permanent seat for PRC rather than (China)

Taiwan.

However Till 1965 USA tried to bring India under its influence.

However, India's tilt was greater towards Russia.

Once India entered into Quasi-Alliance with Russia in 1971, all the illusions about ~~Non~~ Non-Alignment became clear. Since then ~~USA~~ USA has been looking at Non-Alignment as Anti-Americanism. Hence USA has been Alergic to the idea of India asserting its Strategic Autonomy (or) Non-Aligned Status.

Dealing with India has been puzzlesome for USA bcoz India was neither ally nor adversary.

Whether there has ever been consensus in favour of Non-alignment within the country?

Consensus = agreement among group of people

Consensus on foreign policy is the strength of foreign policy. However there has never been consensus in country wrt the India's decision to remain Non-aligned. It is the Hegemony of the Congress & Intellectual bankruptcy of "South Block". [C. Raja Mohan]. That Non-Alignment Remained India's Identity in International politics.

After Non Alignment India's Strategic community has not been able to invent any other grand Idea to Replace Non-Alignment.

Even when there is no Adherence to Non-Alignment officially we are continuing with the Idea.

Initially Neither India's Right nor India's left favoured Non-Alignment. Hence it was the Idea of Congress. However, after Pandit Nehru within Congress also Non-Alignment has been more of a Rhetoric than the article of faith.

Rhetoric = a way of speaking by which others are influenced

Non Alignment after the End of cold war.

Non-Alignment as foreign policy choice came under big 'Challenge' when there was a single super power. In a situation of single super power nations have to go for Bandwaggoning

rather than balancing.

Rise of China, opening of Indian Economy created New Imperatives for greater alignment with the west in general & USA in particular.

It is to be noted that West Asia has been the theatre of International politics where India could implement Non-alignment most successfully. However, it was under Narasimha Rao that India gave full diplomatic Recognition to Israel.

Non-Alignment
↓
Pro Arab
Pro USSR

Vajpayee had no illusions w.r.t. Non-Alignment & No-hesitations in calling USA as India's Natural ally as well as Israel as the Natural ally after the end of cold war. Only left parties ^{have} been supporting India's Non-Alignment. Aced to them India should not lose its Strategic Autonomy vis-a-vis USA.

USA - USSR → in relation to

Only left in India at present favours India's Nonaligned status. India's closeness with Iran & China.

Though officially India has not given up the policy of Non-Alignment yet officials in south block prefer to use word Strategic Autonomy rather than Non-alignment.

What is the relevance of Non-Alignment in present time?

Non-Alignment is a cold war construct it may not be relevant in the present age of complex interdependence. Hence India's

Strategic Community has proposed the policy of Non-Alignment (2.0)

[Siddhant Varadraj, C. Raja Mohan, Sumit Khilnani]

Multiple Alignment suggests that India should continue to preserve its Strategic Autonomy. India can gain strategic Autonomy (2) Room to manoeuvre when India stays away from any sort of alignment. India should be present, both in the western platforms as well as China led platforms.

Hence when India is present at JAI (Japan America India) as well as RIL (Russia India China) it is seen as India asserting strategic autonomy. Those who support Multiple alignment believe that India is too big to be junior partner.

of USA. at the same time the gap b/w India & China is increasing & India is placed in a different geography. Hence it would not be wise if we provoke China.

What is the policy of present administration?

India is continuing with its traditional approach even when India has joined Quad. India does not want Quad to be a military platform at the same time India has given its vision of Indo-Pacific. India believes in the inclusive architecture on one hand India releases joint vision on Asia-Pacific with USA, shows convergence b/w Act East & Japan's free & open Indo-Pacific, on the other hand India goes for human spirit, Hamalla puram, Iochi & Vladivostok.

Non Alignment (or) Quad where India should be?

NON-ALIGNMENT MOVEMENT

What is NAM & How to describe NAM,

⇒ Accord to former PM Indira Gandhi NAM is the biggest peace movement in the world. from the very beginning NAM opposed military alliances, Power Block, Arms Race & stood for Disarmament.

⇒ NAM can also be described as the greatest movement for justice in International Sphere. NAM countries wanted New World order where all enjoy equality of status irrespective whether the country is rich or poor.

⇒ NAM can be called as the Example of South-South Cooperation. The largest platform of 3rd world countries outside General Assembly.

Relevance of NAM.

The Relevance of NAM can be analysed on the basis of agenda of NAM & achievement of NAM towards fulfilment of its Agenda. The Agenda of NAM has been Evolving.

1st phase & Agenda was Anti Imperialism, Anti colonialism.

We can say that NAM was successful in its Agenda
Agenda in 70's: Establishment of New International
Economic Order (NIEO)

Note: What is ~~not~~ NIEO

NIEO was proposed by India at Algiers Summit of NAM in
1973. Later on it became the main agenda of G77 + China
at UNCTAD (UN Conference on Trade & Development).

What was the context?

The continuation of colonialism even after formal independence
The countries of South were not able to overcome the mass poverty
It was suggested that the exploitation by MNC's of western
countries are responsible for the poverty [dependency school]
Hence the idea was to address the poverty of South.

How?

By improving the terms of trade b/w North & South. South has
been the supplier of Raw materials & North, the supplier of
Manufactured goods hence the drain of wealth was continuing.
Hence it was proposed

(i) Countries of North should give better prices for
the exports of South.

(ii) North should provide finance & technology.

(iii) Regulation over conduct of MNC's.

What was the achievement?

No achievement.

Why No achievement?

(i) Utopian idea — Based on the idea of Socialism.

(ii) Developing countries didn't have leverage on west except
for oil. Oil producing countries didn't provide leadership.
The success of NIEO was dependent on Solidarity.

Developed countries were able to break the solidarity
raising the geopolitical issues.

Agenda in 80's : Disarmament.

No achievement.

Agenda in 90's : NAM was in search of Agenda.

Why?

The Reason d'être (Reason for Existence) of NAM has gone.
NAM appeared Anachronistic (in context)

What NAM should have done?

Accd to C. Raju Mohan, NAM should have been disbanded. NAM should have opted for graceful exit. NAM should have claimed the credit for the end of cold war ~~rather than~~ claiming "Mission Accomplished".

Even the founding members of NAM like Egypt questioned the relevance of continuation in the 1st Summit of NAM after cold war at Jakarta in 1993. However India did not support the idea. India favoured the revival of NAM. Accd to Indian prime minister Narasimha Rao. It became all the more relevant to check the unilateral actions of single superpower. Accd to him it is wrong to think that the progress of NAM was ltd to opposition to block politics. NAM's birth during cold war was just a coincidence. NAM's purpose is to promote the interests of developing countries. Still there are lot of issues faced by developing countries which need to be addressed.

What is the current status of NAM?

→ *concurrent in time*

Accd to C. Raju Mohan NAM is in the state of coma. Accd to Harsh V. Pant the title of article "End of the Road for NAM".

The 55 year old NAM once a powerful block of Independent Nations is dying & nobody is sending flowers.

In 2012, Tehran Summit only 35 heads of the state out of 120 members attended.

In 2016, Venezuela Summit only 8 heads of the state attended out of 120. The most notable absence is Indian PM Modi.

Aditya Bhaskar
asthler

18th Oct 2019

Q) Whether NAM has become Irrelevant altogether.

Q) Do you think NAM has become Irrelevant for India?

Ans) NO

(i) NAM is a biggest platform of developing countries outside UN General Assembly. There are many issues where developing countries should cooperate & coordinate their positions. Hence NAM can be a useful platform.

Since India enjoys Natural leadership NAM is a very relevant programme for India.

(ii) India is looking for permanent seat in UNSC. The support of P-5 countries is critical. Hence India is investing too much with the developed countries ignoring developing countries.

UN is a platform to bulle US-Hegemony. NAM is a platform where India already has hegemony. Hence India should prioritise NAM. India's temptation to join the elite group is understandable, but India should not ignore its status as a developing country. India continues to have largest number of poor, as well as malnourished children.

Thus India have a lot in common with developing countries. Today NAM is like an Orphan. It needs leadership, direction, programme of Action. Today India is in much better position to provide leadership to NAM. NAM can be a useful platform under the leadership of India to provide for the dialogue b/w civilisations. If NAM as a movement is criticised as irrelevant b/c of lack of achievement, same logic should also be applied in case of UN. If NAM is seen Irrelevant b/c of the end of cold war same logic should be applied in case of NATO also.

Opinions on Non-Alignment & NAM.

(i) Aparna Pandey:

Unhook Chankya to Modi.

- (i) ~~the~~ Nehru aspired to play the leadership role
- (ii) India was weak militarily & economically.
- (iii) Non-Alignment allowed India to pursue its independence yet to be a part of international politics, maintain relations with super powers without coercion.

Scholar: K. Natwar Singh.

Non-Alignment of Pandit Nehru was a doctrine & never a dogma (orthodox belief). It gave India enough flexibility to maintain independence rather than becoming camp follower. It would not have been wise if we put all eggs in one basket.

Scholar: Paul Bowen

In domestic context Non-Alignment as a policy allowed Pandit-Nehru to handle diverse domestic approach. Rightist wanted relations with west & leftist wanted relations with communist block.

Scholar: Teresita Schaffer

Non-Alignment made good sense for India. It would have worked well if India's Neighbours had not joined external powers.

Scholar: Henry Kissinger

his book "The World Order"

Though Non-Alignment was pivoting for USA yet it was the best course of action which India could have followed at that point of time.

Article: Alliances & Strategic Autonomy

By C Raja Mohan. 15th Jan 2019.

In the Indian foreign policy debate would be less meta physical if it stops obsessions with Non-Alignment & Strategic autonomy & focus on more pragmatic assessment of India's Interest & the best means to secure them.

$$\frac{250}{10} = 25 \quad \text{--- (3)}$$
$$\frac{580}{10} = 58 \quad \text{--- (4)}$$
$$58 - 25 = 33 \quad \text{--- (5)}$$
$$33 + 1 = 34 \quad \text{--- (6)}$$

Relevance of NAM

TP Shanivasan

→ NEW NAM for NEW NORM → ARTICLE

(i) NAM did benefit India as it allowed India to promote its National Interest

(ii) It allowed India to manage the challenges of bipolarity

(iii) India has stakes in integrity of NAM.

(iv) India should seek partnership with developing countries to limit the power & influence of ^{big} great power like USA, China

T.V Paul

THE POWER OF NON ALIGNMENT → Article

(i) NAM never got the credit which it deserves

(ii) There is an intellectual biasness against NAM, despite its weaknesses NAM acted as a limited soft balancing mechanism

Some of the achievements of NAM are:

(i) delegitimising the threatening behaviour of super powers. (ii) NAM can be given partial credit towards ending colonialism.

(iii) It is bcoz of NAM. Nuclear weapons have become a sort of Taboo

(iv) NAM has used Naming & Shaming tool against great powers

(v) At present also there is a need of NAM

Why there is need of NAM

The Big powers have introduced New Arms Race.

There is a militarisation of Nations. There is a territorial Expansions.

There is a possibility of tensions spiral into Hot wars. Developing countries are going to be worst effected hence there

a need to revive bandung spirit.

Who will revive the spirit?

There is no hope from India & China.

Why?

They are in the race of Super power status. Hence, the responsibility is on smaller countries.

Last but not least Normative politics does have a relevance even when results do not come up in a short term.

NAM (or) IBSA which is a better Alternative?

IBSA (or) BRICS Where India should be?

IBSA (India, Brazil, South Africa)

What is IBSA?

It is Example of South-South Cooperation. It was first formed in 2003 as a dialogue forum & since 2006 summit meeting have started.

Whose ^{Idea} ~~state~~ is IBSA?

* A Strategic initiative ^{by} of India. It's a brainchild of the then minister of commerce "Yashwantrao Sinha."

Historical context:-

Dissatisfaction with developed countries w.r.t their attitude towards DOHA development talks, 2001 (CARTALK) main objective was to

What was the purpose?

The three leading countries of the three continents representing Global South, coming together to lead by example means will take initiative to help the countries of South.

to show the countries of North:- Hence these countries have formed IBSA fund, operated by UNDP.

IBSA fund has a contribution \$1 million USD by all the three countries each year (very small amount).

IBSA fund & World Bank

IBSA is a better alternative Why?

iii world bank funds comes with strings.

(ii) IBSA is a demand driven approach.

(iii) IBSA fund also involves civil society & utilisation of traditional knowledge.

→ IBSA fund was awarded Millennium Development Goals (MDGs) Award for the year ~~2000~~²⁰¹⁰ for their contribution.

→ IBSA has financed such projects which have been small in terms of investment but huge in terms of benefits.

for ex: Solid waste collection project.

→ Sports stadium.

→ Clinics for HIV AID.

→ Rice Research.

These are some objectives.

Why IBSA was a strategic initiative? What was the strategic goal in perspective of India?

To counter the increasing influence of China in the countries of South. It was an effort to Regain the lost leadership.

What is the current status?

Though strategic yet it is stagnating. IBSA has lost the track. Who is the culprit?

India: How?

IBSA Summits were successful & regularly conducted in the first cycle, However in the second cycle India was supposed to conduct the Summit in 2011. However since then India could not arrange for the Summit.

What India should do?

Revive it.

Why the platform has been languishing?

(i) It was initiative of NDA govt. Hence UPA govt didn't pay attention.

(ii) Even when NDA govt in Power priorities have shifted towards strengthening of partnership with western countries.

Should IBSA be New-NAM?

IBSA is a better initiative than NAM. Why?

(i) NAM has grown too big hence too difficult to arrive at consensus.

(ii) There is an ideological coherence in IBSA as all the three countries are democratic & pluralistic societies in compared to extremely heterogeneous NAM grouping.

However IBSA cannot be a substitute to NAM. It can complement NAM. IBSA is a Geo-economic. NAM is Geo-political initiative.

Response of China

China became concerned with IBSA. Hence China proposed

a) Inclusion of China in IBSA making it "CHIBSA". However India very smartly prevented China's entry.
How?

By asserting that it is a platform of democracies.

b) Once China was not invited. China aimed at making IBSA irrelevant.
How?

China included South Africa in BRICS in 2010.

↳ In terms of size of Economy, South Africa is no match yet it was brought to BRICS by China. Now all the three countries are in BRICS even BRICS is a platform for South-South cooperation. Hence for China there is no need to have separate platforms.

What India is doing for IBSA?

Trying to revive, Recently foreign ministers of the three countries met on the sidelines of BRICS Summit.

IBSA ORP

Q) BRICS (or) IBSA where India should be?

What is BRICS?

BRICS is an idea i.e. taking shape. The emergence of BRICS is a coincidence. It is a brain child of Goldman Sachs [An investment firm] economist. Jim O'NEIL. He used acronym BRIC. he predicted that by the year 2027 the combined GDP of these countries will surpass the GDP of G7 countries.

As a formal platform BRICS started in 2009 After Global financial crisis. The first Summit took place in Yekaterinberg (Russia).

Since long these countries were coordinating their positions over the need for the reform of the global financial architecture.

After the crisis they got an opportunity to come together to form a platform & to "Lecture" the west. In their first summit they blamed irresponsible approach of the west Lack of regulation which ultimately created Economic problem even those BRIC who were not responsible for crisis.

BRICS AGENDA have been evolving Its agenda includes

(i) Geo political Issues. → multipolar world, Reform of UNSC, WTO, IMF, CLIMATE CHANGE, Middle East peace process, Iran North Korean Crisis

(ii) South-South cooperation → their achievements include establishment of New Development Bank (NDB).

Contingency Reserve Arrangement. They are also contemplating trade in local currencies integration of capital markets, Launching BRICS Bonds.

(iii) One of the core areas of BRICS cooperation include Development partnership with countries of AFRICA & Latin America.

They have been putting pressure on the west

to Reform IMF.

How West looks at BRICS?

A platform challenging USA hegemony. Fareed Zakaria described BRICS as "declined west & the rise of Rest".

Why West is concerned?

Potential of BRICS: They Represent 20% of Global GDP

→ They Represent 40% of Global population

→ 17% in Global trade.

→ Largest reserve of 40% of Hard Currency.

→ They are military Industrial complex

→ They have skilled & Semi-skilled Manpower.

→ Vast Natural Resources.

How western Scholars described BRICS?

BRICS is a "Mottley Cow" (Spotted cow) representing lack of Synergy. It is not a harmonious group. According to them BRICS has no future.

(i) These countries have very limited Economic Interdependence.

Inter BRICS trade is just 6.5% of their total trade.

(ii) There is a huge Economic Interdependence over developed countries against whom this platform is.

(iii) In terms of political ideologies, the 3 countries are formal democracies, 2 countries are ~~formal~~ autocracies.

(iv) → very little people to people contact.

(v) Territorial conflicts.

(vi) Commercial conflicts.

What BRICS is doing?

Since it is a platform of China's Leadership, China is putting lot of efforts.

How important this platform is for China is evident from the fact that China tried to defuse the Doklam crisis so that India attends BRICS.

Under the leadership of China BRICS is building "BRICSy BRIC".

INDIA & BRICS:

India is an odd man out. up till now all the countries other than India have been tilted towards China. Now with the toughest president in power in Brazil, Brazil has also got tilted towards the west - some scholars even predict ~~BRICS~~ "BRAXIT" from the BRICS.

VIEWS OF C. Ravi Mohan:

BRICS may not be important for India yet it gives space to India to assert its strategic autonomy. India gains some bargaining power vis-a-vis USA. Though BRICS is a Mottley Cow yet India looks Cute in BRICS.

India - WTO.

Q1) Discuss the future of WTO?

Q2) Discuss North-South Debate in WTO?

Q3) Discuss India's Negotiating Stand & Strategies in WTO?

Q4) Discuss the recent concept paper proposed by India in WTO?

Q5) What are the reforms developing countries propose in IMF & World Bank.

Evolution of International Economic System

The International Economic System is known as liberal international economic order. The first person to propose Liberal International Economic order was Woodrow Wilson in his 14 points.

What is the basis to support the liberal international economic order?

It is proposed as a means to establish peace on the assumptions

that wars take place when countries follow protectionist or Merchantilist policies.

USA made attempts to establish International Economic Order after IInd World war. It called a conference at Bretton Woods & proposed 3 institutions.

(i) ITO International Trading orgn

(ii) IMF

(iii) World Bank.

Unfortunately ITO cannot come into existence in place of ITO emerged set of Treaties. Known as GATT

FROM GATT TO WTO:

It was in 1995 that USA was successful in establishing WTO. Since Bretton Woods there have been many rounds of talks. WTO is a result of Uruguay Round of talks. present WTO treaties are based on Dunkel Draft. It was finally agreed at Marrakech, Morocco in 1994. giving rise to WTO on 1st January 1995.

presently 164 countries are members of WTO.

What is the objective of WTO?

To Establish free & fair Trade.

Free & Fair means?

Not only Trade has to be free it has to be fair.

How WTO ensures above?

To make ^{the} Trade free. It provides for reducing the tariff & Non tariff barriers.

How it makes Trade fair?

(i) By incorporating the principle of Non-discrimination.

It adopts the principle of MFN states that the countries

(ii) National treatment. Treat the countries domestic fait.

(iii) By providing Special & differential treatments for developing countries. Some can be selected for developing countries & they will be given support for

Capacity building -

Why developing countries accepted WTO?

They have been made convinced that WTO is an institution which can offer them an opportunity for Elevation of poverty.

How Elevation of poverty?

WTO is based on the ideal of Trade rather than aid.

The global trade is based on Ricardo's theory of comparative advantage. Every country has comparative advantage & countries to do something in which they are advantaged.

by this they can create interdependence.

It develops international supply chains. It will be a win-win situation. Each country will make investment where it has advantage.

19th Oct 2019

What WTO offers to developing countries?

It offers opportunity for Economic growth. How?

By creating conditions of free & fair trade with WTO

countries can have access to largest possible market where they have comparative advantage. Bigger market means more economic activities. more activity means more employment.

It also means more National Income.

Major WTO Bodies?

(i) Highest level Body is Ministerial Conference -

The next ministerial conference will take place in 2020 at Nur Sultan in Kazakhstan.

(ii) General Council: Bureaucratic body to manage.

(iii) Council on Specific areas ^{Six} like Council on Trade

for Intellectual Property Rights etc.

(iv) Trade Policy Review Board: It is to ensure that the countries are observing Norms (or) Not.

(v) Dispute Settlement Body: The most important

Non Alignment - Reason

→ Adjacent Geographically to Communist block

→ India talks about peace & treat equally so it is isolation

But it can be said as India is pragmatic in foreign policy. Should Pragmatic.

body otherwise WTO will get reduced for the platform of discussions
It will ensure accountability & predictability.

WTO Agreements.

present WTO Agreements are based on Dunkel Draft.

WTO agreements are not static. These agreements are

Dynamic in Nature

↳ means New areas have to be included for ex: New areas at present hours E-commerce, fish subsidy, Environmental goods, information Technology.

⇒ We have not achieved free trade it have to be done in a gradual process.

Types of Agreements in WTO.

(i) Multilateral:

All countries should agree.

(ii) Plurilateral:

few WTO members can have their own agreements.

Note: India does not support the idea of plurilateral.

Voting System:

Each country has 1 vote & voting is by

Consensus. At present major Agreements are on following:

(i) Trade in goods - for this GATT ^{continues} ~~has~~

At present the negotiations are going under the format called as NAHA-11 (Non-Agricultural Market Access).

(Develop

In this sphere there is a major difference b/w developed & developing countries. Main parties in conflict are USA v/s China & India.

Developed countries are offensive they have already lowered their tariff now they want developing countries

To reduce their tariff.

Views of developing countries:

(i) They are defensive; for them customs duty are the most important source of Revenue to finance development.

(ii) Developing countries believe that developed countries still deny market access even when they have reduced the tariffs they impose. Non-tariff barriers. (Ex: Quota, Standard, Quality etc).

(iii) Agreement on Agriculture.

Most contested bcoz Agriculture is most protected, most sensitive & most politicised. developed countries are offensive & developing countries are defensive.

At present major conflict is b/w India & USA.

(iv) TRIPS - [Trade Related Intellectual property rights] In this case also developed countries are offensive & developing countries are defensive.

Acd to developed countries there is lack of proper protection to IPR Regime. The most contested issue is Pharmaceuticals, The main parties in conflict are.

USA & EU on one side & India on other side. Acd to developing countries.

(i) TRIPS Agreement prevent the transfer of technology.

(ii) TRIPS Agreement prevent the scope for countries to make transition towards Industrial Economies.

Hence Trade Imbalance continues.

(iii) TRIPS policies related to pharmaceuticals has made life saving drugs out of the reach of large population & has created the public Health Emergency.

MNCs of developed countries are continuing the theft of traditional knowledge, Geographical indicators.

To Address the concern of developing countries

developed countries had allowed production of generic drugs. However they don't permit export of generic drugs. However, India wants that restrictions on exports should be removed.

(iv) TRIMS (Trade Related Investment Measures)

developed countries are offensive, developing countries are defensive. There is a big difference in the investment model of developed & developing countries.

for ex: India does not favour FII (that create instability), India favours FDI. India puts many conditions for ex:

a) Use of local content. Ex: IF PDI is 51%, 30% should be goods made in India.

b) Employment of local labours.

c) India favours domestic ^{dispute} resolution over Arbitration by External bodies.

(v) GATS - (General Agreement on Trade in Services)

Like Agriculture service sector is also a sensitive issue under WTO bottom up approach is adopted

for service sector liberalisation [voluntary in nature]. Service sector negotiations are happening under four modes.

Mode I: It is meant for the service consumed abroad (customer case)

Ex: BPO sector; India is interested in Mode-I

hence India is offensive. However developed countries use it as a bargaining chip. There is major conflict.

b/w India & EU, EU does not give India, the status of data service country.

Mode II?

where service should be consumed abroad (in the country which is providing the service) Ex: Tourism.

developed countries are more interested in Mode II.

Mode III?

Operations abroad

It means service provider country establishes its commercial presence in consumer country Ex:- Banking, Insurance.

Developed countries have interest.

Mode 4: Movement of Natural persons.

India is offensive, developing countries are defensive. besides above there are disagreements over other areas like Sanitary & phyto-Sanitary measures.

[saying that there are some microorganisms or chemicals which may affect them]

→ issue of Geographical Indications.

→ Govt proposed policies.

How WTO has performed?

Around 95% of global Trade is done under WTO rules. However there is lack of satisfaction with the performance.

Why?

It has been felt that WTO agreements have not resulted into "Balanced outcomes".

What are balanced outcomes?

(i) It has benefited developed countries at the cost of developing countries [against the ^{Tokyo} ~~Marshall~~ Agreement]

(ii) It has not resulted into a balanced growth in the countries. It has increased

a) Regional Imbalance.

b) Sectoral Imbalance

[India had only service sector]

c) Social Imbalance - increasing inequalities.

Initially developing countries suffered the brunt of WTO policies. Gradually the working classes as well as the middle classes of developed countries also started feeling brunt (or heat).

How is the sentiment towards WTO?

Global sentiment at present is against Globalisation, Liberalisation, It is moving towards protectionism, unilateralism. At present future of WTO is uncertain. Since Uruguay Round of talks - 11 rounds of talks have happened without any achievement. It is believed WTO is doomed to be a failure.

Why WTO is doomed to be a failure?

In WTO office is in, Shakespeare's building. It is a coincidence that WTO Headquarters in Geneva is in the same building where League of Nations had its office.

(P) At present GeoEconomics has succumbed to the pressures of Geopolitics.

In context of Geopolitical rivalry b/w USA & China it is imperative for USA to ensure slowdown of Chinese Economy.
China was included in WTO in 2001.

on the assumption that China will observe the rules. However, China didn't observe the rules. Hence the soft balancing of China didn't work. Hence USA has to take stronger actions. China took the benefits of WTO but didn't reciprocate. Hence WTO is not relevant for USA. USA has threatened to come out of WTO.

Whether USA wants to come out of WTO?

No, it wants a better deal, WTO to be changed, to the advantage of USA rather than continue in present form which is advantageous to those who challenge USA Hegemony.

What is USA's proposal?

Only free trade but not fair — USA is not satisfied with WTO norms related to the special & differential treatment to developing countries. From USA's perspective

China & India don't deserve the status of developing countries. Under the present norms any country can designate itself as a developing country.

USA is playing the game of "Good cop & Bad cop." Trump acts as a bad cop. Trump threatens to come out of WTO.

On the other hand USA trade representative, Light Hizer plays good cop. — He assures that if developing countries put pressure on India & China, USA may not leave.

How important WTO is for developing countries?

WTO is a very important for developing countries especially smaller countries.

Why?

Independently they do not have any bargaining power.

Hence despite adverse consequences, WTO is the best bet for them.

Importance for India.

WTO is very important for India bcoz there are hardly very few countries with which India has FTA. ^(Free Trade Agreements) ASEAN is

The only trade block with which India have FTA.

India does not have given a FTA in SAARC. There is very limited advantages India has at bilateral level.

What is the attitude of USA?

Since the time of OBAMA, USA has started weakening WTO. [ASIA pivot policy]. OBAMA favoured FTA Regional FTA's with major trading partners. Transpacific Trade agreement proposed by Obama where.

1) Trans Pacific Partnership (TPP)

2) ~~PART~~ (TPIP) = Trans Atlantic Trade & Investment partnership.

Whether Regional Agreements are in sync with WTO?

As such Regional FTA go against the spirit of WTO.

WTO is based on

a) Multilateralism.

b) Inclusiveness.

Regional FTA are ⁽ⁱ⁾ protectionist blocks. - Benefits are only for the members.

(iv) Exclusive

only for the members

However WTO allows FTA if their Norms are in accordance to WTO.

On one hand Regional agreements weaken multilateralism.

But on the other hand they are seen as the building blocks.

What is the approach of Trump Administration?

Both Obama & Trump believed in "Take it or leave it" approach.

→ Trump does not even favour Regional FTA's. He believes in bilateral. Trump's approach is Trade deals in place of Trade Rules.

→ Raw politics vs decent method of dispute Resolution.

What is the present strategy?

At present USA is blocking the appointment of arbitrators at WTO dispute settlement body. Ideally it should have

7-members. Quorum is "3". presently it has "3" only.

In December 2019. Two will retire. Only one will remain.

What is India's position?

^{Note} → The dispute settlement mechanism of WTO is so costly that only few countries could afford using it. Ex- USA, China, India, EU, Japan, Canada, Australia.

None of the African countries has ever used the platform before they cannot afford it. Many African countries are even thinking to close their offices in Geneva.

What is India's position?

In July 2019, India has proposed an approach paper.

where it has focused on taking urgent steps to fulfill the vacancies. Why?

The entire WTO system carries NO meaning without dispute settlement body even when countries will not follow the norms. There is no punishment. There is no point negotiating the norms also.

Other developing countries neither have will nor capacity to resist USA.

Evolution of WTOs

In 1995 WTO came into existence as a result of Marrakesh Agreement.

In 1996 first Ministerial took place in Singapore giving rise to Singapore Issues.

What are the Singapore issues?

- (i) govt procurement.
- (ii) competition policy.
- (iii) Trade facilitation Agreement.
- (iv) TRIMS more liberalised invest.
- (v) labour & Environmental Standards. (favour of developed countries)

These issues were opposed by developing countries.

These issues are now called as Singapore Issues.

In Bali ministerial there has been a breakthrough in

TFA (Trade Facilitation Agreement).

Since then there have been different rounds without ^{any} outcomes.

1999 - Seattle Ministerial Meet.

WTO meeting could not take place bcoz of civil society protest.

2001 - Doha Ministerial Meet

Since Qatar is not a democratic country protests were prohibited so that WTO meeting takes place. Hence it was realised that WTO should go for addressing the imbalance. This has resulted into adoption of Doha development

AGENDA:

Doha Development Agenda?

It has been accepted that development rather than trade will be the priority in WTO negotiations. Developed countries accepted the demands of developing countries.

What are demands?

→ Balanced Rules.

→ Balanced Outcomes.

→ Addressing the Asymmetries.

→ Better protection under special & differential treatment.

Developing countries accepted the Singapore Issues as issues for Negotiations.

Why such cooperation b/w developed & developing countries?

In 2001 Al Qaeda attacked USA. around the world there was sentiment to show that international community is united against such threats to humanity.

What is the unique feature of Doha Agreement?

Concept of Single Undertaking.

Doha Agenda has to be adopted in the format of Single Undertaking.

Which means nothing is accepted until everything is accepted. Doha Agenda as well as Doha format is very important for developing countries like India. Hence India wants success of Doha rounds. Developed countries facing tough challenge from China, are not interested in Doha anymore. (Argentina)

First at Nairobi later Buenos Aires, developed countries proposed moving away from Doha format.

Go for Early harvesting. Developed countries also suggest more plurilateral Agreement rather than multi-lateral.

They want to end the consensus rule. Suggest decision by qualified majority. [Ottawa proposals]. Decisions by 55% Majority of WTO members. Subject to the

condition that they are countries representing the total 85% of share in world trade.

India's Approach paper.

In July 2019 India has presented an approach paper along with 8 other countries as suggestions for Reforms.

- | | |
|-------------------|---------------|
| (i) Bolivia | (v) Uganda |
| (ii) Cuba | (vi) Zimbabwe |
| (iii) Ecuador | (vii) Tunisia |
| (iv) South Africa | (viii) Malawi |

→ Strengthen Multilateralism, No to plurilateralism, Regional agreements & Bilateral deals.

→ Opposition to End Consensus System.

→ Assertion of fundamental principles of WTO → mutual respect, mutual trust, mutual benefit.

→ Assertion of the Right of developing countries w.r.t. to Special & differential treatment.

→ Address the implementation issues (addressing the asymmetries in WTO agreements & outcomes)

→ Urgent reforms of dispute settlement body.

→ Capacity building of developing countries.

→ permanent relation to the food security programmes of developing countries keeping in the mind the sustainable development goals & poverty alleviation.

→ Address the concern of developing countries while negotiating New agreements like fish subsidies, E-commerce.

→ No unilateral actions & coercive action.

20th Oct 2019

Importance of Agriculture for Developing countries of India in General

- Major Source of Employment
- Agriculture is also a way of life

Comparison b/w North & South:

In developed countries Agriculture form 3% of GDP & in South 30% of GDP. In India's PPS Share is 17%.

- In developed countries only 3 to 4% of population is dependent on Agriculture whereas in developing countries 70%.
- In North Agriculture is a commerce in South it's a way of life. (various festivals based on agriculture)
- In North per capita Holding is large in South per capita holding is small.
- In North most of the farmers are in farming for commercial gains. In South Subsistence farmers.
- In North climatic conditions are favourable. In South climatic conditions are not favourable.

What developed countries want?

They are offensive & want greater market access bcoz they have surplus production which they had to destroy.

They can export the food grains to the developing countries & make profits. So far Agriculture is the most protected Area Hence there is an immense potential. Developed countries are getting competition in manufacturing.

What developing countries want?

They are defensive bcoz once the market is open, gets flooded with the food products of developed countries it will harm the cause of domestic farmers for the developing countries. It's not just about food security. Agriculture is a multi-dimensional issue. Biggest source of Employment.

Comparison b/w India & China:

If India opens its agriculture. India cannot relocate its huge population to any other ^{occupation}. Whereas China has already shifted towards manufacturing. India is main party in conflict with USA.

Ownership leads to responsibility leads to better output. If lands are divided for on them there is absentee landlordism. → percentage land holding has decreased.

One of the major issue is India's food security programme. Agricultural Negotiations under WTO are conducted under 3 pillars.

- (1) Export Subsidies. [There has been an agreement over]
- (2) Elimination of Export Subsidies
- (3) Market Access [There is a deadlock b/c of lack of agreement b/w India & USA over]
 - (i) SSM (Special Safeguard Mechanism),
 - (ii) Special products.

[We allow the foreign companies to compete but leads to dumping of goods which will impact the domestic farmer then we can trigger ~~for~~ tariff for shorter time. When situation becomes normal we can reduce it back.

for US only Substantial amount it will trigger SSM but for India small amount can also trigger SSM]

SSM [Special Safeguard Mechanism]

There is lack of agreement over formulae when countries can impose Special Safeguard mechanism.

Triggering the tariff wall for the temporary period in case of flooding of market with imports. USA want it should be triggered when there is a substantial influx whereas India's threshold is too low.

Special products

Countries may be permitted to keep certain products as special products where they need not to reduce the tariff. They can be important for Rural development, Rural livelihood. Need to USA maximum 5% products whereas India.

wants as much products as possible.

Domestic Support:

most contentious, domestic support given to the farmers is categorised into three boxes.

(i) Green box = There is no limitation on amount of subsidy that can be given under green box. primarily given for Research & development.

(ii) Blue box = These subsidies actually reduce the production (given to reduce the production). There is no limit on blue box subsidy.
 like farming → animals

(iii) Amber box = These subsidies are Ltd why?

considered as trade distorting. Now?

They increase the production. (Ex = Subsidy on seeds, Agriculture).

both developed & developing countries give more subsidy.

But in developed countries more subsidy is given.

Acc to WTO developed countries cannot give Amber box subsidy more than ^{5% of their} total value of production.

[But 5% of their production is far more than 10% of our production]

per year. whereas developing countries under special & differential responsibility are allowed to give subsidies equivalent to 10% of total value of production.

[Maximum % total value is called de minimis - 5% developed countries, 10% for developing countries].

In effect the total subsidy given to farmers in developed countries many times more than developing countries.

On an avg in India farmers get the subsidy of \$306 per farmer/year. China - \$348 per farmer/year.

EU - \$12,384 per farmer/year. USA - \$68,910 per farmer/year.

Hence present WTO agreements are imbalanced.

WTO agreements on agriculture has adversely impacted

(i) agriculture of developing countries - Exposing the farmer to international competition without safety.

nets.

(includes Bali talks
subsidy is given
until 2013).

(i) Since WTO came into existence the No of farmers suicides has gone up the problem of hunger & malnutrition has gone up.

(ii) Slowdown in agriculture growth impacted the employment.
How WTO policies contributed to farmer suicides & hunger in developing countries?

WTO = opening up of market

Exposed farmers to fluctuation of global market.

Markets have consistently inflated cotton.

Now farmers shifted from ^{food grains} cotton to cotton. led to taking huge amount of loans. afterwards the prices became less & led to farmer distress.

food security Act

- domestic farmer
- import → developed say to member countries

Govt will procure & distribute towards PDS & developed countries will say that rice is corrupted & it have leakages so they will say to promote cash transfer to farmers.

PDS is enough for human's need.

this cash is used to buy those imports. By this they are promoting market forces.

Produce more crop.
- more

Permanent solution is only through land reform.

→ procuring grain from farmers means incentive should be increased by the govt if MSP → production increases → violates Agreement.

10% of total production is calculated based on (1986-88) if we change base year India will not be violating any norms. So developing countries face this problem.

→ when it was signed they haven't checked implications properly. (due to corruption or lack of knowledge) not able to understand complexities.

→ Now we have agreed the deals but the developed countries are not ready to change the deal.

→ India want to end the boxes & count total subsidies & India proposed that food security to be not under that WTO agreement.

Developing countries exposed their farmers to the fluctuation of international market. Developed countries managed to inflate the prices of cotton. farmers in developing countries shifted from food crops to cotton. Cotton is most sensitive

crops. farmers have taken loans.

→ developed countries artificially deflated the prices, there was slowdown in global demand. Thus farmers were not in a position to repay the loans. There was a scarcity of food crops under WTO Norms countries cannot release the food grains stored in Govt storages. WTO norms & politics created a crisis in rural India.

SC judged that to release but Man Mohan Singh said no as the amount should only be released govt above that if it gives of effects National treatment. It violates WTO commitments.

What is current status.

→ India wants permanent solution. Since India has brought FOOD SECURITY ACT, a sword is hanging on India. India can be a violator.

→ In Bali Ministerial Summit, it was decided to extend peace clause to India. It was decided that by Buenos Aires 2017 Meet A permanent solution will be brought.

In Nairobi Meet 2015 it was decided to extend peace clause permanently till final solution does not emerge.

→ India has proposed 3 options.

(i) Immunity to the food security programme.

(ii) Reverse the base price for 1986-88. Taking into account the inflation in the prices of food items.

(iii) End the boxes → convert total subsidy.

IMF

purpose → To provide short term liquidity to deal with BOP crisis.

→ Over a period of time the power of IMF has increased. It is now involved even in poverty reduction programmes.

→ IMF has established New facilities

(i) Stand by facility: It is to provide short term loans for BOP crisis.

(ii) Extended fund facility: Some countries can't overcome

them crisis without Structural Reforms.

(II) Supplementary Reserve facility: In case there is sudden flight of capital. poverty red.

(2) poverty Reduction & growth fund: for low income countries.

(3) European financial stabilisation facility: created after Eurozone crisis to help these countries.

IMF Reforms & India's point of View:

What reforms are needed?

IMF need more fund.

Why?

As Global trade is increasing more & more countries have to approach IMF more frequently. The existing funds are not enough. It is evident during Eurozone crisis.

How to increase the fund?

By providing more funds.

Who can provide funds?

Those who have.

Who has funds?

China & India (BRICS countries), Japan.

Why funds are not increased. Even when China & India have been willing?

USA will not permit.

Why?

In IMF voting rights depend on the contribution of the country.

If subscription amount increases vote share increases.

What is the present status?

No substantive decision can take place without 85% votes.

G-7 countries have vote share of more than 50%. USA alone has a vote share of 17 to 18%. It means nothing can happen

through IMF without consent of USA. Hence USA does not favour increasing the subscription even when other countries have funds & they are willing to pay. Thus USA policies are indirectly impacting IMF itself.

What is the role of IMF?

Establishing USA hegemony.

What is the link b/w USA Hegemony?

USA hegemony is based on the control of the world trade.

Through IMF developed countries not only control the world trade they can control the trade policies, Economic policies. for USA IMF is more important than WTO.

Whenever countries approach for Bailout developed countries impose conditionalities. for Ex: India was compelled to open its Economy when it approached to IMF for bailout. Similarly developed countries imposed many conditionalities like opening up of Economy to any country which wants to increase its subscription.

for the first time developed countries agreed for the reforming IMF in 2010 at G-20 Summit at Seoul after Global financial Crisis. It has been implemented in 2016. There is increase of 6% of quota towards emerging Economies. USA Share have declined slightly. from 17% to 16.7%. China's share increased from 3.8% to 6%. India's share also increased from 2.3% to 2.6%. At present China is developing its own financial architecture in form of AIIB, NDB (New development Bank), Intra BRICS Contingency Reserve Arrangement -

UN [UNITED NATIONS]

- Q) Critically evaluate the performance of United Nations?
- Q) Reform of UNSC? & Reform of UN?
- Q) India & UN?
- Q) ICJ - International Court of Justice?
- Q) UNHCR.

frontline paper

purpose of UN:

To save the ^{succeeding} generation from the scourge of war.

Philosophy behind UN: peace is not just absence of war. It should be seen in a broad sense for ex- cooperation, Mutual Benefits, development, Human Rights. Hence UN had three pillars.

Prim objective
peace
(But don't relate to war)

- ① Collective Security
- ② protection of Human Rights
- ③ Social & Economic development.

What is the theoretical foundation of UN?

Liberal Internationalism - establishment of liberal order.

What is the politics behind? → establishment of USA Hegemony?

the USA Hegemony.

principle organs of UN:

Principle of UN Charter:

→ UN charter is based on the principles of Westphalian

World Order.

(i) Sovereignty of the states

(ii) Non-Interference in the domestic Affairs.

[Article 2(3)]

Evaluate the performance of UN:

performance is to be measured on the criteria of

(i) Expectations.

(iii) fulfillment of mandates.

It is said that UN was created not to create Heaven on this Earth but to prevent this earth becoming Hell:

- Dag Hammarskjöld.

Though there is a huge dissatisfaction with the functioning of UN yet we all realise that life would have been worse without UN. UN's Record is not satisfactory in terms of fulfillment of its goals.

Who is responsible for the failure?

It is our collective failure of Humanity. (we all are culprits).

We should not forget the warnings by ^{he said} Truman. If UN failed then we are to be blamed. How much successful the organisation will be dependent on those who run the organisation. The failure of UN is betrayal of those who sacrifice their ^{lives} for whom we are alive & participating in the formation of this body.

What is the current status of UN?

Like all other multilateral platforms, UN is also in the ^{state} of stagnation. USA president has threatened that USA will come out of UN.

Do we need UN?

more than ever. Why?

There is an increase of global threats & no country & not even the single superpower can manage these threats alone. As per Aurobindo Ghosh Aggregation is the law of Nature. If we do not understand the message of Nature, Nature will destroy us.

What is to be done?

Reinvent UN. (Reform UN)

Why to Reform & What Reforms?

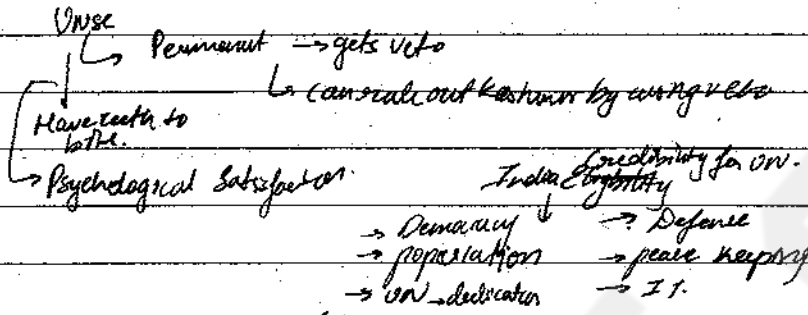

Reform is a natural process needed in any organisation so that it remains relevant. Every principle body of UN

needs reforms.

23 Oct 2019

NA

UNSC

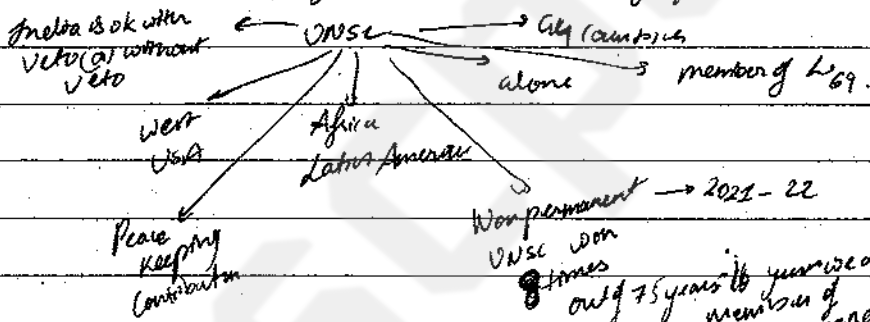

UNSC → had become priority Indian foreign policy
 ↳ Bcoz they want to divert the people.

Pro-west → so that we can get UNSC.

By UNSC it can connect with developed countries but not bothering about developing countries.

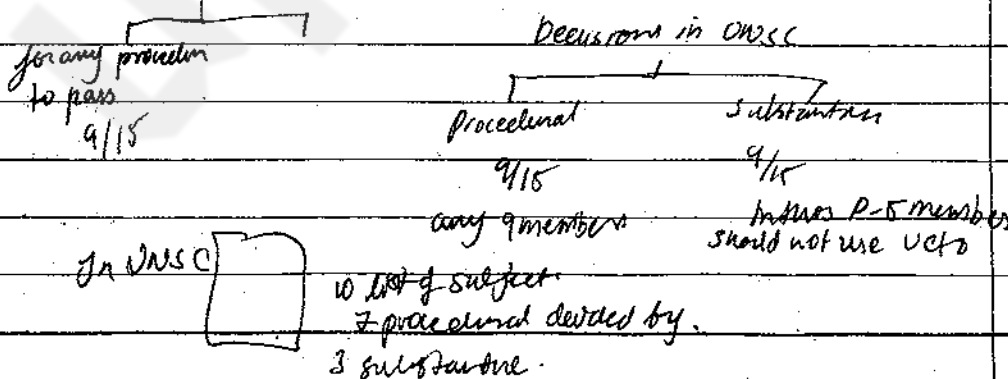

France ✓ America partially yes China → NO } voting for India for permanent
 Britain ✓ Russia

→ India was trying for UNSC since Nehru time.

Today's seat UNSC seat → mod. understood & oil & gas is important.

Decision in UNSC = (5/10)

seed to UNSC formula **KOFI ANNAN** seed of UN
UNSC $\Rightarrow 15 + 9 = 24$

Article by Jayant Prasad.

AT UNSC 2.0 Agenda very Important.

ICJ

Write short note on ICJ?

→ The only institution of League of Nations which has been continued in ~~the~~ UN. Earlier it used to be called as PCIJ (permanent court of International Justice). It consist of 15 judges elected jointly by UN General Assembly & by Security Council for the term of 9-years.

→ As per Article 93 of UN charter all UN members are automatically the members of ICJ. Only states can bring dispute to ICJ. Even those states which are not the members of UN can utilise the platform.

Chapter-6 of UN charter talks about the peaceful settlement of dispute & ICJ ^{has} a prominent agenda for the goal.

Jurisdiction of ICJ.

i) Advisory jurisdiction: It provides advisory jurisdiction to UN bodies like UN GA, UNSC.

Contentious jurisdiction: Dispute Resolution b/w the state parties.

Note: - International law is voluntary in nature. Since International politics consists of sovereign states. It is upto the states to decide which method of dispute resolution they want. It is their choice to go for war or to utilise

ICJ. Hence dispute can be brought in ICJ only with the consent of the parties in the dispute.

Within the contentious jurisdiction there are 3 options

(i) States can approach to ICJ for dispute resolution for a specific issue by mutual consent or understanding.

(ii) When parties have agreed on a particular treaty, which itself incorporate the provision to utilise the platform of ICJ. Ex: Both India & Pakistan have done.

Signatories to Vienna convention related to the rights of diplomats & other personals. Hence in Kulbhushan Jadhav case India could approach directly to ICJ without Pakistan consent. Note: So far the attitude of ICJ in Jadhav's case is favourable to India.

What arguments India had against Pakistan?

Accd to India Pakistan have violated Art-36 of Vienna Convention. How?

→ Pakistan has not informed about the arrest immediately. Delayed it by 3 weeks.

→ Pakistan has coerced Jadhav for confession without adequate legal representation.

→ Jadhav was not informed his rights under Vienna Convention.

→ Denial of 2-way Access. Neither Jadhav was allowed to access nor Indian consulate was allowed to access Jadhav.

→ India has also accused Pakistan of violating International Convention on civil & political rights under the convention person whose trial is going on criminal charges has 3 rights

(i) Effective defence

(ii) Fair trial

(iii) Defence through the legal practitioner by choice.

(iii) Compulsory Jurisdiction?

Compulsory Jurisdiction is actually a voluntary jurisdiction. Instead of taking consent on case to case basis, country can voluntarily submit itself to the compulsory jurisdiction of I.C.J. Hence any country can utilize the remedy.

It is upto the countries to define the scope of compulsory jurisdiction. Pakistan submitted for compulsory jurisdiction in 1960. India submitted itself to a compulsory jurisdiction in 1974. However India's submission mentions that it will not apply to India's dispute with any country which is member of Commonwealth & has been a member of Commonwealth.

As per Article 94 it is a duty of all UN members to comply with the decision. In case of non-compliance matter can be referred to ICJ which can take ^{punishment} punitive action.

REGIONALISM

purpose of Regional Organisation.

To transform the state of Relations among countries.

Traditionally security dilemma has been the *feature of Inter state relations.

Regional organisation are based on the vision of liberal.

International order. Hence Regional orgn promote trade leading to prosperity & peace.

Theories of Regionalism or Regional integration.

→ Functionalism

→ Sociological liberalism.

→ Social constructivism.

How regional organisation evolves?

(i) Countries can form Customs Union. means common foreign

trade policy. Hence, Regional trading orgn are called as Trade Blocks or protectionist block.

Among the members ~~idea~~ idea is to protect the trade hence, things move in following manner.

- PTA (Preferential Trade Agreement)
- FTA (Free trade Agreements in goods)
- FTA (" " " " Services)
- " " " " Investment

These all combined CÉPA (Comprehensive Economic Partnership Agt)

→ movement of people, goods, capital (Inter-state India).

It can evolve into monetary union

↓
Fiscal Union

↓
Economic Union

↓
Common social policy

↓
Common defence & Security policy

Types of Regional Orgn:

(i) Open Regionalism: Bottom up (all members will make Voluntary commitment) → they will say how much tariff they will offer.
Ex: APEC.

Open also means minimum Institutional Structure (Conference type).

(ii) Closed Regionalism: Top Down approach.

(iii) More institutionalisation. Ex - EU, ASEAN.

Two most successful examples are EU & ASEAN. EU is based on Supranationalism (going beyond nation). ASEAN goes for ASEAN way. ASEAN way is based on Panchsheel.

EU

EU

- Q) Future of EU & current challenges
- Q) Describe Brexit the underline causes & its impact on India

Structure

EU- Bodies

Evolution of EU

(i) Here evolution means Enlargement.

(Increasing the membership).

(ii) Deepening :-

More Enlargement More challenges for deepening.

More deepening means more problems for Enlargement.

Important treaties of EU

Main treaty is Treaty of Rome, 1957

(SEA) Single European Act, 1987 → Become common market.

Maastricht treaty 1993 → Monetary union.

Lisbon treaty, 2007. → Before it was ECU

India - EU

Lovelius Arranged Marriage.

Strength = ²⁸ ~~30~~ members.

Eurozone = 19 countries are under Eurozone → Single currency

→ EU is called as fortress

↳ difficult to understand.

↳ Vision of Victor Hugo (scholar)

↳ There should be end for wars, all arms

will fall.

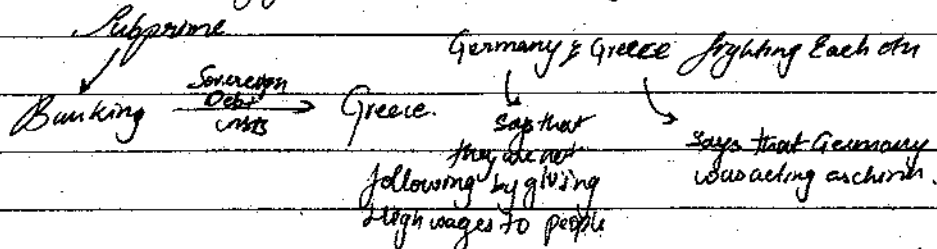

Hugo had planted a seed. Which has become a tree. ~~But~~ that

→ EU is known as Bicycle. It will not fall down until it keeps ongoing but it fall when it slows or stop.

22nd Oct 2019

Eurozone crisis started from USA by subprime lending. led to Banking crisis in EU. They gave loans to whom they can't return.

text-banced disarming means something which is written down is being discussed.

in order to maintain credibility other money countries should start lending.

BREXIT:

- (i) Lisbon treaty of 2007 gives provision for Exit from EU.
 - (ii) But there is no provision for Exit from Eurozone.
- Britain has been a Europhobic nation.

It joined EU in 1973. It had not accepted many of EU treaties. [opt out clause]. Britain has kept part of EU's customs union, European Economic community [movement of goods, capital, service, people]. Britain has not joined Eurozone. Britain has always been a trouble maker in EU. It joined EU for the benefits.

After global financial crisis as well as crisis in Syria. Britain realised that remaining in EU is more of a liability. Britain has close relations with USA. As a part of Trump's America first policy. Britain also favoured coming out of EU. According to British politicians Britain has not gained to the extent it has to pay to EU. Even in the terms of Membership dues. Hence Britain decided to Exit from EU. Since Exit of Britain is like a divorce, Britain cannot Exit as and when it thinks fit. Hence Britain & EU had to decide the terms of divorce. Hence Britain & EU had to negotiate a deal. The approach of EU has been to impose heavy penalties as a step to prevent other states.

What is the current status?

Uncertain: There is a lack of consensus amongst the political parties in Britain over the terms & conditions.

Tension Express
Explained today

on 23rd June 2016 - Referendum was conducted in UK.

52% of population favoured Exit, i.e. favoured remaining in EU. In terms of Regions Northern Ireland, Scotland &

Wales favoured in Remaining in EU. After the Referendum, Britain & EU decided 29th March 2019 to be a date when Britain will come out of EU.

What Britain wants?

Britain wants to negotiate its own trade deals with its prominent partners and to the terms & conditions favourable to it. So far there has been no consensus over the terms & conditions. There have been change in govt, political crisis, defections on the issue of Brexit. The former PM Theresa May could formulate a deal which was rejected by British parliament three.

features of Theresa May's proposal

(they want their own trade deals)

The Rights of British citizens & their dependance will remain intact, those who are working in EU countries. Similarly the Rights of EU citizens working in Britain to remain intact.

As a monetary compensation Britain was supposed to pay 39 Billion pounds £ to EU which was now reduced to 33 Billion pounds £. The most

The most complicated issue in the deal has been the status of Northern Ireland.

Britain has faced secessionist challenges in Ireland ultimately Ireland became independent & Northern Ireland ^{Remain} with Britain. Ireland is dominated by Catholics. Protestant church [Religion] is the official Church in Britain.

Within the Northern Ireland, there has been dominance of protestant.

However Catholics in Northern Ireland continued to protest. Northern Ireland integration with Britain. It has resulted into violent civil war for 30 years known as "Trouble" in Britain history.

In 1998, peace was estbd in the region as the result of "Good Friday Agreement mediated by USA".

As per Agreement Northern Ireland will continue to remain British territory but there will be open border b/w Northern Ireland & Ireland. (free movement of goods). Status of Northern Ireland is contested.

What is the problem?

When Britain will come out of EU. Unless they negotiate FTA with EU ends. Hence British goods entering EU & EU goods entering Britain will require checks at the customs, & 'Imposition of Tariffs'. for checks at the customs there is a need to build physical infrastructure, physical borders, check posts which will violate the Good Friday Agreement of open border.

people in Northern Ireland donot want hard borders.

(b) → Britain wants its own trade deals [Agreement on customs] with EU as well as other countries. Hence there will be a problem w/ Northern Ireland.

What was the formulae of Teresa May?

Soft Border b/w EU & Northern Ireland & Hard border in the Irish Sea. It means effectively keeping Northern Ireland in customs union of EU. Thus Northern Ireland as a territory of Britain. But under EU laws. This formulae has not been accepted by the extreme right & the populist parties.

Boris Johnson's formulae?

His formulae is similar to Theresa May. Except wrt to Northern Ireland. May's formulae called as Back Stop. Johnson wants pull stop. Thus Northern Ireland should be under customs union of Britain.

problem:

→ It will violate the "Good Friday Agreement". There is still no clear formulae. One formulae was not to put physical border but only Electronic Surveillance.

At present the formulae which he had proposed is Northern Ireland will be under custom laws of UK but under legal laws of EU.

Formulae:

Northern Ireland will be under customs laws of Britain.

Since any good from EU comes to Northern Ireland, there will be no tariff when these goods will go to Britain. There will be Tariffs. Similarly any goods from Northern

Ireland to Ireland there will be no tariff so far they are for personal consumption. If they are for commercial purpose there will be imposition of tariffs. On Regulation of goods. Northern Ireland will follow the rules of EU single market. It means no need for standards & safety checks at the Irish border. However when goods will go to rest of UK there will be safety & check when exchange is b/w UK & Ireland.

There will be EU value added tax on Northern Ireland but not on services.

British parliament was supposed to finalise the formulae by 19th Oct 2019. After which Britain was to exit on 31st Oct 2019. Boris Johnson & EU agreed on the formulae on 18th Oct 2019.

British parliament however stopped the implementation of

formulate by PM on his own until & unless he gets approval from British parliament. ^{Amendment} ~~Return~~ of Brexit deal.

Types of BREXIT

(i) SOFT BREXIT

(ii) Hard Brexit : Theresa May's vision has been called as Hard Brexit.

(iii) No deal Brexit / crash landing : Boris Johnson wants crash landing. It means exit without formulae as he believes that there cannot be agreement on formulae.

Present Situation:

parliament compelled Boris Johnson to seek further delay from EU. Hence he has sent two letters to EU.

^{1st Letter} (i) Asking for delay.

^{2nd Letter} (ii) Against delay - & that delay will harm both EU & Britain.

Impact of Brexit on Britain:

It depends on which type of Brexit. At present Soft is not an option. If there is a hard Brit still Britain will have time to make adjustments & protect its corporate groups.

In case of crash Exit no time for transformation. EU will impose harsh measures. However in short term BREXIT will affect Britain adversely.

(i) EU is the largest market of Britain.

(ii) Britain has been a financial centre bcoz of its

a) Location.

b) Infrastructure.

c) Law & order situation.

d) Bcoz Britain was in EU. Countries could establish their base in Britain & could take advantage of the open market of EU. in partnership with Britain.

e) English speaking country.

Hence, investment in Britain may get affected. It is said that pound may become weak. Britain may have to pay more for imports. As far as food items are concerned Britain is net importer from EU. There is a possibility of food inflation.

Job losses. The student community of both Britain & EU will be affected. [They may have to pay higher fees etc.]

Hence, the decision to come out of EU is guided more by Geopolitical & considerations of domestic politics rather than Economics.

Impact of BREXIT on India

Fixed Impact:

(i) GEO STRATEGIC: There is a possibility of India-Britain coming together. So long India was not inclined towards commonwealth. However Prime Minister Modi is giving too much importance on commonwealth.

(ii) There is a scope for improvement in trade relations especially in Agriculture sector. India can start ~~Importing~~ ^{Exporting} food grain to Britain.

Statistics: (i) EU is India's largest trading partner. representing 13% of global trade in goods.

(ii) UK is 17th out of 25 top trading partners of India merchandise trade.

(iii) The Bilateral trade for 2017-2018 b/w India & UK has been dollar 14.5 Billion + 7 Billion \$ USD trade in services.

(iv) India has favourable balance of trade with UK.

UK is 4th largest investor in India after Mauritius.

, Singapore & Japan.

(v) The Cumulative Equity Investment of Britain Since April 2000 is \$ 26 Billion USD [6% of India's FDI].

(vi) India is 4th largest investor UK.

Around 800 Indian companies with total consolidated revenue of 47.57 Billion pounds. Have created more than 1 lakh jobs in UK.

Indian companies are present in UK across the spectrum.

Hence when these sectors of British Economy will be impacted it will have impact on Indian companies also.

What India & Britain are doing?

(i) UK has identified India as a major partner. Both sides have committed to conclude FTA.

→ A joint working group has been established to go ahead.

→ Certain areas are identified as priority areas like advance manufacturing, Renewable Energy, ICT, food Dairy, fisheries.

→ Liberalisation of service sector.

→ Indian companies are ~~there~~ in London Stock Exchange. So there are chances of Masala Bond.

India - EU Relations

Strategic Partners

State of Strategic partnership?

Levelled Arranged marriage.

Why levelled?

EU is primarily a trade block. Hence the degree of love will depend on the amount of trade.

India & EU are negotiating FTA. Still it has not been finalised.

EU wants

- open dairy sector [But in India it is sensitive]
- wine & spirit
- pharmaceuticals
- International mechanism for dispute resolution.
- EU interested in FII, India interested in FDI
- EU is saying no in BPO sector.
- Trade to person to person Exchange.

What else has been the reason for loveless marriage?

→ EU's stand on Kashmir, Human rights violation, Climate Change. → India's closer relations with Russia.

What is a current situation?

EU is giving huge priority to India. They have brought India specific strategic paper in 2018.

Why EU is interested in India?

Uncertainty bcoz of trump.

→ USA is threatening, China is challenging, Russia is also threatening Hence India is a Natural Partner.

NAFTA

(North American free Trade Agreement)

Canada - USA - MEXICO.

Not a regional org
→ there is a common market but Northern NAFTA.

→ only FTA.

→ most advanced FTA (means Very High standard)

means w/ labour & Environment.

High std in IPR.

Why India should be concerned about NAFTA?

NAFTA is a template for any country entering into FTA with USA.

NAFTA is unique bcoz first agreement b/w developed & developing countries.

approach of Trump towards NAFTA =

He called it as worst Trade deal ever. Threatened to

Come out.

Why Trump was against?

Trump was against NAFTA not bcoz it harmed USA.

In fact NAFTA has provided Cheap labour, Cheap consumer
Terms & Generated Employment in Exports sector. There
are certain sectors which were impacted like Automobiles.
→ USA threatened NAFTA bcoz it indirectly benefitted

China.

What China was doing?

Chinese goods entering into USA market with the label of
Mexico. USA does not have FTA with China. It means
China was benefitting without USA receiving reciprocal
benefits.

What USA did?

Compelled these countries to change terms & conditions.

NAFTA is replaced by USMCA [USA, Mexico, Canada]

In this no country will have FTA with non market Economy.

Strengthened the rules of Origin. 75% of the product

should contain domestic material to get Zero tariff benefit

→ In automobile sector, Mexico will get benefit of
Zero tariff when 40-45% of the parts are imported
from USA.

→ Increase of labour wages

In automobile Mexico has to give \$16 per hour.

No Generic drugs, Extend the term of copy right
to years beyond the life of author. no

→ No Duties on Movies & E-books

→ No liability of internet companies for the content users
produce on websites.

→ 16 year Sunset clause [after 16 years this should be
revised]

23rd Oct 2019

APEC (ASIA-PACIFIC ECONOMIC COOPERATION)

is an example of open Regionalism. It can also be called as Soft Regionalism. EU is an example of closed Regionalism. In APEC there is larger role of priv sector in realising goal. APEC want Asia-Pacific to be FTArea.

→ APEC was only for free trade but had been increasing for Security cooperation.

→ Becoming member of APEC is important for India. bcz we don't know future of WTO.

→ APEC has expanded membership to Russia & Vietnam but stopping India by saying that India was not complete market Economy.

→ If we go for Ease of Doing Business, GST laws & Neighbourhood policies to show APEC that we are undergoing change.

ASEAN

Level of integration?

What are the challenges ASEAN facing?

India - ASEAN Relations.

Diff b/w EU & ASEAN? (most successful after EU)

ASEAN originated in 1967. (during the times of cold war).

ASEAN have been initially anti communist block. When ASEAN was formed India was also invited but preferred to stay away.

→ ASEAN made more progress after cold war.

→ ASEAN is a free trade Area. ASEAN & EU are both contributing for peace & cooperation. ASEAN had entered into treaty of AMITY Cooperation, ASEAN as free Nuclear free zone.

ASEAN declared Community in 2015. ASEAN decision taken by consensus whereas in EU decision is taken by Majority rule. ASEAN follows pancasila.

SOUTH-CHINA SEA DISPUTE :

Q) India's position on South China sea ?

India is not directly involved in south China sea dispute yet India have stakes in South China Sea dispute. South China Sea is 3.5 million sq. miles. It is expected to be rich in oil & gas. It is supposed to possess 11 billion barrels of oil & 290 trillion cubic ft of Natural gas. 10% of fisheries.

- 1/3rd of the Global trade passes through South China Sea.

- South China sea is becoming the region of dispute there are territorial dispute over the islands. China claims 9-line also known as Cow-tongue as its own territory. It is around 2000 km far from China's mainland.

At present South China sea is a International water body. If China's claims are accepted it will be China's territorial sea.

Hence China will have power to push other countries out of the Region. China wants South China Sea to be its lake. In order to strengthen its claims China is building islands. Not only its building island its developing Naval Bases with Airstrips. At present China is in conflict with VIETNAM, Philippines, Brunei, TAIWAN & MYANMAR.

The most conflictual islands are Spratley Island (b/w Vietnam), Paracel Island, Scarborough shoal group of Islands (Philippines).

China is also developing its maritime power. China has developed Anti-access & Anti-Denial capability. Even against USA.

Hence South China sea is becoming Geopolitical Hotspot. Aced to USA freedom of Navigation on High Seas is a core National Interest. South China sea is cause of tensions not only b/w China & its Neighbours but also b/w China, USA, USA allies.

like Japan, Australia, South Korea as well as for India.

What are India's interests in this region?

India's interests are not much focused on Geo-Economic means India is not that much interested in oil & gas of that region, India's interests are Strategic. It will strengthen China's assertiveness & China's so called "Historical Claims". China even claims Aksai Chin & Arunachal Pradesh as its territories?

Gradually South China Sea is taking Economic importance for India as India is increasing its Economic partnership with Japan & South Korea.

What is India's approach towards South China Sea?

(i) PM Modi in East Asia Summit in 2014 held that

— In the world of interdependence countries have no option but to follow International Norms, International Law. It even applies to Maritime Security. It is necessary for stability in South China Sea.

(ii) → In 2015 India had released ASIA-PACIFIC VISION

with USA president OBAMA. The vision document mentions about the South China Sea also. Vision document emphasise on India's role as a net security provider. It points towards Indo-USA cooperation in Maritime sphere.

Earlier^{also} in 2007 New Delhi has released its Naval doctrine accord to which India looks at South China Sea as an area of the Strategic Interest.

It reiterated the statement by Govt of India.

Emphasise on the freedom of Navigation, Inclusiveness & Observation of International Norms.

Approach:-

→ India's approach towards South China Sea has to be understood in a broad context in Emerging

Strategic Environment in Region. In order to protect its vital interest & to project itself as a key player. India has changed its look East policy into Act East policy. If the focus ~~was~~ ^{is} on look East on Economic Diplomacy, focus of Act East is maritime security. Act East has been expanded to cover Indo-Pacific. Under the Idea of Indo-Pacific. India is taking following steps like

(i) QUAD

(ii) Look East ^{extended} ~~through~~ to far East.

→ India wants to bring Russia as a partner in the region against the increasing assertiveness of China.

Hence India in Shangri-La Dialogue talked about inclusive architecture of Indo-Pacific. India wants Russia outreach to South China Sea ~~that is~~ why it wants connect b/w Chennai & Vladivostok.

Analysis of India Approach

→ India still doesn't appear very confident. In

→ India is reluctant to take strong stand against China.

→ India is not a party which is directly involved. A

As far as South China Sea is concerned. China operates from the position of strength.

→ In the Age of uncertainty India wants to preserve Asian spirit.

→ There is lack of clarity over QUAD. The other three countries talk about rule-based order in Indo-Pacific. but India is talking about connectivity in Indo-Pacific.

What is the status of South China Sea dispute?

China is changing its approach, China is trying to project its soft power. Initially China has took a strong position against the decision of permanent court of arbitration.

China has changed its tactics. China is using cheque-book diplomacy on the leader of Philippines. China has launched Maritime Silk route. China has promised to address the concerns related to Silk route.

At present even VIETNAM is looking for cooperation with China. China & ASEAN countries have agreed to resolve the dispute in a peaceful manner. They have agreed to create a code of conduct. The first draft of code of conduct has been released in 2018. Negotiations are going on the code of conduct. Hence there is a possibility that China & ASEAN countries reach to some tactical solution.

China has expressed reservations against freedom of Navigation Operations (FNOs) conducted in South China Sea by USA, Britain & France.

INDIA & FISEAN

→ launching pad for India.

GLOBAL CONCERN

Democracy

Pg No - 407

Before Exam look over these factors

- Democracy Index
- Rise of Authoritarianism, Fascism
- Democratic peace theory
- Democratic waves
- Gender Justice → Feminist theory of IR.
 - Feminisation of Security
 - Feminist movement like #MeToo.
- ~~Beijing~~ ^{Beijing} platform of Action.

} Reports

TERRORISM

Pg No - 268

What is terrorism?

It is old political strategy. The use of violence against civilians to frighten the govt & persuade them.

Terrorism is always adopted by the weaker party.

What are the strategies of terrorism?

→ Guerrilla warfare.

→ War of Attrition (means prolonged war).

Ex: Done by Pakistan to India.

History of terrorism:

→ Rule of Terrorist Estbd under Jacobins in France.

→ Communism has been associated with Revolutionary terrorism.

→ Terrorism after the End of Cold War

It is treated as the biggest security threat.

However it is a discourse. USA has securitised the issue.

Do you think there is a global terrorism?

NO, There are very few countries which are

targeted.

Global terrorism in a speech act means USA started talking about global terrorism to people thinking that there is global terrorism.

Changing Nature of Terrorism:

At present the nature of terrorism had changed from ideological to Religion. Hence it becomes difficult to fight.

→ from institutional to diffused.

→ There is a growth of foot loose terrorism

Who is responsible for Terrorism?

States are responsible. Terrorism cannot continue if state stop supporting. Terrorist organisations are proxies. In the age of nuclear weapons countries have to rely on proxy war.

How to deal with terrorism?

Its becoming difficult bcoz of post modern foot loose terrorism

Hence at present the war against terrorism should have

2-stage approach.

1st stage - war of position (win heart)

2nd stage - war of movement.

India is among the worst affected countries. India has

sponsored CCIT (comprehensive convention against

International Terrorism). It has not been passed

bcoz there is no consensus on the definition of a terrorist.

Indian Act East

Russia's E 48 L

→ containment of China

→ development of East

Human Rights

Refer Political Theory.

UNHRC & International Criminal Court.

Critically Examine the Relevance of UNHRC & what are the future prospects of UNHRC?

History of UNHRC (United Nation Human Rights Council).

It was created in 2006 it has replaced.

~~Universal Human Rights Commission~~. United Nation Commission on HR (UNCHR).

Why New body?

USA was critical of Human Rights.

Why?

Human Rights Commission was comprising of many such countries which are has poor record towards Human Rights like Libya, Saudi Arabia, N-Korea.

What's basic difference?

United Nations Economic & Social Council.

Human Rights Council was under ECOSOC & the members were elected by members of ECOSOC. Whereas UNHRC is elected by UN General Assembly.

→ Under Commission there was no review mechanism.

UNHRC estbd mechanism known as universal periodic review. If any offending member does not meet the standard there is an objective criteria to remove that member.

→ In UNGA There is a strength of 193 & the country requires absolute majority to get elected. Thus there is a wider acceptability.

Strength of the Council - 47 member

Each member is elected for 3 years with maximum

2 consecutive terms.

USA has left the body in 2018, Accd to USA, UNHRC is a mockery of Human Rights (has become)

why? It came back on same track with the countries with poor human rights record like Saudi Arabia, Pakistan, Philippines are on the board

Accd to USA council has not taken any steps on issues like

- (i) Russian occupation of Ukraine
- (ii) Human Rights Violation in Cuba.
- (iii) USA has huge concern over the approach of Council on Israel. In the past year of its existence, there have been 6 special sessions on Israel.

Israel is on the permanent agenda. It has become a platform for Israel Bashing. Recently Trump admin aims to improve relations with Israel especially after the deterioration of Relations during the Obama.

Attitude of India.

Even India is not comfortable with agenda of the council & with present composition. Recently India has clarified that it will not entertain any queries w.r to Kashmir. In the recent past UNHRC has brought a report on Human Rights violation in Kashmir under the patronage of Pakistan which India declares as motivated. It is speculated that India will be the next country to leave Human Rights Council.

ICC (Intl criminal court)

Uniqueness.

Significant development in criminal law under ICT only States can approach but under ICC, individuals can also approach. It is to be noted that ICC is not highest court of appeal in criminal cases. It does not supplement

the domestic institutions. Only when it appears there cannot be fair trial within the country it comes into picture.

History

- It replaces earlier Adhoc tribunals.
- countries didn't want another institution under UN
- It has been created under separate treaty known as Rome statute.

What is its performance?

- No prominent country is a member.
- It doesn't have resources.
- Its actions have been controversial why?

The majority of the cases are against African countries. Hence accused of racial biasness.

Area of operation

- (i) Genocide
- (ii) Crimes against Humanity.
- (iii) War Crimes.

How it operates?

- (i) On state parties consent is not needed. [Like ICJ]. It can initiate actions on its own. [Even Somalia].
- (ii) Though it doesn't come directly under UN, yet UNSC can refer the matter. Thus P-5 can utilise it without corresponding obligations.

India's attitude towards ICC?

- India haven't joined ICC why?
- India is a vibrant democracy with highly independent judiciary & robust institutions like NHRE, free press.
- India wanted it should include the Nuclear attack & terrorism as crimes against humanity.
- India is not comfortable with P-5 using the platform for promotion of their interest.
- Accd to India the treaty violates Vienna convention on the laws of

Treaties Acced to which no country can be compelled to accept the obligations which it has not acceded to.

The treaty gives no provisions to opt out means country can refuse such provisions to safeguard its interests in specific situations. It does not exclude internal conflicts [Kashmir, North East] from the definition of War crimes. Acced to India it had inappropriately wide competence.

ENVIRONMENT

→ Since 1970's Environment ^{has gained} is a prominence in international politics.

→ Environment as an issue is linked to development; Development is linked to trade.

What is the focus of politics of Environment?

Environment & Trade

Who are the parties in conflict?

NORTH vs SOUTH.

North focus on trade, South has priority for development.

What are the prominent principles of Environmental Negotiations?

The first major source is Stockholm conference 1972. This conference led to major principles.

(i) Environment is collective concern.

(ii) Though there is a common Responsibility yet we need to recognise the principles of Equity.

What is Equity?

Equality with fairness

→ Since there is a difference in the

Situation of North & South. Their responsibilities will be differentiated.

81 North will take Historical responsibilities -

but the much of environmental degradation is but

of developmental model pursued by north.

What is the priority of the south?

(i) South should also contribute but South lack capacity.

(ii) poverty is the biggest pollutant

Hence South has to make meaningful contribution its priority has to be development.

↳ It is a historical responsibility of North to help in the development of the south.

How to help?

By transfer of funds & Technology.

Note: India has been the leading country towards formulation of the principles.

Uptill 2010 Environmental Negotiations have been favourable to South.

What is the development since 2010?

Environmental Negotiations are moving in the direction of North. Now North [USA] dictates the agenda.

What is the historical context of the change?

2008: Global financial crisis to 2009: Rise of BRICS.

BRICS started giving lectures to North [USA]. G-7 countries started facing challenge from BRICS. Hence they started prioritising trade.

Position of USA?

BAD COP.

USA has adopted very strong position.

(i) It does not believe in historical responsibility. Talks about present responsibilities.

No effective climate action without bringing India & China under binding commitments.

(ii) As China has displaced G-7 countries in Manufacturing, USA insists that technology cannot be given as aid. It can only be given as trade.

(11) Western countries are not in a position to provide the finance.

However, it can help mobilisation of funds to private sector.

What was USA's proposal?

(1) First formulae: Similar commitments by India & China which are expected from USA too.

2nd formulae: If not possible USA should be treated at par with India & China.

What has been the outcome?

At Copenhagen Summit in 2010. All countries succumbed to USA's pressure.

What is the difference at present in comparison to past?

As per the Climate Change Negotiations are concerned K4070 PROTOCOL made that developed countries will take binding commitments. K4070 PROTOCOL was to expire on 2012.

COPENHAGEN SUMMIT 2010

purpose was to find successor agreement which emerged in Paris 2015.

Background of Copenhagen:

Report of IPCC, which highlighted the extreme dangers hence Summit took place at Copenhagen.

Copenhagen was supposed to be Copenhagen but it emerged to be BrokenHagen.

In Copenhagen the fundamental format changed. Now No binding commitments by any country. No Top Down Approach.

No proper. Whereas they will submit their nationally intended target. Thus the progress has been against Environment.

Despite all this USA under TRUMP Administration had decided to leave Paris Agreement also. USA will come out after 2020.

LOOK EAST POLICY & FICT EAST POLICY

Look East → Act East

Indo pacific

Look
far east

What is Look East Policy?

(i) One of the most successful initiative of India's Strategic Establishment

(ii) India's strategic initiative.

What was the strategic factor?

Containment of China.

Evolution of Look East

India's Engagement with the region has been since ancient time. represented by culture & commerce.

India is a civilizational state having significant cultural influence in the Region.

Look East in Modern times:

Though Pandit Nehru laid the foundation in the form of his initiatives like

(i) ASIAN Relations Conference: 1946

(ii) Bandung Conference 1954

yet in a formal sense it started under Narasimha

Rao 1993.

Focus:

In spatial terms on ASEAN with Singapore as gateway.

→ In terms of scope & nature, primarily Economic.

Reasons for Look East:

changing Strategic Environment

→ Loss of USSR

→ Rise of China

→ Beginning of India-US partnership

Economic factor:

Opening up of Indian Economy, the situation was hopeless in Neighbourhood hence India had to look towards Extended Neighbourhood in the East

↳ By that time it has become

a dynamic region

2nd phase of Look East:

Under Vijayee without losing the focus on ASEAN Economic partnership the scope has been expanded to include Japan, South Korea, Pacific Islands [Fiji]

Along with Economic the focus shifted towards Strategic. What are strategic?

→ Defence partnership

→ Naval Diplomacy (MILAN Exercises)

During Vijayee Look East policy developed Domestic dimension.

Malabar - USA

India

Japan

MILAN - 16 countries

How Domestic Dimension?

Look East through North-East, Now Myanmar became the gate way. There was emphasis on connectivity project.

prominent connectivity projects

→ India - Myanmar - Thailand Trilateral Highway

→ Kalodaan multimodal project
(Myanmar Kolkata - Silchar - Arunachal)

ACT EAST - 2014

Act East at Indian ASEAN summit in Myanmar

PM Modi has inaugurated ACT East

What is a difference?

There is more of a continuity than change.

Background of ACT East:

As the tensions b/w USA & China were increasing, & USA's capacity to balance China has declined, USA has been emphasising on India's role as net security provider.

The then US Secretary of State Hillary Clinton told India not to just look East but Act East.

The Act East can be distinguished from earlier phases in terms of Ambition, Scope & Assertiveness.

Ambition of India:

(GOAD)

To be treated as net security provider in the region.

Scope:

Scope has been widened.

(i) Now it becomes Indo-Pacific.

(ii) At present India has extended the policy to far East Region of Russia.

(iii) Under Modi govt India has renewed its Engagement with Mongolia.

(iv) Deepening of partnership with Japan & South Korea. Both became special & privileged partners.

(v) Strengthening Defence partnerships with countries like Vietnam (sale of smaller version of Brahmos).

(vi) DEVELOPMENT PARTNERSHIP with Cambodia, Laos, Vietnam.

The most defining feature of Act East is Maritime cooperation with USA. 2015 - Vision for Asia-Pacific.

2016 - LEMOA agreement.

2017 - QUAD.

Another feature of Act East is revival of Sub Regional initiatives like BIMSTEC, Mekong-Ganga.

Achievements:

Since beginning there have been significant gains of look East policy.

(i) Free trade Agreement in Services.

(ii) India in East Asia Summit, RCEP negotiations, ARF.

It is the only region where India pushes Beyond its weight.

Road Ahead

How is the present Environment?

present Environment is not conducive.

Why not Conducive?

(i) Tensions b/w USA & China.

(ii) China's assertiveness.

(iii) China's charm offensives.

↳ Now China is adopting the charming way.

to create divisions within ASEAN & b/w USA & ASEAN.

Three Act East focuses on culture, commerce & connectivity.

China's OBOR is a very big challenge for India.

What India should do?

fulfill all the promises.

What are the promises?

(i) Delhi Declaration of 2018.

(ii) Completion of projects in time.

(iii) Resume the Repair of 69 Bridges along Trilateral Highway.

(iv) Conclusion of Motor Vehicle Agreement.

(v) Resume the ^{work of} project development funds.

(vi) Continue High impact projects [Inter university Exchange].

Realisation of vision 2020 for North East.

BIMSTEC master plan for connectivity.

Regional Value Chains of ASEAN MCME's.

Address Inauguration.

INDIA & LATIN AMERICA

Lab frontier of Indian foreign policy.

LATIN AMERICA has been out of sight & hence out of mind.

OCTAVIO PAZ The Mexican Nobel laureate wrote right when he held that India did not ~~interpose~~ enter me through my mind but through my sense.

It is believed that biggest obstacle has been geographical. However the real obstacle is not geographical rather psychological. Even Latin America is at the distance from China. However, China is quite established in Latin America.

If India Latin America (LAC) & Caribbean bilateral trade for 2017-2018 have been \$30 billion USD. China trade has been around \$308 billion USD.

Importance of Latin America for India.

There is a huge potential for cooperation.

(i) possibility of Resource Extraction: - Latin America is rich in oil & gas, minerals.

(ii) It can play role in India's food security bcoz they have surplus of agricultural lands.

(iii) India's Nutritional Security → Import of pulses, huge scope of cooperation in IT, pharmaceuticals, Banking, film industry, Aerospace, defence.

Importance of India for Latin America.

In 2020 a report published by Inter-American Development Bank mentions India as Latin America's Next big thing. [1st is China]. There is a huge scope for Energy exports to India.

In 2012 CELAC held its first outreach summit in New Delhi.

History of the Relations?

India-Latin America never had close relations primarily bcoz of distance. However, the countries of the Region interacted with India at the platform of NAM.

After the End of Cold war there has been positive Environment for Comprehensive Cooperation.

→ LA has been a divided region, but the end of cold war resulted into integration

→ Democracy started getting institutionalized.

→ Latin American countries started registering the decent rate of growth of 5% per annum. Indian Economy also got liberalised.

How is the progress:

Still Latin American have not been given priority which it deserves.

In comparison to Latin America Modi govt has given greater priority to Africa. PM Modi had made only 3 visits to the region.

1) To visit the BRICS Summit in BRAZIL

2) G-20 Summit in ARGENTINA.

3) The only bilateral visit he made to MEXICO.

As far as Latin America is concerned India has very limited diplomatic presence. India does not have its Embassies & Consulates in all the countries.

India has been turning focus LAC programme but the achievements have been very limited.

What India should do?

→ Reduce tariffs. Tariffs are as high as 69%.

→ Enter into PTA (Preferential Trading Agreements) &

FTA with countries & Regional Blocks like MERCOSUR.

→ Engage the diaspora in big way. (Suriname, Trinidad, Guyana)

→ Give incentives to shipping companies.

→ Develop connectivity.

Countries of Latin America on N.E

Scholars :- R. Vishwanathan

Deepika Bhatnagar

28th Oct 2019

INDIA & PAKISTAN

What is the state of India-Pakistan Relations?

we do not have normal relations.

What are normal relations b/w countries?

- (i) Respect each others sovereignty & territorial integrity.
- (ii) Regular diplomatic communications.
- (iii) Resolve the dispute in accordance to ^{norms} of international law.
- (iv) movement of goods, people, cricket, trade & commerce.

How India looks at Pakistan?

Brother Enemy. — India's biggest security threat.

Why biggest security threat?

Pakistan poses weapons of mass destruction, Pakistan present itself as isomational actor [Rogue State]

there is a huge possibility of the failure of Nuclear deterrence b/w India & Pakistan. Accd to the American officials & Analysts South Asia is the most dangerous place in the world.

It means a potential nuclear flash point.

Pakistan is a biggest security threat bcz it has capacity to challenge the idea of India.

How scholars describe India-Pakistan Rivalry?

^{scholar} — Deep Hiro: In his book "The longest August" —
Nehru's Int. the partition of sub-continent continues to impact the people on the sub-continent. Like Banquo's

Ghost

Stephen P Cohen: In his book "Shooting for century" calls India-Pakistan conflict as paired majority-minority conflict [It means its too complicated one majority here & one majority there].

Pair of majority-minority conflict can be compared with only few conflicts they are

- Arab - Jew conflict
- Tamil - Sinhala conflict
- Shia - Sunni conflict

Stephen P Cohen is ^{so} pessimistic that he believes that there is no future prospects of normalisation atleast for next.

20-25 years. Accd to him India-Pakistan have reached to a situation of "Mutually hurting stalemate". The situation is such that one party cannot lose & the other party cannot win. There is a strategic balance b/w India & Pakistan. Pakistan has acquired strategic balance by

a) Initially entering into alliance with USA & now its all weather friendship with China.

b) Pakistan has developed Nuclear capabilities. Pakistan has developed Nuclear deterrence against India. Whereas India has not achieved deterrence against Pakistan.

How Pakistan have achieved deterrence?

(i) If India's Nuclear weapons are for political purpose, Pakistan's nuclear weapons are for military purposes.

(ii) Pakistan's Threshold of using nuclear weapon is very low.

(iii) Pakistan has full spectrum Nuclear deterrence

(Tactical weapons, strategic weapons etc.)

(iv) Pakistan has a strategic culture. (India has strategic confusion), Pakistan has a huge capacity to take risk. Pakistan Nationalism is also stronger than India.

India without External mediation India cannot manage Pakistan.

Do we have a policy for Pakistan?

It is a paradox that Pakistan is seen as the biggest security threat to India. It is also a paradox that every prime minister in India has taken personal initiative to deal with Pakistan; yet so far India lacks any sound policy towards Pakistan.

Overview of India-Pakistan's policy

Pandit Nehru - Pandit Nehru never considered Pakistan as a challenge. He believed that Pakistan is so much dependent on India that Pakistan has no option but come back to India. This is reflected in Indus-water Agreement entered by Pandit Nehru with Pakistan.

→ Unique Agreement in the world where upper riparian state has less share + lower riparian not only have a bigger share but also have veto also.

Shastri? His time was too short to discern any

trend - However we can give him credit of having

decisive victory over Pakistan in 1965 war. However, it is lack of strategic culture ~~so~~ that despite military victory, India lacked any diplomatic gains.

Indira Gandhi: She took more realist & offensive approach ~~was~~

She was successful in partitioning Pakistan. India achieved extraordinary victory over Pakistan. However, despite military victory there have been ~~no gains~~.

The outcome of the war was Shimla Agreement.

In Shimla Agreement there is nothing substantial other than that Kashmir issue will be resolved bilaterally. It was the last occasion that India could have compelled Pakistan to take its forces out of POK. India held more than 90,000 of Pakistan's soldiers in captivity.

1971 war has negative consequences. Pakistan started low intensity warfare. It has given rise to the feeling of revenge.

Rajeev Gandhi: Not much difference than policy of Indira Gandhi

I.K. Gujral: Gujral has been successful in creating the conducive environment in South Asia by this time India had become vulnerable to terrorist attacks. Hence Gujral proposed Gujral Doctrine which was based on Non-Reciprocity.

Though Explicitly Gujral doctrine has not included Pakistan yet it resulted into improvement of relations with all neighbours including Pakistan. Ex: Mahakali Treaty with Nepal, Ganga water sharing agreement with Bangladesh.

Also liberalisation ^{with} Pakistan ^{for} parents & students.

Analysis:

India always benefited whenever it used more lenient approach than offensive approach. It ^{will} not be an exaggeration to say that India considers itself as a

Success of British Raj: India continued with the approach of colonial approach with its next door Neighbours.

Vajpayee = even Vajpayee's approach is inconsistent on one hand he held that we can change our friends but we cannot change our Neighbours on the other hand Vajpayee's decision to acquire Nuclear weapon Deteriorated Security Scenario in the region.

India has one of the worst times which includes Kargil. However Vajpayee's approach for resolution of Kashmir has been appreciated. He talked about the resolution within the framework of ^(Humanity) Insanlyat, ^(Democracy) Thamooniyat & Kashmuriyat.

Significance: Uptill now Govt has maintained the position that the solution of Kashmir can be got only within the framework of the constitution. However, Separatists in Kashmir believed that no solution is possible within the framework. Hence when Vajpayee talked about the framework of Insanlyat & not about the framework of constitution. It had great appeal in the valley.

Man Mohan Singh: The biggest qualitative improvement in the relations happened during the time of Man Mohan Singh. It was believed that Man Mohan Singh & Musharraf could arrive at formula for a resolution of Kashmir.

- (i) Make LOC as soft border [It was implemented by allowing cross LOC trade & travel]
- (ii) demilitarisation of Civilian spaces [It was also implemented] as army was shifted towards the border & in place of army paramilitary forces were deployed.

(iii) joint Administration of the territory.

It is said that Man Mohan Singh was very close to the resolution of Siachen Issue & Sir Creek.

Man Mohan Doctrine was based on Economic Diplomacy. His govt was successful in getting MFN Status / Non Discriminatory Market access for India.

What has been the Impact?

(i) Musharraf was thrown out of Country & power.

(ii) India had to face Mumbai Terror attack.

What does it Indicate?

There are certain lobbies both in India & Pakistan besides external powers who do not want the resolution of the conflict. Such lobbies exist both side of the border. For Ex. in Pakistan the army of Pakistan, on India's side separatist forces in Kashmir.

The main opposition party at that time i.e. BJP has created so much pressure, no dialogue with terror that the entire process reach to a dead lock. The opposition party both within the parliament & outside hijacked the peace process.

Who benefitted?

(i) Those who didn't want peace, the Zia's Elements in Pakistan.

(ii) army in Pakistan.

Approach of PM Modi:

There is lack of consistency in Modi's approach towards Pakistan. Modi had been extremely critical of the way Man Mohan Singh handled the Mumbai Terror attack. In 2011 in an interview he took a very strong stand to teach Pakistan a lesson in language they understand. Throughout Election his stand was offensive against Pakistan. However it took a U-turn when he called all SAARC Leaders.

including Nawaz Sharif. After the swearing in ceremony it was decided to start foreign secretary level talks which was also called off immediately. Again in 2014 Modi met Sharif at SAARC summit in Kathmandu. In 2015 after SCO Summit, India had to suffer with Gurdaspur attack. Even after Gurdaspur attack the National Security advisors met in Bangkok 2015. PM Modi visited the house of Nawaz Sharif for Birthday & Marriage. It was followed by Pathankot attack talks were suspended. It was followed by Uri Attack in 2016.

Analysis:

BTP policy has been no talks with terror but India continued to talk with terror.

policy since 2016:

After Uri Attack the approach again shifted towards no talks with terrorism.

What are the salient features of Modi's policy towards Pakistan?

Since 2016 the policy is isolate Pakistan, Blame & Shame. No talks with terror.

Whether PM Modi's policy towards Pakistan has worked in India's favour?

Difficult question,

Why difficult question?

The success of policy is measured in terms of goals.

Acced to Sushil Kumar — Anger is not a policy.

What is the theme of Modi's policy?

Punish Pakistan for wrong deeds.

What should be objective of India's policy towards Pakistan?

The minimalist goal is to prevent terrorist attack.

Maximalist goals Peace & Prosperity.

What is the focus of present policy?

Single Agenda - Counter Terrorism

Whether India is successful?

Neither now nor Never.

Why?

Acced to Ashley Tello's ^{article}, "Pakistan will not change"

Why Pakistan will not change?

Acced to Ashwini Chandra cannot eliminate terrorism. Encouraging from Pakistan. However India can increase its resilience to protect itself from terrorist attacks.

Low intensity warfare under the cover of Nuclear weapons & the safest, ^{least risky} most effective option which army of Pakistan has. Why the least amount of Risk?

Pakistan cannot take the risk of conventional war after loosing 4 wars. Nuclear weapons are not to be used.

The only options left is proxy war. Hence the best strategy for Pakistan army is - to give India 1000 cuts keep needling India - continue the war of attrition.

Why most Effective?

Most conducive to achieve Pakistan's long term goal.

What is the ultimate goal of Pakistan?

India - Pakistan Rivalry is not about territory or Resources. It's about Identity. No bigger insecurity of Pakistan is the existence of India as a secular country. It challenges the idea of creation of Pakistan. The insecurity becomes more acute after creation of Bangladesh.

Acced to Jais's Terrorism Pakistan can give 1000 cuts yet Pakistan cannot win so long the spirit of India survives.

What is the dream of Pakistan?

Making India - Hindu Pakistan. 1

How Pakistan will be benefited if India becomes Hindu - Pakistan?

Completion of unfinished agenda - There will no basis for India to retain Kashmir. What is the use of Terrorism?

The use of Terrorism in the valley has already changed. It has gone out of the hands of those who wanted to emphasise Kashmiriyan (JKLF). It is now in the hands of those who have the ideology of Islamic fundamentalism (Jalsh-e-Mohammed) hence the conflict will take Hindu-Muslim turn. It will spread to the rest part of the country.

^{70% Pakistan} How to counter terrorism from Pakistan?

The greatest objective of Indian foreign policy towards Pakistan is to counter terrorism. India should be realistic that it cannot eliminate terror because that is the best policy option by Pakistan.

What has been India's policy so far? (uptill - 26/11 Attack 2008)

India's policy has been the policy of strategic restraint.

Not getting provoked to the Pakistan's provocations.

→ Not Assimilating the things.

However it has resulted into criticism of India as a soft state.

India's strategy changed in 2016. India left the strategic restraint went for "Measured response".

- (i) The Surgical strikes
- (ii) Balakot strikes

measured response targetting safe heavens described as non-military pre-emptive strikes (offensive defence)

What is the way for the future?

Govt has raised the expectations of the people. Now govt will have to do something bigger. The Report of Balakot may not be enough unless Pakistan conducts another terrorist attack on the scale of Mumbai terror attack.

Neither this govt nor any other govt in future cannot back track. India has escalated the situation.

A

Analysis of Escalation

→ It is wise action bcoz now India has thrown the ball in the court of Pakistan. Now, Pakistan has to respond. What does it implicate?

Change in India's Strategic Culture: The confidence of India is increasing. India's ability to take risk is increasing. At least India has exposed the Nuclear Bluff. It will have the long term impact. It dilutes the image of Pakistan. It

Strengthen India's Stature: we can see the change in the approach of GCC countries including UAE & Saudi Arabia.

→ India should have played this nuclear game much earlier.

What is the Road Ahead?

Any Indian govt has no other option but to escalate. It is perhaps the best time for India to escalate.

(i) Pakistan's Economic condition is vulnerable.

(ii) Since the rise of ISIS, GCC countries, specially Saudi Arabia, UAE have started taking terrorism as a serious threat.

There is a competition going on in Islamic world to be recognised as the leader of the muslim world.

(i) Iran has already estd itself as a regional power.

The competition is b/w Saudi Arabia & Turkey. Turkey is closely aligned with Pakistan [Turkey has been the major source of finance & arms to ISIS]. However India must take multi pronged approach. India must remember "One swallow doesn't make the summer".

As per Ashley Tellis India needs to develop greater Resilience against the terrorist attacks & the first & foremost thing is to plug the loopholes in India's Internal Security.

Turkey & Saudi Arabia
China's recent
stand on Turkey
(regarding Syria)

Views of Shashi Tharoor — book "Pax Indica"

(i) India has a ltd capacity to deal with Pakistan at a bilateral level.

(ii) It means India will have to go for "Back-channel Diplomacy".

What is Back channel diplomacy?

That means working with those countries which have some leverage over Pakistan.

(i) USA (ii) Saudi Arabia (iii) UAE.

(iv) India should utilise its increasing profile at international platforms like IMF, UN, SCO. India can put pressure on IMF to put conditionalities on Pakistan.

(v) India should expedite the conclusion of C-17 Comprehensive convention against International Terrorism.

India should increase the stakes of international community in Indian Economy to deter Pakistan.

Sumit Ganguly — The deadly Impasse.

India should keep on making its deterrence credible.

- maintain the adequate number of forces in Kashmir.
- Strengthen counter insurgency efforts.
- address the grievances of the people in Kashmir.
- Check the radicalisation of Muslim youth in the country.

Doval Doctrine Towards Pakistan

It means offensive defence.

Even before Doval doctrine India has adopted the policy of offensive defence in case of major terrorist attack.

It was called as Cold Start doctrine. In case of any terrorist attack there will be a swift response. Indian forces will occupy sizeable territory in POK (51

otherwise to put pressure on Pakistan. However cold start remain cold against India's cold start Pakistan has developed Denial Strategies → the use of tactical weapons.

As far as the New approach the idea is to talk to the Pakistan in the language they understand.
↳ terrorism.

Language means promoting terrorism.

a) Baluchistan.

b) In Afghanistan.

Acc to Kant Rajpurohit Modi's Pakistan policy as well as Kashmir policy has evolved to deal end.

Overview of India's Pakistan policy:

To Evaluate India's policy towards Pakistan & to decide what should be India's foreign policy we have to answer certain questions.

1) What are the components of good policy?

First component
First of all clarity of goals.

What should be the goal of India's policy towards Pakistan?

There can be two goals

(1) WAR (2) Peace, whichever goal we decide

It will have the cost of peace will come at the cost → land for peace.
Short land is Kashmir.

(b) Cost of war → Nuclear war → Nuclear war means mutually assured destruction.

War cannot be a rational choice hence willingly (or) unwillingly we have to opt for peace.

Methods of peace: There are two methods

(i) Either, peace by strength (dictated peace). However

at present since Pakistan has strategic balance this not an option

(i) By Constructive dialogue: Today or tomorrow we have to start the dialogue.

1st component is clear goal.

Second component of good policy

Once the goal is decided there has to be a plan of action. periodic review whether the plan of action is leading to desired end or not. Hence, if India decides to talk, India should continue to talk. When India will talk there is bound to be a terrorist ~~talk~~ attack. Hence there are two options:

① Continue the talks.

② discontinue the talks.

Again India has to go for talk. Hence, it is better to continue the talks. atleast India should not call off the talks.

Is it easy to continue to the talks in case of terrorist attack?

Not possible unless leaders shows statesmanship. Hence it's a deadly Impasse or dead End. Hence India has only one option i.e. Strengthen its Resilience.

Also

According to ^{Saravane} ~~Saravane~~ It is unfortunate that India deals with Pakistan less as a policy imperative & more as a pathology.

AFGHANISTAN

Afghanistan's Importance.

Most important: → Geo political.

Geo political & → South-South cooperation
(not so important). → Reform of UNSC
→ Peace & stability in ASIA.

Geo Economic & (i) Oil & gas.

(ii) Minerals.

*** (iii) Location: :- Afghanistan is round about
(connects roads to all) It has potential to become a transit
Hub.

(iv) India's access to central Asia.
(Security)

Geo Strategic:

If we go by Kautilya's mandala theory. Afghanistan
is India's natural ally.

How? Neighbor is natural Enemy & Neighbor's Neighbor
is Natural friend ally.

How Afghanistan is natural ally?

Peace & Stability in Afghanistan for India's Security.

Hence the type of commitment India has for the protection
of its border. Similar type of commitment India should
have for peace & stability in Afghanistan.

Security in what sense?

(i) In case of a conventional war with Pakistan it will be huge
advantage for India if Indian forces are present in
Afghanistan & open the second front.

It means the best case scenario for India is Indian
forces in Afghanistan.

Non conventional Security threats:

Afghanistan can be a safe heaven to conduct anti-India
terror operations from Afghanistan.

Who can protect India? ^{against terrorism} (or) who will fight with terrorist attacks?

Armed forces of India.

What Pakistan wants?

Pakistan's nightmare is the presence of Indian forces in Afghanistan. Pakistan is not even comfortable with India's diplomatic presence (or) India's developmental assistance. It is brood of Pakistan Indians could not send even Indian military personnel as a peace keepers under UN in Afghanistan.

Haggarani Network is based at Quetta (Baluchistan capital) & it is recognised by USA administration as veritable arm of ISI. Haggarani network has continuously targeted Indian consulate, Indian infrastructure projects, Indian Engineers in Afghanistan.

31st Oct 2019

Why Pakistan wants strategic depth?

The Real Nightmare for Pakistan is not India but "Durand Line".

Durand Line — The border b/w Afghanistan & Pakistan which was carved by the British.

Why by British?

Britishers aimed at making Afghanistan a buffer zone b/w British Empire in India & the Expanding Russian Empire.

What is the Pakistan's problem with Durand line?

Durand line artificially divide Pashtuns. Since Pakistan as a country is dominated by two ethnic communities

(i) Punjabis (most prominent & powerful)

(ii) Sindhis, the other ethnic communities like

Balochs & Pashtuns are marginalised

The Pashtuns living in FATA (Federally Administered Tribal Areas). Since Pashtuns living in this region they

never want to be part of Pakistan. Khan Abdul ^{Wafar} Khan was against inclusion of the Region in Pakistan. Pathans living in Pakistan want.

a) Merger with Afghanistan.

b) Creation of an Independent Paktoonsah (Pashtunistan)

Hence, After losing Bangladesh Pakistan is extremely fearful of losing another territory. Hence, Pakistan fears

(i) The govt controlled by pathans in Kabul.

(ii) govt presence of India & India having good relations with the govt in Kabul.

What is Pakistan's endgame in Afghanistan?

Any govt in Kabul should be controlled by Pakistan. However, any govt over which Pakistan has absolute control is not in India's interest.

What India will try? (a) what is India's Endgame?

India & Pakistan are playing zero sum game. Whosoever controls Kabul should deny strategic depth to Pakistan, & should have strategic engagement with India. Hence, India wants

(i) govt led by pathans

(ii) govt of Afghanistan should be powerful enough to resist the pressures of Pakistan.

Avinash Balival :- his book "Enemy's Enemy"

He describe India's policy as a balancing act. India want to act as a external balancer. So, that Pakistan does not prevail over Afghanistan.

Since there is geographical disadvantage for India, it is better at present that India provides consistent support to those forces in Afghanistan which are pro India. The most important dimension of support should military support.

Ideally India should have its military footprints in Afghanistan. However, India has to decide which type of military footprints.

type? maybe at present India should be providing defence equipment, training & capacity building of Afghan National defence forces [then foot prints]. However in the long term India may have to think more strategically. There cannot be any question mark that India should be treating security & stability in Afghanistan as its own security & stability.

What is happening in Afghanistan?

History is repeating itself [Afghanistan has always suffered civil war bcoz of involvement of foreign powers]. Afghanistan is the best example where we can quote Karl Marx.

Karl Marx in his book 'The 18th Brumaire of Louis Bonaparte' that history repeats itself.

1st as a tragedy & 2nd as a farce (bad joke).

Rudyard Kipling has written that Afghanistan has been the place for ~~GREAT GAMES~~ ^{GREAT GAMES} throughout history. Afghanistan has suffered the great games. There was a great game b/w British Empire & Russian Empire.

→ 2nd b/w great game b/w USA & USSR

Since the end of cold war the great game has become too complex.

Why it has become complex?

Emergence of many players with different and at times contradictory as well as complementary objectives.

parties in the game: Not just state actors but non-state actors.

① first player: USA

USA: Great aim was to promote "Terrorism", to prevent (a) check the rise of China, to make Russia beggar & to attempt regime change in Iran. The only guarantee

USA wants from Taliban & there should not be any repeat of September-11... (9/11 attack).

Though USA says it want peaceful & stable Afghanistan but USA does not mean it. Earlier USA was against Taliban coming to power but now USA has no problem.

Russia's Big game

Russia wants that there should be stability in Caucasus region (Muslim dominated oil rich region)

[Have Georgia & Azerbaijan]

What Russia wants?

At present there are three enemies of Russia.

(i) USA (ii) Taliban (iii) ISIS (~~ISKP~~ ^{ISKP} (Islamic state of Khorasan province))

In given situation Taliban is the best out of worse.

Hence Russia will not have problem so long Taliban activities are not directed against Russia.

Taliban activities?

Taliban is controlled by Pakistan. Pakistan does not have Enmity with any other country except India. Hence there are strong reasons for Russia to engage Pakistan. Pakistan also has a reason to engage with Russia.

Why?

(i) Pakistan is not comfortable with cooperation b/w India & USA in Afghanistan [India-USA strategic dialogue]

(ii) Engagement with Russia gives leverage to Pakistan in its dealings with USA.

Russia's support to Taliban strengthens the position of Pakistan.

In recent years Taliban has shown Resurgence. Resurgence has been possible primarily b/c of intelligence support provided by Russia.

Why Russia is providing intelligence?

Game b/w USA & Russia: It's Russia's answer to USA's

game in Syria. In Syria USA supports Insurgents & Russia supports Govt. In Afghanistan USA has been fighting ^{Govt} Govt & Russia has been supporting Taliban Insurgents.

Iran : Initially Iran was against Taliban. However, since ISIS has made its presence in Afghanistan, Taliban appears to be a better bet. Hence Iran is also going for hedging by supporting Taliban & strengthening partnership with Pakistan. Another motivation for both Iran & Russia to support Taliban & to support negotiations is that they don't want USA forces in the region. What deal Trump had proposed to Taliban?

(1) Big Cease fire

- Taliban will stop terrorist activities.
- No Repeat of September 11.
- USA will withdraw its forces significantly but gradually & also finally.

However, USA had cancelled the talks bcoz, Taliban has not stopped terrorist activities. Taliban was not ready to accept USA forces & wanted immediate withdrawal. As such Taliban has no reason to compromise (1) Except USA's terms & condition. Taliban is not even ready to accept the present constitution of Afghanistan (Democracy). There is no need for Taliban to accept USA conditions for exit. Taliban knows that USA had to exit (So why to accept the conditions).

Pakistan : Pakistan wants strategic depth means no presence of India & not even developmental.

INDIA'S Game plan : Up till now India has been banking on USA. India has kept its profile limited to soft power. The Endgame of India is that no puppet govt of Pakistan should control Kabul. However, India does not have any

concrete plan. India is in a most challenging situation.

(i) India relied on USA but USA has betrayed India.

(ii) India relies on govt of Afghanistan which itself is too weak to sustain itself.

(iii) India's relations with Iran has deteriorated under USA pressure.

(iv) India cannot bank on the support of Russia & Iran as it used to be.

(v) India should have placed itself strongly in central Asia but there also India does not have significant footprints.

→ There is a talk of India-China cooperation in Afghanistan but it has no substance.

Turkey: has an ambition to emerge as leader in the muslim world.

Since its ambition to be a leader in muslim world there has been differences b/w Turkey & USA. Turkey look at Saudi Arabia as its competitor. Turkey has been supporting ISIS. Turkey supports all terrorist organisations. Turkey want to have leverage over USA.

China: China wants success of its BRI project. The most important

component of BRI is CPEC. CPEC starts in Xinjiang Region.

China wants Pakistan to control insurgency in Region. China

was comfortable with USA forces were fighting against Taliban.

at that time USA-China relations were also not that bad.

China has kept its profile low. China has been sleeping

partner of Pakistan. However, in recent time China has

increased its stakes in Afghanistan.

(i) China has made huge investments in copper mines.

(ii) China wants success of BRI.

(iii) China is trying to gain leadership by initiating talks

with Taliban. Though China is primarily relying on

Pakistan. Yet, China is also strengthening its security cooperation

with countries of Central Asia. China is helping Tajikistan

To raise mountain corps.

China-Tajikistan Military operation had been started in Gorno Badakhshan. China has also extd SCO which aims at fighting against radicalisation & extremism.

Taliban: as such Taliban is not strong as media portrays. Taliban wants to establish in Kabul. Since Taliban is comparatively weak. Taliban is ready to cooperate with China, Iran & Russia.

ISKP: ISKP has increased its influence challenging the status of Taliban. Other Regional countries also prefer Taliban over ISKP.

Govt of Afghanistan: Very weak player. It's on life support system given by USA. Looks for life support system from India. Present govt of Afghanistan is internally divided. → There is a huge corruption hence decline in the legitimacy. There is a domestic instability. The Regular Elections have been postponed. Recently they have conducted Non-conclusive parliamentary Elections as well as presidential elections which is highly disputed.

What India should do? (or) what has been India's policy so far?
is Kesh Averse policy.

(i) W/ heart & mind of Ordinary Afghan.

(ii) Outsource its security to USA.

Why India has such policy?

→ Lack of Strategic culture.

→ India has based its policies on discourses.

What are discourses about Afghanistan?

→ Afghanistan is a place where even Angels fear to

~~from~~ tread in. Afghanistan has been grave yard of Empires.

Ex: (i) Alexander's war started from Bactria.

(ii) USSR

(iii) decline of USA Hegemony.

→ No one can come of Afghans. Magnificent. Afghanistan is called as Cursed land. Curse of God. Said to Afghans Afghanistan was created by god. Once god completed his entire creation. God was tired & god has thrown all the remaining materials in one way.

→ May god keep you away from the venom of Cobra.
"Teeth of Tiger & Revenge of Afghan"

Overview of India's Policy:

There is wide acceptance that Afghanistan is critical to India's security. Keeping this in mind India has always given priority to its relations with Afghanistan.

During cold war:

India has good relations with Afghanistan. The major factor was USSR. Afghanistan was under Soviet influence. Towards 80's Afghanistan started becoming destabilised. Who was responsible?

(i) USA, (ii) Pakistan.

What USA did?

As a part of US policy of Beggar Thy Enemy. USA kept USSR engaged in 10 years long war.

Who were the instruments of USA?

USA has armed the army of religious fighters Mujahideens. not only it impacted Afghanistan. It impacted India in a big way.

(Change in the nature of militancy in Kashmir).

What was India's approach?

Even after disintegration of USSR. There is no immediate collapse of

communist govt. India continued to support the communist govt lead by M. Najibullah. However, Mujahideens were successful in toppling the govt.

Towards the end of 1992 (& he was hanged publicly) [Defeat of India & victory of Pakistan]

Since Mujahideens were controlled by Pakistan, India didn't have good relations initially. However, India was able to recover lost ground. The factions supported by India led by Babbar came to power.

What Next?

Since Pakistan has a policy of strategic depth, Pakistan tried to build another force i.e. Taliban.

Who are Taliban? (Taliban means ^{Talib}Students)

Talibans means Students

Where they were studying?

The Madrasas in NW FATA region in N. Western Area.

Who were funding Madrasas?

(Saudi Arabia)

Why Saudi Arabia was funding?

To prepare a force of insurgents against Iran. Hence they were taught in the fundamentalist type of radical Islam. Since Iran is a Shia country, Taliban were indoctrinated with orthodox Sunni Ideals [Salafism & Wahabism] → puritanical movements.

International
Civil Aviation
ICAO
chapt-2
sec 5

Taliban was promoted by Pakistan to remove Mujahideens. Ultimately Taliban was successful in capturing Kabul. [Defeat of India]. Mujahideens were pushed towards North.

2nd Nov 2019

STAGE-II

AFGHANISTAN UNDER TALIBAN

Relations with India:

India did not recognise Taliban. India kept on recognising Mujahideens now concentrated in the North. Taliban was not recognised by other countries also, there were only 3 countries recognised Taliban.

① Pakistan ② Saudi Arabia ③ UAE.

During Taliban's Regime India faced one of the biggest humiliations — Hijack of IC814 to Kandham.

Ultimately India had to release Masood Azhar.

Chattanooga to Delhi

Sept-11-2001 Incident - Al Qaeda Attacked World Trade Centre (This was first attack on USA main land)

Response of USA:

USA demanded that Osama bin Laden should be handed over to USA. However Taliban leader Mullah Mohammed Omar had huge love for Osama bin Laden. Hence, USA started Operation.

Enduring freedom.

↳ It is Global War on Terrorism (GWOT)

What is its aim?

Not a single terrorist will remain alive.

Response of India: Heaven sent opportunity. India has offered unconditional support to USA.

Response of Pakistan: Pakistan was frightened, Musharraf was planning to leave the country.

What actually happened?

(i) USA didn't take India's help

(ii) USA made Pakistan the front line state in GWOT.

Pakistan's status was elevated. It became Major Non-NATO ally. USA promised military aid to Pakistan including

F-16's.

Response of India & India criticised USA's GWOT.

→ India realised the importance of Iran, Vijayprasek visited Iran (2001). Resulting into Tehran Declaration.

In 2003 - India entered into strategic partnership with China.

Bonn Conference: USA was able to displace Taliban within 3 months. In the war USA made Mujahideens as ghost Soldiers (Northern Alliance). India-USA-Russia-Iran cooperated against Taliban.

What was India's role?

Medical mission - India has setup temporary hospital in Fakhroo in Tajikistan. [Supposed to be India's first airbase outside India].

- USA invited India in Bonn conference meant for the reconstruction & development of Afghanistan. India emerged as the largest donor in Asia. at present India's aid has reached to \$3 billion. India restricted its role to soft power diplomacy. What soft power diplomacy?

India's policy is described as winning Hearts & Minds policy. Why India restricted itself to soft power role?

India didn't even participated in UN peace keeping operations.

India was working under the directions of USA. USA was directed by Pakistan. Pakistan was against any sort of Indian foot print. Not even developmental theme. It's said that in Afghanistan - India was pursuing Pakistan's policy → allowing Pakistan to gain strategic depth.

Today Pakistan has strategic depth. No other country except India has a reason to challenge Pakistan's strategic depth.

India kept on contributing towards development in Afghanistan even at the cost of lives of Indians as

Pakistan could not prevent USA from allowing Indian developmental initiatives (USA were looking for Burden sharing). Pakistan kept on attacking Indian footprints. [Indian Embassy, consulates, Engineers, NCO's, projects]

LONDON CONFERENCE 2001

In 2001 OBAMA was elected his election promise was to exit from Afghanistan. In London conference Pakistan offered Exit plan.

What Exit plan?

Reconciliation with good Taliban. Pakistan classified Taliban into Good & Bad.

Not only USA all other countries supported Pakistan's plan the plan was opposed only by a) Govt of Afghanistan.

b) India.

Why?

Pakistan's good Taliban is bad Taliban for India. India again felt cheated by USA.

What was India's Response?

In 2011 India entered into a strategic partnership with Afghanistan.

Note: Since USA was working with Pakistan & there was opposition of USA in Afghanistan, Govt of Afghanistan was looking for External help. Afghanistan looked towards India. Afghanistan was looking for Strategic partnership but India was delaying under USA pressure.

What does Strategic partnership Indicate?

Message to Pakistan that India is going to stay in Afghanistan.

What else India did?

(ii) Connect Central Asia Policy - 2012.

INDIA - CENTRAL ASIA:

India had advantage in central Asia. Bcoz "Stans" have been under USSR. India was the first country with diplomatic (consulate) presence in the region.

Abhinav (New)
Bharat

Once these countries came into existence.

Role of Narasimha Rao:

Narasimha Rao launched "Look North policy" - It means establish relations with Central Asia. However, not much can be done b/c of India's domestic priorities.

In 2012 - E. Ahmadi, the Minister of State for External Affairs launched Connect Central Asia policy at Bishkek.

(KYRGISTAN) - The focus was on [C-5]

→ Culture, commerce, connectivity, connectivity

4. Civil Society.

Note: Refer MEA for C-5.

Even after the launch of Central Asia Connect policy India was too slow.

Role of Modi: High Octane diplomacy.

PM Modi took the strategic approach towards Central Asia in the evolving Geo-strategic situations. Modi visited all the 5 countries in a single go. He was able to consolidate India's relations with Central Asia. Some of the initiatives include:

(i) India joining Ashgabat Agreement (Transit)

(ii) India has speeded up the work for completion of

INSTC.

(iii) India estd India-Central Asia Dialogue.

(iv) India-Central Asia Business Council.

vi) India-Central Asia Development Group.

India tried to strengthen the links at bilateral level by high level visits.

India has entered into long-term Defence partnerships, Economic partnerships. India has been negotiating FTA with EURASIAN ECONOMIC UNION.

3rd Action - India Joining SCO

What was India's approach towards SCO?

SCO is a China led platform & hence USA has been apprehensive.

of SCO calling it an ASIAN NATO. The countries in central Asia as well as Russia wanted India's presence in SCO to balance China. However India has been reluctant in participating in SCO meetings. However later on India realised its importance. India tried for full membership of SCO ultimately both India & Pakistan have been inducted as full members in 2017. (Astana - Summit). ^{Kazakhstan}

What is the significance of SCO?

SCO has been existing since mid 90's but not have played any effective role. as China's ambitions are rising. China has started investing in SCO. there is a potential that SCO becomes the main security platform in the Region & it is believed that SCO can play constructive role in Afghanistan.

What is the importance of SCO for India?

- (i) Symbolic:- India in SCO is a recognition of India's great power status in Asia, beyond South Asia. A change in approach of China.
- (ii) It is a platform to initiate cooperative dialogue with China in Afghanistan. Its agenda is of huge interest to India.
- Fighting Radicalism & Extremism.

(iii) SCO focus on connectivity is also in India's interest.

India in SCO gives space to manoeuvre against USA.

What is the current challenge for India?

At present the existing situations in Afghanistan are completely against India. How?

There is a huge probability of Taliban coming to power. Why?

All major power USA, Russia, China, Iran support Reconciliation with Taliban.

→ It seems Reconciliation with Taliban will be without Taliban accepting the Red lines drawn by USA.

In 2001 Russia - Iran have been on India's side. Now they are tilted towards Pakistan & Taliban.

→ There is a rise of other Terrorist orgs like ISKP. Khorewar.

There is a direct connection b/w victory of Taliban & increased militancy in Kashmir.

Note = Reason for Pulwama Attack: (Feb 2019).

This was the time when Trump made announcement for Exit. Pakistan felt, it is the time to conduct attack bcoz, USA may not be reacting against Pakistan.

The best time for objectives in Kashmir. Message to Militants in Kashmir. If Taliban can come into power with the support of Pakistan, ~~they can start an~~ ^{the militants} in Kashmir can be sent on Pakistan.

What India should do? & what is India's policy in Afghanistan?

Accd to Harsh V. Pant India's Afghanistan policy at present should be in accordance to evolving realities in the region & should match the stature of India in wider South Asian region.

What is India's stature?

India's stature is of a great power.

↳ With great power comes great responsibility. There is no example in the world where great power status is based only on soft power.

Accd to Harsh V. Pant & Avinash Patel. Indian approach towards Afghanistan suffers from some structural challenges.

(i) Geographical

(ii) India has limited material capacity.

(iii) Reputational - India is very sensitive about its reputation as a constructive player.

Hence, India is not capable of managing Afghanistan all alone. India needs friends both outside & within Afghanistan.

Friends: India should look towards Iran, Russia, China, USA.

with Afghanistan - which party India should choose?

- (i) Govt of Afghanistan (weakest part)
- (ii) Taliban

Should India talk to Taliban?

No point. Reason: It is proxy of Pakistan → as of now Pakistan is biggest support to Taliban.

→ Taliban is a terrorist organisation. It will not be a right approach. It will contradict India's policy: "No talk with terror"

→ It will be a big morale booster for militants in Kashmir.

It is to be noted that Taliban is not as powerful as projected.

Hence talk to Taliban should be the last option in worst case scenario.

Whether India's Strategy of winning Hearts & Minds is of any use to India?

India should continue with its Heart & Mind strategy. It is not entirely a waste among all the countries in the region India enjoys the most positive reputation among the ordinary Afghans.

It is to be noted that people in Afghanistan do not want Taliban. After living under democracy for around 19-20 years, it is not possible for people in Afghanistan to accept the rule of Taliban.

Taliban can rule only with terror. Taliban cannot dare to stand in elections. We should not forget Rousseau who held that even the strongest man is never strong enough. Hence India has to go for re-establishing the balance. In present situations the democratically elected Govt of Afghanistan is the best bet for India. India should help in the capacity building of such factions. India has to act as a balancer. India has to ensure that the govt of Afghanistan should remain strong enough, not to come under pressures of Pakistan. Govt of Afghanistan needs financial & military support of India. Cannot provide financial support to the extent contributed by

USA: India can definitely provide much needed military support. Hence to begin with India should start with its military footprints [providing training, arms, intelligence].

Views of C. Raju Moran
(Rutnam Bhatnagar)
Indians has always suffered from "Panipat Syndrome". They have preferred "Naval gazing". Hence it is high time India should overcome the syndrome & start looking at Afghanistan strategically.

3rd Nov 2019

Response of USA

USA became concerned & compelled India to vote against Iran at IAEA

Note: 1) USA promised CVID Nuclear Deal.

Importance of
(??) CVID Nuclear Deal goes beyond Energy partnership for the first time India voted in a country specific Resolution that to where other countries Even US Allies (Pakistan, South Korea) abstained what was India's thinking?

In comparison to Iran, USA is a better choice, India can diversify the source of Oil (Shift towards Saudi Arabia) & India can outsource security issues in Afghanistan to USA.

Current Situation:

3) Obama's Exit Plan :- He planned Exit from Afghanistan hence India realised the importance of Iran & SCO. OBAMA's engagement with Iran allowed India to re-establish oil trade & to Restart Chabahar in 2016 Modi visited Iran the focus has been on rebuilding the links. PM Modi held that if India & Iran make up their mind the distance b/w Kashi & Kashan is half a step. Later on Iranian president visited India the joint statement emphasised on connectivity. TRUMP'S POLICIES / BOLTON POLICIES. → Maximum Pressure on Iran why?

INDIA & WEST ASIA

Importance of West Asia in international politics?

WEST ASIA is the most sensitive zone of international politics.

Why West Asia is so sensitive?

The most important aspect of West Asia is its location. It is situated major trade routes. [USA's main policy to control trade & control routes]

→ OPI & gas.

→ Cradle of Human civilisations. [Babylon, Egypt etc.]

→ the place of origin of 3 prominent Religions.

Jewish, Christianity & Islam.

→ Highly heterogeneous society.

Modern politics in West Asia.

Since the beginning of capitalism the major capitalist countries had eye for West Asia. Up till 1st world war it was under Ottoman Empire. After 1st WW it came under the control of European powers primarily Britain & France.

There has been demand for the liberation from the control of colonial powers. Colonial powers always played the game of divide & Rule. If we see the ^{map} of West Asia we can understand how arbitrary the borders are. This itself becomes the base for ethnic clashes. From Indian perspective West-Asia & North-Africa (WANA) is seen as a single entity. In terms of ethnicity we can classify the people into following prominent groups.

(i) Arabs. ^(Sunni) - the largest groups

(ii) Persian - (Shia) [Iranian]

(iii) Turks - Turkey (Sunni)

(iv) Jews

The most important countries in the region are

(i) Iran - considered as first superpower in the world & now the most powerful country in West-Asia.

(ii) GCC (Gulf Cooperation Council) countries - Gulf monarchies
of Iran is anti-USA countries in the Gulf region has been
pro USA. at present the most powerful country in Saudi Arabia
at present GCC countries are not united.
as there has been conflict b/w Qatar & other countries of
GCC.

Qatar : Qatar has followed a different policy since
the beginning of Arab Spring.

↳ Arab Spring was a message that people
in middle East reject US Hegemony, & they are looking
for democracy. for ex: If we take the case of Egypt
people have supported Muslim Brotherhood against Pro US govt
of Egypt led by Hosni Mubarak.

→ Arab spring spread to other regions also. Arab Spring
could not establish democracy in the Gulf b/c of support
of USA to Gulf monarchies. Hence the ruler of Qatar
wants to appear Anti-West & pro democracy. Hence, if
Saudi Arabia opposes Muslim Brotherhood Qatar supports
Muslim Brotherhood. Hence Saudi Arabia & USA have

criticised Qatar as a state sponsoring terrorist orgs.
→ Qatar has huge reserve of natural gas & oil. Qatar
is not happy with USA's policy to keep the prices of
oil down. [as well as shale gas revolution in USA]

→ Qatar has one of the largest amount of foreign wealth
fund. The state investment agency of Qatar has made
investments in oil & gas sector in Russia.

→ Qatar has improved relations with Iran, Qatar
understands Iran as a new force in Middle East.

At present not only Qatar there are differences
b/w Saudi Arabia & UAE. UAE is also not favour
extreme rivalry with Iran. Iran has a strategic location
in Persian Gulf.

→ Muslim Brotherhood.

UAE has huge interest in Exports through Persian Gulf, Strait of Hormuz towards South Asia which includes Afghanistan, Pakistan, India.

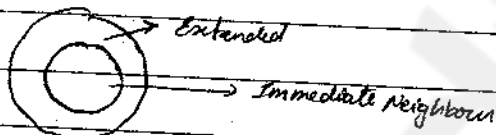

Even OMAN wants better relations, peace & stability in Gulf.

2nd Nov 2019

India's Policy in Middle East:

Importance for India:

West-Asia is located in the second concentric circle in India's Strategic matrix. West Asia is situated in India's Extended Neighbourhood.

Importance of west Asia for India goes beyond treating west Asia as "GAS STATION". West Asia comes in the security perimeter of India. Arabian Sea does not divide rather unite India with the region. Britishers understood the strategic importance of west Asia from the perspective of British Raj in India.

Britishers acted as a Net-Security provider in the region. Peace & stability in west Asia is critical for India's own security in almost all dimensions External, Internal, Energy to Economic.

How is the record of India in dealing with West Asia?

The general impression is that the most successful aspect of India's foreign policy has been Look East however the reality is different. The most successful aspect is WEST ASIA. With ASEAN we have the target to take reach to the trade of \$200 billion, our trade with GCC countries is already more than that. WEST ASIA is the region where India has unequal soft power. In South East Asia India has to compete with China. Indians constitute the greatest number of

Ex-patriate community. The remittances which India receives annually goes beyond the annual investment India gets from USA.

One of the Earliest foreign policy decision which India had to take was wrt West Asia.

The Beginning of India's policy towards middle East goes back to the Era of Khalifat Movement.

Since Balfour Declaration 1917, it was obvious that West will create ISRAEL.

Indian leaders, including Gandhi opposed the creation of Israel — Gandhi mentioned that Palestine belongs to Arab in the similar way England belongs to English & France belonged to French.

India's policy towards middle East / Israel Since Independence.

Pandit Nehru urged for the creation of Gandhi India opposed the creation of Israel in UNITED NATIONS.

[1947] However, In 1950 India had officially recognised Israel.

Q) To what extent it is appropriate to suggest that India's policy towards middle East was guided more by Ideological interest rather than Strategic calculations?

Q) To what extent it is appropriate to suggest that India's policy towards middle East / Israel has been shaped by Domestic Determinants.

Ideological angle in India - Israel Relations:

During the time of Pandit Nehru. Pandit Nehru opposed the creation of Israel, since Israel was a part of this earth. India recognised Israel in 1950 but didn't establish full diplomatic Relations with Israel. India kept on rallying the cause of Palestine from all platforms from UN General Assembly to NAM. India's support to the Palestinian cause was extraordinary.

to the extent that it became proverb - "Nehru was behaving as more Arab than Arabs". (1) (More Catholic than pope).

It was believed that Nehru's anti-west attitude, Anti Imperialism, Anti colonialism was responsible for his stand. It is also believed that the domestic factors

What domestic factor?

"The sentiments of minority

minority in India played a role in shaping Indian policy.

India's policy under Modi?

The present state of closeness b/w India & Israel is attributed to the convergence of the two ideologies the ideology of Hindutva [India as nation of Hindus] & the ideology of Zionism [Israel as land of Jews]. Even if we look at proposed Amendment in India's citizenship laws, it is very much influenced by the citizenship laws of Israel [Jews can come from anywhere]. At present there is a rise of Hindutva (or) Majoritarianism in India. Hence the foreign policy has shifted away from palestine & towards Israel.

Analysis:

Accd to former Ambassador / Scholar of IR Ishrat Aziz the foreign policy of any country is based on Secular interests. Not only India's policy towards west ASIA is shaped by Secular interests like Energy, Remittances, Diaspora, even the foreign policies of countries of west Asia including Saudi Arabia has not been based on Religion.

Similarly It would be wrong to say that sentiments of Muslims in India shaped India's policy. It's to be noted that in India there exists No muslim lobby to influence the decisions the way lobbies exist in USA.

It would be a huge disrespect towards the minorities in India if we believe that they will give priority to such Religious matters over the national interest. There is no

organised movement in India by Minorities for the Palestinian cause. Why there has been no protest when India ^{has} strengthened the relations with Israel.

P.R. Kumar Swamy

Even P. Kumar Swamy does not look at India's policy towards Israel guided by ideological orientation.

Q) Why Gandhi opposed creation of Israel?

1) The objective for saying that Palestine belongs to Arab was that - to bring Muslims with in the fold of National movement by exploiting their sentiments for Khilafat cause.

2) Gandhi opposed the creation of Israel bcoz Gandhi knew that once Israel will be created West Asia will never be in peace.

Lack of peace & stability in West Asia is bound to impact India's security.

Similarly it is believed that Nehru's policy which is said to have been influenced by Maulana Azad was guided by practical concerns.

What practical concerns?

The minorities in India were insecure bcoz of partition. India's whole hearted support for Israel would have allowed Pakistan to create propaganda & to destabilise India.

Hence, in the given situations it appeared rational to recognise bcoz of Israel was a fact yet avoid full diplomatic relations. We should not ignore the views of Selig Harrison & other western scholars who predicted that idea of India will be over by 60's.

Similarly it would be wrong to suggest that Modi's policy is shaped by ideology of RSS. Accd to Kumar Swamy even Modi's policy is shaped by strategic considerations. Accd to him there is a big difference b/w Modi with in country & outside country.

Evolution of India's Israel policy

India's Israel policy can be classified into following phases:

37 years cold war

(87) Since the end of cold war till 2014

(18) Since 2014

Overall Approach: , what is the basic idea here?

Though not shaped by sentiments of minorities yet it has been shaped by political calculations as well as evolving situations in middle East.

Why India continued to give preference to palestine & didn't establish full diplomatic relations with Israel?

At that time India's dependency on gulf was bigger than on Israel.

It is to be noted that there was no formal official partnership with Israel yet there was a understanding with Israel on security issues. Israel has always provided critical help to India in all of India's wars against pakistan. Thus, there was the relation but not in public. India preferred to keep the relations in close.

Why India behaved as more Arab than Israel as far as palestine was concerned?

It is to be noted that Egypt which led all the wars against Israel estd full diplomatic relations in 70's [after Camp David Accord - 1972]. However it took 20 more years for India to establish full diplomatic relations in 1992.

India kept on rallying with palestinian cause primarily to keep itself relevant in the regional politics of middle East as well as international politics.

Why India estd full diplomatic relations in 1992?

→ The Geopolitical context has changed & was a unipolar world by giving full diplomatic status to Israel

India wanted to give clear indications to USA that India is ready to change.

In the Non-Ideological post cold war world order it is imperative for India to think strategically.

There were other factors also

(i) Disintegration of USSR compelled India to look towards Israel. a) Israel is supplier of hi-tech weapons at much cheaper cost.

b) The expertise of Israel in Russian weapons & American weapons.

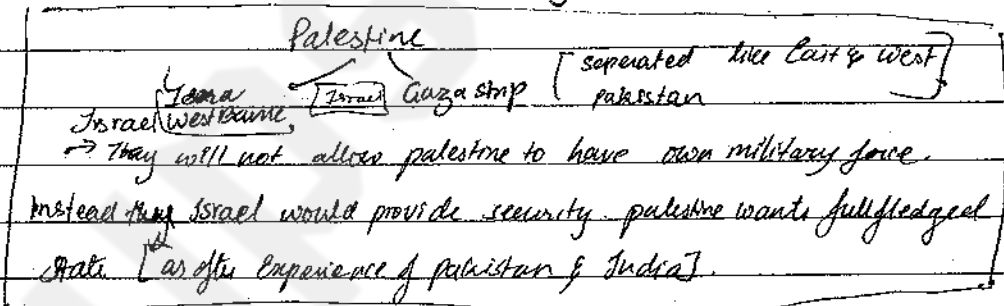

(ii) After the end of cold war we see Arab world not giving too much importance to palestinian cause. What happened.

The palestinian leader Yaseen Arafat supported Saddam Hussein when he invaded Kuwait.

PLO!

The Arab world distanced itself from Palestine, even Palestine recognised that it is isolated hence Palestine agreed for Reconciliation with Israel. [Oslo Peace process - 1992]. for the first time Palestine recognised Israel, its right to existence which lead to the establishment of

(i) Palestine national Authority.

When palestinians themselves recognised Israel there is no need for India to appear more Catholic than pope itself. Hence India could assert its relationship with Israel more openly.

Vajpayee called Israel India's Natural Ally.

However after change of govt when VPA-I was formed there was a sort of Back tracking on too much closeness with Israel.

Reasons: Man Mohan Singh's approach should not be seen as Nehruvian legacy rather the compulsion of coalition. Left parties were in coalition there approach was Anti-American / Anti Israel & Hence they pressurised govt to re-establish the balance.

Policy under Modi:

high octane diplomacy

(i) Modi govt has taken some unprecedented steps

2014 - India abstained from voting against Israel at UN HRC for Israel's violence in Gaza.

(ii) Modi became the first PM of India to visit Israel [in 2015].

(iii) Not only Modi became the 1st PM to visit Israel, he also dehypnotised Israel & Palestinian Issue.

Modi's visit was stand alone

(iv) Before Modi's visit to Israel India awarded Palestinian president Mahmoud Abbas - for the first time in the statement released India did not mention East Jerusalem as capital of Palestine.

Recently India has voted with Israel at UNESCO against the bid by Palestinian NGO Shahed which was looking for observer status. Shahed is branded as terrorist organ by Israel.

There was a time when India even justified the terrorist acts committed by PLO against Israel. PLO was recognised as terrorist organ by west whereas India has given diplomatic status to PLO. There was the time when India used to be the co-sponsor of UN Resolutions ^{in favour} against Palestine. There was a time when diplomatic criticism of Israel was sufficient. Now India does not take

One sided view & condemns all types of terrorism.

During Mun Mohan Singh India was balancing Israel & palestine but under Modi Israel & palestine are on different tracks. India does not feel the need to balance. There is distinct tilt towards Israel.

Why?

(i) There has been a complain by Israel that Israel has always helped India but India has not been supportive of Israel. Israel has very few friends & Israel needed reconnection. It is used to be said that India treats Israel as a mistress & palestine as a wife.

(ii) PM Modi has exceptional chemistry with Bibi (Benjamin Netanyahu). And to Bibi India-Israel marriage is made in heaven.

The geopolitical conditions in Middle East allowed India to ditch palestine & planned its relations with Israel. What is situation in Middle East?

At present the power of Iran is rising. So far Trump has not taken any concrete steps other than Rhetorics on twitter. Trump's policies have actually made Iran stronger.

How Iran looks at USA?

At present USA does not have leverage on Iran

(i) Iran understands that USA cannot afford another war

(ii) Iran is not getting frightened rather escalating the tensions.

Iran has strengthened its image at present even GCC countries are tilted towards Iran. Iran has developed the capacity of Asymmetrical balancing - Sponsoring Non-state actors.

What is the attitude of Trump?

Trump wants to pressurise Iran. Trump does not want to start another war rather prefers Back passing

It would prefer conflict b/w Saudi Arabia.

Situation in Middle East:

Palestine issue is orphaned issue. Especially ^{after} Arab spring. Every country in the region is trying to protect its own stability & territorial integrity against the common enemy Iran. There is engagement & Security cooperation b/w Saudi Arabia, UAE & Israel.

Thus, it's the best time for India to fulfill the aspiration of a trusted friend with a ltd. risk.

Distractive features of Modi's policy:

→ Though India support to Palestine diluted yet not ended. India did not support the US Sponsored Resolution in UNGA recognising Jerusalem as a capital of Israel. Indian officials do reiterate that there is no change in India's Palestine policy.

Why there is no change in policy?

1) India does not want to give impression to Israel that it deserves the most special treatment. We should not forget the close defence cooperation Israel has with China.

2) India is improving its relations with Saudi Arabia, UAE. Saudi Arabia aspires to be leader of Muslim world.

Palestinian cause is one such issue which help Saudi Arabia.

In the joint statements with Saudi Arabia Palestinian cause continued to be mentioned. India is not only normalising its relations with Israel. India is also trying to make Israel a normal country within Middle East. Hence, Modi visited Israel after 3 years (not immediately coming to power). Later on he also visited Jordan & Palestine without visiting Israel.

2. Even Modi visited Iran in 2016 before Israel.

INDIA- IRAN RELATIONS

OVERVIEW OF RELATIONS

Much below potential Never matched Expectations.

- Iran has been the next door neighbour before partition.

- Nearest country of West Asia.

→ No other country of West Asia has influence on Indian culture like Iran (Persian language, literature).

Phases of Relations:

April 1979: Relations were not good bcoz Iran was

USA ally.

(1) Iran had aspiration for leadership in Muslim world & hence, gave consistent support to Pakistan on Kashmir.

However, we had mutually Beneficial Relations

a) Leading source of OIL (cheap, & Quality)

b) India has arrangement for payment in local currency / Barter trade.

c) despite its support to Pakistan Iran didn't stop supply of OIL during Indo-Pak wars.

1979 Relations Second phase 1979- till 2001

The Islamic revolution in Iran Brought it closer to Pakistan. Iran's advocacy on Kashmir became more vocal.

Iran had concerns with India's relations with Israel.

launching of Spy Satellites. Iran was extremely critical of Israel's Demolition of Babri Mosque.

Relations Since 2001

India-Iran relations were never free from the influence of USA.

(1) In 2001, bcoz of war in Afghanistan sort of Strategic Cooperation started b/w India & Iran.

Vajpayee visited Tehran - Tehran Declaration 2001.

Iranian president visited India in 2003 - Delhi Declaration.

USA became concerned about the emerging Delhi-Tehran axis.

Response of USA:

USA became concerned & compelled India to vote against Iran at IAEA.

Trump's policies / Bolton policies.

Aced to Trump administration Obama's policies have

strengthened position of Iran today Iran is the most powerful country in the region.

In context of India, USA had withdrawn waiver which had granted to some countries in context of import of some oil from Iran. However at present USA continues to give exemption to India in context of Chabahar. As India has stopped the import of oil Iranian foreign minister during his visit to India has expressed his concerns.

At present Govt of India is emphasising more on the relations with Saudi Arabia & Gulf countries.

At the same time Iran's dependency on Pakistan has grown in context of Afghanistan.

Thus if we talk in terms of mandal Siddhant India & Iran are also Natural allies & Pakistan is the Natural Enemy of both. However, Pol of USA policies in the region it becomes difficult to realise the full potential at present. Even China has strengthened its engagements with Iran (BRI initiative). Hence, extremely complex situation in the North west has not allowed the two countries to emerge as Natural Allies.

INDIA - GCC

In west Asia the present govt has been able to dehyphenate India's political & strategic relations with Gulf countries, which India has been looking through the prism of Pakistan.

India historically had Economic Engagements with the region but during cold war India's relations with all countries were not political & strategic as they were in USA's league.

India had good relations with Arab world ^{but} with the countries like Iraq, Syria, Egypt. However the end of cold war, the change in India's Economic policies has resulted into GCC countries started looking East. The GCC countries aim to diversify their Economy in context of current Economic Imperatives of GCC countries, The importance of Pakistan has declined. Since the rise of ISIS & uncertainties created by Trump Administration, Assertion of India as Net security provider in the region, the importance of India has increased. The biggest achievement of India is the comprehensive Strategic partnership with UAE. As well as Institutionalisation of Strategic Partnership with Saudi Arabia [Strategic partnership Council]. Both UAE & Saudi Arabia are planning to make huge investments in especially in Indian Strategic Reserves. Historically India has close defence partnership with Oman strategically located in the Gulf. India have acquired stakes in Duqm port of Oman [which is closed to Guadarn]. In Oman India also has certain rights in Thumrait Air base in Oman.

Though there are differences b/w ~~India~~ Qatar & other countries of GCC yet PM Modi had visited Qatar also so overall we

TURKEY

Since beginning Turkey has showered all of its love on Pakistan.

Reasons:

- Ambition to become leader in Islamic world.
- USA Allies.
- Their domestic political system is quite similar (Military has great say).
- The Societies of both the countries are moving towards fundamentalism.

Under PM Modi tried to improve relations with Turkey. India invited the president of Turkey. However, there is no substantial gain on the other hand India's relations with Turkey had deteriorated bcz of Turkey's statements in UNGA on Kashmir. However, with Turkey Modi prefers "Hard ball" Diplomacy.

Hard Ball Diplomacy

- India has strengthened its relations with Cyprus, Greece, Armenia.
- India has criticised Turkey's action on Syria, and to India countries should respect Sovereignty & Territorial Integrity of other countries.

→ India should continue to play Hard ball It is important to remind Turkey that it also lives in a glass house; Turkey should not forget Messy relations it have with its own Neighbours.

Q) Whether India has Strategic culture? Give Arguments?

The debate whether India has a Strategic culture starts with publication of George Tanhamps Essay.

→ Indian Strategic thought — an Interpretative Essay

Tanhamp concluded that India does not have Strategic culture looking at India's history, India's

Culture & India's position on world Affairs (Non-Alignment).

Tanham is not the only western scholar who believed that India lacks strategic thinking. Teresita Sharper in her book "India at high table diplomacy" points towards lack of strategic thinking. The General impression is that India's foreign policy is difficult to understand. India has been against many things for ex: Anti Imperialism, Anti colonialism etc.

But what concrete gains India had was not clear. It was often said that India's foreign policy is against many things but it's not for India. At times, India is known as Exceptional Country [Nehruvian Exceptionalism].

Content of the debate:

After the end of cold war USA started looking at India as a balancer. USA made "Strategic bet on India". Accord to American scholars making strategic bet on India may not be the right approach. Since India lacks strategic culture it doesn't have a view how to deal with the multiple challenges including National Security.

Tanham's essay led to rediscovery of India's Strategic culture. Indian scholars put forward Kautilya's Arthashastra [Realist theory]. As an example of Strategic culture. It is to be noted that in Ancient India there have been two prominent schools of thought.

(i) Hindu School of thought

(ii) Buddhist School.

We can say that Buddhist school lacked strategic culture as Buddhism was other worldly religion (Moksha etc). On the other hand Hinduism & Hindu texts whether its Panchatantra, Mahabharata, Bhishma, Sukra neeti, Arthashastra all reflect the strategic culture.

Nehruvian foreign policy was primarily based on Buddhism.

However, the foreign policy of present govt shows

the greater continuity with Hindu Tradition (Approach
of Nautilya).

— x — x — x —

COMPARATIVE POLITICS

① Comparative politics vs International politics

(They both are not the same) Systems approach is ^{there} in both comparative & international

Comparative politics → Comparing the domestic politics.

Ex: India - democracy Iran - theocracy

Reading India & Iran constitutions.

International politics → politics among the nation.

→ comparative politics has origin in Aristotle → Read US constitution

based on that ^{he} gave ① Monarchy ② Aristocracy ③ polity

Evolution → can be divided into two phases

(i) Traditional comparative politics [Till 2nd ww]

(ii) Modern comparative politics

↳ scientific → Behavioural Revolution.

Traditional comparative politics: Since the End of 2nd ww.

Till 2nd ww → compared constitutions of the western countries

can they were independent & it is called Traditional Study

Modern comparative politics:

After 2nd ww → there is decolonisation → Rise of many new constitutions & countries. It includes western & Non-western.

Britain & India ; Britain & USA

more contrasting relations.

Traditional
Western countries
modern

→ Britain, France, American

→ India, Pak, Bangladesh. These countries have

Constitution but they lack constitutionalism. (If we study just constitution about the country) Ex: authoritarianism

→ so in modern we have search beyond the laws.

We need study about social, cultural & other factors

When we read constitutions → it is legal institutional method

but in modern we have to read Social, cultural

→ It is Eurocentric → Traditional.

Modern comparative politics [MCP] → they use behavioural methodology
→ as scope as more

What are the limitations of traditional methods?

Its scope is Ltd. as we study based on law.

Now we study in legalistic.

→ whereas in MCP we study it as a process understanding
work like constitution, cultural, socialism etc.

Why traditional → Ethnocentric.

(→ It is static bcz it is legalistic.
→ parochial nature → Western
(Morroe).

MCP → primarily focussed on developing countries
i.e. politics of developing Area.

Politics of developing area & comparative politics
can be one.

MCP → India, China

Girvanil Austin → had done good work on comparative
politics on India.

Comparative politics → is a methodology.

↳ If we want to get reforms in Indian Judiciary then we
should study other countries judiciary.

→ Studied for knowledge, power Relation.

What are diff methods MCP?

(i) Systems approach

(ii) structural function of

(iii) Political Social

(iv) Political Economic

Systems approach: study of Indian const v/s Indian Political
System

→ our constitution operates in an environment we
are going beyond constitution. India's society, culture.

Ex: India & Pakistan (constitution exists but system

will not go beyond). Arm chair approach → for US, Britain

for India $\rightarrow$ field approach $\rightarrow$ we need Behavioural approach.

Systems approach $\rightarrow$ Modern Approach $\rightarrow$ Behavioural approach

Scientific approach

Traditional approach

Value based approach.

There are value free.

System Approaches $\rightarrow$ given by David Easton.

Historical approach

Blamed root system of scholars.
for decline in political science

Political Institution

Parliament, Bicameral office.

Reading constitution

system approach

was suggested by

he was corrected by

scholars by historical
to political institutions

Here he said that reading constitution
is not just enough there's need of
Behaviouralism study.

$\rightarrow$ Study caste, Religion etc $\rightarrow$ to
study politics of India

System $\rightarrow$ Process.

$\hookrightarrow$ system is a set of elements in the state of
interactions & the nature of interaction is patterned.

Ex: Solar System, Circulatory system
only study Heart $\rightarrow$ not enough
 $\rightarrow$ institutions

Judicial system

we have to
read complete
system

If we study complete
system $\rightarrow$ then it is behavioural

there is a process of interaction

$\hookrightarrow$ then we can understand
what is lacking.

System is a set of elements with the state of interactions.

Behavioural movement $\rightarrow$ to a movement to introduce scientific
methodology $\rightarrow$ Systems approach.

Scientific $\rightarrow$ scientific terminology $\rightarrow$ precise (proof)
political science $\rightarrow$ contested.

Scientific consensus $\rightarrow$ precise

physical world lives on certainty

Human world is a probability.

Before Scientific method we have to pre-

→ concepts
→ terminology
→ methodology

System is life factors effect each other

→ Political system is impact on

cultural political culture Economy

there is interactions

Systems factors
Effecting Each other

political scholars

will use
State

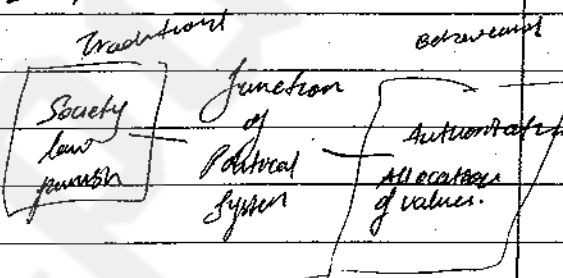

political science is study of political system rather
than study of state. Behavioural Revolution can move above the
point.

functions
organs
structure

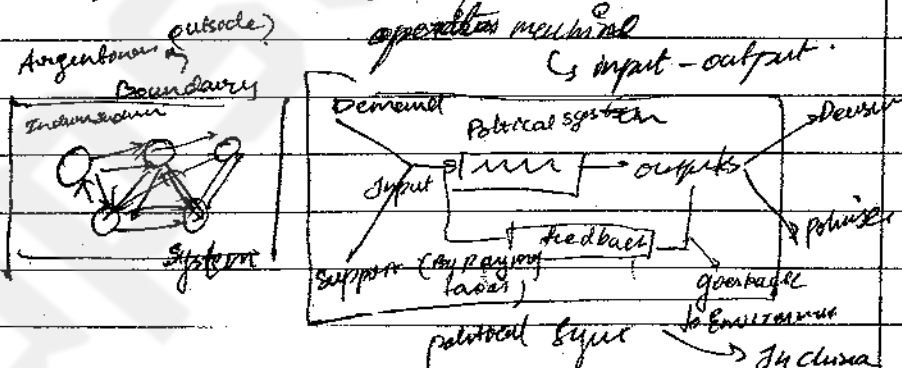

diff this
diff
structure
ex - political

So functions are more
important than structure.
But the structures have to
perform functions

we should not read structure
like institutions but rather
study the functions.

→ we will emphasise political system

→ Marxist & Traditionalist opposed Behavioural movement.

→ used to them its perpetuation of western values.

there would
be no feed back
(as it modelled
in western).

Structural functional approach:

→ It is also a behavioural approach.

→ It is modelled on systems approach.

Purpose : To address some of the criticisms levelled against systems approach.

What are some of the criticisms?

→ Systems approach was criticised as modelled on Western countries.

What is meant by modelled on Western countries?

It means it does not have universal applicability (we can't read ^{English} Chinese).

→ Universalism is needed to build scientific theory.

Hence it was expected that the model can be made more relevant for the study of developing societies.

→ The primary purpose of modern comparative politics

Can it be regarded as improvement in systems approach?

Yes

In what way? (or) why?

It can be treated as more universalist.

→ Systems approach is too general which does not give detailed understanding of the structures & the processes within the political system.

Q To what extent systems approach has been successful in eroding the criticism by Marxist that behavioural approaches are

status quoist, biased & not necessarily value neutral?

Status quoist: They project western models as ideal. Hence prevent the change towards better model (communism). Thus perpetuates status quo.

continuation of the system

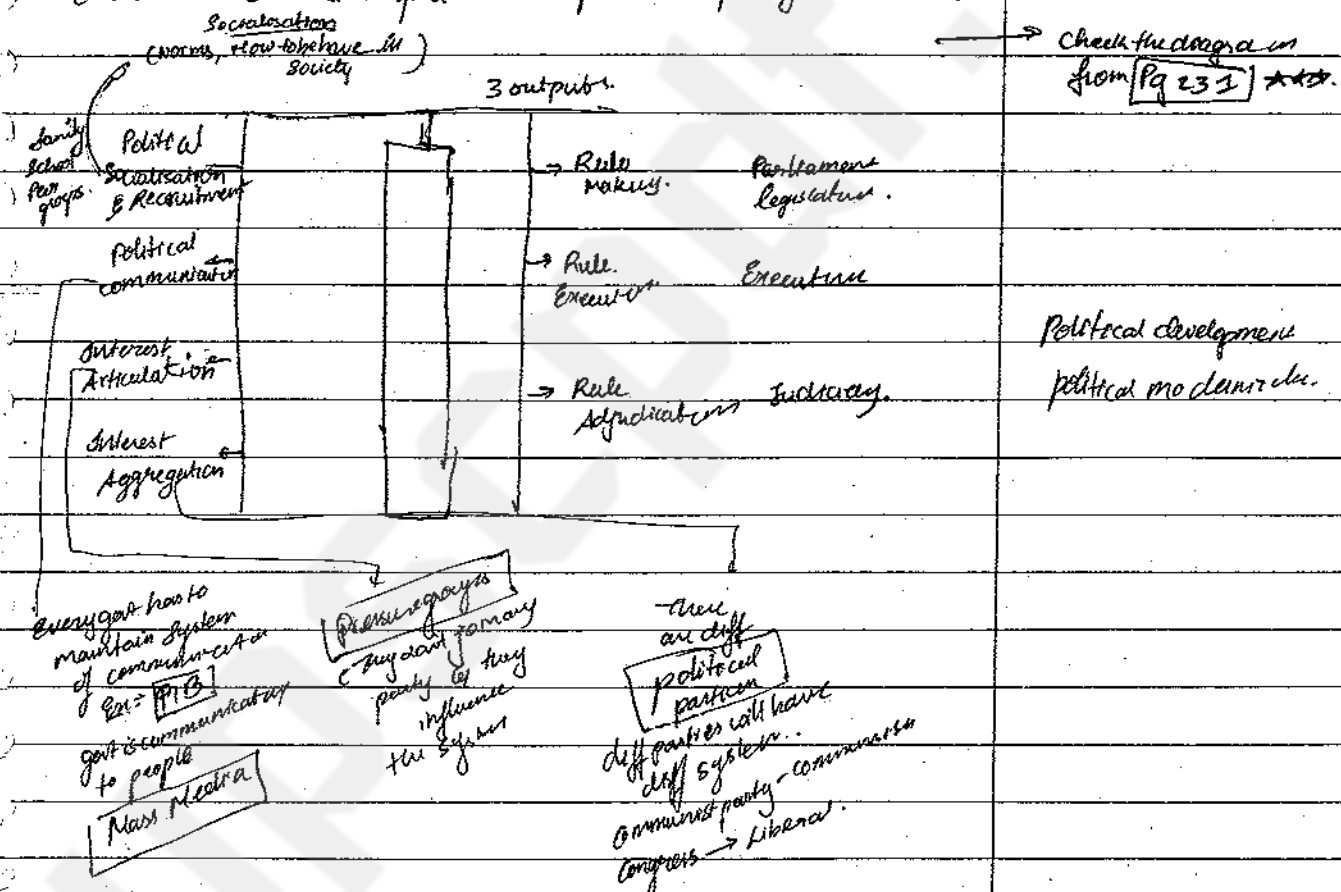

Q To what extent systems approach promotes system maintenance?

System maintenance: Emphasises on function of the system & ignore the disruption, collapse of the system (Revolution).

Q1 How structural functional approach to give more universalist model?

They are influenced by Anthropologists - Malinowski & Radcliffe Brown.

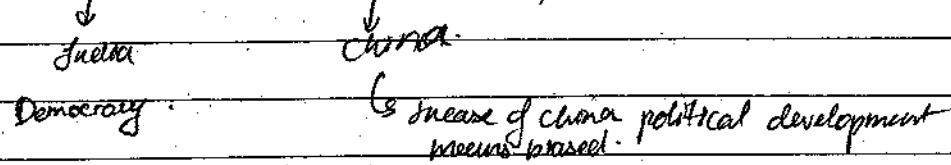

Acc to these scholars, every society has to perform certain essential functions, though the structures performing these functions may vary. Hence universal model can be developed on the basis of understanding those functions which are performed by all political systems essentially though structures may vary. Hence this model is also called as Seven Input & Input Output functions model.

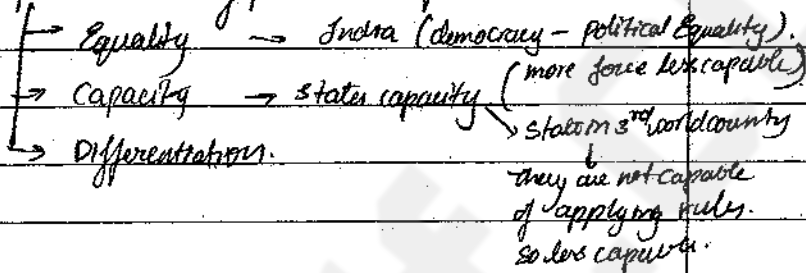

Nov-11 2014

Political Development Approach

Political Dev vs Economical Dev.

Lucanpye gave 3 parameters of political Dev

Development Decay → country may develop but it may take reverse steps.

Development trap → when above 3 parameters are not growing at the same pace causing inequality.

Political Modernisation Approach [Pg No-234]

It is similar to Economic Modernisation.

first It will do Economic development → then people will start challenging the system.

China had said political development approach is to democracy so this theory is formulated.

→ political modernisation want all the countries to become democracy.

→ It is on assumption through modernisation it will go to democracy.

Political Culture Approach.

way of life. diff countries have diff political culture
Ex: India - Britain (there is diff culture in diff countries)

There are 4-types of political culture. (These are 4 models or 4 ^{types} ideas)

- ① Parochial → means staying away. No input — [] — No output.
- ② Subject (means they don't have ^{say} rights, they have to follow whatever laws they make)
- ③ Participant (people play active role in input & output) → Even participation may lead to mobocracy.
- ④ Civic [It's mixture of all ①, ② & ③]
→ It is subjective parochial participant.

India is mostly like subjective.

POLITICAL SOCIOLOGY APPROACH [Pg No - 238]

at present it's not just an approach but it had become discipline. (Vaid work 9)

→ useful for studying developing countries.

→ Political Sociology → Caste + Religion + Language + Electoral Behaviour + etc. ...

Political Economy Approach [Pg No - 242]

RDP

— x — x — x —

PAPER-II . SECN-A

CHAPTER-2

[Pg No:-244]

STATE IN COMPARITIVE PERSPECTIVE.

Characteristics & Changing Nature of state in capitalist.

Ex: of capitalist Economy → USA, Canada -- G7 countries
In general these countries have liberal democratic states.

Accd to the liberals the states in these countries are Neutral.

What is meant by Neutral?

Not biased to any particular class.

However, for Marxists the states are instrumental.

Refer theories of state topic - In political theory.

Marx, Lenin, Instrumentalist approach, Ralph Miliband,

Elitist → Elitist theory of power in democracy.

C. Wright Mills → views of Robert Michels, C. Wright Mills

Muralist → Polyarchy, deformed polyarchies.

Conclusion: Debatable

varies accd to the school of thought.

Changing Nature of state.

haveself fear → welfare state → Neo Liberal → Neo Rightist
↓
Neofacist

Characteristics & changing Nature of state in Socialist

Ex: former USSR, East European States.

Socialism collapsed & all these states embraced democracy.

(In the third wave democracy)

Ex: China from Communism to totalitarianism

Under Xifeng in economy → they have shifted

to state led capitalism (socialism with Chinese characteristics)

& North Korea, Cuba, Venezuela → Totalitarian states

Characteristics & changing Nature of State in advanced Societies

Note: Same as Capitalistic Societies.

Characteristics & Changing Nature of State in developing Societies

Ex - India, China

Developing country is not a homogeneous entity there are lot of variations. The most exceptional country is India.

The only country where democracy continued.

→ Island of Liberalism outside the western world.

→ became democratic in 2nd wave of democracy

→ India is a young democracy.

→ constitutionally India is a welfare state. However in terms of Economic policy it changed from welfare to Neoliberal.

Rest of countries

Most of the countries were democratic in beginning but democracy collapsed, turned authoritarian, they have been puppet states.

Based on dependency school

structuralist school - Hansa Ali

→ Most of them are failed states

→ Revival of democracy but infancy

3. Politics of Participation & Representation.

Q1) Advanced Industrial country & developing societies.

Comparison :- political parties, pressure groups, social movements.

BSP → party

Hindu Aardh
Rait union politen.

Communist party is Burgegeoisie Party

→
Part as Secret
Society

CPI-ML, CPI → they all are merging with Burgegeoisie Party.

Communist party → based on democratic centralism.

INTEREST GROUPS / PRESSURE GROUPS.

Interest groups are called Invisible Empire.

Interest groups & pressure groups are not different.

→ They started focusing

Pressure PG → technique of applying pressure

IG → particular interests

There is no difference. It is the same institutions.

Behaviouralists tried to make more precise

Is there any difference b/w pressure groups & interest groups?

No difference. In traditional comparative politics pressure groups were used. However in modern comparative politics

Based on behavioural movement aimed to introduce scientific methods also tried to build precise terminology.

→ Interest groups is more refined term as it reflects the purpose & role whereas pressure group term was not very precise bcoz it indicates technique. pressure as technique can be applied even by political parties & social movements.

We can analyze the difference by G Almond

Almond

- Institutional (Institution → pressure groups who are pro govt)
- Associational
- Non Associational
- Anomic

pressurise the govt
to make the policy

- Institutional pressure groups are strongest as they were able to influence. Ex: Army, IAS
- Non Associational → are community based caste, language
- Associational → purely driven by interest. Ex: farmers, Assocham.
- Institutional pressure groups → Ex: we can see Pakistan where army pressurises the govt whereas in democracy.
- Associational → It is in developed countries
- Non Assc → developing countries.
- Anomic :- which are not in above 3 are in the pressure groups. Ex: Nibhaya, Jantar Mantar marches.
- It is crowd movement -
- as the people don't have platform to express their views → so it is in developing countries.

Blondel Model - Improved Almond model

↓ dynamic model

Repurposed pressure groups → based on membership

Community

Associational

- Country move towards developing it moves from community to Association

Protective groups :- protect their own group like Agricultural farmers, etc's.

Developmental groups :- Human Rights, Environment.

Lobby's are pressure groups.

There is a scheme that ^{can be} movmt → pressure group
pressure group → political party
movmt → political party.

not so important

Social Movements

Can be called street politics, → these are done by leftists.

first social movements have be the left movement in the west

→ bcz they were not allowed to vote → so they go for protest

& there will be use of force.

→ there will be issue arise.

left → ① workers
② bread butter
③ political movmts

→ In 1960's again social movmts started New-Social movmts
Peace, Environment

New social movmts → Educated class → they want sustainable
middle class

development → they are done by drama, plays etc

→ A. Gupta movmt both → bread movmt & Environmental movmt.

PAPER-I Part-I

INDIAN POLITICAL THOUGHT

- In India there is no time significance.
- India is longest surviving civilisation we are thinking in the same way as ancient times.
- India is known for continuity rather than change.

Time + space

- Ancient
- Medieval
- Modern.

- There is no much difference b/w Ancient & Modern but there is diff b/w Indian & Western.

INDIA vs WESTERN

- | | |
|---|---|
| → more on <u>Religious Spiritualism</u> | → Type of thinking is <u>Rationalism & Humanism</u> |
| → <u>Communitarian</u> (Individual does not have any importance)
our identity is identity of caste | → <u>Individualistic</u> |
| → Should not <u>question</u> they should only <u>obey</u> | → <u>Critical thinking</u> |
| → <u>Pessimistic</u> (or) <u>Backward looking</u> | → <u>progressive & forward looking</u> |

- Blessed are those who don't have history Ex (USA) doesn't have ancient history connect.

Q Indian political thought → It itself is questionable
Aced to western & they say India lacks political thought
wisdom & say India have only Spiritual thinking

- we have been slave for 200 years → Shows lack of political thought
- Hindus are race of losers → BR Ambedkar

Q) To what extent it is correct to believe the existence of Indian political thought? Why this question?

As per western scholars India is not a place to learn the political wisdom. There is no treatise on politics like ARISTOTLE's politics or Machiavelli's prince. India is place to gain spiritual wisdom.

Arguments against:

about west (i) their Ethno Centric attitude.

(ii) Orientalism → as suggested by Edward Said.

(west destroyed all our existence & they created their own view

this is orientalism) → for Hegemony.

Views of Prof. V.R Menka:

There is a fundamental difference in a way west & East look at the things. West is habitual of looking things in Dichotomous

Ex: b/w individual & society, nature & culture, national interest & international peace.

Types of Indian traditions:

There are two classifications.

① Ancient ② Modern.

Ancient:

In Ancient there are two traditions

① Hindu tradition

② Buddhist tradition.

Hindu Tradition:

It is divided into two phases

① Dharma Shashtra — Manusmriti

② Dhand Shashtra — Arthashastra.

What is the basic difference in Dharma Shashtra's & Dhand Shashtra's?

India is known for continuity with very little change. Hence there is no fundamental difference in the two traditions.

↳ It is not a difference of kind rather it is

difference of degree.

created a dichotomy in Indian philosophy where Indian philosophy was not conscious of its own existence to create hegemony. Got indigence.

Shashtra → basis for Muslim Law Manusmriti → Hindu Law.
→ we are not fighting for Religion we are fighting for way of life.

→ Manusmriti explains [Dharma] → Manus is 1st King
→ 1st Brahmin
→ Son of Brahmin
→ Lawgiver.

Pantha → culture/idea.

- used in preamble.
- hinduism is polyethnist

Religion & Dharma are not the same.

→ Dharma is derived from Sanskrit word

→ Dhr → to hold

→ Dharma means which hold the life on the earth. i.e.
Sustenance of life on Earth.

Manudharma → is most important dharma.

Acced to Hinduism two imp Dharmas.

Varma } similar to Plato's concept.
Dharma } → In Manusmriti important role of king
(Spiritual qualities of the soul) is to follow the Varnadharma.
→ Varnadharma should not be understood

Narrowly as caste → King will not ensure completely
The Varnadharma → law of con being → animal or human.
If its not followed it creates unfairness → so the states
punish whoever who doesn't follow (Same like Machiavelli
big of some wrong others can't be endangered.)

Dhr → to hold → Dharma
→ Artha
→ Chakra
→ Moksha

Yogesham is explained as duty of king to help the people
achieve purusharth.

→ Right & wrong of pasts cannot be measured by the standards of present.

Hindu Society → can be called Brahmanical Society

& Dalits were never part of the society.

King → Yogeshwar

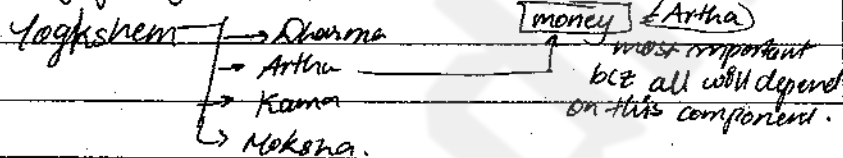

Kautilya

Pg No - 11.

his book Artha Shastra

main subject is statecraft.

What is duty of king accord to Manusmriti?

most important form of Artha → 1st Land.

→ king should keep on increasing land. → & king will give land to subjects to increase Yogeshwar of people.

→ In statecraft → they have to learn strategies of war
→ without war we can't acquire land → 1st Neighbour
land we will acquire.

→ objective of king is to become Chakravarty Samrat.

→ Kautilya's book is book of Geopolitics → a mean acquiring of land

→ Kautilya is Realism → Realism of two types → offensive Realism
The life of king is for well being people → defensive Realism

In the happiness of the subject lies the happiness of the king → Kautilya.

→ contractual theory of origin of state by Kautilya

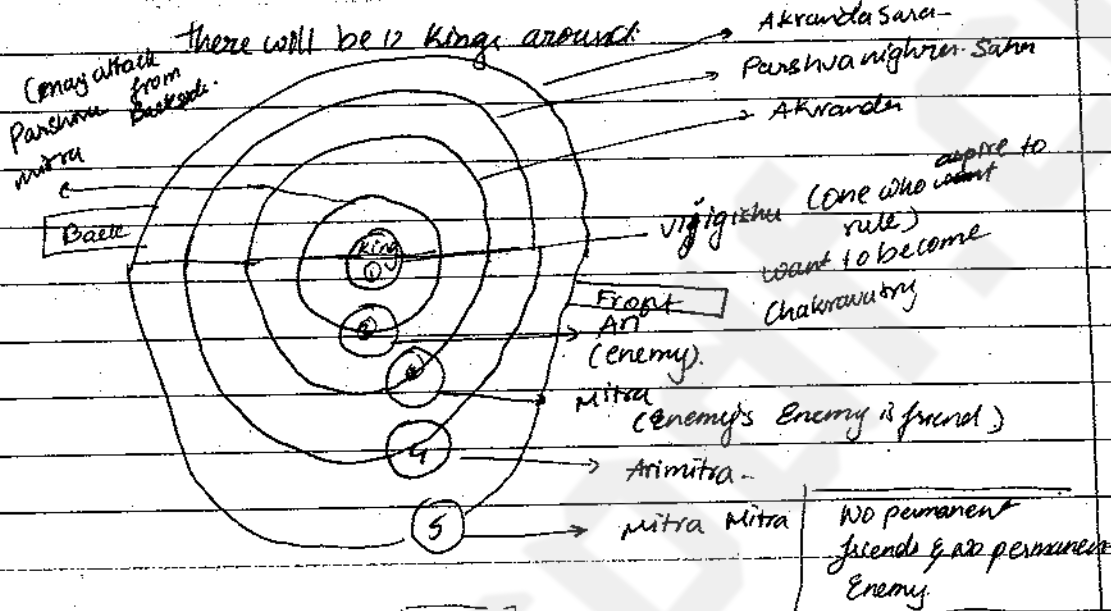

→ In Kautilya main thing is to acquire land through war
war theories

- P. 7-0

War

- Mandala
- Septanga
- 6 fold (Shadgunya)
- 4 upanya.

Mandala → means all directions → it will be looking like circle.

(1) Udasma Neutra

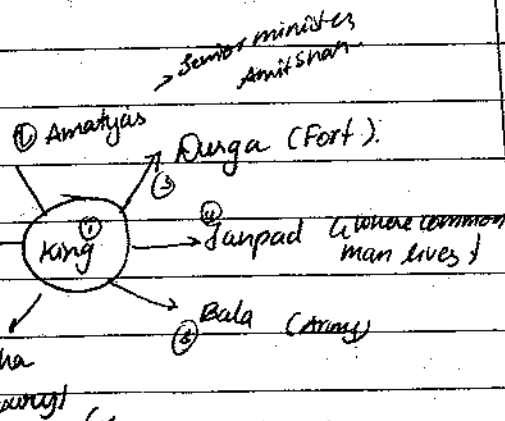

(2) Madhyama Bufferstate is like small state b/w two states

Septanga ⇒ 7 organs (or) 7 limits.

Every state has 7 organs

1st organ is King.

Kautilya says every organ is important but most important is King.

- These are determinants of power (In perspective of IR)
- Strong king converts other elements into strong
- But weak king & strong elements it's just waste.

→ Single wheel cannot run chariot → King has to give amount of respect to others also (or) recognition of sovereignty to other elements also.

Amastyas: like machiavelli he also give advice

He should keep 3 Amastyas as 3 can combine

→ King should keep on checking the integrity of Amastya.

→ for Kautilya most report amastya → Ambandar is a symbol of King. Ambandar should be well versed in Chara Vedas & should be charming & Handsome.

→ King should send spies to Amastyas to check integrity.

→ Kautilya gave a very detail explanation of Espionage.

In Janpad also there should be spies.

BALA → mostly Kshatriyas but needed, can take other castes

Mitra → only have symbolic importance [but no actual relevance] Ex: Bhutan.

By having more mitra's then we can psychologically influence others.

Buddhist SCHOOL OF THOUGHT

Buddhism can be called as Rebel child of Hinduism. Buddhism can be known as protestant of East whereas Hinduism → Brahmanism.

Buddhist → against caste system.

→ Have noble

→ The world is full of sorrow bcoz of Ignorance
→ to leave desire, follow 8 fold path

→ Best King is the one who leaves the kingdom.

His source of good life is leaving our life also.

→ If we achieve political power then our powers become's limited.

→ Chakravarty - not by weapons but by virtues, does not rule territories.

In Buddhism → Social contract is among the people.

In Buddhism root cause of formation of state is materialism.

Due to this fall of man started → later they selected king.

- During Buddhism it was Ganpads so it was repulsive in nature
→ Acc to Buddhism King in most noblest purpose, moral, gentle, philosophical.
→ Real Idea of kingship → can be seen from Ashoka
Idea of peace & prosperity.

Sir Syed Ahmed Khan

Pg NO- 32

- contribution to Education of Muslims.
- Same as Raja Rammohan Roy in Muslim version
- also a controversial figure & criticised both Hindus & Muslims (orthodox).
- Hindu's criticised bcz considered him as originator of two nation theory & formation of Pakistan
- Muslim (orthodox) → liberal interpretation Quran, promotion of science & Rationality which clergy will not like.
- Bcz he started as advocate Hindu-Muslim unity & Ends up as Muslim 2-Nation theory. [Same also happened to Mohd Ali Jinnah]
- British are responsible to 2-Nation theory is convenient & shifting all the wrongs on the British.
- In reality Jinnah is responsible & also blaming British is also wrong. Actually Jinnah had not created Pakistan, The main factor & reason in Brahmanism.
- not as a person but Brahmanism as a Ideology it will never let the country to become one. If it continues it will lead to many

Partitions:

Brahmanism → Strongest hegemony & Ideology which is continuing since ancient times to present [i.e. other is patriarchy].
Brahmanism is an Indian version Hitler version of Aryan Society.
→ Vivekananda considered Brahmanism is leading cause for fall of society so he discuss about Hegemony.

↳ It is a hegemony which generates consent in favour of Brahmanism.
↳ Brahmanism is like Elitism: (They ^{say} become elite based on life style) Hinduism → endogamy → within own community for purity → purest is good.

⇒ Hinduism is a concept based on purifying & pollution. Endogamy most prominent in Brahmanism. Manus proposes very strict punishment who go for inter caste marriage.

⇒ Brahmins portray themselves as Exclusive [not drinking water in any other brass]. Showing they belong to diff class.

⇒ Vegetarianism started very late. Hinduism initially not vegetarian. In vedic period beef eating is not prohibited.

⇒ In Rig Veda guest is known as Gohasta. For whom cow is killed for meat.

⇒ Brahmins created a discourse that eating animals will make them impure.

⇒ Accd to ~~Shirazi~~ ^{Shirazi} Muslims & Hindus can't come together bcz there is no inter dining (1) inter marriage. Shirazi was not wrong it is ^{wise}.
Syed Ahmed Khan.

Factor 1 Language controversy at Awadh, Hindi became a lingua franca (official language) but Urdu was official language. He felt pain how Hindus (2) Muslims are behaving, neither of them will agree & he said in future there will be more clashes.

→ Muslims of India are the one who are facing creation of Pakistan.

→ There is no constituency (3) no leadership.

→ There is diff b/w Hinduism & Hindutva.
Brahmanism.

Syed. AHMED KHAN

- Science & Islam No controversy (They can carry both Quran & Science book in other hand)
- If someone go for science then they will start questioning (Rationalisation)
- reject the customs which don't have logic

Suggested SAK as leader who is needed by Muslim community at this time.

- SAK had a very constructive view how to address stagnation & reconstruction & for that modern Education is the only way.
- founded society & Journal for Scientific Research.
- His family is in tradition of Mughals [He saw both growth & fall of Mughals] after 1857 was the state of stagnation for muslim.
- Revolt of 1857 was considered as conspiracy by Muslims.
- started persecuting Muslims & promoting Hindu.
- He wrote book on R. Root cause of Revolution & he was showing that it was not Muslims conspiracy rather it was bad policies of British.
- unless they don't have capacity it's waste for fighting.
- start taking help from state to betterment of communities.
- through pamphlet he expressed the loyalty of Muslims towards Britain.
- wise policy was to stand on feet first then u can challenge West.
- He was far sighted, practical, & realist.

SR1 AUROBINDO G?

- Q1) Aurobindo's Theory of Nationalism.
- Q2) Aurobindo's views on freedom.
- Q3) His views on human unity.

Introduction: → shifted towards spiritualisation.

- Gandhi had forwarded legacy of Aurobindo but never acknowledged that even in terms of Swaraj → full freedom → given by Aurobindo.
- passive resistance → Satyagraha → given by Aurobindo.
- Aurobindo can be considered as first mass mobiliser can also be considered more than Mahatma.
- Accomplished philosopher but not political.

Aurobindo started his career as in politics but later on shifted towards spiritualism. He is treated as the messenger of India by Tagore.

Aurobindo is known as great synthesiser.

What he synthesised:

He synthesised the philosophical traditions of East & West.

No one before Aurobindo & after Aurobindo had given the theory of Nationalism. He is prophet of Indian Nationalism. His father is greatest critic of Nationalism.

- He came across society called Lotus & dagger.
- His father wanted him to join civil service.
- Later he became principal in college & started writing articles.
- Dissatisfied with congress.

Aurobindo's Theory of Nationalism:

Aurobindo was dissatisfied with the moderates. Aurobindo started writing the series of articles in "Indu prakash" with the title "New lamps for old". In this article he criticised moderates for following reasons.

→ Moderates view on British:

Acced to them British rule is Blessing in disguise.

Acced to Aurobindo when we hold British rule as blessing in disguise we weaken the morale of those who want to fight the British. Acced to Aurobindo foreign rule can never be a blessing. Why it's not blessing?

→ The foreign rule always prevent the natural growth of nation.

on they work for their mother country

→ Aurobindo was against the goals of moderates. The moderates didn't want complete independence.

→ Aurobindo was the first person who talked about "Poorna Swaraj".

→ Aurobindo was against the methods proposed by the moderates. In place of constitutional methods Aurobindo proposed passive resistance.

↳ (i) Aurobindo was not against constitutional methods but British govt in India was not constitutional.

Q12. Aurobindo was also not against revolution or violence

However, he believed that we don't have capacity to wage violence struggle. Hence for Aurobindo passive ^{or} resistance is the best option.

What will come under passive resistance?

→ Boycott

→ Swadeshi

Why it will work

Acc to him British will leave India only when it will become burden & unprofitable. Hence we should strike at roots of colonial state.

Aurobindo was against moderate view on Indian Nationalism. What was moderate view?

As mentioned by Surendranath Banerjee "India is a nation in making" [India is becoming nation] [one of the effects of foreign rule].

Aurobindo challenged moderate, acc to Aurobindo India has always been a nation. Acc to him the emergence of India as a nation is not dependent on "Congress Pandal".

Note: Theories of Nationalism

There are 3 major theories of Nationalism.

(i) liberal theory → Gellner

Acc to liberals Nationalism is a product of modernity.

Emergence of a nation is a evolution.

Modernity = Industrialisation, Urbanisation.

(ii) Marxist theory of Nationalism.

Scholar: Benedict Anderson. Acc to Marxist, Nationalism is Bourgeois concept.

He calls Nation as "Imagined communities".

(iii) Cultural Nationalism:

Scholar: Herder (German School)

It is a strongest theory of Nationalism. Acc to this theory Nation is natural. (It is organic)

According to them Culture is the basis of Nationalism.

Culture is a way of life & can be expressed in different ways like language, Religion, Race.

Nitrobindo's theory of Nationalism is an example of cultural Nationalism. It means according to him India is a natural nation.

It is not dependent on the foreign Rule for its existence.

Sources of Influence on Aurobindo's Theory of Nationalism.

(i) German philosophy:

(ii) Vivekananda: [Neo-Vedantism].

Vivekananda was a critic of Brahmanism. He believed Brahmanism responsible for lack of unity in the country. He was critic of caste system (casteism). He rather wanted to bring the Vedantic or Vedic Ideals.

What are Vedic Ideals?

The Idea of Human Unity. [Unity in diversity given by Vivekananda].

Vivekananda supported Santana Dharma [Eternal Dharma].

Isaniyat → ultimate dharma.

same as cosmopolitan.

Vivekananda → cosmopolitan vision.

during Gupta period Brahmanism became too prominent.

cosmopolitan.

It was Vivekananda who gave idea of Unity in diversity. Amidst the diversity in India there exists fundamental unity.

[we all are children of god.]

fundamental unity is just not limited to the people living in the territory it goes beyond. (cosmopolitan vision).

Vivekananda inspired youth in India. He held that

Nationalism should be the religion of youth in India. Till the time we will not have similar level of commitment for Nation, which we have for our Religion, India will not be able to end the foreign yoke.

(iii) Bankim Chandra Chatterjee:

He was inspired ^{by} the patriotism advocated by

Bankim chandra Chatterjee (BCC)

(i) BCC is spiritualised India as a Nation.

What he spiritualised?

He present India as a mother goddess: India as goddess Shakti.

What is Shakti?

(i) By using the symbol of mother goddess he wanted to communicate that we all are children of mother India. As the sons & daughters of Mother India we should not be ready to see the mother in Bondage.

(ii) He used the symbol of goddess Shakti to frighten British. He wanted to communicate the message that British cannot defend themselves against the power of millions of mother's children of Mother India.

Aurobindo's Views?

Aurobindo incorporated the above ideas & estbd that India is a natural nation. He spiritualised the concept of Nation. Accd to him Nation is divine. Every Nation has a spirit, spirit never dies.

What's nation accd to Aurobindo?

Nation is not a piece of land. Nation is not a collection of human being.

Nation is not a figure of speech. Nation is not a fragment of people imagination.

Nation is not a political programme. Nation is not an intellectual position.

Then what is Nation, Nation is a faith, Nation is a religion,

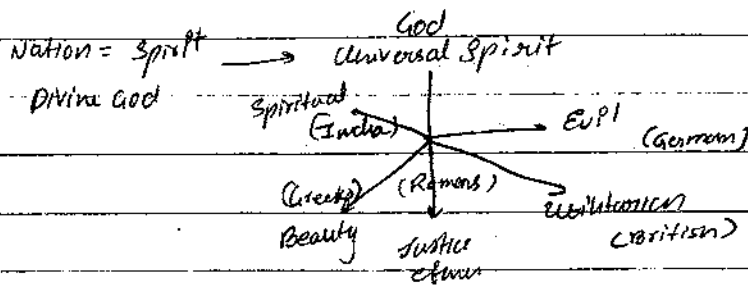

Nation has spirit & nation is divine.

2nd Nov 2019

Aurobindo in his theory of Nationalism also Explain

a) Inevitability of the rise of India as a nation.

b) purpose of Rise of India: To benefit the humanity.

→ Anubindo Ghosh takes the concept of Universal Spirit found in German philosophy

→ at different point of time universal spirit (or) god has represented itself in different nations/civilisations. Through these civilisations god wants to give message.

Acc to him Greeks represent the dimension of beauty of the universal spirit, Romans the dimension of Ethics, British reflect the Materialist & Utilitarian dimension, whereas Fascism is a reflection of evil spirit.

On the other hand India is a reflection of spiritual dimension of universal spirit.

→ The world will get the message of spirituality through the voice of India.

Hence, the rise of India as a nation is inevitable. Universal spirit wants the rise of India. Others should support the cause of India as a nation bcz it is in their interest.

India cannot spread the message of god from the state of Bondages. God has chosen India to spread the message & i.e. the only way humanity can be saved. Acc to Anubindo

Gosh there was a time when Universal spirit was sleeping. It has resulted into the growth of TAMAS or darkness. It has resulted into decline of India.

He believed that British rule was a tragedy.

→ Hammer of god to

Eliminate TAMAS.

What should be the approach of India in future?

Inspired by GITA he suggest to follow the law of one's own being.

Reference Same as Bankim Chandra Chatterjee

What is being?

It means human being.

As mentioned in Gita Rebirth takes place when we follow the law of our being. When we follow the law of others being it is like Successful Suicide. It will not result into our Rebirth as Human.

Hence, India should avoid imitating others. In 19th century India was imitative, forgetful, artificial. Imitation of others leads to death & sterilisation.

don't imitate
others
Copy it as
imitating dca.

There is
no
freedom
in
Indian
philosophy

THEORY OF FREEDOM:

→ Acc to Anubindo the desire for freedom is lodged deep in human soul. Hence thousands of arguments against are powerless. [British say not to ask for swaraj but swaraj is what gives freedom]

not to be slave

What is the purpose of freedom?

Freedom leads to happiness.

Happiness comes from Excellence. There is a inherent desire in all humans to achieve Excellence, perfection.

In Anubindo we see the evolution of Idea of freedom from the political domain to the spiritual domain.

It means from the Idea of SWARAJ to the Idea of Sacchidanand.

What was Swaraj?

The Swaraj was the goal of freedom movement. The Idea of Swaraj kept on evolving.

Anubindo was the first person to talk about Swaraj in terms of Complete Independence. Anubindo has analysed the existing ideas of the ways of life, to ground, what should be the path of India.

He has analysed the Liberal Capitalist Idea of freedom.

What is Liberal Idea of freedom?

Such Idea is not the Idea based on the value of atomistic man.

Such Idea is not conducive for the Society. It may lead to collision & Chaos. In such Idea we don't take the concerns of the others.

It can never result into peace.

Atom
cannot
be human

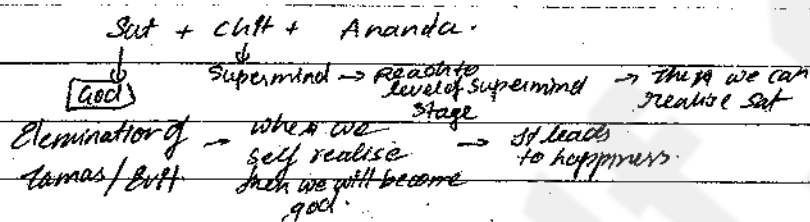

He has also analysed the socialist way of life. It does give imp to society but sacrifices individual. Hence, according to Anandindo we should have an idea of freedom which can establish peace & harmony in the society without sacrificing individual.

Anti (being sacrificer)

योगशान्ता

↳ Rather which should lead to the perfection of individual.

↳ The blossoming of divine within us. In this context Anandindo Gosh has given idea of Sachidanand.

True happiness / Anand comes with Realisation of truth (or) God.

This requires acquiring at the state of Supermind.

Reaching the stage of Prabhu, Tap / Sadhaka of 409

Ideal of Human Unity:

The ideal of human unity comes from civilizational values from India based on Sanathan dharma. According to Anandindo

Aggregation is the law of Nature. If we want to resolve the problems of our life at present, we have to come together. If we do not understand & act according to Nature then ultimately Nature will destroy us. His ideas become all the more relevant in the present times when we see the rise of global threats. No single nation not even the super power is capable of dealing with such problems on their own.

Supermind → rational.

GANDHI

→ Non-violence

Gandhi acknowledges his own mistake

Gandhi acknowledges his own mistakes & the most important thing is that is the learning towards perfection.

→ continuity of end & means

Gandhi → Nonviolence

- Faith
- creed
- Religion

It is based on fundamental value of Humility

→ violence belong to the world of animals, Non-violence is for human

Tolerance & non-violence are not same. Tolerance is negative word.

→ Non-violence is substantive & positive idea by the feeling of love when we treat other person as brother. Humanity can survive on basis of humanity.

→ Non-violence is only way world can survive.

→ Gandhi says those who all want attainment of god they have to practise Non-violence.

→ Gandhi says he doesn't know god but he says that he knows the path which may reach to god i.e. Ahimsa. he said this by Ends & Means theory.

→ Ram → Symbol of Sacrifice, Righteousness.

→ Gandhi believes that in every human being there is a desire to attain God.

→ we cannot degrade anybody without degrading ourselves.

→ Eye for eye will make the world blind.

→ Gandhi said "I will have to take respect ^{credibility} of my enemy".

But he became encouraging of non-violence

SATYAGRAH: A practice of Non-violence.

all of Gandhi's movements from Champaran to ^{SA} Quit India he had practised this only. He called his movements as Satyagrah.

→ Bcz to gain ^{more} moral background in battle.

→ when we don't be moved with spiritual view then it will give life for movement.

→ Indian National movement → fight for truth → it is a battle b/w god & Satan. → it is a battle b/w truth & falsehood.

→ Idea was to motivate Indians.

→ we have to defeat enemy ^{ex} psychologically first by depicting them as Ravan & Indians as Ram defeating them he is spiritualising the battle.

→ If Britishers would have brought good governance (Ram Rajya) then we couldn't have thrown out. Ex = Ploughshares : only foreigners whose distrust are British as they never accepted Indians as their home land.

→ Gandhi himself explained difference b/w

passive resistance

v/s

Satyagraha

→ Not using force bcoz he doesn't have ability to use force & its compulsion to be non violent

→ It is choice to be non violent

→ feeling of Enmity

→ According to Gandhi there is no Enmity. Here no fighting is on cut & not cut & alien.
→ It is type of battle which can convert enemy into friend
→ It is not weapon of weak.
It is weapon of strong.
It means those who are morally strong.

SWARAJ

In India there is only person's changing but not the idea of rule.

→ Gandhi took different dimension of SWARAJ. → It's not just freedom

→ from foreign rule rather it's victory on oneself. on self control of passions.

→ Swaraj → means ruled of Ram Rajya → It is Kingdom of God.

Existence of state is influenced by my weakness
(said to Gandhi) Leo Tolstoy
It is stateless society
(Kingdom of God is in you)

as other agency is needed to control
rather we should control ourselves

→ Gandhi's idea of ideal state is represented by oceanic circle
there is no hierarchy in the society & constructive view of power.

→ Gandhi says the power in society should be like waves in ocean where power is transmitted to others

→ Gandhi wants to reduce the role of state & go for panchayat system
for voluntary system.

→ State is not compatible with Ahimsa as state requires force - So he calls state as "state's machine"

→ Swaraj in Economic sense → Khaddi

Social

→ Untouchability, Inequality

Cultural

→ We should keep windows of the house

open but not keep door closed. [We should not forget our own culture & accept good from other cultures].

Sarvodaya → Gandhi's concept for Socialism.

→ translation of John Ruskin's book by Gandhi into Gujarati.

→ Two principles → (i) Bread & Labour.

(ii)

8th Nov 2019

Pg No: 63

Bread Labour: we should understand dignity of labour. we should also perform physical labour.

Enough for need but not for human greed.

Gandhi is critic of Modernity.

modernity → Individualism

He didn't criticise it because it was better rather than its inhuman.

British Imperialism, Hitler's fascism & also modernity.

→ It was Gandhi's war on position on civilisation by fighting against modernity.

→ Gandhi want to explode the British discourse that they are on mission of civilising human.

Pg No: 65

Moremarrell

Ends & Means theory: Modern civilisation separate Ends & Means.

→ role of ethics had decreased

→ politics without ethics is like a death trap

→ Gandhi influenced by Gokhale → Bringing ethics into politics.

M.N. Roy:

① Ideational Journey of M.N. Roy

② Radical Humanism

Introduction:

As suggested by Sudeepth Kaur Raj, He was a remarkable failure. → Political competitor & critic of Gandhi.

→ M. Roy → Left → Marxist.

MN Roy → is like karniyakuma & Gandhi → modi.

→ M.N Roy kept on changing his ideas.

Journey

1st phase up till 1920's: He was initially revolutionary (Yugantar - Bengal)

→ Revolutionaries in India send him abroad to procure arms.

→ He went to USA & attended lecture given by Lala Lajpat Rai

→ He asked certain question on Congress vote to poor & he didn't get answer. → then he went on search of answer.

→ In USA he came across the idea of Marx. Then went to Mexico to know Marx better.

→ He became the founding member of communist party of Mexico.

M.N Roy in India:

When he came back to India he did

→ he became critic of Revolutionaries (as they don't have understanding)

Revolutionaries lack practicals (Marxist method.)

→ He became critic of Gandhi (Bcz Gandhi called of NCM)

Criticism on Gandhi

→ Gandhi is not working in the interest of the masses.

→ Gandhi is an agent bourgeoisie class.

→ He held that Congress & Gandhi will ultimately betray the masses & join the hands of imperialist.

Note: Sudeepth Kaur Raj suggested that he committed the guilt of Metonymy (superficial understanding & going for false comparison)

→ Aced to him Gandhi's non-violence is a violence against masses.

→ Gandhi is a medieval man. (He brings religion in politics ex: khilafat)

→ He had no faith in Gandhi's Charkha Economy. Accd to him Kadi cannot fulfill the need of clothing in India. Mill made clothes are cheaper & durable.

→ Accd to him Gandhi was a weak waterman (no blood), looking for appointments of Vice Roy.

→ He was extremely critical of Gandhi's decision to call of NCM.

→ Struggle - true - struggle

→ Chaudhanna

Accd to M.N. Roy why Gandhi called NCM?

bcz Gandhi feared masses will capture the power & congress & Gandhi will lose the leadership.

M.N. Roy's debate with Lenin?

By this time M.N. Roy became a recognised personality in Marxism. Lenin invited M.N. Roy to communist International why he invited?

Lenin wanted to decide "what should be approach of communist International towards freedom movement going on in colonies".

However, M.N. Roy & Lenin ended up in debate & ouster of M.N. Roy from communist International.

What was Lenin's approach towards colonies?

2 Stage Revolution

1st Stage: → communist International should support the nationalist parties

→ ones Imperialist are thrown out communist can establish their power.

Views of M.N. Roy.

(i) He should not play with the ideas of Marx, Marx was against the idea of Nationalism.

There is no need for 2 stage revolution. He held that masses

in India are ready for communist Revolution.

1930's 2nd phase: He joined INC he became sympathetic to Gandhi & critic of Marxism. [Soviet-critic]

→ He acknowledged Gandhi's role towards masses. He acknowledged that Gandhi's programme is in interest of

masses.

Why he joined INC?

He thought that He will capture the congress ^{from within}.

He even formed League of Radical Congress men.

In this stage he attempted critic of Marxism. He held that he is not rejecting marx rather he is giving Humanist Interpretation to Marx.

He reinterpreted the following principles of Marx:

(i) Historical Materialism (It is not a scientific theory.)

Marx undermined the role of Ideas

(ii) Dialectical Materialism → It is actually Idealism

(iii) Class Struggle → History is not a product class struggle rather it is class cooperation.

(iv) Surplus value: Surplus value is not wrong but when it is not distributed equally then it's wrong.

(v) Revolution: for Marx Revolution Require change in mode of Production = for M.N Roy change in mode of thinking.

1940s.

3rd stage :- → He came out of INC

→ He criticised Gandhi for Quit India Movement.

(bcoz it will weaken democracy)

→ He estbd his own party known as Radical democratic party.

He wrote thesis of his party.

→ However he disbanded his own party he became critique of parties. Why?

parties pursue Immoral politics Hence he called partyless democracy. Instead of party he planned to start movement. Later on he turned towards philosophy.

Philosophy of M.N Roy

His philosophy is known as New Humanism. Later

on he changed title from Newhumanism to Radical Humanism.

What is Radical Humanism?

What is humanism? It is a philosophy of Renaissance.

Why he calls his philosophy as New Humanism?

His humanism is based on experience of ages. Later on he changed it. Radical Humanism.

Why Radical Humanism?

He felt that this term is better to explain the purpose of his philosophy.

What was the purpose of Radical Humanism?

He defined Radical Humanism as philosophy of freedom.

If people want Real freedom they should establish their way of life on the philosophy of Radical Humanism.

What is the theme of Radical Humanism?

Rationalism.

Note: M.N. Roy represent those sections of Indian society which can be considered as Rationalists.

Rationalists are → Atheist.

→ fight against superstition with the help of science.

What is the theme of Rationalists?

They want Society to be based on Scientific Reason.

Radical Humanism has 3 components:

(1) Reason. → Life should be based on Reason.

Aced to them the origin of Reason is in man's struggle for Survival & not religion.

(2) Ethics.

He rejected Religion as the base of Ethics. Reason as basis of Ethics. (Ethics are do's & don'ts).

Ethics are set of Norms made by people at diff points of time for convenience. Hence we can eliminate our dated customs & traditions.

(3) Freedom:

The objective of life is attainment of freedom.

The Real freedom consists in freedom from all sorts of fear.

Communist in India

they never made their own idea rather they imposed idea.

→ we can see in China.

→ people were not able to understand.

→ Congress was

better alternative acted as India left.

ethics @ time & situation also passing & culture & social elements changing.

what all sorts of fear?

Even from fear of god.

What is god?

freedom from the fear of Supernatural i.e. Superstitions
MN Roy proposed Radical democracy (grass root democracy)
as a means to implement the philosophy of Radical Humanism.

Radical Humanism liberates man in true sense. He
compared Radical Humanism with other philosophies.

(i) Fascism. Fascism suppresses man under the collective ego
of Nation.

(ii) Communism - It suppresses man under the collective ego of
class.

(iii) parliamentary democracy (liberalism) ∴ does not give scope for
direct participation hence the propose grass root
democracy.

Radical Humanism is a cosmopolitan vision. It aims to
create spiritually liberated persons. Radical democracy
stands for Moral politics.

EMBEDKIR

Pg No: 80.

Introduction → Tallest leaders among dalits in India

→ critic of Gandhi
→ Ambedkar was Anti National.

→ Idea of India as Nation was not accepted bcz he
believed that Nation → fraternity. (its absent)

→ Ambedkar represent largest section of society → Bahujan Samaj

→ Ambedkar believed that once britishers leave we cannot solve
problem of dalits ∴ he can't bargain

→ Agreed to Gandhi → first we should free from foreign rule then
we can solve internal issues

There roles were contemporary

→ Father of Nation = Gandhi & Father of Constitution = Ambedkar
Where Gandhi's role ends Ambedkar's role starts we can't see

Ham as opponents.

- Life → belongs to Mahon → untouchables
- lucky enough to get education in foreign universities
 - influenced his father by Jyotirao Phule & liberal scholars of west.
 - No one used to come for services as a lawyer.
 - Even dalits become educated they will still face stigma so he says to completely remove untouchability.

How to remove untouchability?

▷ Mahad Satyagraha → take water from same well as used by upper caste Hindus. Gandhi did not support Satyagraha & Gandhi said for time being it should restrict itself to foreign & internal lakes.

So he felt only way is British → so that he can gain upper hand so they can change the way of life.

→ Ambedkar never believed that Gandhi was never kept any plan to keep away abolition of untouchability.

→ Gandhi → was political leader → so people will respond to politics

[Gandhi knew his limits]

Ambedkar on Social justice.

Social justice — untouchability (Indian concept)

Social justice — class based (western concept)

Ambedkar was not satisfied with origin of varna system.

So he went to Anthropological understanding. So he explained real aspects of caste system.

11 Nov
10 Oct 2019

Untouch

Scientifically Anthropological

Shudras
OBC

Acc to Ambedkar there were only 3 varnas at first. If there Shudras are also Kshatriyas, Kshatriyas → Landowners
→ Agrarian community

Those Kshatriyas which rejected supremacy of Brahmins. Then Brahmins brought system where they were not pure & others are pure.

→ In India there is confusion b/w Kshatriyas & OBC's (Ex: Marathas).

North India (Yadav → also Kshatriya to Vaishya).

→ caste is like class ⇒ lower caste means lower class.

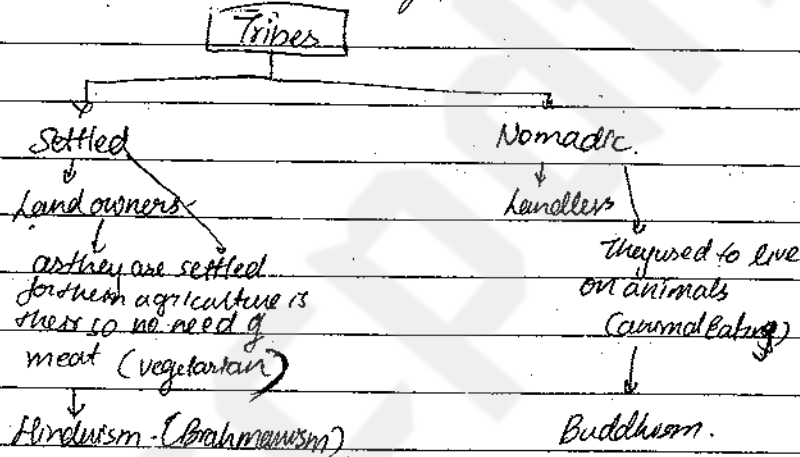

→ untouchables were not Hindus ^{so} they are out caste.

→ Ambedkar calls Dalit (From Channa) ^{vegetarian}
↓
Dalit ≠ split (to form)

→ Everyone initially are tribe ⇒ Nomadic tribe Equality will be more

↳ If they are settled then there will be inequality

as lands other sources become prominent.

→ Brahmins want Buddhism to come into their sphere. later they are subjugated.

→ Now Nomads want to settle so they used to settle outside village. So they came into agreement that landowners would provide food in return to provide security but later it was exploited - by Ritualistic & Religious Rivalry.

→ They made them to do all types of work which they don't want & later other castes also followed this procedure.

⇒ Religious, Economic → lead to untouchability.

They were poor & don't have land.

→ There is no diff b/w Caste & tribe.

Caste & tribe words are used inter changeably,

→ 5th Schedule → only focuses on development

6th Schedule → protection of culture & tradition

Reservation →
→ Ram Singh case
→ NALSA case.

→ Reservation → haven't brought equality, harmony, prosperity
→ only few of them are benefitted by this procedure.

Untouchability $\xrightarrow[\text{without}]{\text{cannot end Caste system without}}$ Brahminism
↓
Hinduism

i.e. why → dynamic on Manusmriti & Vedas. → So only option
is for conversions → Buddhism → It's not matter of choice not to
be born as Hindu but to die as Buddhist.

→ Gandhi didn't favour & Ambedkar favoured conversions.

→ Hinduism → Brahminism (Elites) → Based on concept of Purity & Pollution

i.e. how it became closed segment → Stopped eating Non-veg (vegetarianism) So practised Endogamy

Until we end Endogamy → Cannot End Untouchability → Even 21st cent inter caste marriage are not seen as common → Honour killings also.

Accd to Ambedkar, Hindus are race of losers to Caste Islam &

Christianity → These are missionary religion → aim to expand.

Like Shroddhanda (Brahmism) as convergence is not possible → But in Hinduism not possible
(Juddhism) I cannot know to keep in which Caste

Hindus in a main reason bcz of failure of India

The said Hindu is a madman → make poor to remain poor & illiterate

to be illiterate only & not giving them chance to grow.

→ They can touch animal excreta but can't touch untouchables

→ Accd to Ambedkar Caste Reservation → Compensation of Historical injustice.

→ Indian constitution only takes of caste but not Caste system.

Ambedkar

Gandhi

- Varna & caste same ^(as shown by Ambedkar) → Varna & caste diff. (Shouldn't be eradicated)
- objected use of Harijan → Harijan.
- He preferred word dalit
- against panchayat Raj, believed in stateltd system → Critic of state
- Harijanik Sangh of Harijans as poorhna & saying no concern for Dalits by Gandhi
- led to Ambedkar

— x — x —

INDIAN NATIONALISM.

Q Perspectives on Indian National Movement.

Q Liberal, Marxist, Socialist, Radical Humanist

Q Dalit

Marxist & Dalits → most questions come from?

What is the basic issue?

(The meta narrative)
The conventional approach is that the political activities which were happening in India b/w 1857 to 1947. They are called as National movement.

Conventional → meta narrative (which is b/w 1857 to 1947)

Why there is a debate?

There is a debate bcoz many people at that point of time & even at present don't recognise the existence of India as a Nation. When there is no Nation how can there be a National movement?

Country of India is not a Nation
It is a geographical entity

Beginning of debate

British historians & Administrators.

As to them India is nothing more than a geographical expression.

(India is place in map but not in heart) for Ex =

John Strachey: ^{book} India ^{is} administration & progress - 1883

The only feature & the essential thing about India is that there is no India.

John Seeley: ^{book} Expansion of England - 1883

India as a nation is a vulgar error which political scholars

should eradicate.

Lord Dufferin: Challenge Indian National Congress (INC) by suggesting that it represents microscopic minority.

Lord Curzon, Herbert Risley & others never recognised India as Nation rather tried to give statutory basis to the separate existence of Indians in terms of caste & Religion.

The School of Cambridge School like Percival Spear, Louis Namier, Snit Seal also do not recognise the political activities on Subcontinent as National movement.

Aced to them it was a communal movement there was no National leader, they were Community leaders & Power brokers. They were not inspired by any grand idea they were guided by "Animal Instincts" partition was natural culmination of 100 years of communal politics. politics in present India is not different.

Nationalist School:

The nationalist leaders Responded to the challenge

(i) Liberals / Moderates / Early Nationalists:

They accepted India as not a Nation but also held that India is "Nation in making" (Surendranath Banerjee)

(ii) Cultural nationalists / Extremist:

Aurobindo Ghosh challenged both British as well as moderates. He held that India is not a nation in making rather India was always a Nation.

Nationalist Historians: (i) Dr. Tara Chand

(ii) R.C Majumdar

Also challenged Imperialist School. Aced to them

(i) INC was a nationalist party it had nationalist leadership

& nationalist ideology.

(ii) There was a definite desire among Indians to emerge as a Nation.

(iii) Marxists views on Nationalism:

Nationalism is an invented tradition in the interest of bourgeois class to weaken the solidarity of the masses or poor.

His Roy: book "India in Transition"

Aced to him Gandhi was a bourgeois leader his

programme was against masses. He used to call of movements when he realised marxist will come to power.

→ Ragini Pal : book - India today.

Gandhi was a marxist of Bourgeoisie.

→ A.R. Desai : book (Social Background of Indian Nationalism)

Gandhi's ideology emerged out of Historical needs of Bourgeoisie class

→ G.M.S. Nambudripad : book - Gandhism - Gandhi's vision

Gandhi did involve masses yet gandhism movement was

"Restricted mass struggle"

→ Sumit Sarkar : book - Modern India.

He warns marxists, not to be casual in their analysis of Gandhi

It is true that the programme of Gandhi didn't benefit masses

yet there was no conscious agenda to work against masses

→ Bipin Chandra : book - India's Struggle for Independence.

despite being marxist Bipin Chandra recognises Gandhi as

Mass leader - Gandhi led the largest non-violent controlled

mass movement - The congress led movement was one of the most

Spectacular mass movements, whose echo is felt even in

Contemporary India.

→ within Marxism we can also mention Subaltern

Gramscian tradition represented by scholars like Ranjit

Gurur, Gyanendra Pandey, Shubash Chandra, Biju Panicker.

(i) → they criticised Nationalist school. Nationalist historians

depicted the history of period as "Spiritual Biography of

Gandhi"

(ii) Gandhi regarded himself as "Yugpurush". Gandhi projected

his programme as an attempt to create an ideal state.

Gandhi skillfully used India's culture & traditions to build his

political status.

(iii) The Nationalist Interpretation is "Blinkered vision"

(limited vision) They have ignored the role of peasantry, tribal.

there was not one movement, there were many movements

1st Chapter of
BIPIN Chandra.

in the thought
End of means

, which were independent of congress & some were prior to congress.

Dalit perspective on National Movement.

Contributed to Ambedkar we can also include the ideas of Jyotirao Phule & Rammurthy Naiker (Periyar) within dalit perspective though they were not Dalits. The common ground among them is Anti Brahmanism.

Jyotirao Phule appreciated the British. He held that British raj is better than Peshwa Raj. Britishers at least introduced Equality before law for first time.

Rammurthy Naiker was a member of congress but he came out of the congress as he believed that congress was the party of Brahmins. Against Brahmanism he started Self-Respect Movement. It emphasised on Dravidian Identity. He later on formed DK (Dravida Kazagam) at the time of Independence he demanded Separate States for Dravids. (Like India → Pakistan). Ambedkar never joined the congress he was critic of Gandhi. He later on formed Republican party. He advised Dalits not to join the congress.

Ambedkar warned dalit that congress always is determined to the Interest of Dalits. Dalit will be reduced to Status of drawers of wood & hewers of water.

Ambedkar has given his views on Nationalism in his book Pakistan or Partition.

Ambedkar didn't recognised existence of India as a Nation. He was influenced by the ideas of French Revolution i.e. Liberty, Equality, Fraternity. There cannot be Nation without the feeling of fraternity.

In the words of Ambedkar Nationalism & nationality is a consciousness of kind, awareness of the tie & kinship. Nationalism is an Expression of inner unity, a process

^{full understanding}
Social assimilation, [&] a dynamic desire to live as a nation.
Nationalism is a negation of casteism, communism & is rooted
in Humanism.

Ambedkar rejected hypocrisy.

On 29th July 1927 in an Editorial Bahushkrut Bharat,
Ambedkar had written that he had been born as untouchable.
Instead of saying Swaraaj is my birth right He could have
said abolition of untouchability is my birth right

Q) Write Short note on Ambedkar's views on State Socialism?

Ambedkar was not inspired by marxist approach to Socialism.
In Indian context. Instead of Marx he was inspired by the
^{dealing something}
^{Ambedkar}
pragmatic approach to Socialism represented by John Dewey.
He has presented memorandum titled "State & minorities"
to constituent assembly on behalf of all India Schedule caste
federation in 1946.

features:

- All citizens to be treated Equal.
Equal means one man, one vote, one value.
- No State has a separate religion, Liberty of Conscience to all
citizens & special rights to minorities.
- Reservation as a compensatory justice. Instead of Scientific
Socialism we should go for State led market. → Nationalization
of Agriculture land, State control of Industry, collective farming,
minimum wages. etc (DPSP)

Q) Ambedkar on Marx?

→ Marxism has limited utility in Indian context

Why?

In India Economic structure is not a basic structure
Brahmanism is a basic structure.

→ He had disagreement with Marx over the role of state.

Ambedkar looked at State in a positive sense he believed that in India Society is ^{exploitative} ~~unexploited~~ their State.

→ He had disagreement with Marx over the issue of religion.

for Marx Religion is opium of masses for Ambedkar all religions are not opium. perhaps Marx have not known Buddhism. Buddhism nourishes Human soul.

Radical Humanist: M.N. Roy.

Nationalism is Bourgeois concept which suppresses individual under the collective ego of Nation. He has given the idea of Radical democracy.

- abolition of feudalism
- nationalisation of land
- modernisation of industries
- protection of minorities
- compulsory Education & purification of politics

Socialist Theory

Leaders like Jayprakash Narayan, Acharya Narendra Dev, mineo marxist

Socialists in India have been more influenced by Lenin than M.N. Roy. M.N. Roy opposed joining hand with Nationalists whereas Lenin allowed joining hands with Nationalists.

M.N. → against Marx ideology → national frame

Initially Jayprakash Narayan & Acharya Narendra Dev were critics of Gandhi. J.P. Narayan in his book "Why Socialism" (1935)

found Gandhian programme impractical & felt that Socialist revolution is necessary. However, he later became one of the prominent Gandhians.

By Acharya Narendra Dev in his book ^{Natural Evolution} ~~Socialism~~ ^{criticised} ~~restoration of princely states~~ Gandhi's programme of Reconciliation among the classes but later on he stopped opposing Gandhi believing that opposition to Gandhi is like political suicide.

Socialists tried to work within Congress to

influence the leadership of congress to make their programme poor. It's to be noted that the leaders of Congress like J. Nehru, S.C. Bose has also inclination towards Socialism.

GANDHIAN PHASE

Quit India Movement → Ends justify means.

Non violence ~~but~~ → Purpose was to bring people into movement & make them brave afterwards used violence.

Non violence was means for Gandhi.

Gandhi is best ex for Machiavelli's principle

→ Gandhi is symbol of sacrifice → Sacrificed principles who know how to manage the power ex: which form of power will

be applicable when-

→ Gandhi's Quit India movement → last struggle of his life.

How different ^{radical struggle} ~~would have~~ for independence if there would have been no Gandhi? → rethinkable

→ more blood shed

→ Limited to local level.

→ mass participation would have been less. → communal basis would have been

→ there would have been no freedom without Gandhi & it's unthinkable.

→ Not only Father of Nation, He is midwife → By Albert Einstein.

2. MAKING OF INDIAN CONSTITUTION. & Chapter 9.

Salient features of Constitution:

Q1 Idea of state & Secularism in India

Preamble:

Secularism:

Q1 & Q2 Enumerate the debates on the nature of Secularism in Indian State.

Q3 In context of the increasing role of Religion in Indian politics, critically evaluate the status of the project of Secularism in Indian Society.

Topic 9 → Role of Religion, Caste & Ethnicity.

Q1 Role of Religion in politics.

Q2 What are the reasons for the growth of communalism in Indian politics. Do you think we need an alternative model of Secularism to deal with the rising tide of Communalism in the country?

Role of Religion in Indian politics:

The Role of Religion in politics is neither new nor limited to India. Since beginning there has been a tension b/w Religion & politics. Europe has witnessed the 30 years of war.

Present times:

Since ~~1947~~ there is a increase in role of Religion in politics world wide.

Why?

The End of Ideology has given rise to "Clash of Civilisations". Why End of Ideology has given rise to religion? & what is the difference b/w Ideology & Religion?

Ideology is Secular, Religion belong to the realm of God. Ideology is based on Reason, Religion is based on Faith (Not Reason). prob

up till 2nd was the two prominent ideologies have been liberalism & socialism after the end of the cold war neo liberal economic policy has become universal. It is the impact of globalisation that all countries have similar economic policy. Hence they cannot mobilise people on the difference in economic programmes. They will have to use other means of mobilisation - i.e. Identity.

The increasing use of Religion can also be attributed to the growth of democracies in terms of numbers (3rd wave). The democracies are actually mobocracies.

What type of politics, the politics of Religion?

Politics of Religion, caste, Region, Language, Race, Ethnicity are all variants of Identity politics.

Features of Identity politics:

politics of Identity is not based on reason ^{It is a} politics of passions.
(or Emotions. (Egalm))

Is it wrong to be Emotional?

Is it wrong to be Emotional about one's Religion, caste, language.

Is there is nothing wrong in being emotional i.e. is very natural in human passions dominate. There is nothing wrong in being emotional about one's religion, language, culture. It is natural.

However, it is wrong when somebody excessive emotions of others for his political gain.

Why politics of Identity is bad?

passions when appealed becomes uncontrollable hence it will necessarily result into violence.

The Origin of Communalism in India:

whether communalism in India is a pre British phenomenon?

If we go by western scholars like Louis Dumont Indians are essentially communal people. However accord to Romila Thapar.

There is no instance of major communal violence in the country before independence. Though there are some instances of sectarian conflict which are of local in nature.

as role of ideology have ended, they want to mark the memories so they created Identity politics.

The timeline of growth of Communalism in India:

- (i) Britishers considered muslims responsible for the Revolt of 1857 Hence they started appeasement of Hindus
- (ii) Sir Syed Ahmed Khan, in order to prevent the marginalisation of muslims expressed the loyalty of muslims towards British Raj "Raj".

Britishers left Hindus for the sake of muslims. Why?

Their policy of supporting minorities by manipulating their insecurities & the inevitability of the rise of nationalism among majority. [This is burden of tanks] :- In

In 1906 Muslim League formed it was already led by feudal class.

In 1909 to please muslim league & to pacify Indians Britishers introduced Separate Communal Electorate for Muslims.

First Statutory Recognition that muslims are separate community than others:

In 1915 Savarkar formed Hindu Mahasabha against Muslim League.

In 1919 Britishers expanded Separate Electorate to other community Sikhs, parats, anglo-Indians.

In 1923 Savarkar gave the idea of Hindutva... Ideology for the political mobilisation of Hindus.

He gave the concept of Hindu Rashtra (or) Nationalism.

Savarkar's Theory of Nationalism:

His theory was influenced by German's Theory. According to the theory persons

a) Fatherland

b) Spiritual Land Should die one.

It means those communities whose Spiritual Land is outside India will not be a part of Hindu Rashtra.

In response Mohammed Iqbal gave the concept of

Muslim Ummah It means muslim brotherhood. He held that

there is no concept of territorial nation in Islam. Muslims cannot be divided on territorial lines. they form one community.

He also held that it is un-Islamic for Muslims to live under man made laws. They are supposed to live under Shariat laws. It provided the basis for demand for the separate State for Muslims of the sub-continent where they can live according to their own

Customs & traditions

→ In 1925 Hedgewar formed RSS. Its objective was to address the Hindu sense of vulnerability. It promoted Militant form of Hinduism.

→ In 1932 British announced the Communal award, they wanted to divide Hindus & to reduce the status of Congress representing minority. The above politics of actions & Reactions culminated into the partition & one of the worst forms of communal violence witnessed ever in human history.

AFTER INDEPENDENCE

First phase till 1960's:

No major incident of communal violence or riots. Why?

(1) Pandit Nehru banned Communal Organisations.

(2) He emphasised on Secularist Agenda.

1960's = 60's saw the renewal of communal violence starting with

Jabalpur, Ranchi, Nigah, Nagpur & Ahmedabad.

Analysis: Industrial towns → Hence communalism is seen as a urban phenomenon & primarily the reflection of class politics.

1970's & 80's: Rise of Communalism:

(1) Insurgency in Punjab resulting into Operation Blue Star.

It culminated into assassination of Indira Gandhi. It culminated into

Anti-Sikh riots in North India along with the Capital city. It

Continued for 3 days. The biggest question mark on the Secular

Character of the Indian State. It was later on described not as violence but Pogrom (well planned).

Different studies show that the administration in

India is capable of controlling the riots within 2 hrs.

Why such a increase in the violence or communal violence?

→ Breakdown of congress system.

→ 1980s opening of gate of Ramjama Dham. The then PM Rajiv Gandhi ordered the opening.

Why?

Rajiv Gandhi's govt started losing within the 2nd year of ^{their} existence. Hence he was advised to gain the Hindu vote.

Congress started double appearance as Muslims became angry with the opening of the gate, in order to appease the orthodox sections govt nullified the revolutionary verdict of the Supreme court in SHABIR BANU case where SC directed to introduce UNIFORM CIVIL CODE (UCC).

When the congress opened the gate BJP became insecure. They started Hindu issue in a big way.

Role of V.P Singh? (1989-90)

He was unable to manage

a) Coalition.

b) The increasing militancy in Punjab & Kashmir.

c) deteriorating economic condition.

Hence to consolidate his position he played Placard card Hindutva card.

It can be treated as communal award to divide ^{hindus} ^{studies}. It made BJP more insecure. BJP was not left with any option but to start Rath yatra.

Once Rath yatra started it culminated into ^{the} Reytem demolition of Babri Mosque followed by Mumbai Riots followed by Godhara, followed by Gujarat, followed by Muzaffarnagar.

Analysis: Communal violence which was once limited to urban centres, also spreaded to the rural areas.

Thomas Hansen Blom in his book

The Saffron Wave had projected the communalisation of Indian politics through the phenomenal rise of BJP - from the party with only 2 seats in 1984 to the level it could form govt in 1999 & coalition to absolute majority.

Analysis of Communal riots in country:

views of Paul Brass:

Communal violence in India is part & parcel of India's Electoral democracy. Acced to him communal riots are not spontaneous events. Acced to him there is a well developed "Riot Machinery in the country". They are the most professionally committed acts. Communalism is always in the air. Atmosphere is never allowed to be free from communalism. There are active & passive phases.

There is a proper machinery & there is a proper division of labour. There are 3 stages:

- (i) preparatory Stage: In this stage there is a ride of "fire tenders".
- (ii) precipitation Stage: In this stage the ride of conversion spreads starts.
- (iii) Explanatory Stage: This is the stage where blame game starts.

After the riots celebration takes place, activists are rewarded. Acced to Paul Brass everyone leaves a good riot. all parties benefit. The votes of all the parties gets polarised.

Views of Christophe Jaffrelot:

The title of his book "Majoritarian State"

→ Carnegie Foundation

What are the observations?

- from Multi cultural state India has become Majoritarian State.
- from Political nation India has become defacto Hindu Rashtra.

How? Hind/RSS

- Article 370
- Ram Mandir
- Article 44 UCL
- Citizenship Act

Whose Responsible, which party?

Congress is responsible for the legitimisation of idea of Hindu Rashtra

How? → the vote bank politics of congress

How? → Congress policies has legitimised BJP's narrative

Which narrative? that congress is pseudo secular.

Congress is damned if they do, Congress is damned if they don't do.

Major Reason is of congress policy of appeasement.

→ Indira Gandhi recognised AMU as minority Institute

→ Rajiv Gandhi opening the lock of Ram Jamma Bhoomi & nullifying judgement of SHAH BANU.

In recent times Rahul Gandhi, visiting temples emphasising on Brahmin gotra. The Manifesto of anti-congress adept. adopted to establish ① Smart Committees.

② commercial production of Gomutra.

Even India's 3rd front has similar record as they keep on shifting TDP, BJD

[Article's strategy of making Hindu Rashtra ⇒ Modi 1.0 → victory. In Modi 1.0 was unofficial ^{channels} + blessings of public _{conspirationism}.]

Secularism.

Chapter 299

Q) Discuss & Debate India as a secular state?

Q) What are the peculiar features of Indian model of secularism?

VCC (this is Secularism)

No VCC

(this is tolerantism)

→ Single set of Rights

→ Special rights to minorities.

→ No Art 370

→ Art 370.

What is Secularism?

India Not Secular

India is tolerant

Secularism is a western concept [European / French] - Secularism

is known as (i) Child of Christianity.

(ii) Gift of modernity.

[Levin & Pope]

[Reformation happened in Christianity where

in France if they want to wear Burkha they should wear at home.

State & Church have been divided but haven't happened in India]

Why it is called Child of Christianity?

out of all prominent Religion the only Religion where the sphere of God has been rolled back in Christianity. Hence Secularism will not be successful among the followers of other Religions like Hinduism, Sikhism & Islam. In these communities Religion is a way of life. It is difficult to segregate political way of life from the way of life in general.

Gift of modernity?

(reducing role of religion)

Modernity represent secularisation - Secularisation represent Rationalisation. Scholars like T.N. MADAN, ASHISH NANDY are Skeptical of the success of the project of Secularism in societies which lack Secularisation.

India as a Secular State:

The debate on Identity of India as a secular state started with publication of P.F. Smith's book in 1963.

Titled as India as a Secular State.

What was his observation?

India has some features of Secular & not all the features accord to him. There are 3 essential features of a secular state.

(i) Freedom of Religion (India has)

(ii) Right to Equality / Equal citizenship (India has)

(iii) The Separation b/w Religion & State (Not present). → The defining feature of French model of Secularism 'Laïcité'.
He has also given his opinions on the future of Secularism in India. He is not optimistic about the future of Secularism in India. Why future is not safe?

(i) Hindus constitute around 80% of the population.

(ii) Acc to him the minorities in India are the custodians of Secularism.

What does it mean

The future of Indian state as a secular state will depend upon on minorities. → what he think about it?

He believes that in India only Christians can accommodate the idea of Secularism.

Neither Sikh community nor Muslims can accommodate.

He pointed towards the excessive involvement of Gurukulwaras in politics in India. Sdy. we cannot expect the Clergies among Muslims to take up necessary reforms.

Hence Sooner or later Indian state will have to involve itself in different affairs of Religion. whenever the state will intervene there will be question mark on the status of Indian State as a secular state.

The Nature of Indian Secularism continues to remain amorphous messy & ambiguous. There is an internal political debate wrt Secularism. The constitutional model / congress model is criticised as pseudo secular [Advan].

Arjun Ghosh does not accept the view that in secular state diff communities have diff set of rights.

The Nature of Indian Secularism has been explained by Rajeev Bhargava.

Contributions of Rajeev Bhargava:

First model

According to him there are 3 models of Secularism.

① Hyper Substantive model — based on the substantive value of secularism. i.e. Autonomy of Individual.

2. Individual sphere

2.4. To state reform

Religion & State are separated by autonomy, development (as reason).

② Ultra procedural model — Here the focus is on national legal procedures. (State will not take suggestion from Religion).

Separating religion from the state through bureaucracy & technical rationality.

~~He calls Indian model as combination of two models. Thus~~

is to state interference with.

Indian model combines Hyper Substantive & ultra procedural model. According to him Indian model is politically negotiated.

Contextual model. Indian model is neither based on the wall of separation b/w Religion & State nor on the policy of Equidistance.

i.e. equal treatment of all the religions. The boundaries b/w religion & State are porous boundaries. (They enter into each other).

State interferes in different religion in different measures, in different context.

According to him situations in India would not have permitted the adoption of strict Separation. Considering India as a prismatic (traditional) society, it was not expected that communities will initiate Religious reforms on their own. Hence the only way to bring reforms was through the state. Hence when state interferes in the religion, there emerges a question mark on the identity of India as a secular state.

Views of Prakash Bhargava Mehta:

→ He called principled distance model as Asymmetrical model.

Chz state is interfering in diff amounts.

→ The Asymmetrical model actually leads to communalism.

Muslim Reservation
Christian Reservation.

→ The model neither satisfies minority nor majority.

→ It is an attempt to hide communalism as a part of state bank politics (playing one community against another).

→ It keeps all communities insecure all the time.

Romilla Thapar also believes that existing model is not able to stem the rising tide of communalism. She suggests we should have a bold model of secularism. (French model is bold model).

On other hand Neo Gandhian like Ashwin Nandani in his article Anti Secularist Manifesto criticised the entire project of Secularism.

(1) Secularism is a western concept.

(2) Secularism treats religion in a negative sense (Experience of the West). Instead of secularism we should emphasise on communal harmony (Bharat Shastri, Sambhu Chandra Dasgupta).
Jyoti Chatterjee recommends to replace the word Secularism by the word toleration. Toleration accommodates the idea found in the constitution more accurately & is much in accordance to the Indian culture.

The Debate of UNIFORM CIVIL CODE & Secularism:

What is VCC?

The European/French Idea of 17th century

What is the big question we need to think?

Relevance of 17th century French Idea for 21st century in India.

Relevance of 17th century French Idea for 21st century France.

Origin of VCC:

we have to go back to the history of Europe.

(1) Europe has witnessed 30 years of war on the basis of Religion.

(2) Hence in Europe the principle came to establish.

"Render to Caesar (king), what belongs to Caesar."

"Render to pope", what belongs to pope or god.

As the Roman Empire got divided into territorial states, every state was left with some minorities.

→ In order to maintain peace & to assure the minorities states adopted the principles of "Universal Citizenship"

↳ Every citizen is equal in the eyes of the state, irrespective of Religion. UCC is based on universal citizenship.

In western countries bco of secularisation even personal matters [family, marriage] come under the state. In general western countries only grant freedom of conscience unlike India which gives freedom of conscience along with freedom to practise, profess & even propagate Religion.

Case of UCC in India:

UCC is a misnomer in India. when we talk about UCC we actually mean recognition of Right of the state to codify personal laws.

currently only for criminal laws

History of the debate:

Introduction of UCC has been a highly contentious issue even in the constituent assembly. Women members like Hansa Mehta wanted UCC in part III of the constitution.

Leftist also wanted enforcement of UCC in the interest of gender justice. Hindu Rightist also wanted the introduction of

marriage rights
polygamy

UCC on the belief that it will strengthen Nationalism. However the members of minorities like Muzaffar Ismail, Mohammed Ismail, Packer Sahib opposed even Sardar Patel felt that UCC is outside the scope of fundamental Rights.

property rights
etc can be altered if UCC is allowed - women may go against their
Shariat law & they are against that it may affect them

What is the constitutional provision?

(i) UCC has been placed in part IV → Article 32 a non enforceable part of the constitution

(ii) Though DPSP are non enforceable yet they are fundamental in the governance of the country

(iii) As per Article 37 It shall be the duty of the state to implement the directives. It means it was the duty of Indian state to take the step for the Enforcement of UCC. If we look at Article 44 It also mentions that State shall endeavour to establish

UCC

Endeavour means false special efforts. However the Ruling party [Congress] has not taken any such efforts.

(i) Supreme Court in SHAH BANU case ⁽¹⁹⁸⁵⁾ has pointed towards the failure of the govt for bringing UCC & directed the govt to implement it.

(ii) Recently SC has appreciated the state of Goa as shining example, the only state with UCC in India. SC has held that — It is interesting to know that whereas founders expected state to ^{take effort} Endeavour, till date no action has been taken.

Even after Hindu laws were codified, there has been no attempt to frame UCC despite ^{urging someone to do something} exhortations by court.

In response to a PIL petitioned by Feroz Bakht Ahmed Delhi high court has referred the matter to law commission.

→ the 28th Law commission in 2018 held that UCC

is neither possible nor desirable in present situations.

→ The 22nd Law Commission will be looking at the matters in accordance to directives by Delhi High Court.

What is the status of personal laws?

(i) Britishers had codified the personal laws of Christians, Parsis & Anglo-Indians.

The law commission under Lord Macaulay favoured the introduction of UCC.

However both Hindus & Muslims opposed. Even the most educated members of constituent assembly including Dr. Rajendra Prasad, Madan Mohan Malviya, Pattabhi Sethuramayya, K.N. Katju opposed the introduction of "Hindu code bill".

However later on Indian state codified Hindu personal laws.

Note: The codification of laws in the state itself is not a guarantee that better laws will come into existence.

Indian state has codified Hindu personal laws but it does not mean it has resulted into the upliftment of the status of

women out of all communities in India. Hindu has worst sex ratios & despite economic backwardness Muslims has better sex ratio.

Ased to Flavia Agnes. Therfore reforming muslim personal laws cannot be based on arrogance of the belief of superiority of the Hindu laws.

It is to be noted that despite abolition of Polygamy, polygamy is most practised among Hindus. In many ways Muslim personal laws are more advanced.

At present only muslim personal laws need to be codified there is nothing wrong if state codifies personal laws to bring gender equality. However, it is important that right thing should be done in the right manner in the right time with right intentions. Hence govt, should constitute a committee representing diff sections of muslims, the committee should go for the comprehensive review & make some recommendations.

at the same time personal laws of all the communities, need to be reviewed from time to time.

Note: (1). So far Muslim personal laws are not codified in 2012.

Indian state codified Hindu personal laws known as marriage act. However it is a myth that Indian State has not touched muslim personal laws. In 1986

Rajiv Gandhi brought muslim women protection on divorce rights act 1986.

In 2019 Modi govt brought muslim women protection of Rights in marriage Act.

from time to time judiciary has also intervened in Muslim personal Act. In 2017. Judiciary has declared Instant Talaq, ^{Chahar bidat} as unconstitutional. It is a myth that muslim women does not get compensation at par with Hindu women in case of divorce.

first in Shah Bano Case, later on in Daniel Latif's Case
In Daniel Latif's case SC has again recognised the right
of muslim women for getting reasonable compensation.

ROLE OF CASTE

It is said that Indians don't caste their vote rather
they vote their caste.

Accd to Christophe Jaffrelot Caste forms the masaque
(base) of Indian politics.

What is caste?

The term caste is ^{derived from the} a portuguese term casta which means
pure blood / Race. Caste is the translation of Sanskrit word
Jati. Jati is the basic feature of Indian Society though
primarily the feature of Hindu Society but in India there
is a caste even among muslims. Caste is described as
the Indian model of social stratification.

Caste v/s Class:

In western societies, societies divided into classes however
in India in terms of caste. Louis Dumont has explained
the difference b/w class & caste. Accd to him class is based on
achievement or worth or Ascriptive criteria. ^{class} caste is open
or mobile but whereas caste is rigid (or) close.

Views of M.N. SRINIVAS (famous sociologist.)

The distinction b/w class & caste is textual (bookish) in
practice there is no difference class is equally rigid It is not
easy to change the class. By caste is not as rigid as
believed M.N. Srinivas has coined the term Sanskritisation
as a result of Sanskritisation many castes have moved up in
the category.

(to adopt practices)
of Brahmin
eg = vegetariansm.

Whether there is role of caste in Indian politics, if there is
what type of role caste has played? Do you think caste

has strengthened democracy or weakened democracy?

There is no doubt that caste has been the most important determinant of the voting behaviour in India.

The interaction b/w caste & politics is a pre-independence phenomenon even at that time diff political parties could be linked to different castes. for ex: Congress - was the party of upper caste, Justice party - represent o.c's & backward class, Republican party - represented dalits.

In India even muslims can be treated as caste. ^{even} at present every party is associated with particular class.

The prominent political developments in India including the linguistic reorganisation can be considered as the phenomenon of the role of caste.

One of the earliest academic works on the role of caste in Indian politics can be attributed to the famous Socialist, Andre Betelle. He has analysed the role of caste in the politics of Tamil Nadu.

Rudolph & Rudolph have analysed the role of caste associations in India.

M.N. Srinivas made a significant contribution when he gave the concept of dominant caste.

What is a dominant caste?

In India the term upper caste can be misleading in the context of politics. Brahmins may be upper caste in ritualistic sense but they may not be dominant caste. Which caste is a dominant caste?

Brahmins are the dominant caste. Dominant caste is of the Region. Region & abroad.

There are regional variations. Some regions have single dominant caste & some may have more than "1" dominant caste.

The dominant castes are

- (1) Numerical majority in the region.
- (2) Land owners

(PPP) have social power.

Jats → Yadavs are the dominant caste in UP & Bihar.

→ Marathas in Maharashtra.

→ Jatts in Haryana.

→ Vokkalings & Lingaids in Karnataka.

→ Reddys & Kammas & Kapus in Andhra Pradesh.

The interaction b/w caste & politics has been described by Rudolph & Rudolph as the phenomenon of "Modernisation of the tradition & traditionalisation of Modernity".

Caste have become tradition.

Caste in democracy.

The interaction b/w democracy & caste & its nature has been a matter of debate.

First school of thought:

Name of scholars: ① Rajni Kothari, ② Christophe Jaffrelot,

③ Yashendra Yadav.

They believed caste has strengthened democracy.

Contribution of Rajni Kothari:

Acced to him the credit for the success of democracy in India goes to caste.

→ democracy failed in other 3rd world countries bcz they lacked the social organisation like caste.

How caste has led to success of democracy?

Since Indian society has been traditional. The caste has been important ways to mobilise people. The caste has not been just a divisive force caste has also been an integrative force.

How integrative forces

Caste has promoted alliances or coalition. Some of the famous caste alliances of Indian politics have been —

Majgar (Ahr - Jatts - Gujjars) → formed by Chaudhary Charan Singh.

Majgar (Ahr + Jatts + Muslims)

KHAM (Kshatriyas + Kshatriyas + Adivasis + Muslims) or

Gujarati formed by Congress

Muslims + Yadavs by RJD & JP.

He also believes that caste has strengthened the consciousness among the weaker sections.

⇒ Cristophe Jeffray in his book "India's Silent Revolution" has highlighted how caste based mobilisation has resulted into deepening of democracy.

⇒ Professor Yogendra Yadav also believes that caste based mobilisation has deepened democracy. He explained the deepening of democracy through his phrase "Democratic Uprising".

⇒ The first democratic uprising took place in 60's → It has resulted into Oris coming out of Congress & forming their own parties.

Samajwadi party
Socialist party

⇒ Second democratic uprising in 1990's when dalits left Congress thus reducing Congress to the status of the party of minorities.

At present only minorities vote for Congress & that is why Congress is not in a position to form a govt, Congress

prefers to be a junior partner of the state parties.

⇒ Ashutosh Varshney, C.P. Bhambhani, Andre Beville, C.P. Bhambhani, Pratap Bhanu Mehta

They do not believe that caste based Mobilisation is the long term interest of the country.

⇒ Accord to C.P. Bhambhani; politics of caste is worse than religion when one party uses caste & other uses religion the mobilisation on the basis of caste has indirectly contributed to the rise of communalism.

⇒ Accord to Ashutosh Varshney book "Battles half won";

"India's improbable democracy" - caste based mobilisation has resulted into massive participation of people into Election however it has not resulted into any significant improvement in the situation of masses. There is too much of democracy at the times of Elections; there is too less democracy between Elections.

Note:- Accord to Rajmoh Kothari not only caste has impacted politics in India even politics has impacted caste. he has coined the phrase "Politicisation of caste".

Politicisation of caste: It means the nature of caste has changed. Once caste was important for ritual benefits. However at present in India caste has become important for secular benefits. (for jobs, political Elections) → we can call it as Secularisation of caste.

Contemporary trends:

Since 2014

⇒ Christophe Jefferydot in his Article "Do Indians vote their caste - 2019".

— Has analysed the contemporary trends based on Lok Sabha Elections in 2014, 2019 as well as assembly Elections during this phase.

→ (i) Though caste remains the major determinant of the Electoral behaviour more in assembly Elections yet caste is not playing a role as it used to be.

→ (ii) The role of caste has become sub-Ordinant to the role of Religion there is a clear manifestation that people have accepted the BJP's narrative. India first/Hindu first.

→ (iii) There is role of surgical strikes & Balakot strikes in shaping trends.

→ (iv) Since 1990's there have been two prominent developments which have impacted the Equations.

Just factor (a) Saturation of politics of Reservation

How? Since Supreme Court judgement in Indira Sawhney case India reservation cannot cross 50% of total seats.

Hence parties will not find easy to ask votes in return of promise of Reservation.

Accd to him survival is possible incase if the political project of reservation in Pvt sector gains

acceptance - so far, BJP is in power. It is a distant thinking.

2nd factor: In 1990's India introduced New Economic policy and new economic policy has resulted into the growth of Neo-middle class.

What has been the trend?

Traditionally upper caste & upper class have been the supporters of BJP.

The rise of Neo-middle class has ended the overlap that was existing in India b/w caste & class.

Earlier those who have been in lower caste were also in lower class. At present the person from lower caste may not be in lower caste. Hence class has also started shaping choices & not just caste. BJP got the votes of Neo-middle class.

3rd factor: Though class is gaining prominence yet caste has not lost its importance. At present instead of understanding the role of caste we should focus on the role of "Jati".

At present we will not be able to understand the trend if we look on the term broad categories. Broad categories like OBC, SC, ST's.

There are many castes which felt discriminated, BJP has tried to bring these communities under influence - for ex: Khatris were not happy with dominance of Yadavs in Bihar. BJP has become the party of Jathavs hence Valmikis & Pasiks don't vote for BJP. BJP has made new coalitions.

Thus it can be said that caste has not been made insignificant rather BJP has Reinvented & Reimagined the caste.

Earlier Yogendra Yadav has also mentioned that voters in India are going for identity plus politics (means need development also).

Socialism - Neo middle class

① Saturation of Reserves

② Neo Economic order

③ Internal class differences

Here caste & Jati are used in diff terms

India today
L. Arora

Role of Ethnicity in India

Introduction : Since the end of cold war there is a rise of Ethnic movements & Ethnic conflicts. There has always been a role of Ethnic factors in Indian politics.

How to define Ethnicity in Indian context?

James Mann in his book "Ethnic politics in India" has suggested that Ethnicity is a sort of collective consciousness. In the western countries where race is the major way to understand Ethnicity. In case of India we can take the parameters of Religion, Caste, Race as well as language.

How has been India's record in dealing with ethnic challenges?

⇒ Views of professor S.D. Muni : India's record is quite decent in Addressing Ethnic challenges. If we compare with former USSR & Yugoslavia these states collapsed under pressure. By India's record is many times better than any other countries in Neighbourhood. Pakistan is one of the worst example failed to accommodate the linguistic aspirations & suffered partitions.

At the same time if we take the example of Sri Lanka the way they have dealt with Ethnic challenges have brought the country in the verge of disintegrated. As to S.D. Muni Ethnicity is not going to be a major challenge to the territorial integrity of India in future.
Why no challenge?

As to S.D. Muni → Ethnic identity of Indians is fluid. They can be united as well as divided.

The interaction b/w Ethnicity & Democracy has been analysed by Atul Kohli. in his article "Can democracies accommodate Ethnic challenges".

→ Ethnic movements can be seen as challenges to democracy in ethnic sense

→ They are challenges if they were not handled democratically

→ If democracy is part of problem then, only democracy is solution.

Hence more democracy rather than less democracy is needed.

→ It is natural for traditional societies like India that ethnic will choose mobilisation on ethnic basis to maintain their dominance.

belonging to social groups

And Kohn has compared how diff PM's of India have dealt with ethnic movements:

(i) → The way Nehru dealt with Tamil sub-nationalism is the best Example

(ii) → on other hand the way Jawahar Gandhi dealt with Punjab is one of the worst Example.

(iii) → Even the way Rajeev Gandhi dealt with Mizos is a good Example bco Mizoram is most peaceful state in North East (Earlier it had huge insurgency)

Ased to him if ethnic challenges are dealt democratically then it can result into dilution of challenges.

whether it is an ethnic movement or any other movement prime aspiration is "power sharing". However leader can deal with the ethnic movements democratically only when his party has sufficient majority in the parliament. His status is undisputed within his own party.

Jawahar Gandhi's initial position was not as strong as that of Pandit Nehru.

Views of Sarkaria Committee - Commission:

Ethnic movements are never pure ethnic movements

They are overlapping political & economic aspirations.

Hence democratic decentralisation is the way forward in ethnic movements.

5th Chapter GRASS ROOT Democracy.

- Panchayat Raj & Municipal Governance
- Significance of 73rd & 74th Amendments & grass root movements.

- Q1 Critically Evaluate the working of panchayat raj in India.
- Q2 To what extent 73rd Amendment Act can be called as "Half baked cake"?
- Q3 Discuss the State of Urban governance in India: Enumerate the initiatives taken by the govt in recent times to improve urban governance.

Grass Root Democracy:

Empowerment of people at grass root level.

grass root means the lowest section of the society.

who are lowest?

those who are least advantaged

who are least advantaged?

Those who are least Economically, Socially & politically backward. The real meaning of democracy is

Empowerment of masses.

↳ It means giving power to powerless & voice to voiceless. → Power & voice

In India, Gandhi was the advocate of grass root democracy. Gandhi was against organising the society on the principles of modern nation state.

↳ What does modern Nation State implies?

Modern Nation State represents Centralisation. The vision of ideal society of Gandhi was Decentralised circles of power which means absence of hierarchy & a constructive view of power.

Why Gandhi supported democratic decentralisation?

- (i) That is the only way to address the Rural poverty.
- (ii) democratic decentralisation is the best way to manage India's diversity [Each village is republic in itself].

→ poverty

→ diversity

→ It is well established fact that without grass root democracy we can neither achieve good governance (nor) Sustainable development

(nor) Inclusive growth. It can therefore

What is the status of grass root democracy in the country? What should be the model of administration has been a matter of debate even in constituent assembly!

Gandhian's wanted panchayat raj system.

(1) grass root democracy

(2) Administration in the hands of people rather than bureaucracy.

However, Modernists in constituent assembly like

(1) Ambedkar - opposed panchayat Raj. He held that Indian villages are "Den of Ignorance" where caste system is most entrenched

(2) Pandit Nehru Even pandit Nehru favoured Strong state Centralised planning & State led affirmative action

Ultimately Gandhi found place in DPSP Art-40 → Non enforceable part of Indian constitution.

Under PM Nehru India started with centralised planning as an approach for addressing Economic backwardness.

Instead of people's representatives Pandit Nehru preferred bureaucracy led development.

Community development programme - 1952

The largest Rural development programme launched in India under PM Nehru. Community development programme was a complete failure. The only achievement of programme was

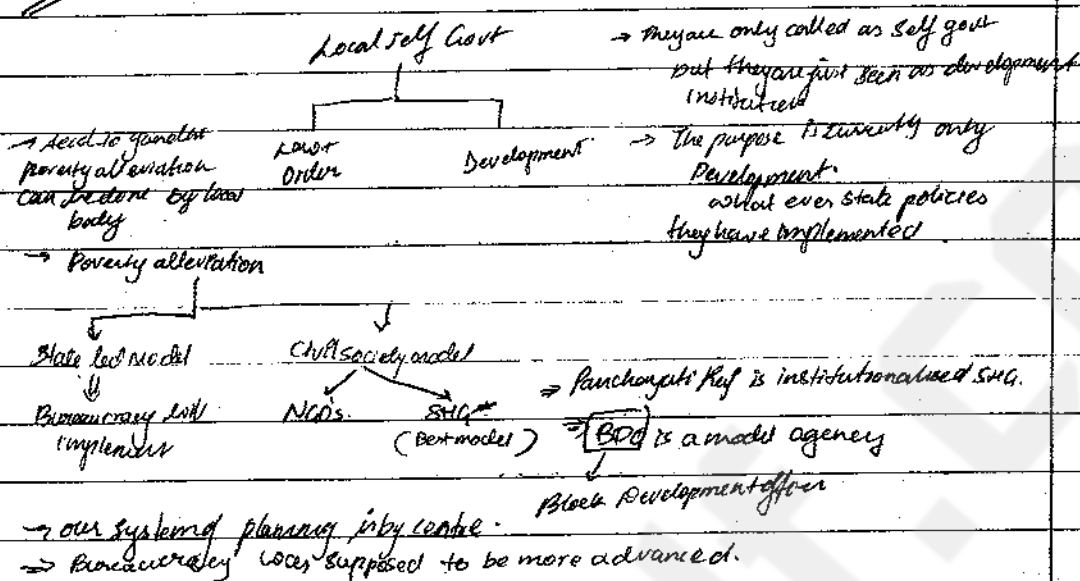

the establishment of administrative machinery for the purpose of development. The entire country is developed into development

block. Each development block was brought under BDO

[Block Development Officer] To analyze the causes of failures planning commission has set up committee known as

Balwant Rai Mehta Committee in 1957

14 Nov 2019

↳ Nehru is Elitist.

↳ Ambedkar was against Gandhian principle or state dependent.

- BDO was a failure programme → so govt estd Balwant Rai Mehta Committee.
- there should be nothing in the hand of Bureaucracy rather it should be in People's hand → Resolute.

What was the Observation?

Community development takes place only when community participate

Bureaucracy has been complete failure in motivating the people

on acting as a vanguard of change.

Why bureaucracy failed? (bureaucracies of 50's)

→ colonial mindset

→ development administration was a new thing, Indian bureaucracy was having no experience in such type of task.

→ Half of the people were not able to understand

→ many govt policies failed due to communication gap.

INTRODUCTION OF PANCHAYATI RAJ:

- In 1959 Pandit Nehru inaugurated Panchayati Raj at Nagaur in Rajasthan on 2nd October. Balwant Rai Mehta Committee suggested Three Tier Panchayati Raj Institutions. It should have Elected Representatives
- Why Elected Representatives?

They will acts as link b/w state & masses

Phases of Panchayati Raj in India:

1st phase: 1960's → Phase of Enthusiasm under the leadership of Pandit Nehru & Home Minister Govind Vallabhan Union govt mobilised the state govt to introduce P.R.I.s. almost all the states introduced.

2nd phase: 1970's & 80's → Phase of Stagnation the initial enthusiasm was lost.

- (i) States have not transferred funds, functions & functionaries
- (ii) If panchayat were dissolved they were kept dissolved.
- (iii) When panchayat completed their terms no fresh elections took place

What is the reason behind Stagnation?

Multiple factors.

70's & 80's represent the centralising trend.

Why?

External factors → war with neighbour.

Internal factors → The Break down of Congress system, Misuse of Art-356.

By this time a vested interest developed.

→ certain groups realised that success of panchayat is not in their interest. The two sections became insecure.

(i) State level leadership:

a) panchayats will give rise to new local leadership.

They will challenge the hegemony of traditional elites.

b) In India the situation of states is already like glorified municipalities if panchayats became prominent they will further go out of relevance.

(ii) Bureaucracy:

They feared that power & resources will be shifted into the hands of panchayat representatives. Hence Bureaucracy became the main conspirator in collusion with state level

politicians there was no cooperation with panchayat representatives.

800 faster
6
8 then represented
by

at the same time union govt failed to play a leadership role
Ashok Mehta Committee 1977:

Janata party tried to revive panchayats. However, that govt could continue only for less than 2-years. The Recommendations of Ashok Mehta Committee have not been tabled in Parliament till date. This committee have observed that panchayats have not flourished rather made to fail. There has been conspiracy against PRI's.

PRI's in 1990s: - phase of Revival.

By mid 80's it was clear evident that USSR is bound to collapse. It was known that once USSR collapses India will face the Economic Crisis. Hence even during Rajiv Gandhi govt India started taking Baby steps towards privatisation. Rajiv Gandhi govt introduced Panchayats Raj Bills based on the recommendations of LM Singwani Committee.

LM Singwani committee:

It recommended to give Constitutional Status to panchayats as well as reservation of seats for women. Unfortunately Bill's could not be passed in Rajya Sabha.

Why?

The Bill introduced by Rajiv Gandhi govt aimed to create Strong panchayats. Hence State thought it is an attempt by Union to marginalise states.

It is to be noted that until & unless union does not devolve powers to the state govt, State govt will not devolve powers to the local govt.

Why Rajiv Gandhi govt introduced Panchayats?

If country has to go for privatisation in Economic Sphere it will have to go for Rolling back of the state in Administrative sphere. It means Economic Liberalisation has to go hand in hand with political liberalisation.

Otherwise there will be a trap. It is to be noted that in 1991 India introduced New Economic policy & in 1992 73rd & 74th Amendment Acts were introduced.

What made India to introduce panchayat Raj?

Panchayat Raj in India is not bcz of indigenous factors.

The credit of introducing panchayat Raj goes to International Body IMF.

How IMF comes into picture?

IMF imposed structural adjustment programmes. It was compulsion to introduce good governance.

Accd to IMF good governance means transparency, accountability & rolling back of State & hence to satisfy international donor agency India has introduced panchayat Raj.

rolling back of state
↓
by decentralisation
↓
giving power to the people.

What does this imply?

govt has done the bare minimum which was needed to suever the international institutions. At the same time India made commitment to Agenda 21 at Rio Summit - 1992. Agenda - 21 proposed the strategy of community participation for sustainable development.

larged
community participation
↓
Panchayat Raj Institution

What is the most unfortunate aspect of the panchayat Raj?

[Active middle class]

The entire experiment is supply driven rather than demand driven. In India there has been no grass root movement (or)

In other countries there is civil society activism

civil society movement for good governance. In India Economic reforms went much far whereas political reforms stagnated.

which is absent in India

⇒ women representation.

Simultaneous political reforms have not taken place there has been lack of inclusive growth & sustainable development.

As a result there has been the growth of dissatisfaction in Rural India. At present there are two Indias.

1) India 2) Bharat

Bharat represent second class citizenship. Since 1990's there is a increase in "Left wing Extremism".

Analysis of 73rd Amendment:

73rd Amendment is called as Half Baked coffee

It is said that 73rd Amendment act introduces the skeleton & flesh & blood to the panchayat has been left.

What are the strengths of 73rd & 74th Amendment Act?

(1) It gives constitutional status to panchayat. It means

It is mandatory on all state govt to constitute panchayat

It creates the constitutional structure of a uniform system of Panchayat.

One of the major weakness of Barber Experiment was

→ lack of regular Elections, lack of funds.

73rd & 74th amendment acts introduced bodies like State Election Commission as well as state finance commission for predictable funds. It also gives additional responsibility on finance commission to make recommendations to the Union govt for panchayat finances. It also creates other bodies like gram Sabha, district planning committee, urban planning committees. It also provide reservations to vulnerable sections like women, members of SC & ST community.

Drawbacks:

→ Bad panchayat Raj

Why?

In comparison to the bill introduced by Rajiv Gandhi govt, 73rd Amendment

act is a compromised document.

Why compromised document?

The provisions on which states had objections had been made Voluntary. Lack of funds, functions, functionaries has been the fundamental programme which had not been addressed.

(1) It creates the uniform structure throughout the country.

It creates a uniform structure but it will not provide which level of panchayat will perform what function (absence of proper activity mapping).

(ii) It introduces Gram Sabha

↳ the Soul of the Experiment. Gram Sabha is

institution of participatory & deliberative democracy. The weakest part of the Experiment. The Act does not define powers of Gram Sabha.

In Gram Sabha bores meetings takes place

Suggestions:

(i) Video Recording

(ii) Training & Capacity

(iii) Like PESA (Panchayat Extension Schedule Areas Act)

The powers of Gram Sabha in Schedule ^{should} be defined.

Gram Sabha PESA Act Functions

73rd Amendment: act makes no provision for.

(i) ~~is~~ a separate bureaucracy for panchayat.

(ii) ~~is~~ does not provide any code of conduct for the members of bureaucracy - states should follow Kerala Model. In Kerala there is a code of conduct for bureaucracy as well as panchayat representative.

(iii) State Election Commission is not as independent as Election Commission. It should be brought under Election Commission.

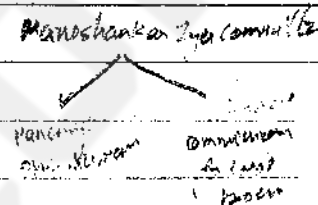

74th Finance Commission - has expressed concerns that state govt constitute State finance commission but they do not lay the reports of these commissions in state legislature.

State finance commission are neither as autonomous nor have enough capacity.

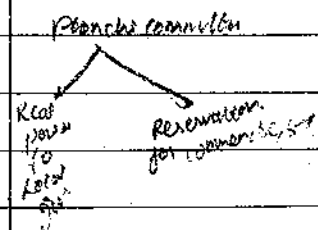

It has been suggested to harmonise the terms of finance commissions & state finance commissions.

The most important objective was implementation of decentralised planning. The act itself describes the role of panchayat as an institution for preparation & implementation of plans for social & economic development.

District planning committees have been Non-starters. Even at the grass root level people lack capacity for planning. Acc to Manoharan Tiger Committee instead of Decentralisation of panchayat. Decentralisation of corruption had happened. Bureaucracy in collusion with Pradhans continued the diversion of funds, Hence, the empowerment of gramrathas & Strengthening of Social Audit was necessary. Like Kerala other states should also introduce panchayat ombudsman where people can approach to register the cases of corruption. Like National commission for SCs, STs a National commission for local self bodies which can act as a watchdog & go for continuous review is needed. It is

Panchayati Commission had suggested to create Legislative Councils in all states. Reorganised Legislative councils they should be made the bodies representing the local self institutions. They should be given Real powers so that they can compel state legislatures to devolve powers.

→ 73rd & 74th Amendment Act provides for Reservation for Women, SC & ST Community however Reservation itself does not ensure participation. There have been instances primarily in Tamil Nadu where members of upper caste have not even permitted the chairperson belonging to SC community to attend the meetings.

The state of municipal governance in India is worse at least panchayats had a place in directive principles municipalities have been missing all together. The state of Urban administration The delivery of basic services is worse. It is to be noted that India had one of the most advanced urban civilisation in the world i.e. Indus valley.

Indian cities were thriving centres of commerce.

It is to be noted that China has revived its cities in a big way. Chinese cities have been able to attract

the foreign investment whereas Indian cities are lacking even in law & order. It is a paradox that India is democracy but municipalities lack power. On the other hand China is a totalitarian state yet local govt enjoy lot of powers. The mayor of Shanghai is as powerful & prestigious post as mayor of London. China has even involved representatives of municipalities in diplomatic initiatives.

16th Nov 2018

What is the state of urban governance?

Not better than rural.

The quality of basic services is far from satisfaction.

Reasons:

- (i) 74th Amendment Act suffers from similar drawback
- (ii) albeit in 73rd Amendment Act there is a provision for gramasabha. No parallel provision for Mahallan Sabhas.

Unplanned urbanisation at alarming rate.

(iii) Isher Judge Ahluwalia

→ At urban level there are many para ^{statals} ~~structures~~ ^{So many parallel bodies} (duplication of works)

→ India centralised federation.

→ In Lok Sabha there is a predominance of rural constituencies.

Hence very limited schemes for urban development.

→ There is an administrative decentralization but political decentralisation is missing (bodies are created, political power is not

administration of Post & S
DNDA is not a 50:50
Political or 60:40 ratio
2005 & 61

given to representatives). In municipal administration general problems emerge bcz of lack of spatial mapping. The

→ There is lack of adequate training & capacity.

→ Local govt's are reluctant to introduce taxes like property tax.

→ They do not have capacity for collection of taxes & service charges.

A NITI Aayog in its document 5 years

has suggested certain measures

On creating the spaces

What spaces?

for participation of people or create public sphere for involvement of people.

(ii) better collection of user charges, speciall. deep (city to above)

Steps taken by govt:

There is no step to Empower the municipality.

atleast the earlier programme Jawahar Urban Renewable Mission had provision for giving incentives to state govt if they empower municipalities & for municipalities if they perform well in the collection of Taxes & user charges. The most prominent initiative taken by MODI govt was SMART CITIES. There is no performance audit of the programme.

political decentralisation

Acad to (Ashu Judge Ahluwalia) Smart cities require smart municipalities. at the same time smart city limits the role of municipalities. Instead of making municipalities as the Nodal Bodies it had feature of creating "Special purpose vehicle".

municipalities → made nodal body.

(iii) In India especially in metropolitan areas the.

Post of Mayor is just Nominal. The Real power lies with CEO, a member from public services.

current trend.

↓
Maximum governance
minimum govt

ex: Swachh Bharat

↓
Pvt agencies for service & maintenance

There will be greater reluctance to empower municipalities bcz urban areas are centres of growth [Revenue Generation]. State govt do not want to loose the revenues so they maintain strict control.

↑
↑ extent of prosperity
↓ sea of poverty.

As a part of philosophy of Maximum governance, minimum govt there is a trend to promote pvt sector in providing basic services in urban areas.

→ Even Indira Gandhi mahan Bhawan

FEDERALISM

- Q) Regional Aspirations.
- Q) Constitution provisions x
- Q) Changing nature of Centre & state

Q) Inter State water Disputes

Topic

- 1Q) Discuss the prominent features Indian model of federalism?
To what extent the existing model has been successful in addressing the regional aspirations?
- 2Q) Critically evaluate the role of governance?
- 3Q) Examine the efficacy of the mechanism existing in India for the resolution of inter state water disputes with the help of 2-Case Studies.

(i) from North India (ii) South India.

Regionalism:

According to Paul Brass, "Regionalism is a long term trend of Indian politics & Nationalism is a temporary phenomenon".
What is regionalism?

Like any other "ism", Regionalism is also a political ideology for mobilisation of people. It is mobilising the people in the name of region.

What is region?

Region in political science is different from region in geography. In Geography, region is a physical fact in politics region is a political fact. Political facts are made by human. Region can expand & contract according to the convenience. In politics region is not just a physical entity it is a psychological entity. In politics region is always mixed with elemental issue. It can be language, culture, Religion.

Regionalism is a natural phenomenon in a country like

India: Vastness, diversity, prismatic society, gdemocracy.

Whether Regionalism is unique to India?

No, Regionalism is neither unique to India nor unique to 3rd world even western countries face regional challenges.

Ex: Scotland, Catalonia, Basque, Quebec in Canada.

However there is a difference in way the challenges are dealt.

Developed countries: Democratic methods like Referendum.

Developing countries: Whether it is autocracy like China or

democracy like India. States will not use democratic

means rather rely on force.

Why rely on force & not on democratic means?

Insecurity, they are new nations where Nationalism is not consolidated. Gurnitarpal Singh has given "core & periphery model". If any regional demand arise in core regions

(Haryana, Chhattisgarh, Madhya Pradesh) govt is not much concerned.

However, govt is sensitive if demands arise in peripheries like J&K, Punjab, North East.

Why State is concerned?

Regional movements may challenge the territorial integrity they are expressed in territorial terms. Hence they are called as sub-national movements. However they may also be guided by the concern for development.

Causes of Regionalism in India:

There are diff theories.

(i) Modernisation Theory & Scholars: Rudolph & Rudolph.

Introduction of democracy in a traditional society.

(ii) Culture of poverty (or) scarcity:

Ex: North East, Scholars: Mark Jungs & Smear.

(iii) Culture of affluence: Ex: Punjab

Scholar: Thomas Januzyg.

(v) Uneven development:

Ex = Telangana, Vidharb. Scholar: Robert Hardgrave.

(vi) politics of opposition:

Ex = Scholar: T. B. Narayan.

(vii) Song of Soil movements: (a) Bhoomiputra.

Ex = Maharashtra, Assam. Scholar: Hyson Weinar.

Types of Regional Movements

They range from demand from state autonomy to separate state to separation from Indian state.

What is the policy of govt of India to deal with such movmt?

As such Indian constitution provides enough space to accommodate aspirations.

How?

→ Asymmetrical federalism

→ Secularism

→ Multi culturalism

→ Independent Judiciary

→ Vibrant democracy

→ Panchayati Raj.

Even India has a good record in dealing with regional movements

(may be best in world) if we compare with former USSR, Yugoslavia, Neighbours like Pakistan, Sri Lanka. Most of the regional movements have followed inverted U curve (Atul Kohli)

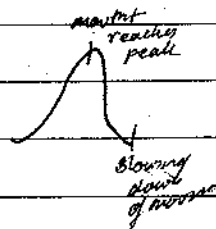

In general there is no declared policy yet we can highlight following approaches.

Is govt is ready to go for dialogue. However there are two conditions -

a) No talks with guns - If separatist will use force govt will use bigger force.

b) Any formula is acceptable but not outside

the framework of constitution

c) The normal course is that movements start getting weak, at this point they go for compromise. Govt offers political & Economic devolution.

Federalism:

The term federalism comes from the Latin word "foedus" it means contract. Federalism is a govt by contract. Constitution is a contract paper. Written Constitution is necessity for federalism.

The first federation was US known as coming together model.

Why federation?

Acc to Lord Bryce federation is where Units desire Unity without Uniformity [Unity in Diversity].

There can be various reasons for states to go for federation

(1) Security

(2) Economic - (Federation is one big market)

Unique features of Indian Model?

K.C. Wheare called Indian model as Quasi federal

means federal in form Unity in spirit.

Reasons:

→ He considered USA as ^{an} ideal & bcoz Indian model deviates he calls it quasi-federal.

Views of Granville Austin:

(1) There is nothing called Quasi federal, either country is federal or Unitary.

(2) K.C. Wheare's methodology is wrong.

What wrong?

He adopts legal constitutional approach. He explains federalism on the basis of features of the constitution.

Acc to Granville Austin federalism is a dynamic concept.

Federalism

→ Unity in Diversity
→ concurrent law
as diff places have diff powers.

He had criticised the traditional view regarding

add
Resolving power
absence of dual citizens

→ Historical approach

Why dynamic?

Federations do not exist in vacuum. They are influenced by internal & external factors. [Social, Economic]. Aced to him each model is Self generated → [means unique on itself & emerge in specific circumstances].

Behavioural approach.

We can agree with Grandwll Austin. If we see USA model in practice it may be very different. Since the introduction of welfare state in 1930's. There is a growth of New Federalism in USA.

What New federalism means?

Strong-centre, By in 1990's bcz of coalition politics the position of the states had become stronger. Aced to Grandwll Austin Indian model is Cooperative federalism.

→ not quasi-federal

What is Cooperative federalism?

(i) Cooperative federalism differs from dual federalism.

Ex of Dual = USA. In dual federalism the two govt are like two water tight compartments. Means Independent of each other.

Cooperative federalism is based on interdependence rather than dependence. Ex: In India.

States are dependent on Centre for finances & Centre is dependent on states for execution of its laws.

→ Cooperative federalism also denote Strong centre. Centre as a big brother. adopted in the countries with Revisionist-trends. Ex - Canada, India.

Federation is dynamic in nature

Aced to paul Brierly, contrary to the view that Indian Constitution emerged in the flow of slope it emerged in the environment of fear (bcz fear of partition).

→ so that to prevent them from separation strong centre is called.

Another unique feature of Indian model is its Asymmetrical. Alfred stephen calls India's Asymmetrical model as democratic enabling & USA's model as democratic constraining. It means Indian model is more democratic & for developing countries.

India is a better Example to follow.

democratic enabling. In USA all states big (or) small have equal representation in Senate. However in India the seats of the state are in proportion to the population.

Q1) Which form of govt is ideal for Federalism?

→ Parliamentary (or) presidential.

Presidential system is ideal for federalism & not parliamentary why?

parliamentary system distract the functioning of federalism. How & why?

parliamentary system is based on party system. parties distract the working of federalism. for ex: Indian model operates smoothly when the party at the centre & the

party at the state are same. However, when they differ it starts showing frictions. If same party is in centre & state it acts as a cooperative federalism. If parties differ it acts as a bargaining federalism. It is

→ as they will be implementing the policy that was given by centre

to be noted that the various commissions like first & 2nd ARC, Sarkaria Commission, ~~Paradhi~~ ^{Purush} Commission,

Commission setup to review the functioning of centre & state relations have not made any ~~strong~~ ^{suggestion} for structural

change. There is a common view that in India there is no centre & state dispute it is party-party dispute.

Indian dispute centre-state dispute is only party-party dispute

According to professor M.P. Singh, the Indian model will operate best (or) smoothly only when there is a one party dominant system.

→ Cooperative federalism

According to professor M.P. Singh there are two axes of Indian political system.

(1) Parliamentary Axis (means centre is strong)

(2) Federal Axis (State is strong)

Sometimes federal axis is dominant sometimes parliamentary axis.

Q) Discuss the changing trend in centre & state relation?
Federalism does not operate in vacuum. It is influenced by many systemic factors.

New Economic
↓
Federalism.

↳ It means Socio, cultural, Internal, External factors

Even Indian federalism has shown different trends,

(i) ~~April 1947 to 1967~~ 1947 - Strong centralising trend during this phase country had

a) one party dominant system

b) had wars with neighbours

c) had centralised planning.

(ii) from 1967 to 1989: The hegemony of Congress has weakened the initial hegemony of centre. Centre had to face various regional movements at diff times. Still centre remained dominant but centre's position was not uncontested.

(iii) from 1989 onwards: The federal axis became strong

Reasons: a) coalition Era at Union level

b) The End of centralised planning

c) The increasing role of privatisation has

→ Reduced the functions of the states thus

reduced the needs of the states

Roll back of State

→ public pvt + partnership also reduced states

dependence on centre for funds.

The stronger position of states is evident if we look at the finance commission recommendations since 15th finance commission.

(iv) from 2014 onwards: The return of one party dominance

→ The strengthening of nationalist consequences & weakening of Regionalism.

→ Charisma of Modi

→ The decline of opposition & Regional parties.

All has again strengthened the parliamentary axis at present there is a strong centralising trend

Ex: (i) Less reference of 15th finance commission

may lead for
cooperative
federalism

(iii) Introduction of GST

(iv) Abolishment of NDC, National Development Council

(v) Vision of PM Modi: Sakha Saath

1) Sakha Vikas

2) Sakha Vishwas

He promotes the vision of TEAM India & India first.

He has given vision of competitive, cooperative federalism

Accd to Prof: Baldev Arora

competitive, cooperative federalism is based on

Neo liberal idea

[Minimum govt & maximum governance]

→ States will compete with each other to attract foreign investment.

(ii) States & centre have to cooperate for "Ease of Doing Business". Ex: GST

(iii) There is a possibility that the above model may increase regional imbalances.

Q) What are the areas of dispute in centre & state relations?

i) Legislative: The legislative powers are tilted towards the centre (7th Schedule). Even on the subjects of the state list Union can make laws encroaching Normal periods [Art 249, 252, 253].

Analysis

Not only the initial distribution was skewed towards centre, subsequent amendments resulted into the decrease of state powers. Thus the legislative federation is a very weak concept.

(ii) Administrative Issues: More contentions.

→ Power of Union to issue directions (Art 256, 257)

→ Not only Union has power to issue directions but power to punish in case of non-compliance (Art-365 & 356)

(Art 365)

direct state law
to comply Union direction

provision in case of
state failure

Article 256, 257
Before it used to give
states the power to
appoint & dismiss

Union list, State list
concurrent list

249: Power of parliament to legislate
on matters in state list in
National Interest

252: Power of parliament to legislate
on matters in state list with
consent of state legislatures

253: Legislation to give effect to
international agreements

obligation of states to Union

Control of Union over
State in certain cases

→ Misuse of Art 356

a) Colonial legacy.

b) despite Ambedkar's promise that it will be

a dead letter it remained most vocal. In less than 70 years of Republic it was used more than 100 times so far around 115 times most of the proclamations till 80's. In 1990's misuse declined but not stopped.

Reasons

• Coalition govt

• Judicial activism - (SR Bommai case) 1994.

• presidential activism (president has returned 41

declined bcz CM of Karnataka

checked the length of Art-356 had slight impact on centre state relation

under 356 legislative assembly dissolved & power of centre government

The basic problem has been the misuse. The misuse in the interest of Ruling party at the centre. Some recent

Examples include: → Misuse in Arunachal Pradesh, Uttarakhand.

Govt action in Arunachal Pradesh in 2014 was criticised by Supreme court as thrashing of the constitution.

One of the earlier example: → In 1977 Janata party govt dissolved the govt's in 9 states ruled by congress on the grounds that congress has lost majority at Union.

→ In 1980 when Indira Gandhi came to power, she also dissolved the govt's in 9 states ruled by Janata party on the same grounds.

Policy:

(Constitutional morality, morality.)

Economic inclusive growth & Development

→ All India Service ^{Grievances}

→ cannot be dismissed by State govt, power is in the centre.

→ They act as agents of Union. State govt has no power to dismiss.

→ Deployment of Armed forces Grievances

→ Ex-moto deployment

→ power, privileges, jurisdiction, liabilities all determined by Union.

INSTITUTION OF GOVERNOR.

→ Institution of Governor.

What is the role of governor?

As per constitution, governor is the head of State Executive.

Why there is a Institution of governor?

Governor has dual role.

(1) Since we have adopted parliamentary system even at the state level two heads are necessary.

(2) India is a cooperative federalism. Governor acts as a lynchpin (Building Bridge).

What is actual scenario?

Governor is the long arm of the nation, with "Iron Fist in velvet gloves". Instead of the Institution of Cooperative federalism it has become the Institution of Bargaining federalism.

Why?

Misuse of the Institution by Building party at the centre.

What allows the misuse?

Discretionary powers of the Governor. As per Art 163 there shall be Council of ministers to aid & advice except where governor is to act in his discretion.

It was also mentioned further that governor will decide when to use discretion. Governor's power to use discretion is beyond the scope of Judicial Review. Some of the examples of the situation are:

Ex. Art 356

(1) Reservation of the Bill

whether discretionary powers are against democracy.

Ideally discretionary powers are against democracy but they have to be given on the basis of trust to meet unforeseen situations. The problem arises when discretionary powers are used in arbitrary manner. (Views of Poore's Commission).

14 Nov 2019

(i) In a democratic country there is a very narrow scope for use of discretionary powers. It should be used with absolute caution. The Exercise should not appear unnatural, unreasonable & arbitrary.

Ex of the discretionary ^{used} power

There are many examples of Arbitrary Exercise. In 1984 Chief minister of Andhra Pradesh N.T. Rama Rao (NTR) went abroad for medical treatment Governor dissolved the assembly

(ii) In 1998 Governor of UP Romesh Bhandari dissolved Kalyan Singh govt & appointed Jagdambika pal as chief minister. Not giving opportunity to Kalyan Singh to prove his majority. Then Supreme Court had to intervene → for the first time in history of India Composite floor test took under the authority of Supreme Court in which Jagdambika pal lost.

(iii) 2006 Governor of Bihar Biju Singh dissolved the assembly immediately after the election even before 1st meeting.

(iv) 2016 Governor of Uttarakhand gave Congress govt time to prove majority but dissolved the assembly in 1 day in advance. On the basis of sting operation released by media.

In 2016 Governor of Arunachal Pradesh prepared the session of Assembly

In 2017 Governors of Goa & Manipur didn't invite the largest party (Congress) to form the govt. at the same time in 2018 governor of Karnataka invited the largest party [BJP] to form the govt.

Supreme court's view on discretionary powers of Governor

In Hargobind Pant v/s Raghubir Malik case → 1979.

Significance of the case

given by constitutional bench with unanimity. The discretion of governor is discretion of governor & not the

discretion of Union govt. Governor is a constitutional post of dignity. Even when Union Govt has power to appoint & remove it does not mean that governor is Employee of Union. Governor is not answerable to Union for the manner in which he conducts the functions of his office.

discretion power is not a problem but arbitrary use.

Where is the fundamental fault in the institution of Governor?

System of appointment & Removal

System of appointment

1) Constitution mentions only 2 Qualifications

a) Citizen of India.

b) completed 35 years of age.

constituent constituent assembly:

pandit Takhur Das Baghwan raised issue with pandit Nehru. He held that we should make elaborate qualifications.

Response of pandit Nehru:

Nehru makes Gentle man's promise.

Healthy conventions will be followed.

What are in Healthy conventions?

→ Only Eminent persons will be chosen

→ person should not have active political (or) administrative background.

→ Not from the same state.

Actual practise

→ only the last convention ~~was~~ followed.

→ persons elected by the electorate in Lok Sabha Elections

have been made governors.

→ Not only civil servants even judges without cooling

period have been appointed

→ atleast some time before their tenure & appointment should be their.

Hence it is a high time that things should not be left on conventions. Should be written in Black & white.

Raja mannar committee set up by Tamil Nadu govt has suggested that there should be consultation with

Chief ministers if Chief Minister is not comfortable that person should not be appointed.

Poonchi Commission:

As suggested Inter-State Council must be used.

A list of Prominent persons ^{can} be prepared with consultation & the persons should be appointed automatically.

2nd Fundamental Problem

System of Removal:

There is no security of tenure like president. In case of governors. Governors are at the pleasure of president which means pleasure minister.

Views of Supreme Court:

B.P. Singhal 4/5 VOT case - 2010.

→ Supreme court held that pleasure doctrine should continue.

→ There is no need to give opportunity to governor to present his position & there is no need for govt to give.

Explanation:

However court ^{held} that just bcz governor is from different ideology cannot be seen as valid ground for Removal. Since then removal of governors for ^{partisan} ~~partisan~~ ends has decreased though they have been transferred.

→ Accd to Supreme court governors should normally be allowed to complete their term.

Way forward:

Joshi Sorabjee his book "Governors: Sage or Saboteurs?"

Governors can do great good if they are good governors.

They can do great harm if they are bad governors.

Even Sarkaria Commission recognised the critical

role the governors play in India's cooperative federalism as a lynchpin.

Poonchi Commission suggest that the importance

of the government has increased in the context of growing communalism, internal security challenges.

Views of former Prime Minister Manmohan Singh:

In the conference of governors he has given 4 mantras

- (i) you are the soul judge of ~~the~~ what is right & what is wrong.
- (ii) you decide what is the mandate of the constitution.
- (iii) you have to see what people expect from you.
- (iv) you have to see what is in the best interest of the country.

Centre & State financial dispute

taxation powers of state are very confined. goods & services tax need permission & products & services tax.

The distribution of financial powers are tilted towards centre. The taxes in the state list are old & low yielding whereas the taxes in the union list are various & high yielding.

→ Constitution puts many restrictions on the taxation powers of the state. Ex: (i) The profession tax cannot go beyond ₹ 2500 per annum.

(ii) In some contexts if state has to impose tax it requires consent of Union (iii) president.

Ex: Tax on the sale of Electricity & water for the use of the Union.

→ Union's property is exempted from states taxation whereas States income can be taxed if it is due to the functions not treated as the ordinary functions of the govt.

→ Finance Commission which determines the distribution of Revenue & grants is solely constituted by union.

on 10th finance commission federal structure. when strong union & then change.

Terms of Reference are solely determined by Union.

→ Earlier planning Commission became an institution of bargaining federalism as it was determining

developmental outspace.

States had ~~concern~~ concern also over large number of centrally sponsored schemes.

They take away the freedom of State to decide the policy of their own. NITI Aayog was supposed to be a welcome

change over planning commission. However, once NITI Aayog has come into existence centralisation has increased.

At least in planning commission states were involved in the approval of plans through the platform of NDC. Now NDC is abolished all the powers get concentrated in Finance Ministry.

→ There are many limitations on the borrowing powers of the state govt. They cannot borrow from outside.

(i) There are restrictions when they borrow from domestic market.

(ii) GST has further taken away the autonomy of the state govt.

Note: Out of all state taxes Sales tax was most buoyant ~~tax~~. Sales tax was the major source of revenue for state govt. to implement the developmental programmes of their choice. Even in constituent assembly there was a debate, ultimately Ambedkar held that there should not be any upper limit on the sales tax imposed by the state. (Major source of Revenue → GST)

→ ^{optimistic} tax revenue increasing

State, Interstate, Union

→ GST has taken away the autonomy. Now, a single state cannot decide its own priorities & rate of tax.

→ GST has been made the imposition of sales tax as three legged horse (state-centre)

→ It is said that federalism was unity without uniformity. Even the most capitalist country USA does not have GST but it values federalism. It should be matter of choice of state govt. → for ex: If state of Bihar wants the prohibition on alcohol even for ideological purposes it should be

their choice. If the state of Tamil Nadu wants to make expenditure on Education & so that they want to impose higher sales tax on some goods it should be their choice.

Whenever there is a one party dominant system Indian political system reflect centralising trend.

INTER-STATE WATER DISPUTE

"Whiskey is to drink & Water is to fight".

colleagues note

It is true that there is a water scarcity in India but the problem of water in India or Pakistan is primarily not of mismanagement water is becoming an important currency of politics everywhere. There are many inter-state water disputes in India but they are primarily political in nature.

What are the mechanisms found in India for Resolution of water disputes?

Water ^{dispute} is the only dispute for which there is a special provision in the constitution. There are following mechanisms to resolve water dispute:

(1) Art 131, 136, 263, 262.

Article 131: Original jurisdiction of Supreme Court.

This method was in practice till 1956. State

Reorganisation

In 1956 Union parliament has brought two acts:

(i) Inter state water dispute act 1956

(ii) River Boards Act 1956

River Board Act 1956:

It was a proactive approach.

What is proactive

It was thought to prevent even emergence of issue

How?

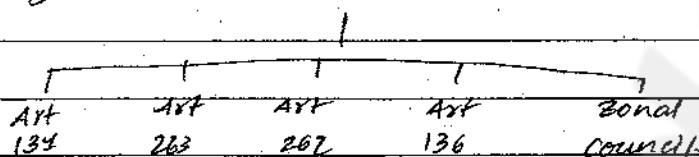

By creation of River Boards.

Board will consist of co-riparian states in joint planning & joint management of water resources.

Till date not a single river board was created under the act.

In 1986 govt of India has also estbd Zonal councils.

Zonal councils: One of the prime objective was to resolve water dispute. The then Home Minister while inaugurating zonal councils held that river do not understand linguistic boundaries. Not a single dispute has been dealt by zonal councils.

Article 263: Inter State Council: Most important institution for the effective working of cooperative federalism. It could be created by presidential order could be utilised for the resolution of the disputes.
Never used.

Art 262: If parliament think appropriate it can bring law for the resolution of dispute & may exclude the jurisdiction of Supreme court. parliament brought the inter state water dispute act & excludes the jurisdiction.

Analysis of attitude of SC

This is the only dispute where constitution prohibits SC. Ideally SC should not entertain issues. However in India SC has been entertaining the disputes under SLP (Special leave petition) under Art 136.

Role of SC of USA :

In USA these disputes come under original jurisdiction.
However USA SC discouraged & Campbell tries to resolve
the dispute politically.

Analysis of Efficacy of water dispute Act on the basis of
Case Case study on Kaveri.

(1) It provides the list of dispute to be treated as water
disputes.

If in case any dispute arise concerned state will approach
to Union govt. Union govt as a big brother will try to resolve
the dispute by mediation.

In 1970 Tamil Nadu govt approached to Union
govt bcz 50 year agreement was to expire in 1974.

mandamus → ordering
them to do their duty

However Union govt didn't constitute the tribunal.

Tamil Nadu had to approach to SC. SC issued the writ
of Mandamus. ultimately Union govt constituted the
tribunal in 1990. Since the constitution of Tribunal was
delayed Tamil Nadu demanded Interim Award. Tribunal
declined. Tamil Nadu approached SC bcz of SC's
intervention Tribunal agreed to give Interim award.
Karnataka declined to implement the interim award.

Tamil Nadu approached SC. SC issued writ of Mandamus.
Karnataka declined. It's not under obligation to implement
until the award was published in gazette. TN approached
SC again issued writ of mandamus. Karnataka Chief
Minister went on fast, TN chief minister also went on
fast there were clashes & some people lost their lives.

Since there used to be excessive delays in
constituting the tribunals Union govt brought amendment
in 2002.

(2) Once Union govt receives the request Tribunal will
be constituted within a year.

(iv) Tribunal has to give award within 3 years in exceptional situations & more years.

(v) In 2007 - Kaveri ~~govt~~ Tribunal gave the award.
after ⁷⁰ years of constitution of Tribunal.

Even after award came it was not implemented. TN had to approach to SC. (Same procedure Repeated)

(vi) In 2013 - SC ~~it~~ was directed to constitute the authority, authority will be constituted under PM. Nothing implemented on ground. TN approached to the SC. SC took unprecedented step → In 2018 - SC changed the award itself. SC decreased the share of TN & increased the share of Karnataka.

Why unprecedented?

As per 1956 act award of Tribunal was final.

→ 1956 ^{act} Excludes the jurisdiction of SC.

→ Until now SC intervened only in context of working of Tribunal but never changed the award. for the first time SC changed the award itself. It was the wastage of the entire process. Jurists like Fali S. Nariman suggest to end the Tribunal system restore pre-1956 status.

Steps taken by present govt.

→ Govt has brought amendment in the act. all existing tribunals will be brought under the permanent tribunal.

→ Tribunal will consist of Chairperson, Vice chairperson & 6 other members, No one will serve beyond 70 years of age.

Since dispute arise Union govt will setup a dispute resolution committee. They will try to resolve the dispute within a year & extendable to 6 months after which Tribunal to be constituted.

→ (vii) Tribunal has to give award within 2 years extendable to 1 more year Hence the total time will be $4\frac{1}{2}$ years - [Earlier it was bylaw]

However, water disputes are political in nature even after all these changes there is no guarantee that things can be implemented on the ground without political will.

Case Study from North-Indian States:

Satlej - Yamuna link Canal:

→ The 1960 Indus water Treaty with Pakistan left Punjab an agrarian state with disadvantage.

→ In 1966 Haryana was created demanded share in Satlej water declined by Punjab bcoz Satlej does not flow through Haryana.

→ Union govt intervened created an agreement to build link canal while involving two more states Delhi & Rajasthan.

→ Water sharing was one of the issue in Khalistan movmt.

→ In 1985 the agreement b/w Rajiv Gandhi & Sant Longowal lead to the estbl of tribunal to address the concerns of Punjab. The award has been controversial & not published till date.

→ In 2004 Assembly of Punjab took unprecedented step it terminated the agreements on water sharing with all states.

→ Union govt referred the matter under the advisory jurisdiction. It came up with the view in 2016 that the action of Punjab was not constitutional.

→ In 2017 Elections were due in Punjab the ruling party took unprecedented step it de-notified the acquired land meant for construction of the link & started returning the land with the plans to build colonies.

It has also returned the cheque taken from Haryana govt to build Canal.

New act brought by govt the act has been moved to publish a warrant in the gazette.

SOCIAL MOVEMENTS.

→ Civil Right Movements (What to read)

What are civil Rights? Which rights are called civil Rights?
The Rights which establish the Rule of law for political democracy
Ex: fundamental Rights

History of civil Rights movements

→ Freedom movement

freedom of press,

Representation in legislative councils

Satyagraha against Rowlatt act

→ After Independence

Civil Rights were given constitutional guarantee (Art 14, 19, 20, 21, 22).

What was the status of Civil Rights movement?

In practice civil Rights remain weak.

Indian state introduced preventive detention laws. It is an irony that Pandit Nehru who himself was a civil Right activist & promised that there will be no black laws introduced preventive detention law.

In India preventive detention law can be introduced even during normal times primarily against opposition.

Ex: (A.K. Gopalan) was opponent of Nehru & a communist leader was put behind bars. He has challenged his detention as arbitrary violation of due process of law.

→ During time of Indira Gandhi it was not better, situation become worse that J.P. Narayan called for total Revolution

which led into Imposition of Emergency on internal grounds also. The black hour of Indian democracy. During

Emergency preventive detention acts like MISA was used against political opponents & unfortunately even Supreme Court cannot come to rescue (Habeas corpus case). After Emergency also situations remained unchanged govt had

AA 356

brought Draconian law like National Security Act initially as advance where a person can be detained for 1 year without approval by the magistrate. Though J.P. Narayan's movement led to the rise of many civil Rights organisations like PULL, PUDR, ADR yet India continues to be a Police state. Govt officials continued to enjoy lot of Immunities which weakens the rule of law. Even at present the laws like UAPA continues to challenge civil Rights. which shows that civil Rights activism have not been adopted. & India continues to be Over developed state (Bonapartian state)

Human Rights Movement:

India has been the signatory of Universal Declaration of Human Rights (HR) since beginning. Even Indian Constitution incorporates the idea of HR as many fundamental Rights are available even to non-citizens. India has been signatory to International Conventions on Human Rights.

In order to strengthen the Human Rights situation in India govt have estbd Human Rights Commission.

However, it is often criticised as toothless tiger - It does not have any power to enquire the cases of violation of Human Rights by the members of Armed forces. Even India has Unofficial Bearu Act (UNHRC). However, the universal periodic review of India does not give the bright picture. Some of the Major Human Rights concerns are

- 1) Armed forces special power Act (AFSPA)
- 2) Continuation of National security Act, Public safety act.
- 3) State of undertrials.
- 4) Torture by police.
- 5) State of prisoners.
- 6) Female foeticide 7) Atrocities against dalits.

The Existing Scenario show that India does not have any effective Human Rights movement.

According to professor Upendras Baidya there is no ^{Human Right} civil right

Movement Rather Human Rights Industry

↳ It has become a means to

make money.

HR Orgs in India Lack Legitimacy

Why?

They are accused of biasedness

(i) they criticize the role of Armed forces

(ii) They overlook HR violations by Non-state actors.

What is the Current Scenario?

HR will always be sidelined when ever country will face Security threats. Under the leadership of present PM as well as Home Minister we can expect there will be better law & order, Security, Non-state actors will be curbed & there will be better scope for Exercise of Civil rights, Fundamental Rights by ordinary citizens. In recent time govt had taken many steps to address anti Social Elements, Non-State actors. In context of Rising Cyber Crime, Hate Speech, Misuse of Social media.

India was not a signatory of Refugee treaty.

ENVIRONMENTAL MOVEMENT:

Civil Rights purpose : ^{Contexts} Rule of law. (Constitution, Equality before law etc)

Fundamental Rights : ^{Contexts} Country to country (In India 6-FR which art-32 is available)

Human Rights : ^{Contexts} Which give life of dignity - & Human Rights there are some inalienable Rights. HR is part of international law.

Environmental movement in India

Environmental movement started in 1970's with Chipko Movement by the women in Uttarakhand. The movement was against commercial forestry. Later on many similar movements emerged in diff. parts of the country like APPIKO movement in Karnataka; ^{Protect} Silent valley movement in Kerala. In 80's & 90's the most prominent movement was Narmada Bachao Andolan (NBA).

Nature of Environmental movements

In Environmental movements primarily question the developmental strategy. Since they question the developmental strategy they are primarily treated as "Anti National". Environmentalists in 70's were criticised as CIA Agents. Environmentalists at present are known as "Old fashioned Socialist guys".

→ India has a long history of Environmental movement

— The tribal movements for ex: by Jaintias were an environmental movement against the extractive policies of Colonial State. Even after Independence extractive policies continued. Led to Ramchandra Guha

His Environmental movement in North is a movement by Full Stomach (middle class - Educated people). The Environmental movement in South (India) is Empty Stomach. Thus Environmental movement in India are led by most marginalised sections like tribals. The indigenous people who has to be displaced for the sake of development & where expected to make supreme sacrifices for nation's well-being. Indian State displaced them

without proper rehabilitation & Resettlement. Many of the Environmental activists are declared Anti National & have been detained under preventive detention laws.

There are 3 major expressions of Environmental movement

- (i) movement against commercial forestry.
- (ii) movement against large scale dam.
- (iii) movement against mines

Most of the movements are in the regions inhabited by STs the poorest sections of the society. One of the Resentment against the modal of development has resulted into the Emergence of Left wing Extremism. It is an irony that India has been at the fore front of Environmentalism at international level but back home India has become the basket case of Environmental tragedies. From polluted shores to the dead rivers. Is the ^{total} account of Environmental activism of

a) Indian State.

b) Judiciary

c) Civil Society:

In recent times there is a dilution of Environmental Impact Assessment (EIA) There is a question mark on New CRZ (Coastal Regulation Zone) as well as proposed Amendments in the Forest Act.

Fortunately India has a Prime Minister whose commitment towards Environment & Sustainable Development is recognised globally. We can expect that in coming years there will be a qualitative improvement in the Environmental issues.

(What is the Road Ahead? or How to address Environmental tragedies?)

Ased to Smriti Narayan.

(i) It is wrong to think that Environmentalism & Development are Antithetical.

(ii) Environmentalism requires Sustainable development. Protection of Environment is not about planting trees & protecting tigers. Environmentalism is about democracy means

(iii) Protection of Environment is not possible without

Ex highway project in Telangana → climate change → development should not be at the cost of environment.
Sustainable development
Vellore citizen welfare forum
V/S. VOZ-6

Cooperative growth

Empowerment of people at grass root level - Environmental protection.

Environment.

WOMEN MOVEMENT

India does not have feminist movement. It has women's movement.

Feminist movement is challenging the patriarchy.

Women movement is not about challenging patriarchy.

Women movement in India is about addressing the basic rights of women. The major issues include Economic Empowerment of women - political reservation of women in legislatures.

History of Women Movement.

(1) Women movement in India was started by Liberal Men.

Raja Ram Mohan Roy, Jhawan Chand Vyasragars

During National movement Gandhi brought women in the mainstream. It has strengthened the consciousness which resulted into emergence of bodies like All India Women's Conference.

One significant achievement was

(i) Pharda Act (increasing the age of women for marriage).

2nd phase (from Independence till 70's) - GREY YEARS means no prominent movement.

Why?

women's orgs thought that Indian State will itself take care of the interest of women. There is no need of movement.

70's Revival of women movement, Why?

United Nations declared 70's as the decade of women.

UN directed all govt to prepare a report on the status of women. Govt of India published the report in 1974.

Titled towards Equality. The report brought shocking facts about the status of women. Especially the declining

ratio, Exclusion from development, Dowry Deaths, Rapes.

The Report was eye opener & the beginning of Women movement in Independent India. It has led to the formation of many women Orgs. However, 80's was one of the worst decade for women.

Issues:

→ large no. of dowry deaths

→ Sati Act Degraded in Rajasthan

→ Mathura Rape case - Rape of Dalit women in a police station.

Women movement in 1990's:

The Globalisation has increased the No. of women Orgs. However at the same time it has increased the phenomena of feminisation of Poverty. The most adversary impacted group was rural women. There is no significant improvement in the violence against women including Negative Sex Ratio.

In Recent Years India has also seen the beginning of feminist movement. The nomenclature of women Orgs changed. The New Nomenclatures are Saheli, Vamacham, Manushi. However, Radical movement are confined to post-gravidian cases for ex: women have organised "Not Walks" movement.

There is a growing Interlink b/w Indian & global movements for ex: Me 2 movements. There is no achievement as

such except some Bizzome pieces of legislation (Machhi Khushwar)

At present one of the biggest issue taken up by Indian state is Empowerment of Muslim women.

Party System

Party system Material
Pg No = 161

Data of 17th Lok Sabha:

→ 397 MP's were elected from National parties, &

→ 303 MP's from BJP, 52 from Congress, 22 from TMC.

→ Among the state parties DMK-23, YSR Congress-22.

→ Left together has 5 seats.

→ The No of Re-elected MP's are higher than last time.

Avg age is 54 years.

In 16th Lok Sabha 20% MP's had certificate of 10th class.

whereas in present L.S 27% MP's has certificate.

→ representation of women MP are gradually increasing from 5% in 1st Lok Sabha to 14% in 17th Lok Sabha.

Self awarded daughter company

→ 39% has listed as Social workers.

→ 32% agriculturalists.

→ 23% Business men.

→ 4% lawyers.

→ Nearly 50% of the MP's have criminal background. 26% increased from 2014.

→ There is a increase of 109% of ⁱⁿ term no of MP's with heinous crime since 2009.

Positive secularism

or
not against religion
if it makes temple it also
make mosque.

democracy in India is surviving bcz of the poor & Educated are most irresponsible.

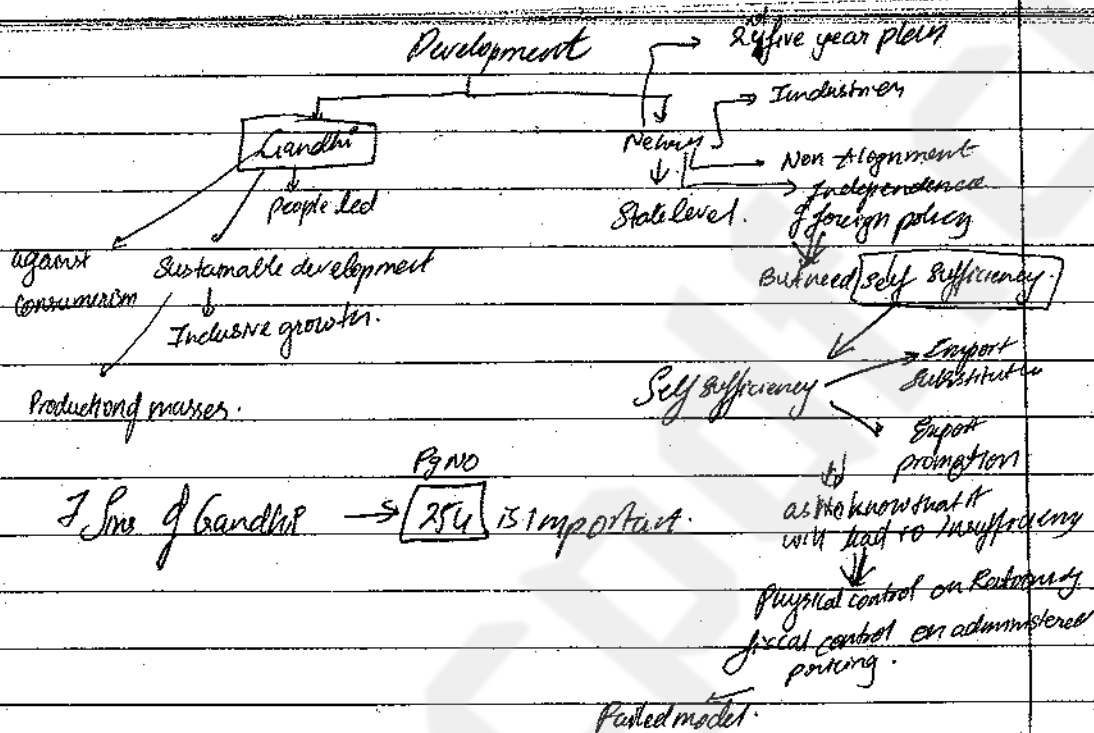

→ In India people vote a lot compared to other countries.

Testimony

Electrons

key words attracting people.

PLANNING & ECONOMIC REFORM.

J. S. of Gandhi → P. No. 254 is important.

→ Read introductory chapter of Economic Survey

Land Reforms

Gandhi

→ Land to the tillers

[Landless labourers: most of them are SC/ST's]

→ Ambedkar - Nehru = Reservation in PSE

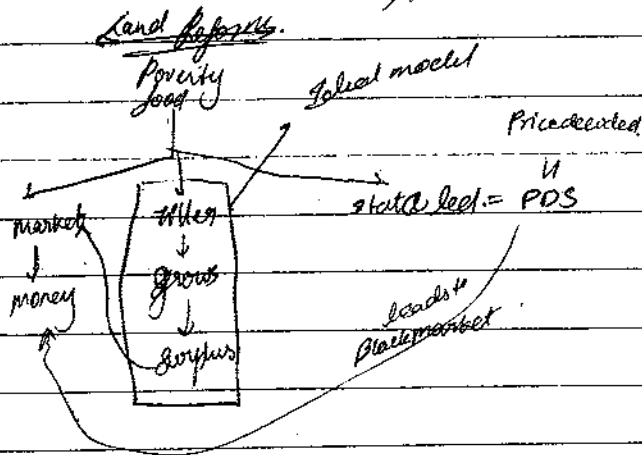

→ Maintaining poor people is necessary for rich people to live

→ Gandhian approach could have made them owner of the land & would

lead them to be land owner → So eradicate poverty, or can eradicate hunger

→ There is enough for people's need but not for people's need.

→ State led development model → would always lead to corrupting bureaucracy & politicians.

Indian Land Reforms → Landlords abolished
 → Tenants should be saved.
 → Land ceiling → Extra land to the people.
 → Landless

Universal Basic Income

Land Reforms could have developed India's more than Reservations.

→ Skill development

→ Electoral Reforms should be brought
 ↳ Electoral Bonds

Green Revolution: Food Security

Land Reforms is distribution approach, Green Revolution is production approach.

- They don't have capital → so started taking money from money lenders → not able to pay → led to loss of land.
- due to Green Revolution it led to environmental impacts.
- it had led to social & political conflict. Ex: Punjab
- cost increase in wages → led to increase in inflation.
- led to displacement of labourers.
- led to loss of job theory → unemployment.
- State revolution.
- Instead of Green going for food security → we should have gone for Land Reforms.

UNION GOVERNMENT:

- Role of president, Prime Minister & Council of Ministers.
- Role of Indian parliament → we should recall Decree of parliament.
- Supreme court.
 - ↳ Judicial Activism?
 - ↳ Critically evaluate India's Judiciary role.

Role of President:

→ Head of Union Executive. Since India has parliamentary system there are two types of heads.

PM is the real Head, President is Nominal Head.

What are the functions & responsibilities of president?

- Act as Nominal Head of Union Executive.
- As India is a cooperative federalism President represent States also.

Care taken PM is more Powerful than President

What is the Nature of power of president in India?

Former president R. Venkataraman. He said "President is like an Emergency Lamp".

Art - 356

It means president never has any discretionary powers only when main switch is off. The only occasion is hung Assembly but fortunately Presidents have followed the conventions unlike Governors at the State level.

As per the constitution & the principles of parliamentary system, president should act on aid & advice of Council of Ministers.

What if president does not act?

He can be impeached it will be treated as violation of constitution. Suppose President sends the advice back for reconsideration, How constitutional Expenditure will reevaluate. It will be treated as presidential activism.

* presidential activism desirable?

No its not desirable. Presidential activism should not be equated with judicial activism. Constitution allows judicial activism but not presidential. The 42nd Amendment wrt Art 74 was connected 44th Amendment was not correct why?

president is not an institution of accountability of govt. parliament is an institution. President is not an institution of accountability rather friend, philosopher, guide.

Is further India had activist president?

Many activist presidents.

Rajendra Prasad - He opposed Hindu Code bill.

Gyan Zail Singh - used pocket veto on part of his bill on

Rajiv Gandhi govt.

K.R Narayanan - Hyper active

(i) Sent the advice back for imposition of president

Rule in Bihar for

(ii) He read his own speech rather than the one presented by MCA when USA president visited.

A.P.J Abdul Kalam - He was activist as well as populist.

Activist: - ~~used~~ pocket veto he sent the advice back on the office of profit bill.

populist: He was interacting with public a lot which is not correct (as it will result into alternative centring power).

Pranab Mukherjee - activist president

On many occasions he expressed that Govt is not running in a proper sense.

Conclusion: Adhered to

Constitution Morality

same question arises thus

Role of PM:

Most powerful position, if his party is in Majority.
More powerful than president of USA. PM control legislature,
Executive as well as finance.

The position of PM will depend on multiple factors

- (i) Strength of his party.
- (ii) personality of other ministers & council of ministers.
- (iii) His own personality & leadership skills.

Nehru:

Till Sardar Patel was alive his position was not so strong
but after death of Sardar Patel he became Moon among stars.

Indira Gandhi:

It is said that she was the only man in the cabinet.
During her time cabinet declined. Indira developed the trends of
presidential systems.

Rajiv Gandhi:

He was unable to manage his own party. He saw the
largest number of defections.

Narasimha Rao:

Had strong leadership skills. despite running the
minority govt He could bring far reaching reforms.
(New economic policy, look east etc.)

Vajpayee:

It is said that Coalition politics weakens the position of PM.
But it is not necessary if PM has leadership skills. Vajpayee
was the first PM under whom coalition govt completed its term.

Man Mohan Singh:

He had shown leadership skill in UPA-I but could not
show in UPA-II.

Modi:

Extraordinary Charisma, Extraordinary Leadership Skills, ability

to take difficult decisions. God sent opportunity.

Judiciary Role:-

There is no better test than Excellence of Governance than the functioning of its judicial system. Even Economic Survey of 2018 mentions the relationship b/w efficient judiciary & faster Economic growth.

Types of Judiciary Under Indian Constitution:-

→ very independent judiciary.

↳ System of Appointment
↳ Charged Expenditure etc

→ very powerful judiciary

Or Supreme Court as well as High Court are court of review having power to punish for its contempt. Art-129.

(i) Art-149 (ii) Art-142 It has power to do complete justice.

(iii) All civil & Judicial Authority have to act in aid of Supreme court.

(iv) Art-136: Special Leave petition. While defining its power judiciary has held that only we sky is limit.

Active Judiciary: Accd to Pandit Nehru Judiciary in India will not be a passive participant rather active participant in India's social evolution.

Now,

Judiciary is treated as State under Art-36 If Legislature & Executive does not take action to implement directive principle. The judiciary can take initiative.

under Art-242 Judiciary can also declare law

Evaluation of the working of Judiciary:-

Matter of Debate

(i) Prof Upendra Bakshi Nea admires the role of judiciary in strengthening democracy. However, Pratap Chandra Mehra

Special leave is used when there is substantial question of law is involved (or) gross injustice has been done. Special leave petition means an individual takes special permission to be heard in appeal against any High Court or Tribunal verdict. → This is a petition filed to appeal.

Is a critic of Judiciary. In his article Indian judiciary, promise of uncertainty. He held that Indian judiciary is

- (i) Highly paradoxical
- (ii) Highly politicised
- (iii) Self perpetuating.

Paradoxical? Its judgements change very fast. The judges. The judgements are not based on any overarching idea rather they are artifacts of individual judges.

Politicised: decisions are influenced by political environment.

Self perpetuating: (Becomes its own powerful) used to protect. Bharti. Despite Judicial activism nothing has changed on ground of governance. Only Judiciary own image has improved.

Judicial Activism.

What is judicial activism?

When judiciary intervenes in the functions of the other two branches of govt.

Is judicial activism bad?

Gone are the days when judicial activism was seen as wrong. Judicial activism is a global trend with the growing human rights consciousness.

Any way Indian constitution explicitly encourages activist Judiciary.

What is judicial over reach.

The actions of judiciary which don't generate the concept. However, it is very subjective. Judicial High Headedness: when judiciary misuses its power like gives punishment for the contempt of court. to protect the wrong judges or to avoid legitimate criticism.

What gives opportunity to do activism?

power of A Judicial Review.

When Judiciary Exercises Judicial review it means Judicial Review is not activism it is constitutional duty.

If Judiciary will not do Judicial review It will be called as passive.

INDIA - AFRICA

Around Lake Victoria in East African countries.

Number of East African countries are Anglophone countries
Kenya & Egypt are Anglophone.

→ Most of the Indian diaspora is related with British India relation. Mauritius also have large amount of Indian population. → 70% of people are Indian origin.

→ PM's of Mauritius also have been for a "

→ In South Africa about 10 lakhs of Indians.

→ In Uganda - 30,000 live.

In 5 countries - 20,00,000 lakh people live & work there.
& Africa

West side like Algeria, Morocco are Francophone countries.

1st largest trading partner of Africa - USA

2nd " " " " - France.

Kusophone - portugese speaking countries.

→ Historical Background.

→ Significance of Africa for India

→ China focus for India in Africa & India-Africa.

→ 2008 - 2019

→ Rajeev Bhatia - Ambassador to African continent.

→ Pankaj D. Mullani.

→ Hemish V. Pant.

Significance

→ Geo strategic Significance

→ Port Security

→ maritime sphere.

→ Number of East African countries border Indian Ocean

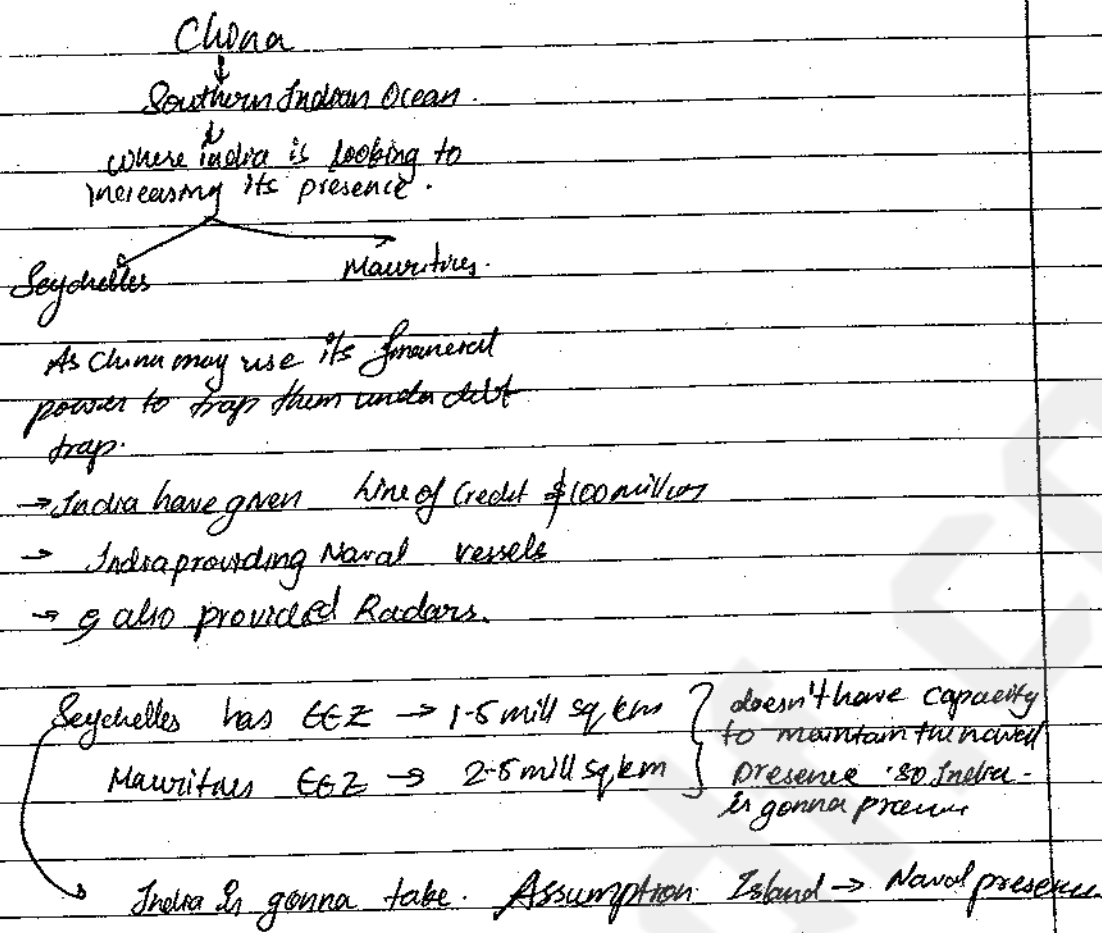

→ Conventional Security Threat

→ Like China can pose challenge

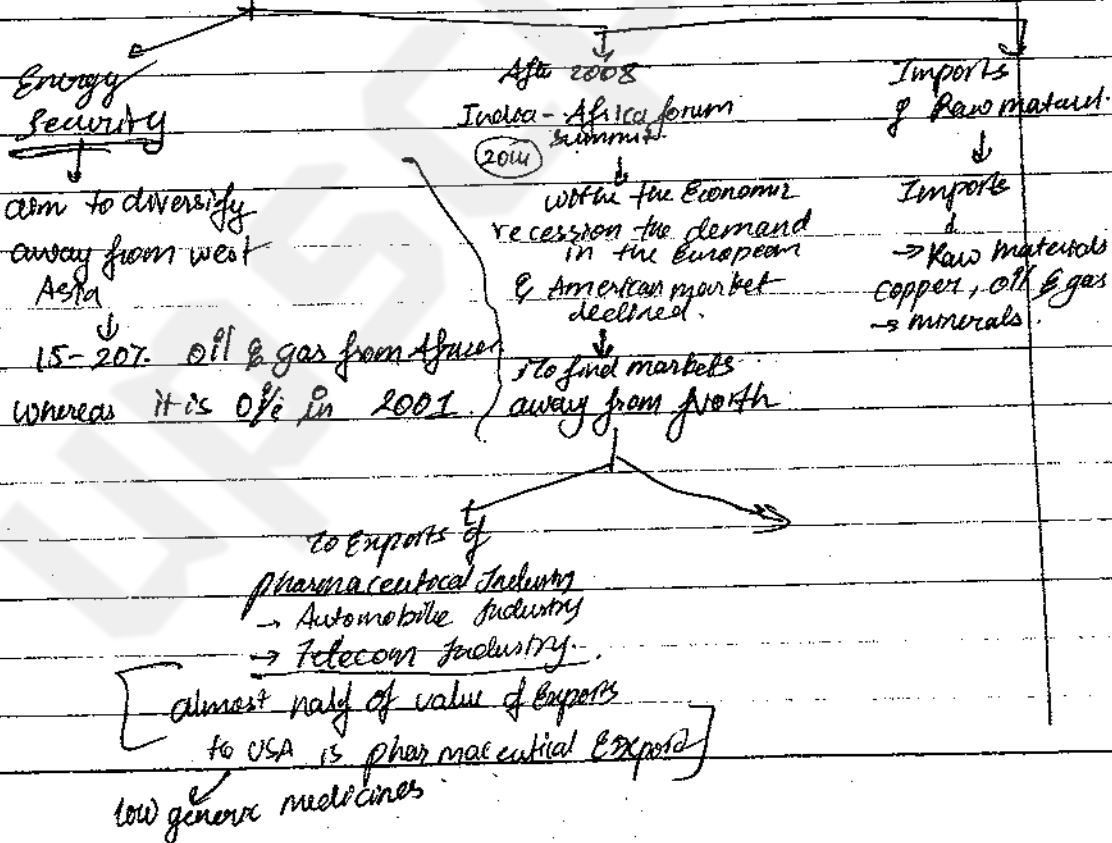

→ non-conventional Piracy

→ along Horn of Africa.

→ Somalia. (can effect Energy security etc.)

Economic Significance.

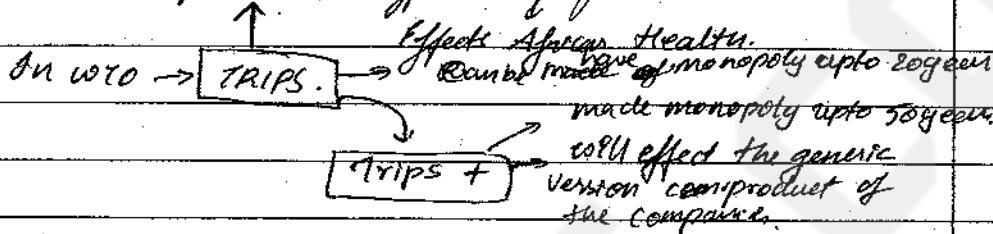

→ Since 2000's India was giving pharmaceuticals for South Africa → ARV, Anti HIV drugs.

HIV drugs were extremely costly in USA, EU countries which could have costed \$1000 per person/day. They don't have purchasing capacity.

→ Cipla started (or Indian companies started providing) at \$1 per person/day.

Patent law problem → Effects Indian pharmaceuticals

Strategic Interest → Member of UN → total 54 countries strengthen its case for UN permanent member.

(UN peace Resolution)

Historical Background

1960's

1990

previously had good relations due to similar views.

European colonies

1960's - supported decolonisation movements in Africa.

1937 - Strongly condemned Italy occupying Ethiopia, Kenya, South Africa.

India recognised ANC before they came into power.

Strongly Argued through Joint NAMA → Ghana - Nkrumah

Reform of Global Institutions to give more effective representation to Global South including African to

at & in UN.

1963: UN Council went under Expansion

P-5

Other Non Permanent members

Pushed from **6** → **10** by NAM.

→ Against Racial discrimination.

→ Economic cooperation b/w Africa & India was zero.

→ Gandhi said India would not flood market (or) against Economic Exploitation.

India have forward looking approach (Closed Economy)

Lack of political stability in Africa & Low Economic growth states & there will be no market as no purchasing capacity.

South - South Cooperation

1964: ITEC → India Technical Economic Coop.

India will aid in nation Building

- ↳ like Engineers, doctors are trained
- ↳ Higher Education in India.

would become policy maker's (1) Bureaucrats so it will

Increase Soft power.

→ It is Realism → Where they understood limit & do what they can.

→ with no conditionalities. India gave support.

whereas Western (IMF, WB) → kept condition.

C. still operating in ~~India~~ Africa also started in Latin America)

ITEC

Higher Education.

Electronics

Engineering

10,000 scholarships

2017 10,000 → 50,000.

Election commission

Mozambique → framed their EC's

& also provided EVM.

Disaster

NDC: Disaster Mgmt training

NDC: Kenya → Higher defence establishment.

ITEC-2009 → PAN African e Network.

Optical fiber Networks → connecting the capitals.

→ \$ 125 million grant

→ Tele medicine } generating goodwill for India.

→ Tele Education.

→ It will help in increasing the soft power.

→ It is a long term Strategic move.

→ Countries must demand & other should help.

→ It's mostly done for Anglo phone countries but not for francophone countries!

After 1990's

↳ Harsh V Pant

ASEAN - Look East policy
West Asia → Engaging energy security needs
USA - Service sector

Africa → No meaningful focus on Engagement
1990-2000 → lost decade

2006

China organised. China-Africa Summit in which 34 countries participated & extended \$1.5 Billion for developing African Infrastructure.

2003

China-Angola → due to Angola had oil reserves

2013-2018 → gave \$14.5 billion

2nd largest supplier of oil after Saudi to China.

Angola asked for first IMF (but kept conditionalities) But China gave without conditionalities.

Francis Fukuyama → End of History

↳ 23rd → He felt his assessment was wrong due to Chinese resurgence.

China - 1978

→ Deng Xiaoping → single party rule followed state sponsored capitalism.

→ In any companies Chinese govt have a significant share. In fact any company becomes big then govt acquires stake. → It is also beneficial for companies bcoz they need to provide loans whenever necessary.

Due to single party → They can acquire long term goals.

China may also support authoritarian govt like USA supplying democracy. [Softs not End of History]

\$1.5 billion line of credit for infrastructure.

2008

India-Africa forum summit was organised. Roughly 40 African countries participated.

Certain healthy competition with China is good for India.

2011

→ \$5 Billion line of credit.

2014 → End of

2018 → India - Delhi → 54 countries
[40] Heads of countries

→ Here they said they will give \$4 billion line of credit

2008 - 2018 → 9.5 - 10 \$ Billion LOC

→ Decision to open new 18 embassies

out of 54 countries → 47 countries will have embassies

[But India have shortage of IFS services, rather they are going for lateral entry]

out of 18 → India have opened 8 embassies

language problem & shortage of staff

Rajn Bhargava :- It's poor implementation of

LOC → out of \$ 9.5 billion

conditionalities → 75% of project value by Indian companies

Power plant
Highways

Signed around \$ 5.2 billion. implemented

\$ 4.5 billion credit is implemented

i.e. only 50% was executed

Oil & Gas

2000

2018

Sudan & South Sudan

OWAC vessels

oil blocks & exploration

2012-2013

oil exploration in Mozambique

3.5 \$ Billion
4 \$ billion

West Africa

Crude oil

Refinery that produces petroleum products

Diesel, Petrol, lubricants

upstream
Saudi Arabia, Iran → produces crude oil

India is in down stream
i.e. petroleum products
petroleum products down stream

West Asian countries in upstream

→ So India must acquire Exploration rights & also acquire stake in the oil fields also. Saudi are in upstream they can come in India & produce. can help in downstream.

If Aramco acquires stake in Reliance. then Reliance will acquire oil from Aramco [then there is promise].

This will build Economic Interlinkages b/w India - Saudi.
leads to Economic Interdependence → This is economic diplomacy

Trade

India trade with Africa → 2001 → \$7 Billion
It is well Balanced market 2015 → \$72 Billion.
32\$ Billion are Indian Export.

37\$ Billion are African Export.
oil & gas → Agriculture products
↓
Pulses
→ Mozambique
→ Kenya.

Indian Investment → Ethiopia → India Agriculture. (10000 hectares of land)

Even Kenya → vast pieces of land.

Inc case due to climate change → India may face food security problems that may look towards Africa

→ TATA : Automobiles

→ Airtel : Telecom Sector

2029 → India - Africa → 100\$ Billion.

China - Africa trade is currently 100\$ Billion.

US- Africa Trade Relation is \$500 Billion

Way forward

Rajiv Bhadra $\div$ $\rightarrow$ India should leverage its Diaspora in South Africa, Mauritius, Uganda, Kenya.

& Engage this ~~to~~ people in various business.

$\rightarrow$ Revamp ITEC. to increase the slots & provide more options. currently there are 46 institutions they should be increased & improve direct connectivity to Africa. (No direct flights to Africa)

$\rightarrow$ Thus year only India have announced direct flight to Addis Ababa.

$\rightarrow$ Use forums like BRICS $\rightarrow$ for its African outreach.
South Africa $\rightarrow$ fastest growing country in Africa.

India must look to work with Japan to increase connect.

$\rightarrow$ we need more focus on west Africa. to get

$\hookrightarrow$ to extend line of credit to west Africa 8 countries.

(francophone countries) $\rightarrow$ They have rich resources of oil & gas. $\rightarrow$ ~~that's the secret~~

2015: (Rwanda, Kenya, Uganda, Mozambique)
African union $\rightarrow$ East African Union.

Maldives Army

drawn by India

soft power to not let them taking over (soft power).
